Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
<p>Policy DE5: Strategic and important local views</p>	<p>Residents are concerned that the extended views across Whitewebbs Park have not been included in Policy DE5 – Important Local Views. The 2012 Area of Special Character (AoSC) Review emphasizes the importance of protecting Enfield's historic and exceptional landscape character, which includes Whitewebbs Park and Forty Hall. The review highlights Whitewebbs Park as an area of undulating woodland, parkland, and open fields with significant public access and recreational value. Residents argue that the parkland at Whitewebbs, originally set out in the 19th century, contains important views across the Cuffley Brook Valley that are not currently recognized in DE5. They stress that retaining these open views is crucial to prevent further urbanization and maintain the area's recreational and visual qualities. They request the inclusion of these views in DE5 to ensure proper protection under the Historic England guidance and planning regulations.</p>	<p>Society's concerns and ensuring that important views are preserved and enhanced for the benefit of the community.</p> <p>Comments noted. Policy DE5 aligns with the National Planning Policy Framework (NPPF) and the London Plan by emphasizing the protection of significant local views and the overall townscape. The policy aims to ensure that new developments do not harm or obstruct identified important views, thus preserving the borough's visual corridors that enhance understanding of its geography and character. While the Enfield Society notes that the list of important views in Figure 7.2 and Table 7.1 has been largely carried over from the 2014 Development Management Policies DPD, this continuity ensures that recognized and valued views remain protected. The policy framework allows for these views to be re-evaluated and updated as necessary, based on ongoing community engagement and stakeholder input. The Local Plan preparation process has included extensive public consultations. These consultations have provided opportunities for the community and stakeholders, including the Enfield Society, to contribute to identifying and protecting important local views. This engagement ensures that the policy reflects local values and priorities. Policy DE5 considers both strategic and local views, although the Local Plan primarily focuses on local views significant to the borough. This approach aligns with London Plan Policy HC3, which distinguishes between strategic views of London-wide importance and locally important views. The detailed assessment of local views ensures that development proposals respect and enhance Enfield's unique townscape and landscape. Policy DE5 is legally compliant and sound, supported by a robust evidence base that includes community and stakeholder engagement. The policy aligns with national and London Plan objectives, ensuring the protection of significant local views while accommodating growth and development. The Enfield Design and Character Evidence Base provides a comprehensive framework for implementing Policy DE5, addressing the Enfield Society's concerns and ensuring that important views are preserved and enhanced for the benefit of the community.</p>	<p>No</p>	<p>01989</p>	<p>Martin Holland</p>
<p>Policy DE5: Strategic and important local views</p>	<p>Residents are concerned that the extended views across Whitewebbs Park have not been included in Policy DE5 – Important Local Views. The Enfield Design and Character Evidence Base provides a comprehensive framework for implementing Policy DE5, addressing the Enfield Society's concerns and ensuring that important views are preserved and enhanced for the benefit of the community.	No	00120	Greater London Authority
Policy DE6: Tall buildings	The GLA's response highlights that the draft ELP has multiple definitions for tall buildings across different borough areas, mostly set at 21m and above, including roof plant. The GLA calls for clarity on where measurements should start, such as from ground level or AOD.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the GLA to clarify these points further and ensure mutual understanding and agreement on these matters.	No	00120	Greater London Authority
Policy DE6: Tall buildings	The GLA's response notes that seven small areas in the draft ELP have different tall building definitions (30m to 36m) without explanation. The GLA requests justification for these separate definitions and an assessment of the potential harm from exceeding these heights.	Comments noted. The Council emphasizes that the methodology used in the Enfield Local Plan is thoroughly documented and supported by robust evidence, as detailed in the Character of Growth Report, section 4.03 Method. In response to GLA's concerns and to ensure transparency, Enfield will reference this section in paragraph 7.42 of the plan. This reference will provide clarity and allow stakeholders to access detailed information about the methodology used in developing the plan.	No	00120	Greater London Authority
Policy DE6: Tall buildings	The GLA's response acknowledges that the draft ELP identifies 58 locations suitable for tall buildings with specific height limits, complying with LP2021 Policy D9 Part B2. However, it suggests that broader area identification might be more appropriate for flexibility and to accommodate future changes, as many locations are small and adjacent.	Comments noted, however, the Council disagrees with the GLA's assertion. The areas designated for tall buildings are based on broad character areas identified in the updated Characterisation Study and analysed through the Character of Growth Study, aligning with London Plan Policy D1. These areas, suitable for change and growth, have been thoroughly evaluated using a VU City modelling exercise, with methodology developed in consultation with Historic England. Detailed information is available in the Character of Growth Appendices within the Local Plan evidence base. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the GLA to clarify these points further and ensure mutual understanding and agreement on these matters.	No	00120	Greater London Authority

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
Policy DE6: Tall buildings	The GLA's response criticises the draft ELP for setting maximum building heights for site allocations, which is inconsistent with LP2021 Policy D9 that implies flexibility and a range of appropriate heights. It suggests that maximum heights should only be set where necessary, such as for strategic views or Civil Aviation Authority limits.	Comments noted. The concern revolves around the interpretation of building height, specifically whether the issue is with the height specified in the site allocation or the height itself. The specified heights in site allocations have been carefully coordinated with the tall building policy to ensure alignment and consistency. Appendix D3 of the Enfield Local Plan provides clear guidance on height interpretation, ruling out uniform height and mandating context-dependent responses tailored to each site's specific context. This approach ensures that height decisions respect local context and promote sensitive urban design principles. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the GLA to clarify these points further and ensure mutual understanding and agreement on these matters.	No	00120	Greater London Authority
Policy DE6: Tall buildings	The GLA's response suggests that Policy DE6 should clearly state that tall buildings are only suitable in identified locations. The exceptions in Parts 5 and 6 should be removed to avoid confusion, as the planning system already permits exceptions based on Development Plan policies and material considerations.	Comments noted. On DE6 Policy and Tall Buildings Maps, the Council emphasizes that Paragraph 2.0 of Policy DE6 explicitly states that tall buildings should only be constructed in designated appropriate areas. Each tall building map includes notes highlighting that tall buildings are designated solely for the proposed areas, ensuring clarity and adherence to the policy. The policy's reference to "Unusual Height" acknowledges unique circumstances where height considerations may vary. For instance, locations like Amos Grove and New Avenue demonstrate that topography can mitigate potential impacts on neighbouring properties, recognising the importance of site-specific factors in evaluating height proposals. Part 5 of the policy recognizes the need for certain civic uses, such as hospitals or universities, to have taller structures known as marker buildings. This provision serves as an exception to the general tall building policy, offering guidance to decision-makers and ensuring clarity in urban design and townscape considerations. Part 6 clarifies the scope of the policy and its alignment with the evidence base, focusing primarily on heritage, townscape, and design considerations. While there may be a need for further technical planning policy input and review, maintaining the current policy ensures consistency until additional advice is sought. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the GLA to clarify these points further and ensure mutual understanding and agreement on these matters.	No	00120	Greater London Authority
Policy DE6: Tall buildings	The Hadley Wood Neighbourhood Planning Forum suggests that Section 7 of Policy DE6 in the Enfield Local Plan should be enhanced to align more closely with London Plan Policy D9. They emphasize that proposals should consider and avoid harm to London's heritage assets and their settings. Any proposals that result in harm should require clear and convincing justification, demonstrating that alternatives have	Comments noted. The Local Plan is designed to be read as a whole, and protections for heritage assets are comprehensively covered across various policies. Specifically, DE6 and other related policies ensure that heritage considerations are integrated into planning decisions. The evidence base, including documents on Design and Character, provides detailed guidelines to maintain Enfield's distinctiveness and heritage values.	No	01311/01669/0 1854/01856/01 863/01864	Hadley Wood Neighbourhood Planning Forum

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	been explored and that the public benefits outweigh the harm. The buildings should also positively contribute to the character of the area.	aligning with the broader strategic objectives of the London Plan. Consequently, DE6, in conjunction with other policies, adequately addresses these concerns without unnecessary duplication. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the HWNPF to clarify these points further and ensure mutual understanding and agreement on these matters.			
Policy DE6: Tall buildings	The Forum finds the Enfield Local Plan's (ELP) reliance on the Character of Growth Study (2021) problematic. They argue that the study is fundamentally flawed, as it dismisses PTALs due to supposed inaccuracies without providing evidence. Additionally, the study uses 'as the crow flies' measurements for 400/800m distances, which do not reflect real travel distances. They suggest that LB Bexley's method, which measures actual footpaths and roads, is a more accurate and thoughtful approach.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the HWNPF to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01311/01669/0 1854/01856/01 863/01864	Hadley Wood Neighbourhood Planning Forum
Policy DE6: Tall buildings	The Enfield Conservative Group notes that the March 2024 update of the Draft Plan proposes even more tall buildings and significant Green Belt encroachment, disregarding public feedback.	Comments noted. The Council disagrees with the Enfield Conservative Group's critique regarding the Draft Plan's policy on tall buildings. The Council's approach is consistent with London Plan Policy D3, which ensures site capacity is optimized through a design-led approach, especially in well-connected locations. The Draft Plan considers the Character of Growth Study and other evidence, ensuring that tall buildings are appropriate for their context and do not adversely impact historically and architecturally sensitive areas. Detailed considerations and justifications can be found in the Enfield Evidence Base.	No	01670	Enfield Conservative Group
Policy DE6: Tall buildings	The Enfield Conservative Group argues that the Draft Plan's relaxed policy on tall buildings significantly deviates from the 2014 Development Management Document, which prohibited such buildings in sensitive areas. This policy shift is justified by an excessively high housing target, leading to the potential proliferation of tower blocks in low-rise residential areas. The Draft Plan lacks clear height thresholds for tall buildings and proposes significant height increases in several traditionally low-rise areas, which would adversely affect their character and violate London Plan requirements. The group highlights the negative social impacts of tall buildings, particularly in areas like Edmonton Green, and criticises the Character of Growth Study as fundamentally flawed. They emphasise that tall buildings in Enfield Town and other historically and architecturally sensitive areas are inappropriate and unsound.	Comments noted. The Council disagrees with the Enfield Conservative Group's critique regarding the Draft Plan's policy on tall buildings. The Council's approach is consistent with London Plan Policy D3, which ensures site capacity is optimized through a design-led approach, especially in well-connected locations. The Draft Plan considers the Character of Growth Study and other evidence, ensuring that tall buildings are appropriate for their context and do not adversely impact historically and architecturally sensitive areas. Detailed considerations and justifications can be found in the Enfield Evidence Base.	No	01670	Enfield Conservative Group
Policy DE6: Tall buildings	The Enfield Conservative Group suggests the following modifications to make the Draft Plan sound and legally compliant, revise Tall Buildings Policy: Revisit DE6 and the accompanying site plans in	Comments noted. The Council believes that this approach is justified and sound for several reasons: the Local Plan identifies that tall buildings may be appropriate in specified strategic locations and are selected due to	No	01670	Enfield Conservative Group

