04105	Katie	Gallagher	SP SS1: Spatial strategy		<p>Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.</p>	No	<p>The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.</p>

Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
04128	Toulla	Toms	SP SS1: Spatial strategy		Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only. 					brownfield sites only.			
04169	Laurence	Pearl	SP SS1: Spatial strategy		Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.

The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
04460	Martina	Bartek	SP SS1: Spatial strategy		Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.</p>	
04522	Alice White		SP SS1: Spatial strategy		<p>Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.</p>	No	<p>The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.</p>

					inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.		prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
04543	Shirin Jetha	Dagseven	SP SS1: Spatial strategy		Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.

The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
04712	Charlotte	Hornung	SP SS1: Spatial strategy		Residents argue that the Enfield Local Plan is not legally compliant or sound. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
04754	Zuriye	Kemal	SP SS1: Spatial strategy		Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. 					inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.		prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
04776	M	Bourke	SP SS1: Spatial strategy		Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.

04904	Elena	Halepas	SP SS1: Spatial strategy		<p>Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.</p>	No	<p>The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.</p>

					inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.		prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
04925	Miranda	Sutters	SP SS1: Spatial strategy		Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.

The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.</p>	
04988	Agatha	Koko	SP SS1: Spatial strategy		<p>Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.</p>	No	<p>The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. 05148	Kyan	Tomordy	SP SS1: Spatial strategy		Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.	No	The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.

The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.	
05169	Dan	Healy	SP SS1: Spatial strategy		Residents argue that the Enfield Local Plan is not legally compliant or sound. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.</p>	
05190	Maurice	Gould	SP SS1: Spatial strategy		<p>Residents argue that the Enfield Local Plan is not legally compliant or sound. They claim that the plan's policies and site assessments are spread across almost 300 inconsistent documents. The Council has not adequately considered Regulation 18 consultation responses, particularly from the Hadley Wood Neighbourhood Planning Forum. The housing target increased by 33% since the consultation, based on sites proposed by owners rather than actual need, which is especially problematic for Green Belt sites. Exceptional circumstances for Green Belt release, particularly for site RUR.02, are not evidenced. The site is unsuitable for sustainable development and has several formal designations making development inappropriate. There is no evidence that all available alternative/brownfield sites have been fully explored, and Paragraph 2 of Policy H4 is inconsistent with London Plan Policy H1, needing restriction to brownfield sites only.</p>	No	<p>The Enfield Local Plan is both sound and legally compliant, developed from comprehensive and up-to-date evidence contained in the council's planning evidence base. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. The extensive documentation ensures a robust framework for sustainable development, despite the volume of documents. The Plan considers Regulation 18 consultation responses and aligns with the Hadley Wood Neighbourhood Plan. The 33% increase in the housing target reflects a realistic assessment to meet future needs, supported by the Enfield Housing Topic Paper 2024. Exceptional circumstances for Green Belt releases, including site RUR.02, are justified in the Exceptional Circumstances Topic Paper, ensuring alignment with national policies and community needs. The Plan prioritizes brownfield site development, adhering to NPPF para 125, and includes targeted infrastructure improvements to support sustainable growth.

00115	Andrew	Ayiy	SP PL1: Enfield Town	SA1.4: Enfield Civic Centre	<p>Residents express agreement with the consolidation of council departments at the Enfield Civic Centre to maximize building usage and reduce costs but strongly disagree with the proposal to incorporate high-rise domestic dwellings. They oppose high-rise buildings and any reduction of green space in the borough, advocating for the use of brownfield sites instead of green belt land to meet development needs. Their concerns emphasize maintaining the character of the area and preserving existing green spaces.</p>	No	<p>Comments noted. The Local Plan aims to maximize the efficiency of the Enfield Civic Centre by consolidating council departments, thereby reducing operating costs and enhancing service delivery. While the inclusion of domestic dwellings, particularly high-rise buildings, has raised concerns, this approach is intended to meet housing demand within the borough efficiently. The plan prioritizes the use of brownfield sites to preserve green spaces and minimize environmental impact, aligning with sustainable development goals and ensuring the protection of the borough's green belt.</p>

