02208	Valerie	Dee	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents are concerned that the Local Plan does not adequately address the 7,000 objections received during the Regulation 18 consultation, with the Consultation Statement failing to accurately reflect this feedback. The housing target is criticized for being based on supply rather than actual need, particularly for Green Belt sites, which is deemed unacceptable. The exceptional circumstances for Green Belt release, especially for site RUR.02, are not well-supported, with the site being isolated, car-dependent, poorly served by public transport, and lacking amenities. Additionally, RUR.02 is located in an Archaeological Priority Area between conservation zones. The Council's approach is also faulted for not proactively exploring brownfield opportunities, relying instead on passive Calls for Sites. Moreover, the recently adopted Hadley Wood Neighbourhood Plan is not adequately incorporated into the Local Plan, diminishing the value of several policies.	No	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.

					diminishing the value of several policies.			
02267	Karthik	Chintaparthi	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents are concerned that the Local Plan neglects the feedback from the Regulation 18 consultation and fails to engage with stakeholders such as the Hadley Wood Neighbourhood Planning Forum. The 34% increase in the housing target from Regulation 18 is deemed unjustified. The Plan is criticized for not thoroughly exploring brownfield and alternative sites, opting instead for Green Belt land as an easy solution. Site RUR.02, which is car-dependent, lacks local amenities, and poses risks to heritage and biodiversity, is highlighted as unsustainable. This site scores highly on Green Belt purposes and development impact, with significant material harm noted. Additionally, key evidence supporting site allocations was developed post-decision and contains weak and contradictory arguments. The Plan also inadequately reflects the recently adopted Hadley Wood Neighbourhood Plan.	No	The Local Plan has been carefully developed to address housing needs while balancing environmental and community impacts. The increase in the housing target reflects updated projections and the necessity to meet growing demand, supported by robust evidence and strategic considerations. Although the Regulation 18 feedback is acknowledged, the Plan is designed to incorporate broader stakeholder views and statutory requirements. Site RUR.02 has been assessed comprehensively; despite its Green Belt designation and some limitations, it is deemed necessary to meet housing targets sustainably. The Council has proactively considered brownfield sites and other alternatives, and the Plan includes provisions to mitigate impacts on heritage and biodiversity. The evidence base, including recent studies and strategic frameworks, supports the Plan's approach, ensuring alignment with national policies and the objectives of the Hadley Wood Neighbourhood Plan.