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	Appendix D, reinstating more restrictive policies for tall buildings from the current Enfield Local Plan.	their potential to make the best use of land in a sustainable manner and to reflect the evolving character. The Council's approach is consistent with the London Plan Policy D3, which aims to optimize site capacity through a design-led approach, especially in well-connected locations. This policy supports the development of taller buildings in areas where they can contribute positively to urban design and land use efficiency.	No		
Policy DE6: Tall buildings	The Enfield Conservative Group oppose Policy DE6, which allows buildings up to 39m in Cockfosters. This policy would disrupt views from Trent Park Conservation Area and transform Cockfosters from a suburban area to a built-up town center, negatively impacting the village high street and scenic views.	<p>Comments noted.</p> <p>The Council believes that this approach is justified and sound for several reasons: the Local Plan identifies that tall buildings may be appropriate in specified strategic locations and are selected due to their potential to make the best use of land in a sustainable manner and to reflect the evolving character. The Council's approach is consistent with the London Plan Policy D3, which aims to optimize site capacity through a design-led approach, especially in well-connected locations. This policy supports the development of taller buildings in areas where they can contribute positively to urban design and land use efficiency.</p>	No	01670	Enfield Conservative Group
Policy DE6: Tall buildings	The Enfield Conservative Group opposes to the Tall Buildings Policy DE6 for Area 6 Southgate, which includes four sites around Southgate Circus with a maximum height of 30m. This densification and the presence of tall buildings would negatively impact the views and setting of the historic Charles Holden-designed station, the overall Southgate Circus Conservation Area, and views from Grovelands Registered Park and Gardens.	<p>Comments noted.</p> <p>The Council believes that this approach is justified and sound for several reasons: the Local Plan identifies that tall buildings may be appropriate in specified strategic locations and are selected due to their potential to make the best use of land in a sustainable manner and to reflect the evolving character. The Council's approach is consistent with the London Plan Policy D3, which aims to optimize site capacity through a design-led approach, especially in well-connected locations. This policy supports the development of taller buildings in areas where they can contribute positively to urban design and land use efficiency.</p>	No	01670	Enfield Conservative Group
Policy DE6: Tall buildings	The Enfield Conservative Group oppose the policy allowing tall buildings near significant heritage assets in and around Palace Gardens, as it would disrupt the low-rise setting of the Enfield Town Conservation Area. Increased building heights near Enfield Chase Station would harm the conservation area and impact views of the Enfield War Memorial. The policy would also create a cluster of tall buildings at the Tesco's/Sorting Office site, negatively affecting views along Church Street, Genotin Terrace, and the setting of listed buildings. Additionally, the development would be near the Ermine Street and Enfield Town Centre Archaeological Priority Areas, further risking heritage sites.	<p>Comments noted.</p> <p>The Council believes that this approach is justified and sound for several reasons: the Local Plan identifies that tall buildings may be appropriate in specified strategic locations and are selected due to their potential to make the best use of land in a sustainable manner and to reflect the evolving character. Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
Policy DE6: Tall buildings	The Enfield Conservative Group opposes to the policy allowing tall buildings near significant heritage assets in and around Palace Gardens, as it would disrupt the low-rise setting of the Enfield Town Conservation Area. Increased building heights near Enfield Chase Station would harm the conservation area and impact views of the Enfield War Memorial. The policy would also create a cluster of tall buildings at the Tesco's/Sorting Office site, negatively affecting views along Church Street, Genoin Terrace, and the setting of listed buildings. Additionally, the development would be near the Ermine Street and Enfield Town Centre Archaeological Priority Areas, further risking heritage sites.	Comments noted. The Council believes that this approach is justified and sound for several reasons: the Local Plan identifies that tall buildings may be appropriate in specified strategic locations and are selected due to their potential to make the best use of land in a sustainable manner and to reflect the evolving character. The Council's approach is consistent with the London Plan Policy D3, which aims to optimize site capacity through a design-led approach, especially in well-connected locations. This policy supports the development of taller buildings in areas where they can contribute positively to urban design and land use efficiency.	No	01670	Enfield Conservative Group
Policy DE6: Tall buildings	Telereal Securitised Properties GP Limited supports the principle of identifying Angel Edmonton as a Placemaking Plan area. However, they argue that the approach to tall buildings does not fully reflect national and regional policies, nor the evidenced housing need. They believe the 33-meter height limit is too restrictive, limiting regeneration and failing to optimize the use of brownfield land. Telereal recommends removing or increasing the height limit to allow for greater flexibility and higher densities, ensuring the Local Plan aligns with the NPPF and London Plan policies, and meets housing needs effectively.	Comments noted. The Council notes Telereal's comments on the draft Local Plan. While Enfield recognize their support for the strategic vision and objectives, including the identification of Angel Edmonton as a Placemaking Area, the council believe the plan's approach to building heights is justified. The plan's evidence base, including the Characterisation Study, ensures development aligns with Enfield's local context and character. The Council maintain that the 33-meter height limit is appropriate to balance density with the character and sustainability of the area. This height restriction is based on thorough assessments as documented in our Character of Growth Report. While the council appreciate their input, it believes the current height limits support the plan's goals for sustainable development and community integration. The council is open to continued dialogue through further engagement and a Statement of Common Ground to collaboratively address any concerns and ensure that our policies remain effective and flexible.	No	01728	Telereal Securitised Properties GP Limited
Policy DE6: Tall buildings	Appendix D of the Draft Local Plan identifies areas potentially suitable for tall buildings (over 21m), emphasizing that inclusion in this list does not guarantee acceptability without a thorough assessment process. It underlines the necessity for proposals to meet high design standards. Nexus Planning on behalf of Miriam Investment Holdings, proposes extending the designated area for tall buildings to include Metro Point, located across Cockfosters Road from already identified sites. This prominent brownfield site, owned by our client, is immediately available for redevelopment and could help meet local housing needs. A detailed assessment has been submitted to the Council.	Comments noted. The Council acknowledge the site's potential for redevelopment and its strategic location adjacent to already identified areas. The Council will engage further by entering into a Statement of Common Ground (SoCG) with Miriam Investment Holdings to explore this proposal in detail, ensuring a thorough consideration of the site's suitability for tall buildings as part of our ongoing planning process.	No	01794	Enfield Society
Policy DE6: Tall buildings	The Enfield Society has raised several concerns regarding the current policy on tall buildings, highlighting its insufficient assessment of the potential harm to heritage assets and conservation areas. They argue that such assessments should occur during plan-making rather than being deferred to the application stage. The policy's vagueness about the positioning of tall buildings is also problematic, potentially leading	Policy DE6 aligns with the National Planning Policy Framework (NPPF) and the London Plan, specifically Policy D9: Tall Buildings, ensuring that tall buildings are located appropriately, considering proximity to public transport, town centres, and potential impacts on heritage assets and conservation areas. The policy is based on thorough research, including the Enfield Characterisation Study (2011)	No	01817	Barnet Society

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	to more harmful developments. Specific objections are noted for areas like Cockfosters Station and Enfield Town Civic Centre, emphasizing the need for clear, consistent policy frameworks that align with the Character of Growth Study and London Plan. Additionally, the Society criticizes the policy's redundancy in repeating London Plan Policy D9, the inadequate justification for tall buildings based solely on proximity to transport, and the borough-wide definition of tall buildings as 21 meters, advocating instead for a definition aligned with local context. They call for a thorough impact assessment and revisions to the policy and maps to better protect Enfield's heritage and character.	and the Tall Buildings Study (2021), which provide detailed analysis and mapping of suitable locations. These studies are part of the evidence base supporting Policy DE6. The policy framework includes specific height limits and requires detailed visual impact assessments at the planning application stage to evaluate and mitigate potential harm. Extensive consultations with local communities, including the Enfield Society, have refined the policy to balance local needs with sustainable development and growth. Policy DE6 requires clear and convincing justification for any development harming heritage assets, ensuring significant public benefits outweigh the harm. The definition of tall buildings at 21 meters is based on local context analysis and is consistent with London Plan Policy D9. The policy is legally compliant, sound, and supported by a robust evidence base and stakeholder engagement, ensuring rigorous assessment and mitigation of potential harms in line with national and London Plan policies.			
Policy DE6: Tall buildings	After 'must consider long views from Trent Park Conservation Area' add 'and Monken Hadley Conservation Area'. p.464 – BOX Area 1.2 Cockfosters Station Car Park, last sentence: 'After 'consider views from' add 'Monken Hadley Conservation Area'.	Comments noted.	No	01817	Barnet Society
Policy DE6: Tall buildings	The Councillor for Southgate Ward expressed concerns that the proposed policy allowing high-rise and high-density buildings significantly deviates from Enfield Council's Enfield Development Management Document (2014), which restricted tall buildings in sensitive areas to preserve local views and the skyline. They emphasized that Southgate is primarily composed of low-rise residential homes and businesses, including conservation areas. Introducing high-rise buildings would drastically alter the character of the area, contrasting sharply with the existing built environment.	Comments noted. The Local Plan identifies that tall buildings may be appropriate in specified strategic locations, including town centres. This approach is supported so to make best use of land in a sustainable location and to reflect the evolving character of this town centre. The Council's approach is consistent with London Plan Policy D3 which seeks to ensure that site capacity is optimised through the design-led approach, particularly in well-connected locations. Policy is considered sound and compliant with aims of the NPPF particularly those relating to the protection and conservation of the Natural Environment.	No	01670	Enfield's Conservative Group
Policy DE6: Tall buildings	The NHS London Healthy Urban Development Unit emphasizes that tall buildings must be safely designed to protect residents and users from fire and other emergencies and to minimize the risk of suicide. They advocate for extra scrutiny at the planning stage to ensure safety considerations from design inception, including the materials and construction systems used.	Comments noted. The Council is supportive of the principle of a design-led approach to deliver optimum density on sites. Policy is helping to deliver Secured by Design in Enfield, it can greatly enhance the safety and security of those using or residing within a development and the wider environs of the local community, by using proven crime prevention measures at design, planning stage. The Council is committed to working collaboratively with the NHS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01872	NHS London Healthy Urban Development Unit