00279	Stephen	Evans	SP PL1: Enfield Town	SA1.1: Palace Gardens Shopping Centre	Residents feel that more consultation is needed regarding the proposals for floorspace above commercial premises. They express that the current process involves an overwhelming amount of information, making it too complex for most people to effectively scrutinize and engage with the plans.	No	Comments noted. The Local Plan consultation process is designed to be inclusive, utilizing various platforms such as online documents, community libraries, and public notices to inform and engage residents. The consultation process includes clear instructions on how to make representations and emphasizes the importance of public input, ensuring that residents can contribute their views effectively. Additionally, support is available for those who need assistance with the consultation materials, ensuring that all community members can participate meaningfully. These measures aim to simplify the consultation process and enhance community engagement, addressing concerns about the complexity and accessibility of the provided information.	
00750	Peter	McWilliams	SP PL1: Enfield Town	SA1.1: Palace Gardens Shopping Centre	Residents object to the inclusion of SA1.1: Palace Gardens Shopping Centre.	No	Comments noted. The council aims to ensure that any development at Palace Gardens Shopping Centre will foster economic growth, improve public spaces, and maintain the historic and aesthetic value of Enfield Town. The council's spatial strategy emphasizes sustainable development that enhances the vitality and viability of town centers while preserving their character and heritage. The Site Allocation Topic Paper highlights the importance of integrating new developments in a way that complements the existing urban fabric and supports the needs of the community.	
03726	bernadette	lappage	SP PL1: Enfield Town		The proposal to allow tall buildings in Enfield Town is seen as unsound, failing to preserve the town's unique identity and historic character. It suggests constructing high-rise buildings up to 14 storeys, which starkly contrasts with the current 4-5 storey structures, and uses outdated justifications such as marking locations with tall buildings. Additionally, the plan to build over 1,000 new homes would remove essential amenities like the Tesco on Southbury Road and St Anne's Catholic High School, exacerbating infrastructure deficits and forcing residents to travel further for services. Finally, the proposal implies further traffic restrictions, which could worsen congestion at key junctions like the A110 and A105, contradicting the aim of enhancing economic vibrancy. This plan does not meet the National Planning Policy Framework (NPPF) soundness test due to these significant flaws.		The Enfield Local Plan is both sound and legally compliant, having been developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. The Site Allocation Topic Paper addresses traffic concerns by incorporating comprehensive impact assessments and proposed improvements to infrastructure, including key junctions, to manage increased traffic from new developments. It also emphasizes enhancing public transport and active travel to mitigate car reliance. Regarding housing, the plan justifies Green Belt releases by prioritizing brownfield sites and demonstrating exceptional circumstances for necessary Green Belt allocations, with rigorous assessments to minimize environmental and historical impacts. The Meridian Water development is maximized as part of the housing strategy, balancing growth with sustainability and preservation.

00429	Aron	Rolle	SP PL8: Palmers Green	SA8.2: Lodge Drive Car Park	Residents object to the development of tall buildings based on outdated housing need figures derived from 2014 population projections, which are significantly overstated compared to the latest 2021 census data and projections for Enfield. The actual population has decreased in recent years, and the GLA's projections show an increase of only about 10,000 people from 2021 to 2041, versus the 51,000 stated in the Enfield Local Plan (ELP). This overestimation leads to an inflated housing need figure of around 34,000 homes. Residents argue that using more relevant and recent data would provide a more accurate housing need figure, potentially negating the necessity for tall buildings and high-density housing. They also express concerns that proposed tall buildings around Southgate Circus, with heights up to 30 meters, are unsympathetic to the area's character and will impact privacy by overlooking gardens, thus negatively changing the area's character.	No	Comments noted. The "Spatial Strategy and Overall Approach" document sets out the council's commitment to using the most relevant and up-to-date data for planning decisions. The Enfield Housing Topic Paper 2024 highlights the use of recent census data and GLA projections to determine housing needs more accurately. This approach ensures that housing targets are based on realistic population growth figures, thereby potentially reducing the need for high-density developments and tall buildings that could negatively impact the character and privacy of existing neighborhoods.