Site RUR.02 has been assessed comprehensively; despite its Green Belt designation and some limitations, it is deemed necessary to meet housing targets sustainably. The Council has proactively considered brownfield sites and other alternatives, and the Plan includes provisions to mitigate impacts on heritage and biodiversity. The evidence base, including recent studies and strategic frameworks, supports the Plan's approach, ensuring alignment with national policies and the objectives of the Hadley Wood Neighbourhood Plan.	
02294	Lesley	Mackie	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents are concerned that the Local Plan neglects the feedback from the Regulation 18 consultation and fails to engage with stakeholders such as the Hadley Wood Neighbourhood Planning Forum. The 34% increase in the housing target from Regulation 18 is deemed unjustified. The Plan is criticized for not thoroughly exploring brownfield and alternative sites, opting instead for Green Belt land as an easy solution. Site RUR.02, which is car-dependent, lacks local amenities, and poses risks to heritage and biodiversity, is highlighted as unsustainable. This site scores highly on Green Belt purposes and development impact, with significant material harm noted. Additionally, key evidence supporting site allocations was developed post-decision and contains weak and contradictory arguments. The Plan also inadequately reflects the recently adopted Hadley Wood Neighbourhood Plan.	No	The Local Plan has been carefully developed to address housing needs while balancing environmental and community impacts. The increase in the housing target reflects updated projections and the necessity to meet growing demand, supported by robust evidence and strategic considerations. Although the Regulation 18 feedback is acknowledged, the Plan is designed to incorporate broader stakeholder views and statutory requirements. No	The Local Plan has been carefully developed to address housing needs while balancing environmental and community impacts. The increase in the housing target reflects updated projections and the necessity to meet growing demand, supported by robust evidence and strategic considerations. Although the Regulation 18 feedback is acknowledged, the Plan is designed to incorporate broader stakeholder views and statutory requirements. Site RUR.02 has been assessed comprehensively; despite its Green Belt designation and some limitations, it is deemed necessary to meet housing targets sustainably. The Council has proactively considered brownfield sites and other alternatives, and the Plan includes provisions to mitigate impacts on heritage and biodiversity. The evidence base, including recent studies and strategic frameworks, supports the Plan's approach, ensuring alignment with national policies and the objectives of the Hadley Wood Neighbourhood Plan.	
02391	Reena	Patel	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley	Residents are concerned that the Local Plan neglects the feedback from the Regulation 18 consultation and fails to engage with stakeholders such as the Hadley Wood Neighbourhood Planning Forum. The 34% increase in the housing target from Regulation 18 is deemed unjustified. The Plan is criticized for not thoroughly exploring brownfield and alternative sites, opting instead for Green Belt land as an easy solution. 02434	Robbi	Cockburn	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents are concerned that the Local Plan neglects the feedback from the Regulation 18 consultation and fails to engage with stakeholders such as the Hadley Wood Neighbourhood Planning Forum. The 34% increase in the housing target from Regulation 18 is deemed unjustified. The Plan is criticized for not thoroughly exploring brownfield and alternative sites, opting instead for Green Belt land as an easy solution. Site RUR.02, which is car-dependent, lacks local amenities, and poses risks to heritage and biodiversity, is highlighted as unsustainable. This site scores highly on Green Belt purposes and development impact, with significant material harm noted. Additionally, key evidence supporting site allocations was developed post-decision and contains weak and contradictory arguments. The Plan also inadequately reflects the recently adopted Hadley Wood Neighbourhood Plan.	No	The Local Plan has been carefully developed to address housing needs while balancing environmental and community impacts. The increase in the housing target reflects updated projections and the necessity to meet growing demand, supported by robust evidence and strategic considerations. Although the Regulation 18 feedback is acknowledged, the Plan is designed to incorporate broader stakeholder views and statutory requirements. Site RUR.02 has been assessed comprehensively; despite its Green Belt designation and some limitations, it is deemed necessary to meet housing targets sustainably. The Council has proactively considered brownfield sites and other alternatives, and the Plan includes provisions to mitigate impacts on heritage and biodiversity. The evidence base, including recent studies and strategic frameworks, supports the Plan's approach, ensuring alignment with national policies and the objectives of the Hadley Wood Neighbourhood Plan.

No	The Local Plan has been carefully developed to address housing needs while balancing environmental and community impacts. The increase in the housing target reflects updated projections and the necessity to meet growing demand, supported by robust evidence and strategic considerations. Although the Regulation 18 feedback is acknowledged, the Plan is designed to incorporate broader stakeholder views and statutory requirements. Site RUR.02 has been assessed comprehensively; despite its Green Belt designation and some limitations, it is deemed necessary to meet housing targets sustainably. The Council has proactively considered brownfield sites and other alternatives, and the Plan includes provisions to mitigate impacts on heritage and biodiversity. The evidence base, including recent studies and strategic frameworks, supports the Plan's approach, ensuring alignment with national policies and the objectives of the Hadley Wood Neighbourhood Plan.	
02455	Philippos	Kyriacou	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents are concerned that the Local Plan neglects the feedback from the Regulation 18 consultation and fails to engage with stakeholders such as the Hadley Wood Neighbourhood Planning Forum. The 34% increase in the housing target from Regulation 18 is deemed unjustified. The Plan is criticized for not thoroughly exploring brownfield and alternative sites, opting instead for Green Belt land as an easy solution. Site RUR.02, which is car-dependent, lacks local amenities, and poses risks to heritage and biodiversity, is highlighted as unsustainable. This site scores highly on Green Belt purposes and development impact, with significant material harm noted. Additionally, key evidence supporting site allocations was developed post-decision and contains weak and contradictory arguments. The Plan also inadequately reflects the recently adopted Hadley	No	The Local Plan has been carefully developed to address housing needs while balancing environmental and community impacts. 02590	Mo	Abba	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised several concerns about the Local Plan, particularly regarding the proposed allocation of site RUR.02. They argue that exceptional circumstances for releasing this Green Belt land have not been adequately evidenced. The site is criticized for being isolated, having poor public transport accessibility (PTAL 1), and lacking nearby amenities, contributing significantly to Green Belt purposes and potentially causing very high environmental harm. Residents are also concerned that the 34% increase in the housing target from the Regulation 18 Plan is unjustified and was implemented without proper consultation. They believe that the reliance on site capacity for housing projections after 2029, rather than actual need, is inappropriate for Green Belt release. Additionally, there is frustration over the insufficient exploration of brownfield sites and the Council's reliance on passive Calls for Sites, which does not meet the proactive approach required by national policy. The Plan also reportedly neglects feedback from the Regulation 18 consultation and the Hadley Wood Neighbourhood Plan.	No	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.