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
Policy DE6: Tall buildings	Joseph Homes Regeneration Limited supports Draft Policy DE6 but suggests two amendments: 1) Increase the definition of a tall building to 30 meters to align with GLA thresholds, ensuring optimal use of brownfield land and promoting regeneration. 2) Include the Commercial Road site as a 'potentially appropriate location for tall buildings' in Figure 7.4 and Appendix D, enhancing policy effectiveness and supporting mixed-use regeneration. This would align with nearby tall building zones in Edmonton Green and Angel Edmonton, fostering comprehensive redevelopment and public benefits.	Comments noted. The Council is committed to working collaboratively with Joseph Homes Regeneration Limited and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01875	Joseph Homes Regeneration Limited
Policy DE6: Tall buildings	Joseph Homes Regeneration Limited supports Draft Policy DE6 but suggests two amendments: 1) Increase the definition of a tall building to 30 meters to align with GLA thresholds, ensuring optimal use of brownfield land and promoting regeneration. 2) Include the Commercial Road site as a 'potentially appropriate location for tall buildings' in Figure 7.4 and Appendix D, enhancing policy effectiveness and supporting mixed-use regeneration. This would align with nearby tall building zones in Edmonton Green and Angel Edmonton, fostering comprehensive redevelopment and public benefits.	Comments noted. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01875	Joseph Homes Regeneration Limited
Policy DE6: Tall buildings	Vistry Group supports the intentions of draft policy DE6 and the importance of high-quality design for tall buildings. However, they request flexibility in point 10, which discourages single aspect homes to avoid simplified external envelopes. Vistry argues that while dual aspect homes are preferred, site constraints sometimes necessitate a simplified design to maximize density and viability. They suggest that flexibility is needed to accommodate these situations while still maintaining high design standards.	The council appreciates Vistry Group's support and acknowledges the concerns regarding. The Council will continue to engage with Vistry Group and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01897	Vistry Group
Policy DE6: Tall buildings	Places for London appreciates the clarity in 'Appendix D' regarding maximum height figures for each site, following issues with legibility in Figure 7.4, and the recommendation to refer to building heights in metres rather than storeys. They advocate for omitting Figure 7.3 to consolidate key information on sites suitable for tall buildings in one place. They commend Enfield for recognizing both parts of the Cockfosters Station Site as appropriate for tall buildings but question the reduction of the area's maximum height to 39m, recommending it be increased to 50m in line with the recently permitted application (ref. 21/02517/FUL). They highlight the urgent housing need and the site's suitability, suggesting the policy reflect what has been permitted. Additionally, they commend the inclusion of an 'impact on heritage assets' section in Policy DE6, aligning with Paragraph 202 of the NPPF, ensuring proposals resulting in harm have clear justification and demonstrate public benefits outweigh the harm.	Comments noted. The council acknowledges the importance of collaboration and agrees to work together with Places for London. We will formalize our mutual understanding and agreements through a Statement of Common Ground, ensuring that all recommendations and concerns are addressed cohesively within the planning framework. This collaborative approach will help us effectively accommodate growth, enhance sustainable travel, and support higher density development in areas with high transport accessibility.	No	01937	TfL Places for London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
Policy DE6: Tall buildings	The Meridian Water team supports the coherent, evidence-based approach to the development of tall buildings throughout the borough in alignment with London Plan Policy D9, and the identification of areas suitable for tall buildings. However, regarding the specific heights proposed for Meridian Water (outlined in Appendix D, Area 11), they seek further dialogue with the LPA to discuss the evidence base used to determine height parameters and the assessment of potential visual and cumulative impacts. This will help determine whether Policy DE6 is justified and sound, and if modifications are necessary.	The Council appreciates the Meridian Water team's support for an evidence-based approach to tall buildings development in line with London Plan Policy D9, highlighting suitable areas for such structures. The proposed heights for Meridian Water in Appendix D, Area 11, are based on thorough evidence and analysis, including visual and cumulative impact assessments, ensuring compatibility with the surrounding environment. This aligns with national and regional planning policies. The Council emphasizes its commitment to collaboration with stakeholders like the Meridian Water team, ensuring the Local Plan remains effective and deliverable through ongoing dialogue. A Statement of Common Ground will facilitate this cooperation, addressing concerns and ensuring the sustainable development of key areas within the borough.	No	01945	Meridian Water (LBE)
Policy DE6: Tall buildings	Councillor Emma Supple highlighted Enfield Town's historical significance, mentioning its ancient vicarage, church, and market square, which form an important heritage site. She argued that plans to build tall, tower buildings in this area are inappropriate and unacceptable, as they would harm the conservation area. She listed seven proposed sites for these buildings, including Palace Gardens, Enfield Town Station, and Tesco Southbury Road, deeming the proposal unsound.	Comments noted. The Local Plan identifies that tall buildings may be appropriate in specified strategic locations, including town centres. This approach is supported so to make best use of land in a sustainable location and to reflect the evolving character of this town centre. The Council's approach is consistent with London Plan Policy D3 which seeks to ensure that site capacity is optimised through the design-led approach, particularly in well-connected locations. Policy is considered sound and compliant with aims of the NPPF particularly those relating to the protection and conservation of the Natural Environment.	No	02003	Councillor Supple
Policy DE6: Tall buildings	London borough of Waltham Forest (LBWF) support the approach to tall buildings and appreciate the alignment with London Plan Policy and additional design guidance for tall buildings.	The support of Enfield's approach to tall buildings is welcomed. The Council appreciates their recognition of our alignment with London Plan Policy and the additional design guidance we have included for tall buildings. Their positive feedback is invaluable as the council strive to ensure that its development strategies promote sustainable and well-designed urban growth.	No	02006	London borough of Waltham Forest
Policy DE6: Tall buildings	In summary, New Ladderswood LLP supports the principle of Site Allocation SA7.3 Ladderswood Estate for estate regeneration. However, certain policy items in their current form would constrain redevelopment options, making them ineffective and inconsistent with national policy. Thus, the draft Local Plan, as it stands, is not sound. With the suggested amendments, they believe the draft Local Plan would be sound.	The Council appreciates New Ladderswood LLP's support for the principle of Site Allocation SA7.3 Ladderswood Estate. The Council acknowledges the concerns raised regarding certain policy constraints and their potential impact on redevelopment options. The Council believes that the draft Local Plan, including Site Allocation SA7.3, is justified by the evidence base, as outlined in the Enfield Local Housing Needs Assessment and Housing Topic Paper. However, the Council is committed to ongoing dialogue and will consider the suggested amendments to ensure the plan is effective, flexible, and consistent with national policy. The Council look forward to working together to refine the Local Plan, ensuring it meets the needs of all stakeholders.	No	02090	New Ladderswood LLP

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
Policy DE6: Tall buildings	New Southgate is located in southwestern Enfield, bordering Haringey to the south and Barnet to the west. The Statement of Common Ground between LB Barnet and LB Enfield acknowledges the regeneration potential of New Southgate, now designated as an Opportunity Area in the London Plan 2021. The London Plan suggests ambitious regeneration efforts, including potentially decking over or tunneling sections of the North Circular near New Southgate Station. Policy PL7 in the draft Local Plan calls for a comprehensive, master-planned approach to development, especially around key sites like the former Gasholder, Topps Tiles, and Aldi, to ensure appropriate distribution of green spaces, non-residential uses, and height and density, while improving the area's relationship with the North Circular Road. Cross-boundary cooperation with Barnet is emphasised to align with Barnet's local plan policy GSS09. Policy PL7 also addresses air quality and noise pollution by recommending the strategic placement of living spaces away from the North Circular Road and improving links to train and tube stations, with potential for creating active routes.	The Council acknowledge LB Barnet's recognition of New Southgate's regeneration potential and its designation as an Opportunity Area in the London Plan 2021. Enfield's draft Local Plan, particularly Policy PL7, aligns with this vision by advocating for a comprehensive, master-planned approach to development. This includes strategic placement of living spaces to address air quality and noise pollution, enhancing links to transport hubs, and improving the area's relationship with the North Circular Road. We emphasize our commitment to cross-boundary cooperation with Barnet, ensuring alignment with Barnet's local plan policy GSS09. Further engagement and a statement of common ground will be pursued to address these issues collaboratively.	No	02091	London borough of Barnet
Policy DE6: Tall buildings	LB Barnet's Head of Transport Strategy reviewed LB Enfield's Reg 19 draft Local Plan, highlighting several key points. The plan should consider the impact of development proposals near the borough boundary on neighbouring transport networks. Policy T1 promotes sustainable transport networks and recommends collaboration between Enfield and neighbouring boroughs on boundary-related transport projects. This is particularly relevant if the London Mayor's "Super Loop 2" proposal, including a service from High Barnet to Walthamstow via Enfield and Chingford, proceeds. The plan should explicitly recognize the transport implications for areas near the boundary, such as Southgate and New Southgate. Barnet's recent Strategic Transport Assessment indicates several junctions in High Barnet and Whetstone are near capacity, with others potentially nearing capacity depending on local plan demand management. Currently, the additional traffic flows modelled do not cause undue concern.	The Council appreciate LB Barnet's thorough review of our Reg 19 draft Local Plan and their insights on transport implications. Enfield acknowledges the importance of considering boundary effects on neighbouring transport networks and commits to ongoing collaboration on relevant projects, including the potential "Super Loop 2" proposal. The Council will continue to engage with Barnet to monitor and address junction capacities and traffic flows, ensuring coordinated and sustainable transport solutions.	No	02091	London borough of Barnet
Policy DE6: Tall buildings	The proposed zones will significantly impact the Enfield Town Conservation Area, which includes numerous Grade II and Grade II* buildings, such as St Andrew's Church. A major concern is the proposal for Palace Gardens/Exchange and the Tesco's/Sorting Office site, where significant building height is planned near the historic market town's center. Consequently, the Bush Hill Park Residents' Association is advocating for the policy's removal from the plan.	Comments noted. The ELP Spatial Strategy and Overall Approach Topic Paper emphasizes preserving Enfield's rich historical and cultural heritage while addressing housing needs. The council is committed to ensuring that development respects and enhances the town's unique character, including its iconic structures and green spaces, vital for community well-being and social cohesion. Sustainability and natural environment protection are also prioritized, recognizing their importance for mental and physical health.	No	04218	Bush Hill Park Residents' Association

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
Policy DE6: Tall buildings	The proposed development zones will significantly impact the Enfield Town Conservation Area, which includes several Grade II and Grade II* listed buildings, such as St Andrew's Church. The proposal for Palace Gardens/Exchange and the Tesco/Sorting Office site is particularly concerning due to the planned significant building heights near the historic market town center, which could adversely affect the area's historic character and visual integrity.	The Enfield Local Plan is both sound and legally compliant, having been developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development.	No	05343	Edmonton Hundred Historical Society (EHHS)
Policy DE6: Tall buildings	IKEA's comments on Draft Policy DE6 and tall buildings highlight their support for recognizing Meridian Water as suitable for tall buildings. They emphasize the need for flexibility in applying maximum height restrictions, which should be determined at the planning application stage through a design-led approach. IKEA also notes inconsistencies and ambiguities in the Local Plan, such as cross-referencing non-existent policies and unclear "Important Local Views." They propose further engagement with Enfield Council to ensure the allocation better reflects the site's housing capacity and clarifies the tall buildings policy.	Comments noted. The Council is committed to working collaboratively with Ikea Properties Investment and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01921	Ikea Properties Investment Ltd
Policy DE6: Tall buildings	ADL supports the inclusion of Brimsdown as an area appropriate for tall buildings for industrial intensification, allowing for increased industrial floorspace on brownfield sites with minimal impact on residential areas. They acknowledge the importance of quality in delivering tall buildings per London Plan D9 but emphasize the need to balance quality with viability, especially in SIL locations. ADL proposes amending Part 9 of Policy DE6 to: "In addition to the requirements of policy D9 of the London Plan (2021 and its successors), proposals involving tall buildings should demonstrate how they will: ..." to ensure that development remains feasible even in challenging market conditions.	Comments noted. The council appreciate ADL's support for the inclusion of Brimsdown as an area suitable for tall buildings to facilitate industrial intensification. The council acknowledge the importance of balancing quality with viability in delivering these developments, particularly within SIL locations. As supported by the Enfield Viability Update Planning report, the council will aim to ensure policies remain feasible under market conditions. Therefore, the council will consider ADL's suggested amendment to Part 9 of Policy DE6 to help maintain the viability and high standards of development. Further engagement and a statement of common ground will be pursued to refine these objectives.	No	01682	Arell Developments Ltd. ('ADL') on behalf of the Landowner of Stockingswater Lane ('Landowner').
Policy DE6: Tall buildings	The Canal and Rivers Trust emphasises the need to protect the tranquil and quiet character of waterways, even in urban areas. They highlighted that developments near waterways should consider the impact on canal users and biodiversity. The Trust suggested that any changes in operating hours should not negatively affect waterway users and that development design and layout should minimize impact and include necessary mitigation measures. They recommended that these considerations be explicitly referenced in the policy and supporting text, with detailed design advice included in the forthcoming Borough-wide Design Guide.	Comments noted. The Council is committed to working collaboratively with Canal & River Trust and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	02007	Canal and Rivers Trust
Policy DE6: Tall buildings	CCLA Investment Management recommends that the supporting text of Policy DE6 recognize multi-storey industrial developments in London that are 35-40 meters tall. This acknowledgment would facilitate the construction of high-capacity, modern industrial buildings,	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where	No	01895	CCLA Investment Management (CCLA) who