					to effectively challenge the plan.			
01714	Michael	Clary	SP PL8: Palmer's Green		Residents express concerns that using the Morrisons store and Lodge Drive car park for housing, though consistent with promoting active travel (policy T1), could lead to unintended consequences. Specifically, it may force people to drive further for their "weekly shop" to locations with better parking, undermining the viability of the replacement store and the entire shopping center. This shift could detract from the local area's economic health and contradict the plan's sustainable travel goals.		The concerns about using the Morrisons store and Lodge Drive car park for housing, while aligning with the promotion of active travel in policy T1, are justified in the Site Allocation Topic Paper for Regulation 19. The paper emphasizes the importance of balancing new housing development with maintaining essential community services and infrastructure (section 4.1). Reducing parking availability could lead residents to drive further for their weekly shopping, undermining the viability of the replacement store and the shopping center as a whole. This would contradict the plan's goals of reducing car dependency and supporting local economic health, highlighting the need for a more integrated approach that considers both housing and commercial needs.	
04801	Alison	Rolle	SP PL8: Palmer's Green	SA8.2: Lodge Drive Car Park	Residents object to the development of tall buildings based on outdated housing need figures derived from 2014 population projections, which are significantly overstated compared to the latest 2021 census data and projections for Enfield. 00008	Janet	Malone	SP PL 10: Chase Park		The Trent Park Residents Association objects to the proposed developments at Vicarage Farm and the Trent Park Equestrian Centre on legal compliance grounds, arguing they are not 'sound' or in conformity with the London Plan and should be removed from the Local Plan. The objections include concerns that the developments would harm the historic setting of Enfield's Green Belt, disrupt key entrance points, strategic views, and the rural backdrop, damage the visual connection between Trent Park and the former Enfield Chase, urbanize popular pedestrian gateways, and encourage more car use due to poor public transport connectivity. Additionally, the developments would harm the tranquility of areas like Williams Wood, negatively impact the Metropolitan Site of Importance for Nature Conservation, and result in the loss of the Trent Park Equestrian Centre, which holds historical and mental health value.	No	Comments noted. The Council is committed to sustainable development that respects our heritage and environment, as supported by its Site Allocation Topic Paper and Spatial Strategy and Overall Approach Topic Paper. These documents emphasize addressing housing shortages, promoting sustainable growth, and enhancing community infrastructure while protecting significant landscapes and biodiversity. Measures will be taken to minimize impacts on pedestrian gateways and tranquility, and efforts will be made to improve public transport connectivity and integrate green spaces and biodiversity enhancements. Regarding the equestrian centre, the council recognizes its value and are exploring options to preserve and enhance these facilities. The council is committed to ongoing engagement with stakeholders to address concerns and refine our plans to achieve the best outcomes for the community.	
00008	Janet	Malone	SP PL 10: Chase Park		Residents object to Policy PL10 due to concerns about its impact on local traffic, inadequate infrastructure, overcrowded schools, and increased air pollution. They argue that the proposed development will exacerbate traffic congestion and strain existing infrastructure, including roads and public services. Additionally, they highlight the lack of capacity in local schools, which would lead to further overcrowding. The increase in car usage due to insufficient public transport options will contribute to higher air pollution levels, negatively affecting the community's health and	No	Comments noted. Policy PL10 is sound, addressing concerns about local traffic, infrastructure, school overcrowding, and air pollution through comprehensive planning and mitigation strategies. The Chase Park Topic Paper outlines measures to manage traffic impact and enhance infrastructure, ensuring developments are supported by necessary public services. The Infrastructure Planning Evidence Base details plans for upgrading local infrastructure and public amenities, including schools and transportation, to accommodate growth while minimizing

00011	Leland	Lewis	SP PL10: Chase Park		<p>Residents recognize the need for more housing in Enfield, especially social and affordable housing, but argue there are sufficient non-Green Belt areas for development. They express concern that the development will destroy the semi-rural nature of the Green Belt and the visual transition from residential areas to the Enfield Chase Area of Special Character and Trent Park Conservation Area. They oppose the</p>	No	<p>Comments noted. Policy PL10 is sound, balancing housing needs with environmental and historical preservation. The Chase Park Topic Paper details measures to protect the Green Belt's semi-rural nature, ensuring development respects the Enfield Chase Area of Special Character and Trent Park Conservation Area. It addresses concerns about visual impact, shop occupancy, and road layout by planning sustainable, community-friendly developments.</p>	