Residents are also concerned that the 34% increase in the housing target from the Regulation 18 Plan is unjustified and was implemented without proper consultation. They believe that the reliance on site capacity for housing projections after 2029, rather than actual need, is inappropriate for Green Belt release. Additionally, there is frustration over the insufficient exploration of brownfield sites and the Council's reliance on passive Calls for Sites, which does not meet the proactive approach required by national policy. The Plan also reportedly neglects feedback from the Regulation 18 consultation and the Hadley Wood Neighbourhood Plan.	No	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.	
02639	Muhammad	Ali	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised several concerns about the Local Plan, particularly regarding the proposed allocation of site RUR.02. They argue that exceptional circumstances for releasing this Green Belt land have not been adequately evidenced. The site is criticized for being isolated, having poor public transport accessibility (PTAL 1), and lacking nearby amenities, contributing significantly to Green Belt purposes and potentially causing very high environmental harm. Residents are also concerned that the 34% increase in the housing target from the Regulation 18 Plan is unjustified and was implemented without proper consultation. They believe that the reliance on site capacity for housing projections after 2029, rather than actual need, is inappropriate for Green Belt release. Additionally, there is frustration over the insufficient exploration of brownfield sites and the Council's reliance on passive Calls for Sites, which does not meet the proactive approach required by national policy. The Plan also reportedly neglects feedback from the Regulation 18 consultation and the Hadley Wood Neighbourhood Plan.		compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.	
02678	Antonio	Kounnis	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised several concerns about the Local Plan, particularly regarding the proposed allocation of site RUR.02. They argue that exceptional circumstances for releasing this Green Belt land have not been adequately evidenced. The site is criticized for being isolated, having poor public transport accessibility (PTAL 1), and lacking nearby amenities, contributing significantly to Green Belt purposes and potentially causing very high environmental harm. Residents are also concerned that the 34% increase in the housing target from the Regulation 18 Plan is unjustified and was implemented without proper consultation. They believe that the reliance on site capacity for housing projections after 2029, rather than actual need, is inappropriate for Green Belt release. Additionally, there is frustration over the insufficient exploration of brownfield sites and the Council's reliance on passive Calls for Sites, which does not meet the proactive approach required by national policy. The Plan also reportedly neglects feedback from the Regulation 18 consultation and the Hadley Wood Neighbourhood Plan.	No	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. They argue that exceptional circumstances for releasing this Green Belt land have not been adequately evidenced. The site is criticized for being isolated, having poor public transport accessibility (PTAL 1), and lacking nearby amenities, contributing significantly to Green Belt purposes and potentially causing very high environmental harm. Residents are also concerned that the 34% increase in the housing target from the Regulation 18 Plan is unjustified and was implemented without proper consultation. They believe that the reliance on site capacity for housing projections after 2029, rather than actual need, is inappropriate for Green Belt release. Additionally, there is frustration over the insufficient exploration of brownfield sites and the Council's reliance on passive Calls for Sites, which does not meet the proactive approach required by national policy. The Plan also reportedly neglects feedback from the Regulation 18 consultation and the	No	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.