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	including multi-storey warehouses, where commercially feasible. They also highlight that tall industrial buildings often have large footprints to accommodate vehicular ramps and goods lifts, and suggest the policy should consider these practical requirements.	necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.			are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
Policy DE6: Tall buildings	Goodman UK Limited supports the Council's approach to allowing tall buildings in Strategic Industrial Locations (SIL), particularly in the Great Cambridge Road SIL, which is suitable for heights of up to 36m or 39m. They value the flexibility this offers developers for improving site usability and density. However, Goodman questions whether these height limits were established through comprehensive testing as per London Plan Policy GG2 or based on specific typologies. They believe the current evidence base is insufficiently ambitious and does not account for site-specific factors, suggesting that taller buildings, up to 54m, might be necessary for optimal industrial intensification. Goodman's feasibility studies show no significant visual impact difference between 39m and 54m buildings. They recommend increasing the height limit to 54m, allowing for flexibility and detailed assessments during development, and aligning with Draft Policy DE6's flexibility provision.	Comments noted. The Council is committed to working collaboratively with Goodman UK Limited and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.		01874	Goodman UK Limited
Policy DE6: Tall buildings	Historic England commend the Council's efforts and the positive aspects of the draft Plan, especially Policies SS2 and DE1, which aim to create well-designed, high-quality environments that respect the historic context. However, their main concern at this stage is the approach to tall buildings. Detailed comments on the policy framework and proposed Allocations are included in Appendices A and B.	Comments noted. The Council appreciate Historic England's guidance on the importance of conserving and enhancing Enfield's historic environment. The Council will address their concerns by collaborating on a statement of common ground to ensure the Local Plan aligns with the National Planning Policy Framework (NPPF) and the Planning Practice Guide (PPG).	No	01788	Historic England
Policy DE6: Tall buildings	Replace with: Tall building proposals must demonstrate how they have preserved and enhanced the significance of any affected heritage assets, including any contribution made by their setting	Comments noted. The Council appreciate Historic England's guidance on the importance of conserving and enhancing Enfield's historic environment. The Council will address their concerns by collaborating on a statement of common ground to ensure the Local Plan aligns with the National Planning Policy Framework (NPPF) and the Planning Practice Guide (PPG).	No	01788	Historic England
Policy DE6: Tall buildings	Delete clause 10	Comments noted.	No	01788	Historic England

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
		The Council appreciate Historic England's guidance on the importance of conserving and enhancing Enfield's historic environment. The Council will address their concerns by collaborating on a statement of common ground to ensure the Local Plan aligns with the National Planning Policy Framework (NPPF) and the Planning Practice Guide (PPG).			
Policy DE6: Tall buildings	Historic England support the intention behind clause 11 to secure heritage benefits in particular circumstances. However, and in a similar vein with our comments in relation to DE6, we consider that clause 11 also infers that an undefined adverse impact on heritage assets would be acceptable as long as a Section 106 agreement can be secured. This is potentially problematic and may encourage harmful development proposals to come forward. Our suggested amendment is intended to make clear that such a scenario would be rare. Suggested change: Proposals affecting heritage assets should secure opportunities to conserve, enhance or better reveal heritage significance through Section 106 agreements in exceptional circumstances where harm cannot be minimised or otherwise mitigated.	Comments noted. The Council appreciate Historic England's guidance on the importance of conserving and enhancing Enfield's historic environment. The Council will address their concerns by collaborating on a statement of common ground to ensure the Local Plan aligns with the National Planning Policy Framework (NPPF) and the Planning Practice Guide (PPG).	No	01788	Historic England
Policy DE6: Tall buildings	Historic England object to the wording that suggests an acceptable level of harm to heritage assets, which contradicts the NPPF's requirement for clear and convincing justification for any harm to heritage assets. The policy may conflict with the Town and Country Planning (Listed Buildings and Conservation Areas) Act 1990, which mandates preserving or enhancing the character or appearance of conservation areas.	Comments noted. The Council appreciate Historic England's guidance on the importance of conserving and enhancing Enfield's historic environment. The Council will address their concerns by collaborating on a statement of common ground to ensure the Local Plan aligns with the National Planning Policy Framework (NPPF) and the Planning Practice Guide (PPG).	No	01788	Historic England
Policy DE6: Tall buildings	Specific recommendations: Remove references to "likely harm" to heritage assets. Ensure tall building proposals take appropriate account of any impacts on heritage assets, including conservation areas. Include a caveat that tall building proposals will only be acceptable if they satisfy the requirements of the entire Plan.	Comments noted. The Council appreciate Historic England's guidance on the importance of conserving and enhancing Enfield's historic environment. The Council will address their concerns by collaborating on a statement of common ground to ensure the Local Plan aligns with the National Planning Policy Framework (NPPF) and the Planning Practice Guide (PPG).	No	01788	Historic England
Policy DE6: Tall buildings	Emphasis on the need for the evidence base related to the historic environment to be relevant and up to date, ensuring a positive strategy for conservation and enjoyment as per NPPF para 185.	Comments noted. The Council appreciate Historic England's guidance on the importance of conserving and enhancing Enfield's historic environment. The Council will address their concerns by collaborating on a statement of common ground to ensure the Local Plan aligns with the National	No	01788	Historic England

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
Policy DE6: Tall buildings	The proposed development zones will significantly impact the Enfield Town Conservation Area, which includes several Grade II and Grade II* listed buildings, such as St Andrew's Church. The proposal for Palace Gardens/Exchange and the Tesco/Sorting Office site is particularly concerning due to the planned significant building heights near the historic market town centre, which could adversely affect the area's historic character and visual integrity.	Planning Policy Framework (NPPF) and the Planning Practice Guide (PPG). Comments noted. The Council appreciate Historic England's guidance on the importance of conserving and enhancing Enfield's historic environment. No	01788	Historic England
Policy DE6: Tall buildings	Comments received from residents/businesses are contained in Table B.3i_3: DM DE6: Tall buildings				
Policy DE7: Creating liveable, inclusive and quality public realm	The Metropolitan Police Service Design Out Crime Team emphasises creating safe and accessible routes and spaces for all users, especially disabled individuals, those with mobility impairments, and children in pushchairs, ensuring these areas are well-lit and inclusively designed. Additionally, developments should incorporate safety and counter-terrorism measures to mitigate risks like anti-social behaviour without compromising the aesthetic and functionality of streets and public spaces, particularly in crowded or important civic areas.	Comments noted. The council supports the integration of crime prevention and counter-terrorism measures early in the design process, as emphasized by the Metropolitan Police Service Design Out Crime Team. The policy aligns with the London Plan and the National Planning Policy Framework (NPPF), ensuring the delivery of Secured by Design principles in Enfield. This approach enhances safety and security for residents and the community by incorporating proven crime prevention measures during the design and planning stages. Each application will be evaluated on a case-by-case basis, ensuring tailored solutions that promote safety and resilience.	No	01721	Metropolitan Police Service Design Out Crime Team
Policy DE7: Creating liveable, inclusive and quality public realm	TfL does not consider the sites at Chase Park (PL10) SA10.1 – SA10.4, Crews Hill (PL11) SA11.1 – SA11.6, land opposite Enfield Crematorium (RUR.01), and land between Camlet Way and Crescent West, Hadley (RUR.02) suitable for housing. This is due to their poor transport connectivity and the high costs required to provide sustainable transport access comparable to urban sites in the borough. Developing these sites is likely to lead to car-dependent development, which is contrary to the Good Growth objectives of the London Plan and the NPPF.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
Policy DE7: Creating liveable, inclusive and quality public realm	Vistry Group supports high-quality public realm development, which enhances well-being and biodiversity. However, they express concerns that the combined prescriptive policies (BG13, DE7, DE11) increase costs for developers, potentially conflicting with other objectives like affordable housing. They note that highly landscaped public realms, as required by these policies, may not be sustainable for Council	The council appreciates Vistry Group's support and acknowledges the concerns regarding. The Council will continue to engage with Vistry Group and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01897	Vistry Group

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
quality public realm	maintenance teams. Vistry suggests these policies be assessed on a site-by-site basis to ensure viability for both developers and Council maintenance teams.		No	01732	Asda Stores Ltd
Policy DE7: Creating liveable, inclusive and quality public realm	Savills, on behalf of Asda, generally supports the remainder of the Enfield Local Plan but recommends ensuring flexibility within detailed policies to apply them appropriately. They note that several policies, such as SE2 (Sustainable Design and Construction Statement), SE9 (use of SuDS), DE3 (creating accessible spaces), DE7 (improving public realm quality), and DE11 (landscaping schemes), apply to "all development." However, Savills argues that it may be impractical or disproportionate for minor developments to meet these requirements. They suggest amending the policy wording to include "where applicable to the type of development and appropriate to do so" to accommodate the varying nature of development proposals.	The council welcomes Asda's general support of the Enfield Local Plan. The Council appreciates their feedback on ensuring flexibility within detailed policies to apply them appropriately. The Council will consider amending the policy wording to include "where applicable to the type of development and appropriate to do so," particularly for policies SE2, SE9, DE3, DE7, and DE11. This adjustment aims to accommodate the varying nature of development proposals while maintaining the council's commitment to sustainable design and quality public spaces. This approach ensures that policies are practical and proportionate, aligning with Enfield's sustainable development goals as outlined in the Enfield Viability Update.	No	01875	Joseph Homes Regeneration Limited
Policy DE8: Design of business premises	Joseph Homes Regeneration Limited suggests amending Draft Policy DE8 to reference the correct local policy for co-location of residential uses with industrial sites. The current draft inaccurately requires compliance with Policy E3, which pertains to Strategic Industrial Land (SIL). Instead, it should reference Policy E6, which is relevant for Locally Significant Industrial Sites (LSIS). The recommended amendment would ensure clarity and alignment with London Plan Policy E7.	Comments noted. The Council is committed to working collaboratively with Joseph Homes Regeneration Limited and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01875	Joseph Homes Regeneration Limited
Policy DE8: Design of business premises	Joseph Homes Regeneration Limited suggests amending Draft Policy DE8 to reference the correct local policy for co-location of residential uses with industrial sites. The current draft inaccurately requires compliance with Policy E3, which pertains to Strategic Industrial Land (SIL). Instead, it should reference Policy E6, which is relevant for Locally Significant Industrial Sites (LSIS). The recommended amendment would ensure clarity and alignment with London Plan Policy E7.	Comments noted. The Council is committed to working collaboratively with Joseph Homes Regeneration Limited and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01922	Segro
Policy DE8: Design of business premises	SEGRO requests a meeting to discuss their responses and the application of the policy for new employment proposals, recognizing differences between single development plots and estate-scale developments. They support key pedestrian routes where feasible but believe strict application of other criteria could lead to inflexible design solutions that do not meet modern business needs. SEGRO suggests the policy should allow a planning balance exercise, considering site-specific characteristics. They recommend changing point 1 of the policy from "will only be permitted where it:" to "should consider the following:" to introduce more flexibility.	The council appreciates SEGRO's support and acknowledges the concerns regarding the wording of the policy. The Council will continue to engage with SEGRO and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01895	CCLA Investment
Policy DE8: Design of	CCLA Investment Management supports maintaining and intensifying business premises but stresses the need for pragmatic application.	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan	No	01895	CCLA Investment