Rep ID	First Name	Last Name	Policy Number	site allocation reference	Summary of Response	Potential to change the plan	Council Response	LINKS
					construction of 5-storey blocks with shops, citing the presence of many unoccupied shops across the borough, potential car dominance, and a negative impact on local jobs and the area's unique character. They also highlight that the proposed road layout would be unsuitable for walking, cycling, and disabled access, fundamentally altering Oakwood's demographic and character.		The policy aligns with preserving local character while meeting housing demands through thoughtful, strategic planning.	
00032	Loukia	Monachello	SP PL 10: Chase Park		Residents are concerned that this plan will destroy important historical Greenbelt land, increase road traffic and pollution, and cause road congestion. They object to the plan, emphasizing the need to protect and preserve this valuable countryside.	No	Comments noted. The Council has carefully planned these developments to ensure they align with sustainable growth and environmental protection principles. The Plan includes measures to mitigate traffic and pollution, promote sustainable transport, and preserve the integrity of the Greenbelt. The Site Allocation Topic Paper highlights the comprehensive approach taken to balance housing needs with environmental preservation. Moreover, the Exceptional Circumstances Topic Paper justifies the careful selection of sites for development, ensuring that historical and valuable countryside areas are protected. The Council remains committed to ongoing engagement with the community to address concerns and refine plans to achieve the best outcomes for all stakeholders.	
00032	Loukia	Monachello	SP PL 10: Chase Park		Residents object to the PL10 plan due to the loss of historical Green Belt land, which is part of the historic Enfield Chase and should be preserved for future generations. They argue that the development will harm the character of Enfield by removing countryside and semi-rural areas, leading to increased car usage and pollution due to urbanization.	No	Comments noted. The justification for the PL10 policy is sound based on the following points outlined in the Enfield Local Plan's extensive evidence base documents: Housing Need: The Exceptional Circumstances Topic Paper outlines that the housing need in Enfield cannot be met without developing some Green Belt land due to the severe shortage of developable land within urban areas. The projected population growth requires additional housing to prevent worsening housing shortages and affordability issues. Environmental and Strategic Considerations: The spatial strategy emphasizes sustainable development, aiming to balance growth with the protection of key environmental assets. It identifies specific Green Belt areas that, if developed, would provide the least harm while still addressing urgent housing needs. Policy and Planning Compliance: The proposed development complies with the National Planning Policy Framework (NPPF) requirements, which allow for Green Belt development in exceptional circumstances. The detailed analysis within the documents justifies the need for this policy shift to ensure Enfield can sustainably meet its housing targets while maintaining key environmental protections where possible. The council's approach has been to carefully select areas where development can

00063	Hulya	Murat	SP PL10: Chase Park		<p>The resident strongly objects to the proposed development on Chase Park and Chase Farm Hospital site, emphasizing that their recent property purchase was based on the surrounding beautiful countryside, which they consider a sanctuary. They criticize Enfield Council's vision as blind and careless, highlighting the importance of preserving the Green Belt for mental well-being and to protect nature and the area's character. The resident accuses the council of making thoughtless decisions reminiscent of the regrettable concrete developments of the 60s and 70s. They object to high-rise buildings, the destruction of nature walks, historical landscapes, increased pollution, and the loss of Enfield's remaining natural beauty.</p>	No	<p>Comments noted. The Council recognizes the importance of preserving the natural beauty and character of its Green Belt areas. The proposals have been carefully considered and guided by the principles outlined in Enfield's Spatial Strategy and Overall Approach Topic Paper and the Site Allocation Topic Paper, which emphasize sustainable growth and the protection of significant landscapes. The council aims to balance the need for new housing with the preservation of its natural environment, ensuring that any development includes measures to protect and enhance green spaces, improve infrastructure, and minimize environmental impact.</p>	
00089	Graham	Bray	SP PL10: Chase Park		<p>Residents express strong opposition to the proposed development on Greenbelt land under Policy PL10, emphasizing the significant damage it would cause to the area's character and identity. They highlight the risk to the rural landscapes and semi-rural features of the Enfield Chase Area of Special Character, which is recognized in the current Development Plan. Concerns include the loss of historic scenery in Enfield Chase, the urbanization of Merryhills Way, a popular public right of way, and the threat to conservation efforts at the Trent Park Equestrian Centre. Additionally, residents fear the development will lead to car dependency due to minimal local employment opportunities and challenging cycling conditions, further urbanizing views from footpaths along Williams Wood, Shaws Wood, and the London Loop. They argue that the development undermines the preservation of greenbelt land and call for the protection of these valuable landscapes.</p>	No	<p>Comments noted. The ELP Spatial Strategy and Overall Approach Topic Paper emphasizes the preservation of the area's character and identity, prioritizing the protection of greenbelt land and semi-rural features. The Chase Park Topic Paper outlines measures to maintain the historical and ecological value of Enfield Chase, ensuring that public rights of way like Merryhills Way remain accessible and scenic. Additionally, the plan includes strategies to enhance public transport and infrastructure, aiming to reduce car dependency and integrate the development harmoniously into the existing landscape (Enfield Council). These comprehensive approaches aim to balance development needs with the preservation of the area's unique ecological, historical, and cultural values.</p>	
00091	Robert	Page	SP PL10: Chase Park		<p>The resident considers the draft plan unsound for two main reasons:</p> <ol style="list-style-type: none"> 1. Number of New Homes Required: The proposed number of new homes is excessive and would overburden social infrastructure, including transport, health, and education services. Additionally, the need for these new homes is questionable as school 	No	<p>Comments noted. 1) Number of New Homes Required: The Council has carefully considered the housing target in line with the projected needs of the borough. The Site Allocation Topic Paper and Spatial Strategy and Overall Approach Topic Paper provide evidence supporting the requirement for new homes to address current and future housing needs. The council is committed to ensuring that social infrastructure, such as transport, health, and</p>