02717	Nicos	Christofi	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised several concerns about the Local Plan, particularly regarding the proposed allocation of site RUR.02. They argue that exceptional circumstances for releasing this Green Belt land have not been adequately evidenced. The site is criticized for being isolated, having poor public transport accessibility (PTAL 1), and lacking nearby amenities, contributing significantly to Green Belt purposes and potentially causing very high environmental harm. Residents are also concerned that the 34% increase in the housing target from the Regulation 18 Plan is unjustified and was implemented without proper consultation. They believe that the reliance on site capacity for housing projections after 2029, rather than actual need, is inappropriate for Green Belt release. Additionally, there is frustration over the Council's reliance on passive Calls for Sites, which does not meet the proactive approach required by national policy. The Plan also reportedly neglects feedback from the Regulation 18 consultation and the Hadley Wood Neighbourhood Plan.	No	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. 02736	Louoe	Kyriacou	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised several concerns about the Local Plan, particularly regarding the proposed allocation of site RUR.02. They argue that exceptional circumstances for releasing this Green Belt land have not been adequately evidenced. The site is criticized for being isolated, having poor public transport accessibility (PTAL 1), and lacking nearby amenities, contributing significantly to Green Belt purposes and potentially causing very high environmental harm. Residents are also concerned that the 34% increase in the housing target from the Regulation 18 Plan is unjustified and was implemented without proper consultation. They believe that the reliance on site capacity for housing projections after 2029, rather than actual need, is inappropriate for Green Belt release. Additionally, there is frustration over the insufficient exploration of brownfield sites and the Council's reliance on passive Calls for Sites, which does not meet the proactive approach required by national policy. The Plan also reportedly neglects feedback from the Regulation 18 consultation and the Hadley Wood Neighbourhood Plan.	No	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.

				Crescent West, Hadley Wood	for being isolated, having poor public transport accessibility (PTAL 1), and lacking nearby amenities, contributing significantly to Green Belt purposes and potentially causing very high environmental harm. Residents are also concerned that the 34% increase in the housing target from the Regulation 18 Plan is unjustified and was implemented without proper consultation. They believe that the reliance on site capacity for housing projections after 2029, rather than actual need, is inappropriate for Green Belt release. Additionally, there is frustration over the insufficient exploration of brownfield sites and the Council's reliance on passive Calls for Sites, which does not meet the proactive approach required by national policy. The Plan also reportedly neglects feedback from the Regulation 18 consultation and the Hadley Wood Neighbourhood Plan.		sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.

Residents are also concerned that the 34% increase in the housing target from the Regulation 18 Plan is unjustified and was implemented without proper consultation. They believe that the reliance on site capacity for housing projections after 2029, rather than actual need, is inappropriate for Green Belt release. Additionally, there is frustration over the insufficient exploration of brownfield sites and the Council's reliance on passive Calls for Sites, which does not meet the proactive approach required by national policy. The Plan also reportedly neglects feedback from the Regulation 18 consultation and the Hadley Wood Neighbourhood Plan.	No	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.	
02777	Nitin	Kotecha	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised several concerns about the Local Plan, particularly regarding the proposed allocation of site RUR.02. They argue that exceptional circumstances for releasing this Green Belt land have not been adequately evidenced. The site is criticized for being isolated, having poor public transport accessibility (PTAL 1), and lacking nearby amenities, contributing significantly to Green Belt purposes and potentially causing very high environmental harm. Residents are also concerned that the 34% increase in the housing target from the Regulation 18 Plan is unjustified and was implemented without proper consultation. They believe that the reliance on site capacity for housing projections after 2029, rather than actual need, is inappropriate for Green Belt release. 02816	Lee	Pittal	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised several concerns about the Local Plan, particularly regarding the proposed allocation of site RUR.02. They argue that exceptional circumstances for releasing this Green Belt land have not been adequately evidenced. The site is criticized for being isolated, having poor public transport accessibility (PTAL 1), and lacking nearby amenities, contributing significantly to Green Belt purposes and potentially causing very high environmental harm. Residents are also concerned that the 34% increase in the housing target from the Regulation 18 Plan is unjustified and was implemented without proper consultation. They believe that the reliance on site capacity for housing projections after 2029, rather than actual need, is inappropriate for Green Belt release. Additionally, there is frustration over the insufficient exploration of brownfield sites and the Council's reliance on passive Calls for Sites, which does not meet the proactive approach required by national policy. The Plan also reportedly neglects feedback from the Regulation 18 consultation and the Hadley Wood Neighbourhood Plan.	No	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.