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
business premises	They suggest focusing on modernized floorspace, operational efficiency, building height, infrastructure investment, resilience, sustainability, and operational flexibility. Regarding the co-location of residential and commercial uses, they emphasize this should only be acceptable if the operational functionality of surrounding industrial units is not compromised, in line with London Plan Policy E7. They propose adding a clause to ensure compliance with NPPF paragraph 35(d): "Co-location will only be considered acceptable where operational function	policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.			Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
Policy DE9: Shopfronts and advertisements	No comments made.				
Policy DE10: Conserving and enhancing heritage assets	The Enfield Conservative Group suggests the following modifications to make the Draft Plan sound and legally compliant, clarify Policy Wording: Eliminate vague wording and qualifying statements in policies BG8, BG10, DE10, and DE15 that give planning officers excessive discretion.	Comments noted. Planning policies must be both flexible and deliverable to effectively respond to a wide range of development scenarios. The wording in policies BG8, BG10, DE10, and DE15 is intentionally designed to provide necessary discretion for planning officers, ensuring they can adapt to specific circumstances while maintaining policy intent. Therefore, no changes are considered necessary. This approach is supported by comprehensive methodologies and evidence, ensuring policies are robust yet adaptable. For detailed methodologies, please refer to the evidence base.	No	01670	Enfield Conservative Group
Policy DE10: Conserving and enhancing heritage assets	The Enfield Society raises several concerns regarding the policy's title and content. They argue that the policy title should align with national policy, which refers to "Conserving and enhancing the historic environment" rather than just "heritage assets." This distinction is crucial as it reflects the broader concept of sustainable development outlined in the National Planning Policy Framework (NPPF) paragraph 8c. The NPPF glossary distinguishes between "heritage assets" and the "historic environment," with the latter encompassing all aspects of the environment resulting from historical interactions between people and places. The Enfield Society believes this broader focus is essential for appropriately addressing the borough's Conservation Areas, such as Trent Park and Enfield Town Conservation Areas, which are key embodiments of the historic environment. Additionally, they highlight a lack of clarity in the plan regarding the location of Archaeological Priority Areas (APAs) and the implications for decision-makers.	Comments noted. The Local Plan aligns with the Enfield Characterisation Study and the Site Allocation Topic Paper for Regulation 19, which emphasize the need for detailed heritage and environmental assessments. The integration of these broader considerations into the policy framework ensures that the development strategy respects and preserves the historical and cultural fabric of the borough. Furthermore, regarding Archaeological Priority Areas (APAs), the plan will provide clear mappings and guidelines to ensure that decision-makers are well-informed about areas of significant archaeological interest. This approach ensures that all development proposals are carefully assessed for their potential impact on these valuable historical resources.	No	01794	Enfield Society

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
Policy DE10: Conserving and enhancing heritage assets	The Lake Estate Conservation Area Group is concerned that policy DE10 of the draft Local Plan does not sufficiently protect the unique characteristics of their Conservation Area as identified in the Character Appraisal. Specifically, they highlight the need for the policy to ensure that replacement joinery exactly replicates original designs rather than merely being similar.	Comment noted. This change is not considered to be necessary to make the policy sound.	No	01813	Lake Estate Conservation Area Group
Policy DE10: Conserving and enhancing heritage assets	Vistry Group supports protecting heritage in the Borough but raises concerns about point 10, which mandates planning contributions for Conservation Area Appraisal and Management Plans from developments with 50+ residential units. They argue this requirement exceeds typical mitigation measures and the 2016 Section 106 SPD, potentially imposing unnecessary financial burdens that could affect project viability. They request reconsideration of this policy.	The council appreciates Vistry Group's support and acknowledges the concerns regarding. The Council will continue to engage with Vistry Group and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01897	Vistry Group
Policy DE10: Conserving and enhancing heritage assets	Historic England welcomes the identification of heritage considerations in site allocation proformas but suggests more detail is needed in the design principles. They note that several site allocations would require consultation with the Greater London Archaeological Advisory Service (GLAAS) and recommend including a link to the GLAAS charter in Appendix C. Additionally, they point out that the meaning of green, amber, and red colours in the heritage considerations box is unclear and needs clarification.	Comments noted. The Council appreciate Historic England's guidance on the importance of conserving and enhancing Enfield's historic environment. The Council will address their concerns by collaborating on a statement of common ground to ensure the Local Plan aligns with the National Planning Policy Framework (NPPF) and the Planning Practice Guide (PPG).	No	01788	Historic England
Policy DE10: Conserving and enhancing heritage assets	Historic England's response to Policy DE10 highlights the following key points: 1) While they appreciate the identification of heritage considerations in site allocation proformas, they emphasize the need for more detailed design principles to address heritage sensitivities effectively. 2) They recommend including a link to the Greater London Archaeological Advisory Service (GLAAS) charter and specifying in Appendix C that certain planning applications, such as major proposals over 0.5 hectares, Environmental Impact Scoping requests, and significant alterations to historic buildings, must consult with GLAAS. This addition will ensure clarity and proper consideration of archaeological and heritage impacts in the planning process.	Comments noted. The Council appreciate Historic England's guidance on the importance of conserving and enhancing Enfield's historic environment. The Council will address their concerns by collaborating on a statement of common ground to ensure the Local Plan aligns with the National Planning Policy Framework (NPPF) and the Planning Practice Guide (PPG).	No	01788	Historic England
Policy DE10: Conserving and enhancing heritage assets	Residents express concerns about DE10, and consider it should be deleted.	The Enfield Local Plan is both sound and legally compliant, having been developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs.	No	01989	Martin Holland

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
DM DE11: Landscape design	The Enfield Society contends that Policy DE11, aimed at protecting the historic landscape of Enfield Chase, is flawed and inconsistent with national and local policies. They argue the policy misunderstands the cohesive nature of Enfield Chase's historic landscape, including its woodlands, streams, parklands, and farmland. The lack of a recent comprehensive review of Areas of Special Character (ASC) undermines the policy, with the last significant review in 2013 emphasizing the preservation of Enfield Chase. The policy does not align with NPPF paragraph 180 or the London Plan, failing to protect valued landscapes and heritage assets. ENPlan's assessment suggests the policy would harm the historic landscape and conservation areas, including sites like Owls Hall and The Paddocks. Shifting from a strategic to a non-strategic policy could weaken protections, making the landscapes vulnerable to inappropriate development. Additionally, the draft Local Plan's lack of clear ASC boundaries and definitions creates ambiguity, and the policy overlooks the heritage and archaeological significance of Enfield Chase as recognized by Historic England.	The Enfield Local Plan aims to protect and enhance the historic environment, aligning with national policies such as the NPPF and the London Plan. Developed with extensive stakeholder engagement, including heritage experts and the local community, the policy ensures the preservation of Enfield Chase's historic character. Key documents like the Enfield Characterisation Study and the 2013 ASC Boundary Review inform the strategy to balance development with preservation. The plan includes clear guidelines and boundaries for Areas of Special Character (ASC), integrates heritage and archaeological assessments, and maintains a strategic vision to respect the historic landscape's integrity. This collaborative approach reflects a shared vision for preserving Enfield's historic environment.	No	01794	Enfield Society
DM DE11: Landscape design	Vistry Group supports high-quality public realm development, which enhances well-being and biodiversity. However, they express concerns that the combined prescriptive policies (BG13, DE7, DE11) increase costs for developers, potentially conflicting with other objectives like affordable housing. They note that highly landscaped public realms, as required by these policies, may not be sustainable for Council maintenance teams. Vistry suggests these policies be assessed on a site-by-site basis to ensure viability for both developers and Council maintenance teams.	The council appreciates Vistry Group's support and acknowledges the concerns regarding. The Council will continue to engage with Vistry Group and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01897	Vistry Group
DM DE11: Landscape design	Savills, on behalf of Asda, generally supports the remainder of the Enfield Local Plan but recommends ensuring flexibility within detailed policies to apply them appropriately. They note that several policies, such as SE2 (Sustainable Design and Construction Statement), SE9 (use of SuDS), DE3 (creating accessible spaces), DE7 (improving public realm quality), and DE11 (landscaping schemes), apply to "all development." However, Savills argues that it may be impractical or disproportionate for minor developments to meet these requirements. They suggest amending the policy wording to include "where applicable to the type of development and appropriate to do so" to accommodate the varying nature of development proposals.	The council welcomes Asda's general support of the Enfield Local Plan. The Council appreciate their feedback on ensuring flexibility within detailed policies to apply them appropriately. The Council will consider amending the policy wording to include "where applicable to the type of development and appropriate to do so," particularly for policies SE2, SE9, DE3, DE7, and DE11. This adjustment aims to accommodate the varying nature of development proposals while maintaining the council's commitment to sustainable design and quality public spaces. This approach ensures that policies are practical and proportionate, aligning with Enfield's sustainable development goals as outlined in the Enfield Viability Update.	No	01732	Asda Stores Ltd
DM DE11: Landscape design	Residents express concerns about DE11, and consider it should be deleted.	The Enfield Local Plan is both sound and legally compliant, having been developed based on up-to-date evidence contained in the council's planning evidence base. The housing targets reflect realistic capacity assessments to meet future needs.</p>	No	01989	Martin Holland
DM DE12: Civic and public developments	The Enfield Society is concerned the Policy is unclear and potentially ineffective in protecting the Enfield Town Conservation Area from the impacts of proposed tall buildings, such as the 39m tall buildings at the Civic Centre and Dugdale Centre. Specifically: Ambiguity in Wording: The policy's requirement for development to "respect the heritage of an area and respond to local character and distinctiveness" is vague and lacks clear guidelines, making it difficult for decision-makers to enforce. Impact on Historic Assets: The policy might not effectively prevent overbearing tall buildings from negatively impacting historic assets, especially when other Local Plan policies and site allocations support such developments. Potential Ineffectiveness: The policy could fail to protect the character and distinctiveness of the Enfield Town Conservation Area if tall buildings are endorsed elsewhere in the Local Plan, leading to conflicting outcomes.	<p>Comments noted.</p> <p>The Council acknowledges the importance of protecting the character and heritage of Enfield Town while facilitating necessary development. The site allocation policies and the Enfield Characterisation Study have been designed to ensure that new developments, including tall buildings, are sensitively integrated. Detailed assessments, such as visual impact studies and heritage impact assessments, are part of the planning process to mitigate potential negative impacts on heritage assets and the Conservation Area. The Local Plan includes specific design principles to ensure developments respect local character and distinctiveness, thus aligning with both national and London Plan policies. The Enfield Whole Plan Viability update supports the financial feasibility of these developments, ensuring that they can provide significant public benefits, including housing, while safeguarding the borough's heritage.</p>	No	01794	Enfield Society
DM DE13: Housing standards and design	The Home Builders Federation (HBF) argues that Part 1e of the policy is unsound as it contradicts national policy. The policy requires applicants to build according to the BRE Home Quality Mark, an environmental performance standard not endorsed by the Government. On December 13, the Government clarified that local authorities should not mandate alternative environmental standards, especially those related to energy efficiency. Therefore, the reference to the BRE Home Quality Mark should be deleted.	<p>Comments noted.</p> <p>To align with national policy and ensure the soundness of our Local Plan, we will consider deleting the reference to the BRE Home Quality Mark from Part 1e of the policy.</p>	No	01851	Home Builders Federation (HBF)
DE13: Housing standards and design	Vistry Group supports maintaining clear guidelines for separation distances and privacy impacts but seeks flexibility in applying point 3, which mandates set-backs based on building height. They argue that rigid application could conflict with broader outline consents and other policy goals. Vistry suggests allowing daylight/sunlight analysis to demonstrate minimal impact, noting that the current prescriptive	<p>The council appreciates Vistry Group's support and acknowledges the concerns regarding. The Council will continue to engage with Vistry Group and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.</p>	No	01897	Vistry Group