					enrollments in Enfield are declining and many residents are moving away from London post-Covid to work remotely. 2. Building on the Green Belt: Proposing developments on Green Belt land contradicts Enfield's Climate Action Plan, which emphasizes maintaining and enhancing the Green Belt for biodiversity, carbon offsetting, and promoting low-carbon living. Specifically, the Chase Park proposal is problematic due to its distance from public transport hubs, making it a car-dependent development that would increase carbon emissions. It would be more sustainable to develop housing near public transport hubs on brownfield sites, even if it means constructing higher-rise buildings.		education services, is developed in tandem with new housing to prevent undue strain. Additionally, while there have been changes in residency patterns post-Covid, the overall housing demand remains significant. 2) Building on the Green Belt: The exceptional circumstances for releasing Green Belt land have been thoroughly evidenced, as detailed in our Exceptional Circumstances Topic Paper. Enfield's Climate Action Plan does prioritize the enhancement of the Green Belt for biodiversity and carbon offsetting. However, to meet housing needs sustainably, a balance must be struck. Developments, including those in Chase Park, are planned with careful consideration of their environmental impact and proximity to public transport. Efforts will be made to enhance public transport links and minimize car dependency. Where possible, brownfield sites are prioritized, but some Green Belt sites are necessary to meet the borough's comprehensive housing and infrastructure needs.	
00092	Tilak	Divani	SP PL10: Chase Park		Residents object to Policy PL10 due to the high level of harm to the area's character and identity from the loss of countryside and semi-rural nature. They emphasize the Green Belt's designation as an Enfield Chase Area of Special Character and express concern over losing a significant part of the historic Enfield Chase landscape. They highlight the urbanization of Merryhills Way and countryside views from footpaths, the impact on Trent Park Conservation Area, and the potential for car-dominated development with few local jobs and challenging cycling conditions.	No	Comments noted. Policy PL10 is sound and addresses residents' concerns by carefully balancing development with the preservation of the area's character and historical significance. The Chase Park Topic Paper outlines strategies to protect the Green Belt's semi-rural nature, maintain Enfield Chase's historic landscape, and prevent urbanization impacts on Merryhills Way. Trent Park Conservation Area, and surrounding footpaths. Measures are included to minimize car dependency and promote sustainable transport, ensuring the area's character and identity are preserved while meeting housing needs.	
00093	Colin	Woodley	SP PL10: Chase Park		Residents object to Policy PL10, highlighting the historical and environmental significance of the Green Belt, which protects an area of special character. They argue that the plan will ruin the countryside feel, lead to urban sprawl, and result in the loss of Merryhills Way and the Trent Park Equestrian Centre. Concerns include inadequate assessment of increased car journeys, low cycling uptake due to hilly terrain, and additional traffic strain on already busy roads, especially during peak times.	No	Comments noted. Policy PL10 is sound, addressing concerns about the preservation of the Green Belt and minimizing urban sprawl. The Chase Park Topic Paper outlines measures to protect the area's special character, including Merryhills Way and the Trent Park Equestrian Centre. It provides strategies to manage increased car journeys and traffic, promote sustainable transport, and ensure the countryside feel is maintained while meeting housing needs. The policy aligns with sustainable development principles, preserving both the environment and community heritage.	
00103	Danny	Yang	SP PL10:		Residents express strong opposition to the proposed changes, citing threats to the rural character and	No	Comments noted. Policy PL10 is sound, balancing development with the preservation of Enfield's character	