02820	Penny	Panayi	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	<p>Residents have expressed significant concerns regarding the Local Plan, particularly the 34% increase in the housing target, which was introduced without proper consultation and is based on sites proposed by developers rather than established housing needs. They argue that this approach is fundamentally flawed for determining Green Belt releases. The Council's reliance on passive Calls for Sites rather than proactively seeking all available brownfield sites is criticized, with residents pointing out that the Hadley Wood Neighbourhood Planning Forum (HWNPF) has indicated that there is no necessity to use Green Belt land. The exceptional circumstances for releasing site RUR.02 from the Green Belt are deemed insufficiently evidenced, overlooking the site's strong contribution to Green Belt purposes and potential harm to heritage assets and biodiversity. Residents highlight that the site is isolated, car-dependent (PTAL 1b), and lacks nearby amenities, making it an unsuitable development location. They also note that decisions regarding Green Belt releases were made before relevant evidence was compiled and that the Council has ignored over 7,000 objections from the Regulation 18 consultation as well as the policies and aspirations of the Hadley Wood Neighbourhood Plan.</p>	No	<p>The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. 02843	Sonya	Shah	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	<p>Residents have expressed significant concerns regarding the Local Plan, particularly the 34% increase in the housing target, which was introduced without proper consultation and is based on sites proposed by developers rather than established housing needs. They argue that this approach is fundamentally flawed for determining Green Belt releases. The Council's reliance on passive Calls for Sites rather than proactively seeking all available brownfield sites is criticized, with residents pointing out that the Hadley Wood Neighbourhood Planning Forum (HWNPF) has indicated that there is no necessity to use Green Belt land. The exceptional circumstances for releasing site RUR.02 from the Green Belt are deemed insufficiently evidenced, overlooking the site's strong contribution to Green Belt purposes and potential harm to heritage assets and biodiversity. Residents highlight that the site is isolated, car-dependent (PTAL 1b), and lacks nearby amenities, making it an unsuitable development location. They also note that decisions regarding Green Belt releases were made before relevant evidence was compiled and that the Council has ignored over 7,000 objections from the Regulation 18 consultation as well as the policies and aspirations of the Hadley Wood Neighbourhood Plan.</p>	No	<p>The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. They argue that the exceptional circumstances for releasing site RUR.02 from the Green Belt are inadequately evidenced and flawed, citing its isolation, poor public transport, limited amenities, car-dependency, and proximity to heritage assets and important biodiversity areas. The Council's failure to fully explore brownfield sites, as required by the NPPF, and its lack of planned infrastructure improvements for Hadley Wood are also criticized. Additionally, residents contend that the Council has ignored substantial Regulation 18 feedback and the Hadley Wood Neighbourhood Planning Forum's input, rendering the allocation of RUR.02 unsound and necessitating several modifications as outlined by the Forum.	No	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.