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
DE13: Housing standards and design	<p>approach might result in unfeasible set-backs given site constraints, potentially hindering efficient land use.</p> <p>Places for London recognise that adequate access, parking, cycle parking and refuse storage should be provided in line with 'other policies in the development plan'; however, we strongly request that this is specified further to include reference to London Plan Policy T6, Car Parking. This requires that 'car-free development should be the starting point for all development proposals in places that are (or are planned to be) well connected by public transport, with developments elsewhere designed to provide the minimum necessary parking ('car-lite')' (Section B). Framing Policy DE13 in the context of this London Plan policy will continue to promote car-free development in locations already readily accessible by public transport services.</p>	<p>Comments noted.</p> <p>The council acknowledges the importance of collaboration and agrees to work together with Places for London. We will formalize our mutual understanding and agreements through a Statement of Common Ground, ensuring that all recommendations and concerns are addressed cohesively within the planning framework. This collaborative approach will help us effectively accommodate growth, enhance sustainable travel, and support higher density development in areas with high transport accessibility.</p>	No	01937	TfL Places for London
DE13: Housing standards and design	Residents express concerns about DE13, and consider it should be deleted.	The Enfield Local Plan is both sound and legally compliant, having been developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs.	No	01725	Keith Brooks
DE13: Housing standards and design	Residents express concerns about DE13, and consider it should be deleted.	The Enfield Local Plan is both sound and legally compliant, having been developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs.	No	01989	Martin Holland
DM DE14: External amenity standards	The NHS London Healthy Urban Development Unit welcomes that external amenity standards align with the London Plan requirements. However, they note that paragraph 7.111 mentions the minimum requirement may not be sufficient for all sites but does not specify how much more should be provided. They suggest including a quantified amount to ensure adequate provision on these sites.	<p>Comments noted.</p> <p>The Council greatly value the input from the NHS London Healthy Urban Development Unit, North Central London Integrated Care Board (NCLICB), and NHS providers. The Council is committed to working collaboratively with the NHS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01872	NHS London Healthy Urban Development Unit

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
DM DE15: Residential extensions and outbuildings	The Enfield Conservative Group suggests the following modifications to make the Draft Plan sound and legally compliant, clarify Policy Wording: Eliminate vague wording and qualifying statements in policies BG8, BG10, DE10, and DE15 that give planning officers excessive discretion.	Comments noted. Planning policies must be both flexible and deliverable to effectively respond to a wide range of development scenarios. The wording in policies BG8, BG10, DE10, and DE15 is intentionally designed to provide necessary discretion for planning officers, ensuring they can adapt to specific circumstances while maintaining policy intent. Therefore, no changes are considered necessary. This approach is supported by comprehensive methodologies and evidence, ensuring policies are robust yet adaptable. For detailed methodologies, please refer to the evidence base.	No	01670	Enfield Conservative Group
DM DE15: Residential extensions and outbuildings	Residents express concerns about DE15, and consider it should be deleted.	The Enfield Local Plan is both sound and legally compliant, having been developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs.	No	01725	Keith Brooks
Chapter 8: Homes for all					
SP H1: Housing development sites	The London Borough of Redbridge supports Strategic Policy H1 and its ambitious target of 33,280 homes over 22 years, an increase from the previous target of 24,920 over 20 years in the Regulation 18 plan. They note Enfield's 10-year housing target of 1,246 homes per year from 2019-2029, as stated in the London Plan. However, they emphasise the need for Enfield to properly calculate, rather than merely "roll forward," a housing target extending to 2041 or the proposed end of the plan period.	Comments noted. The London Borough of Enfield appreciates the support from the London Borough of Redbridge for Strategic Policy H1 and its ambitious housing targets. Regarding the calculation of housing targets beyond 2029, the methodology employed is consistent with paragraph 4.1.11 of the London Plan (2021). This approach is thoroughly detailed in the Housing Topic Paper, and it underpins the housing trajectory extending to 2041, ensuring a robust and forward-looking strategy for meeting Enfield's housing needs.	No	01603	London Borough of Redbridge
SP H1: Housing development sites	The Diocese of London emphasizes the importance of assessing land availability in Local Plans as per the NPPF guidelines. They reference the Housing and Economic Land Availability Assessment (HELAA), which identifies their site in parcels CHC11-13 as potentially developable for residential use, suitable for delivery in the later stages of the plan. However, they argue that the site could be delivered within the first five years to address immediate housing needs. Additionally, they suggest the site is suitable for various uses beyond residential development.	The Council appreciates the Diocese's recognition of Enfield's approach to calculating housing need and addressing Green Belt release. They acknowledge the feedback and will review the housing target in Policy SS1 to ensure clarity, with the target of 33,280 homes based on detailed housing assessments. The Exceptional Circumstances and Site Allocation Topic Papers justify the proposed Green Belt releases, prioritizing sustainable development and aligning with NPPF guidelines. The council will further evaluate certain sites, including the Land at Jesus Church, for their potential to address immediate housing needs. The Plan's spatial strategy ensures development is supported by necessary infrastructure and maintains a 5-year housing land supply through a mix of brownfield and greenfield	No	01744	Diocese of London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP H1: Housing development sites	The Diocese of London supports Enfield's Housing Topic Paper (2024) and the draft Local Plan's approach to addressing housing challenges, particularly the need for affordable family housing, which justifies Green Belt release. They agree with the identification of constraints on brownfield land delivery and propose their site for early delivery due to its minimal constraints. They emphasize the importance of delivering more market homes to facilitate affordable housing and suggest bringing forward more deliverable sites within the first five years of the plan to meet both quantitative and qualitative housing needs.	developments. The Diocese's insights will be considered as the Local Plan is refined, with ongoing dialogue welcomed to achieve shared objectives. For more details, refer to the Site Allocation Topic Paper. The council welcomes the Diocese's feedback and support regarding the Housing Topic Paper (2024) and the draft Local Plan. The council acknowledge the challenges of delivering affordable family housing and the necessity of Green Belt release. The plan's strategy prioritizes sustainable development while addressing housing needs. Their site will be considered alongside other potential sites for early delivery. The council appreciate the Diocese's proactive approach and will incorporate their suggestions to ensure the Enfield Local Plan remains robust and flexible, meeting both quantitative and qualitative housing demands. Further discussions will follow to align on these objectives. This approach is justified based on the evidence provided in the Site Allocation Topic Paper, which emphasizes sustainable site selection and strategic development planning.	No	01744	Diocese of London
SP H1: Housing development sites	The Councillor object to the proposal to close the car park at Oakwood Station and build 52 dwellings on the site as it does not meet the NPPF soundness test. The closure is inconsistent with promoting sustainable transport, particularly impacting those with mobility issues. Displaced cars will exacerbate parking problems and emissions in nearby streets. The proposed housing blocks will detract from the listed station building and increase housing density without additional services like GP surgeries and schools, inconveniencing the traveling public and local residents.	Comments noted. The plan emphasizes sustainable development and transport, reducing car dependency, and encouraging alternative travel modes. The introduction of housing near public transport hubs aligns with the aim of maximizing land use efficiency and supporting local housing needs. Infrastructure improvements and design considerations will ensure accessibility and integration with existing community services, mitigating concerns about parking displacement and service provision.	No	01792	Councillor Fallart
SP H1: Housing development sites	The Councillor objects to redeveloping Sainsbury's on Green Lanes for 368 homes and highlights several concerns: the impact on Bush Hill Park residents' supermarket access, leading to increased congestion at other locations; inadequate consideration of local infrastructure like schools and doctor surgeries; reduced parking affecting nearby streets; unclear commercial servicing plans; environmental risks due to proximity to potable groundwater abstraction; and the potential loss of green space and impact on nearby heritage assets.	Comments noted. The proposed site allocation of Sainsbury's on Green Lanes for 368 new homes, while re-providing the supermarket with reduced parking, aligns with the National Planning Policy Framework (NPPF) as it supports sustainable urban growth. The plan includes measures to mitigate impacts on local infrastructure, such as schools and healthcare facilities, and ensures efficient servicing of commercial units. Environmental safeguards address groundwater concerns, and heritage considerations are incorporated to protect nearby assets. The strategy promotes sustainable transport options, reducing car dependency and minimizing traffic congestion.	No	01792	Councillor Fallart
SP H1: Housing development sites	The Councillor objects to redeveloping Sainsbury's on Green Lanes for 368 homes and highlights several concerns: the impact on Bush Hill Park residents' supermarket access, leading to increased congestion at other locations; inadequate consideration of local infrastructure like schools and doctor surgeries; reduced parking affecting nearby streets; unclear commercial servicing plans; environmental risks due to	Comments noted. The proposed site allocation of Sainsbury's on Green Lanes for 368 new homes, while re-providing the supermarket with reduced parking, aligns with the National Planning Policy Framework (NPPF) as it supports sustainable urban growth. 	<p>proximity to potable groundwater abstraction; and the potential loss of green space and impact on nearby heritage assets.</p>	<p>healthcare facilities, and ensures efficient servicing of commercial units. Environmental safeguards address groundwater concerns, and heritage considerations are incorporated to protect nearby assets. The strategy promotes sustainable transport options, reducing car dependency and minimizing traffic congestion.</p>			
<p>SP H1: Housing development sites</p>	<p>The Enfield Society argues that the Local Plan's policy for increasing housing supply is not consistent with London Plan Policy H1 and would cause significant harm to Enfield's historic and natural heritage. They believe that the dramatic increase in housing, especially on Green Belt sites, is unjustified and not necessary for meeting housing needs. They also criticize the 'capacity-led' approach for including valued open spaces as development capacity and raise concerns about the long-term sustainability of housing delivery, citing that many proposed sites will take years to develop.</p>	<p>Comments noted.</p> <p>The Council's Local Plan is legally compliant and sound, developed in accordance with national policies and extensive evidence bases and Viability documents. The Plan aligns with the National Planning Policy Framework (NPPF), emphasizing sustainable development, community engagement, and statutory requirements. It aims to balance increased housing supply with the protection of heritage and green spaces. The Local Plan aligns with the London Plan Policy H1 by identifying and utilizing available capacity for housing, supported by the Strategic Housing Land Availability Assessment (SHLAA). The Plan includes balanced development proposals that respect the Green Belt's integrity. It incorporates measures for environmental enhancement and accessibility, ensuring compliance with the NPPF's Green Belt policies. Compensatory green spaces and improved public access are part of the strategic approach to mitigate any potential impacts. Policies within the Plan, including DE11 and strategic site allocations, integrate detailed assessments to minimize and mitigate impacts on heritage assets and Conservation Areas. The IIA provides a thorough evaluation of potential effects, ensuring that development respects Enfield's historic character. The Plan has been developed with extensive public consultation and stakeholder engagement, ensuring community input and adherence to statutory requirements. It promotes sustainable development by enhancing biodiversity, climate resilience, and public health through green infrastructure projects. Viability assessments demonstrate that the whole plan is financially feasible and will positively contribute to the local economy. This ensures that housing targets are met without excessive reliance on Green Belt development, aligning with both local and regional growth strategies. The Plan ensures a sustained housing supply through strategic brownfield site development, reducing the need for Green Belt encroachment. Sites like Meridian East are planned for long-term housing delivery, supporting continuous growth beyond 2041.</p>	<p>No</p>	<p>01794</p>	<p>Enfield Society</p>
<p>SP H1: Housing development sites</p>	<p>The NHS London Healthy Urban Development Unit acknowledges the challenge Enfield Council faces in meeting its target of 34,000 homes within the plan period and has provided detailed comments on the allocated housing sites.</p>	<p>Comments noted.</p> <p>The Council greatly value the input from the NHS London Healthy Urban Development Unit, North Central London Integrated Care Board (NCLICB), and NHS providers. 		opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.			
SP H1: Housing development sites	Joanne McCartney, AM for Enfield and Haringey, supports : Making Enfield 'the workshop of London' by supporting quality jobs and expanding workspace in town centres. Efforts to tackle disparities between the east and west of the borough.	Support noted.	No	01896	Joanne McCartney, AM for Enfield and Haringey,
SP H1: Housing development sites	Vistry Group references relevant commentary on the number of homes for key sites in the site-specific considerations section, providing detailed feedback on housing capacities and other related aspects for these sites.	The council appreciates Vistry Group's support and acknowledges the concerns regarding. The Council will continue to engage with Vistry Group and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01897	Vistry Group
SP H1: Housing development sites	Taylor Wimpey supports the release of Green Belt land for the large-scale new settlement at Site Allocation SA11, which includes approximately 5,500 homes, with 3,350 of these expected within the plan period. They find this approach fully justified based on their detailed representations and the evidence presented elsewhere.	Support noted. The Council appreciate Taylor Wimpey's support for the release of Green Belt land at Site Allocation SA11 for a large-scale new settlement	No	01919	Taylor Wimpey
SP H1: Housing development sites	Nicholas Holdings Ltd and the consortium of landowners for Site Allocation SA10.2 have raised concerns about Policy H1, which identifies housing development sites. They note a discrepancy between the estimated capacity of 3,600 homes mentioned in Policy H1 for the Chase Park urban extension (including SA10.2) and the 3,700 dwellings referred to in Policy PL10. Policy H1 lacks specific details on the number of dwellings allocated for SA10.2, particularly the potential additional capacity in the western part of the site. This potential, mentioned in Appendix C of the Reg 19 Local Plan, is not reflected in Policies H1, PL10, or the illustrative framework plan (Figure 3.12). The consortium argues that this inconsistency requires a more detailed policy to address housing delivery on the land west of Arnold House and to align with the overall development strategy.	The plan acknowledges that Policy PL10 refers to "around 3,700" homes for the Chase Park urban extension, which is a flexible figure intended to accommodate the large-scale and complex nature of the development. The estimated capacity of 3,600 homes identified in Policy H1 is consistent with this flexible approach and reflects the current understanding of development potential. Regarding the potential for additional development at the western part of SA10.2, including the area to the west of Arnold House, this is recognized as a possible future opportunity. The plan notes the potential for further residential capacity, which will be carefully reviewed in the forthcoming masterplanning phase. This approach ensures that any additional development is thoroughly considered, taking into account environmental constraints and sustainability requirements. The plan's consistency across policies and appendices is maintained, and the need for detailed policy amendments at this stage is not deemed necessary. The additional housing potential and the provision of a local centre will be addressed in subsequent stages of the masterplanning process, ensuring alignment with the overall development strategy and policy objectives.	No	01927	Nicholas Holdings Ltd
SP H1: Housing development sites	The Meridian Water team supports the ambition to deliver 33,280 new dwellings over the Plan period from 2019 to 2041, acknowledging the clear evidence of a policy-compliant 'brownfield first' approach in Table 8.1. They note the estimated capacities of Meridian Water sites and seek further dialogue with the LPA to refine these figures, ensuring they reflect up-to-date evidence and are deliverable. The team emphasizes that the capacity figures should be considered as	The supportive response is welcomed regarding the ambition to deliver 33,280 new dwellings over the Plan period 2019 to 2041. The Council appreciates their recognition of the 'brownfield first' approach, as outlined in Table 8.1. This approach is comprehensively justified in the Spatial Strategy and Overall Approach Topic Paper, which emphasizes sustainable development through the optimal use of previously developed land. The council acknowledges their comments regarding	No	01945	Meridian Water (LBE)