Rep ID	First Name	Last Name	Policy Number	site allocation reference	Summary of Response	Potential to change the plan	Council Response	LINKS
			Chase Park		identity of the area. They are concerned about the jeopardy posed to designated Green Belt lands like the Enfield Chase Area of Special Character and the erasure of significant historical landscapes. Urbanization plans for Merryhills Way and nearby footpaths risk severing access to pristine countryside, while developments at the Equestrian Centre threaten Trent Park's conservation efforts. Picturesque views near Williams Wood and Shaws Wood are at risk, and the dominance of cars, limited job opportunities, and challenging cycling terrain exacerbate the impact. The urbanization agenda also endangers the scenic beauty of the London Loop footpath, highlighting broader transformational challenges.		and historical landscapes. The Chase Park Topic Paper outlines measures to protect the Enfield Chase Area of Special Character, including maintaining access to the countryside via Merryhills Way and nearby footpaths. It addresses concerns about urbanization impacts on Trent Park's conservation efforts and picturesque views near Williams Wood and Shaws Wood. Strategies to manage traffic, enhance sustainable transport, and ensure local employment opportunities are integrated to mitigate potential negative impacts.	
00119	Wenling	Li	SP PL10: Chase Park		Residents express strong opposition to the proposed changes, citing threats to the rural character and identity of the area. They are concerned about the jeopardy posed to designated Green Belt lands like the Enfield Chase Area of Special Character and the erasure of significant historical landscapes. Urbanization plans for Merryhills Way and nearby footpaths risk severing access to pristine countryside, while developments at the Equestrian Centre threaten Trent Park's conservation efforts. Picturesque views near Williams Wood and Shaws Wood are at risk, and the dominance of cars, limited job opportunities, and challenging cycling terrain exacerbate the impact. The urbanization agenda also endangers the scenic beauty of the London Loop footpath, highlighting broader transformational challenges.	No	Comments noted. The Council is committed to preserving the rural character and historical landscapes that define the area. As outlined in the Chase Park Topic Paper (2024), the development strategy includes stringent measures to protect designated Green Belt lands, maintain access to green spaces, and enhance biodiversity through green corridors and conservation efforts. The plans have been carefully designed to balance development with the preservation of scenic views and recreational footpaths, such as Merryhills Way and the London Loop. The Council is investing in sustainable infrastructure improvements to promote cycling and walking, aiming to reduce car dependency and mitigate the impact on local transport networks. The development at the Equestrian Centre will incorporate conservation principles to protect Trent Park and its surroundings. Additionally, new employment opportunities are being integrated into the development plans to support the local economy and provide meaningful work for residents.	
00127	QPbmCRV M	QPbmCRV M	SP PL10: Chase Park		Residents oppose Policy PL10 and considers it should be deleted.	No	Comments noted. Policy PL10 is sound, addressing residents' concerns while promoting sustainable development. The ELP Spatial Strategy and Overall Approach Topic Paper emphasizes strategic growth, protecting Enfield's historical and natural assets. It ensures balanced development, integrating green spaces and infrastructure improvements to manage traffic and pollution. The policy aligns with broader objectives to meet housing needs responsibly, safeguarding the area's character and environment while enhancing community well-being.	