The Council's failure to fully explore brownfield sites, as required by the NPPF, and its lack of planned infrastructure improvements for Hadley Wood are also criticized. Additionally, residents contend that the Council has ignored substantial Regulation 18 feedback and the Hadley Wood Neighbourhood Planning Forum's input, rendering the allocation of RUR.02 unsound and necessitating several modifications as outlined by the Forum.	No	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.	
02876	Gaynor	Nye-Matthew	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised concerns that the Local Plan was developed with Green Belt release decisions made before supporting evidence was completed, as seen in the early identification of such sites in the 2021 Reg.18 consultation, while the relevant Topic Papers were only produced in 2023/24. They argue that the exceptional circumstances for releasing site RUR.02 from the Green Belt are inadequately evidenced and flawed, citing its isolation, poor public transport, limited amenities, car-dependency, and proximity to heritage assets and important biodiversity areas. The Council's failure to fully explore brownfield sites, as required by the NPPF, and its lack of planned infrastructure improvements for Hadley Wood are also criticized. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.	
02998	Joseph	Reilly	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised concerns that the Local Plan was developed with Green Belt release decisions made before supporting evidence was completed, as seen in the early identification of such sites in the 2021 Reg.18 consultation, while the relevant Topic Papers were only produced in 2023/24. They argue that the exceptional circumstances for releasing site RUR.02 from the Green Belt are inadequately evidenced and flawed, citing its isolation, poor public transport, limited amenities, car-dependency, and proximity to heritage assets and important biodiversity areas. The Council's failure to fully explore brownfield sites, as required by the NPPF, and its lack of planned infrastructure improvements for Hadley Wood are also criticized. Additionally, residents contend that the Council has ignored substantial Regulation 18 feedback and the Hadley Wood Neighbourhood Planning Forum's input, rendering the allocation of RUR.02 unsound and necessitating several modifications as outlined by the Forum.	No	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.

The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.	
03019	Chris	Hall	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised concerns that the Local Plan was developed with Green Belt release decisions made before supporting evidence was completed, as seen in the early identification of such sites in the 2021 Reg.18 consultation, while the relevant Topic Papers were only produced in 2023/24. They argue that the exceptional circumstances for releasing site RUR.02 from the Green Belt are inadequately evidenced and flawed, citing its isolation, poor public transport, limited amenities, car-dependency, and proximity to heritage assets and important biodiversity areas. The Council's failure to fully explore brownfield sites, as required by the NPPF, and its lack of planned infrastructure improvements for Hadley Wood are also criticized. Additionally, residents contend that the Council has ignored substantial Regulation 18 feedback and the Hadley Wood Neighbourhood Planning Forum's input, rendering the allocation of RUR.02 unsound and necessitating several modifications as outlined by the Forum.	No	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.

They argue that the exceptional circumstances for releasing site RUR.02 from the Green Belt are inadequately evidenced and flawed, citing its isolation, poor public transport, limited amenities, car-dependency, and proximity to heritage assets and important biodiversity areas. The Council's failure to fully explore brownfield sites, as required by the NPPF, and its lack of planned infrastructure improvements for Hadley Wood are also criticized. Additionally, residents contend that the Council has ignored substantial Regulation 18 feedback and the Hadley Wood Neighbourhood Planning Forum's input, rendering the allocation of RUR.02 unsound and necessitating several modifications as outlined by the Forum.	No	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.	
03060	vincenzo	toro	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised concerns that the Local Plan was developed with Green Belt release decisions made before supporting evidence was completed, as seen in the early identification of such sites in the 2021 Reg.18 consultation, while the relevant Topic Papers were only produced in 2023/24. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024.

03119	Tommy	Gallagher	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.

The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024.

					inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.		prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
03159	Russell	Harlow	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.

The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
03199	Sikin	Velji	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan

No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
03342	Andrew	ARESTI	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
03362	Jane	Mari	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. 					inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.		prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
03512	Howard	Daitz	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.

Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
03532	Max	Johnson	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.

Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
03572			SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan

The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
03668			SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. 03869	Ales	Lipensky	SP SS1: Spatial strategy		<p>Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.</p>	No	<p>The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.</p>

The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.

There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
03954	Shirryn	Anvar	SP SS1: Spatial strategy		Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.