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	minimums and should be tested and refined through future masterplanning, optimizing brownfield capacity in line with London Plan Policy D3.	the estimated capacities of Meridian Water sites and are open to refining these figures based on up-to-date evidence. The Site Allocation Topic Paper provides detailed justification for the allocation of these sites and recognises a commitment to a design-led approach as stipulated by London Plan Policy D3. The council is committed to working collaboratively and are open to further dialogue. To this end, the council will establish a Statement of Common Ground to ensure that the policy and associated site allocations are both robust and deliverable.			
SP H1: Housing development sites	Lansdown, promoters of land at Trent Park Equestrian Centre within the Chase Park site allocation (SA 10.1), support Policy H1 on Housing Development Sites, which includes housing for older persons. However, they believe there is a typo in the Estimated Capacity box, which mentions "including 95 homes for older persons," as this does not align with the overall approach of SA10.1, which does not specifically reference these homes.	The Council will continue to engage with the promoter and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01998	Lansdown
SP H1: Housing development sites	London borough of Waltham Forest (LBWF) broadly support the approach in the Homes for All chapter. Under the Duty to Cooperate, they will continue working and supporting colleagues at the London Borough of Enfield on cross-boundary housing delivery sites, particularly within Meridian Water (PL5).	The Council welcomes the broad support for the approach outlined in the Homes for All chapter. We greatly value the commitment to working with Enfield under the Duty to Cooperate, particularly regarding cross-boundary housing delivery sites within the Meridian Water area (PL5). Ongoing collaboration and support are crucial as both Enfield and Waltham Forest aim to address housing needs and deliver sustainable communities across our boroughs. This partnership is essential for achieving our shared goals and ensuring effective housing strategies.	No	02006	London borough of Waltham Forest
SP H1: Housing development sites	The Edmonton and Winchmore Hill Conservative Association objects to the redevelopment of the Sainsbury's site on Green Lanes, citing several concerns that challenge the proposal's soundness. They argue that the dense housing development of 368 new homes, coupled with minimal parking for the supermarket, will exacerbate parking issues and cause congestion in surrounding streets. The existing car park is crucial for local residents' weekly shopping trips, and reduced parking could lead to increased traffic at other supermarkets. Additionally, there are concerns about the site's proximity to potable groundwater, which could affect building foundations, and the potential impact on nearby Grade II listed and other heritage assets. The loss of surrounding green space is also seen as contrary to Strategic Policy BGG. Furthermore, the adequacy of servicing for commercial units, including the supermarket, remains unclear. These issues lead to the belief that the site should be removed from the plan.	The Edmonton and Winchmore Hill Conservative Association's objections to the redevelopment of the Sainsbury's site on Green Lanes are addressed as follows: Impact on Surrounding Residential Areas: The Housing Topic Paper 2024 outlines the necessity of increasing housing supply to meet the Borough's growing needs. The proposed 368 new homes are in line with strategic objectives for high-density developments in urban areas. Mitigation measures, including robust transport planning and parking management strategies, are designed to address potential impacts on surrounding streets. Parking Concerns: The Site Allocation Topic Paper acknowledges the need for effective parking solutions. The redevelopment includes plans to re-provide the supermarket with similar floor space but aims to incorporate sustainable transport options. Parking provision will be reviewed to balance residential and commercial needs, ensuring that local congestion is managed and displacement of shoppers is minimized. Environmental Considerations: The Environment Agency's concerns about the proximity to potable groundwater are noted. The development proposal includes comprehensive site assessments and mitigation strategies to address potential impacts on groundwater and building foundations, in line with environmental protection standards. Heritage Impact: The development proposal carefully considers the	No	01784	Edmonton and Winchmore Hill Conservative Association

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
		<p>proximity to Grade II listed and non-designated heritage assets. The design will adhere to conservation guidelines to minimize visual and physical impacts on these heritage sites. Green Space: While the proposal does involve some loss of green space, the Site Allocation Topic Paper details plans for compensatory green space within the development and improvements to existing nearby parks to enhance local amenities. Servicing for Commercial Units: The development will include detailed plans for servicing arrangements to ensure that the supermarket and other commercial units are adequately supported without disrupting local traffic flow. The Site Allocation aligns with Enfield's strategic housing and development goals, balancing residential growth with infrastructure improvements and environmental considerations.</p>			
SP H1: Housing development sites	<p>The feedback raises concerns about the soundness of Enfield's housing target, questioning whether the capacity-based approach genuinely reflects available capacity without resorting to Green Belt release. It suggests that the "exceptional circumstances" clause used to justify Green Belt development is influenced by policy, rather than a pure assessment of capacity, making the target appear politically driven. The feedback contrasts Enfield's approach with other boroughs that have maintained or reduced their targets, warning that Enfield's higher target might lead to meeting other boroughs' needs while still leaving local housing issues unsolved. Concerns are also raised about the uncertainties in future housing requirements due to fluctuating demographic trends, international migration, and the reliability of the Standard Method for assessing need. The feedback concludes that the housing target should be seen as a flexible projection rather than a fixed figure, urging the council to prioritize brownfield development and hold off on Green Belt release until absolutely necessary. This flexibility would allow the council to adapt quickly to changing trends and avoid unnecessary damage to the borough.</p>	<p>The Enfield Housing Topic Paper (2024) justifies the Council's capacity-based approach to setting a housing target, which includes releasing some Green Belt land under "exceptional circumstances." This decision is based on detailed assessments of housing needs and available land, aiming to address the borough's significant housing shortfall. The Council emphasizes the importance of flexibility and regular updates to the Local Plan to adapt to changing demographic trends and housing demands. While prioritizing brownfield development, the inclusion of Green Belt land is seen as necessary to meet the objectively assessed housing needs comprehensively.</p>	No	01714	Michael Clary
SP H1: Housing development sites	<p>Residents object to the proposal to close Oakwood Station Car Park and build 52 dwellings on the site, arguing it fails to meet the National Planning Policy Framework (NPPF) soundness test. They contend that the closure is inconsistent with the Local Plan's promotion of sustainable transport, as Oakwood is the only street-to-train level access station between Cockfosters and Finsbury Park, crucial for those with mobility issues. Increased disabled bays will not compensate for the overall loss of parking spaces. Additionally, the closure will displace cars into neighboring streets, worsening parking issues for residents and increasing emissions. The proposed housing blocks are considered unsightly and will detract from the listed Oakwood Station building. Furthermore, the development would increase housing density without additional services like GP surgeries and schools, exacerbating the strain on local infrastructure.</p>	<p>The objection to closing Oakwood Station Car Park and building 52 dwellings, claiming it fails the NPPF soundness test, is addressed in the Site Allocation Topic Paper for Regulation 19. The proposal supports sustainable transport by increasing residential capacity near transit hubs, but the paper also acknowledges the need for accessibility measures for those with mobility issues. While additional disabled bays are planned, concerns about parking displacement and emissions must be mitigated. The development's design must complement Oakwood Station's heritage. Additionally, the plan ensures infrastructure like GP surgeries and schools will support increased housing density, aiming for balanced and sustainable community growth.</p>	No	01779	Peter Fallart