Rep ID	First Name	Last Name	Policy Number	site allocation reference	Summary of Response	Potential to change the plan	Council Response	LINKS
00128	Rosalind	Sawyer	SP PL10: Chase Park		Residents oppose the proposed plans, arguing they will damage the semi-rural character of the area by reducing open spaces. They highlight that the pleasant vistas across Enfield Chase, viewed from footpaths near Williams Wood and Shaws Wood, will be replaced by unsightly urban landscapes. The plans would result in the loss of a valuable and historically significant part of Enfield Chase's landscape. Additionally, the changes proposed for the Equestrian Centre could significantly harm Trent Park, a conservation area.	No	Comments noted. The Chase Park Topic Paper sets out the Council's commitment to ensuring that any development is sensitively integrated with the existing landscape and historical context of Enfield Chase. Measures are being put in place to protect key views and the unique character of the area, ensuring that new developments enhance rather than detract from the local environment. The Crews Hill Topic Paper outlines that proposed developments will include significant green infrastructure and open space provisions to maintain the area's ecological and recreational value. These plans are designed to balance development needs with the preservation of Enfield's historical and natural landscapes, aiming to create a sustainable and integrated community that respects its environmental heritage.	
00130	Stuart	Phillips	SP PL10: Chase Park		Residents want policy PL10 to be deleted from the plan.	No	Comments noted. The Chase Park Topic Paper 2024 outlines that the development plans have been carefully considered to balance growth with environmental preservation. The document highlights measures to protect mature trees and hedgerows, integrate green spaces, and enhance biodiversity. The proposed developments include sustainable transport solutions to mitigate traffic increases and ensure accessibility. Furthermore, the plan aims to support and potentially relocate local businesses, preserving employment and maintaining Crews Hill's commercial vitality.	
00132	Jean	Connolly	SP PL10: Chase Park		Residents oppose Policy PL10, citing the irreversible loss of countryside vital for future generations' physical and mental health. They emphasize Enfield Chase's historical significance, which would be compromised by urbanization. Concerns include the loss of the public right of way at Merryhills, transforming it from a country footpath to an urban path, and the disappearance of scenic country views across farmland.	No	Comments noted. Policy PL10 is sound, as it balances development with the preservation of Enfield's historical and natural landscapes. The Chase Park Topic Paper details measures to protect the historical significance of Enfield Chase and maintain public access to green spaces, such as the Merryhills Way footpath. Strategies are in place to minimize the impact on countryside views and ensure that future generations can continue to enjoy these areas, promoting physical and mental well-being.	
00139	Anita	patel	SP PL10: Chase Park		Residents are concerned about the proposed development, citing the loss of Green Belt land, over congestion, loss of wildlife, inadequate drainage, and increased pollution from both noise and traffic.	No	Comments noted. The Chase Park Topic Paper outlines a comprehensive plan to address these issues through sustainable development strategies. The development will include extensive green infrastructure to mitigate the loss of natural habitats, measures to manage congestion and improve transport infrastructure, and initiatives to enhance drainage and reduce pollution. The plan emphasizes preserving the area's character while providing much-

00141	Maria	Bonorchis	SP PL 10: Chase Park		Residents are concerned that the proposed developments will erode the unique character and semi-rural charm of the area, particularly threatening the Green Belt countryside and the Enfield Chase Area of Special Character. They fear the loss of historical landscapes and the urbanization of Merryhills Way, which was intended to provide access to pristine countryside. The development at the Equestrian Centre is seen as a threat to the Trent Park Conservation Area. Additionally, residents worry that urbanizing views across Enfield Chase from various footpaths will further diminish the area's natural beauty, and that the area will become increasingly car-dependent.	No	Comments noted. The Chase Park Topic Paper outlines the rigorous assessments and strategic planning involved to ensure that development is balanced with the need to protect and enhance the environment. The plan includes measures to integrate green spaces, maintain public rights of way, and ensure any new developments are designed to complement the existing landscape and heritage assets. The council is committed to maintaining the semi-rural charm and accessibility of Enfield Chase while meeting housing needs sustainably.	
00142	BARBARA	COOPER	SP PL 10: Chase Park		The resident objects to the proposed construction of 3,755 houses on Green Belt land, citing concerns about increased pollution and traffic in an already busy area. They emphasize the limited Green Belt area in Enfield and its importance for wildlife habitat, air purification, and overall environmental health. The resident references statements by Michael Gove and the Mayor of London, noting that Green Belt should not be developed if brownfield sites are available, which they assert are present.	No	Comments noted. The Chase Park Topic Paper addresses these issues by emphasizing the council's commitment to sustainable development and environmental preservation. The council recognizes the importance of Green Belt land for wildlife habitats, air purification, and maintaining the area's natural beauty. The development strategy prioritizes the use of brownfield sites whenever possible, aligning with the statements by Michael Gove and the Mayor of London. However, in instances where development on Green Belt land is considered, it is done with rigorous assessments and sustainability measures in place. Traffic and pollution concerns are taken seriously, with plans to improve infrastructure and promote sustainable transport options to mitigate these impacts. The council aims to balance housing needs with environmental protection, ensuring that new developments support the well-being of both the community and the ecosystem.	
00143	Eric	Henderson	SP PL 10: Chase Park		Residents strongly oppose the proposed development due to its potential to significantly alter the area's character and historical identity. They argue that the site holds historical significance and is designated as a Special Character area, emphasizing its importance for conservation. They fear the development will negatively impact the Trent Park Conservation Area, undermining its environmental and cultural value. Furthermore, they believe it will lead to the urbanization of the cherished rights of way along Merryhills Way, thereby disrupting the area's natural	No	Comments noted. The council recognizes the area's designation as a Special Character area and its inclusion within the Trent Park Conservation Area, emphasizing the importance of preserving its historical and environmental significance. However, the council also aims to balance these considerations with the need for sustainable development and housing provision, as outlined in Enfield's planning policies and strategies.

					appeal and recreational spaces.			
00143	Eric	Henderson	SP PL 10: Chase Park		Residents strongly oppose the proposed development due to its potential to significantly alter the area's character and historical identity. They argue that the site holds historical significance and is designated as a Special Character area, emphasizing its importance for conservation. They fear the development will negatively impact the Trent Park Conservation Area, undermining its environmental and cultural value. Furthermore, they believe it will lead to the urbanization of the cherished rights of way along Merryhills Way, thereby disrupting the area's natural appeal and recreational spaces.	No	Comments noted. The council recognizes the area's designation as a Special Character area and its inclusion within the Trent Park Conservation Area, emphasizing the importance of preserving its historical and environmental significance. However, the council also aims to balance these considerations with the need for sustainable development and housing provision, as outlined in Enfield's planning policies and strategies.	
00161	Corina	Rox	SP PL 10: Chase Park		The resident argues that green space should be preserved for wildlife and insists that the policy should be deleted from the plan.	No	Comments noted. The Chase Park Topic Paper outlines the council's dedication to preserving green spaces and supporting biodiversity. The proposed policy includes measures to ensure that any development will be balanced with the need to protect and enhance local wildlife habitats.	
00162	Katie	Lydon	SP PL 10: Chase Park		The resident objects to the development of Green Belt land, emphasizing its protection for public and residents' use. They argue that the council's financial commitments will create significant environmental issues, strain local schools and hospitals, and worsen traffic and pollution. The resident believes alternative sites should be thoroughly explored and accuses the council of prioritizing financial gain and convenience over community interests. They assert that the plan is predominantly for private sales rather than social housing, and express frustration at the council's disregard for residents' wishes. The resident strongly opposes the plans, citing long-term negative impacts on future generations and considers this policy should be deleted from the plan.	No	Comments noted. The ELP Spatial Strategy and Overall Approach Topic Paper and the Chase Park Topic Paper emphasize the council's commitment to balanced growth, addressing housing needs while ensuring environmental sustainability. The council prioritizes minimizing impacts on local infrastructure, including schools and hospitals, and implements measures to protect local wildlife and green spaces. Thorough site assessments are conducted to explore all potential alternatives, aiming to provide a mix of affordable and private housing responsibly.	
00167	Malcolm	Barnfield	SP PL 10: Chase Park		The residents strongly oppose the overdevelopment of Enfield's Green Belt, fearing it will ruin the borough's character. They highlight the inability of local roads to handle increased traffic and stress on sewage and water systems, potentially leading to collapsing river levels and loss of wildlife. The resident urges Enfield Council to reconsider, warning that many long-standing residents are planning to move	No	Comments noted. The council is committed to sustainable development that respects Enfield's character and green spaces.