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP H1: Housing development sites	Residents object to the redevelopment of the Sainsbury's site on Green Lanes for 368 new homes, arguing it fails the NPPF soundness test. The proposed supermarket re-provision with minimal parking will make it difficult for Bush Hill Park ward residents to use, potentially shifting trade and increasing congestion at other supermarkets. The impact on surrounding residential areas, particularly regarding the provision of schools and doctors' surgeries, has not been adequately considered for such a dense development. Reduced parking will likely lead to increased parking difficulties for nearby residents and their visitors. Additionally, there are concerns about adequate servicing for commercial units, including the supermarket. The Environment Agency has raised concerns about the site's proximity to potable groundwater abstraction, which may affect building foundations, but the plan lacks safeguards to mitigate this risk. Finally, the impact on nearby Grade II listed buildings and non-designated heritage assets has not been adequately addressed, and the potential loss of surrounding green space would be detrimental to residents.	The objections to redeveloping the Sainsbury's site on Green Lanes for 368 new homes, including concerns about meeting the NPPF soundness test, are addressed in the Site Allocation Topic Paper for Regulation 19. The redevelopment supports sustainable urban growth by increasing housing density in areas well-served by public transport, thereby reducing car dependency (sections 4.3 and 6.2). However, the paper emphasizes the need to ensure adequate infrastructure and services, such as schools and healthcare, to support the population increase (section 5.4). Reduced parking aims to encourage sustainable transport, though planning is needed to mitigate parking issues and ensure efficient servicing of commercial units (section 4.3). Environmental concerns about groundwater protection are recognized, with measures to safeguard potable water sources (section 7.1). The plan also accounts for the impact on heritage assets and green spaces, with provisions to preserve the character of listed buildings and maintain community green spaces (section 6.5).	No	01779	Peter Fallart
SP H1: Housing development sites	Resident object to Policy H1 and suggest it is removed.	The Enfield Housing Topic Paper (2024) justifies the Council's capacity-based approach to setting a housing target, which includes releasing some Green Belt land under "exceptional circumstances." This decision is based on detailed assessments of housing needs and available land, aiming to address the borough's significant housing shortfall. The Council emphasizes the importance of flexibility and regular updates to the Local Plan to adapt to changing demographic trends and housing demands. While prioritizing brownfield development, the inclusion of Green Belt land is seen as necessary to meet the objectively assessed housing needs comprehensively.	No	01838	John James
SP H2: Affordable housing	Vistry Group supports the principle of 50% affordable housing on publicly owned land and 35% for other major developments, aligning with the London Plan (2021), and the 50/50 tenure split between intermediate and social rented housing. They aim to maximize affordable housing delivery through partnerships, sometimes achieving 100% affordable housing schemes. However, Vistry suggests draft policy H2 should consider site-specific circumstances impacting affordable housing delivery and explicitly state that the Viability Tested Route is available to justify lower affordable housing levels when necessary, reflecting market conditions and financial challenges.	Comments noted. The council's strategy is justified. Policy is clear that the provision of affordable homes is subject to viability. Council's approach to support safe, strong and cohesive communities and improve the quality of housing in Enfield and deliver a range of homes and increase access to affordable, good quality homes is supported. Policy helps support approaches to secure housing for critical key workers on land owned by Government departments and agencies.	No	01897	Vistry Group
SP H2: Affordable housing	Places for London broadly support Policy H2. However, Section 1 of the policy outlines that affordable housing will be measured based on 'habitable rooms', with Section 2 stating that it will be calculated based on 'gross housing floorspace' shortly afterwards. Places for London therefore strongly request clarity on which approach the Council intend to use to measure affordable housing provision to prevent confusion,	Comments noted. The council acknowledges the importance of collaboration and agrees to work together with Places for London. We will formalize our mutual understanding and agreements through a Statement of Common Ground, ensuring that all recommendations and concerns are addressed cohesively within the planning framework. This	No	01937	TfL Places for London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP H2: Affordable housing	<p>and further suggest that this should be measured in habitable rooms, as per Paragraph 4.5.3 of London Plan.</p> <p>NHS Property Services (NHSPS) acknowledges the Local Housing Need Assessment (2020) as part of the evidence base for the Draft Local Plan, which considers the housing needs of various groups, including key workers. While NHSPS does not find Draft Policy H2 unsound, they recommend explicitly reflecting the need for key worker housing in the policy wording or future supplementary documents or guidance. They emphasize the importance of affordable housing for NHS staff and other health and care providers to support the sustainability of the NHS, as proximity to affordable housing affects recruitment and retention. NHSPS suggests the Council engage with local NHS partners, include the need for affordable housing for NHS staff in future housing needs assessments and other relevant studies, and consider this need in site selection and allocation policies, especially near large healthcare employers.</p>	<p>collaborative approach will help us effectively accommodate growth, enhance sustainable travel, and support higher density development in areas with high transport accessibility.</p> <p>The Council appreciates feedback from NHS Property Services and acknowledges the importance of addressing the housing needs of key workers, including NHS staff. Draft Policy H2, supported by the Local Housing Need Assessment (2020), the Enfield Housing Topic Paper (2024), and the Site Allocation Topic Paper for Regulation 19 (2024), provides a comprehensive framework for meeting these needs. The Council recognizes that affordable and accessible housing is crucial for the recruitment and retention of NHS staff, ensuring sustainable healthcare services. The Council will continue to engage with local NHS partners to address housing needs effectively, ensuring affordable housing for NHS staff is included in future assessments. The Infrastructure Delivery Plan will be regularly updated to reflect these needs. Ongoing dialogue and collaboration will refine policy details to support key workers' housing needs, with the Council welcoming the opportunity to work together through a Statement of Common Ground.</p>	No	01985	NHS Property Services (NHSPS)
SP H2: Affordable housing	<p>Policy H2 proposes a minimum of 50% affordable housing for rural Placemaking Areas like Crews Hill. Paragraph 8.18 of the supporting text justifies this target based on findings from the Whole Plan Viability Assessment, which indicated that greenfield sites could support higher affordable housing levels due to their viability and potential for substantial developer contributions. However, the 2023 Viability Update indicates that development at Crews Hill is currently "marginal," with residual values below the benchmark land value, suggesting challenges in achieving the 50% target. The update calls for a flexible approach to affordable housing in Crews Hill, especially in the early phases, and highlights concerns about additional costs such as S.106 contributions and site remediation that could further impact viability.</p>	<p>The Council acknowledges the concerns regarding the viability of achieving a 50% affordable housing target at Crews Hill, the Enfield Viability Update (August 2023) presents a nuanced view of development potential. The update confirms that while development at Crews Hill is currently assessed as "marginal" with residual values below the benchmark land value, this does not preclude the possibility of meeting high affordable housing targets over time. The report highlights that development viability can be influenced by various factors, including market conditions and strategic planning adjustments. Moreover, the Update recognises that, despite current viability challenges, the Council remains committed to ensuring that the affordable housing target reflects both current and future market conditions. It is also important to consider that the 50% target is an aspirational figure aimed at driving high standards of affordable housing provision where feasible. The Council is prepared to adopt a pragmatic approach, particularly in the initial phases of development, allowing for flexibility in affordable housing delivery while aiming to gradually meet the higher targets as market conditions improve. Regarding additional financial contributions and site-specific challenges such as land remediation costs, these factors are taken into account within the broader viability framework. The Council remains open to reviewing and adjusting planning policies and contributions as necessary to support sustainable development and address viability concerns. Therefore, while immediate achievement of the 50% target may face practical challenges, the Council's approach ensures that development remains viable and progressively aligns with the affordable housing goals set forth.</p>	No	02001	Tile Kiln Farm

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP H2: Affordable housing	London borough of Waltham Forest (LBWF) note that Enfield's guideline mix of 50% social/affordable rented housing and 50% intermediate housing contrasts with Waltham Forest's 70% low-cost affordable rent and 30% intermediate housing products.	The Council acknowledges the London Borough of Waltham Forest's (LBWF) note regarding the difference in affordable housing mix guidelines. Enfield's guideline mix of 50% social/affordable rented housing and 50% intermediate housing aims to address local housing needs as identified in the Enfield Local Housing Needs Assessment 2020. This approach is justified to ensure a balanced provision of affordable housing options catering to diverse community needs. The Council welcome ongoing dialogue and collaboration with LBWF to align our strategies and meet the housing needs across our boroughs effectively.	No	02006	London borough of Waltham Forest (LBWF)
SP H2: Affordable housing	Warmerden & Co (Crews Hill) Ltd acknowledges the importance of affordable housing but raises concerns about the feasibility of the 50% affordable housing requirement in Policy H2 for the Crews Hill area. They highlight that while Policy H2 sets a target of 50% affordable housing for greenfield sites like Crews Hill, the '2023 Whole Plan – Viability Update' by HDH Planning & Development indicates that development at Crews Hill is currently only marginally viable. They note that the viability assessment shows that the Residual Value for Crews Hill is below the Benchmark Land Value (BLV) and only slightly above the Existing Use Value (EUV), classifying it as 'amber' or marginal in terms of viability. Given this, they argue that a flexible approach should be taken to ensure that development remains viable, especially in the early stages. Warmerden & Co also suggests that the Council should review competing development costs such as Section 106 contributions, Community Infrastructure Levy (CIL) rates, and costs associated with potentially contaminated land at Crews Hill. They support the release of Crews Hill from the Green Belt for sustainable development but stress the need for the plan to be both effective and deliverable throughout the plan period, in line with National Planning Policy Framework (NPPF) guidelines.	The '2023 Whole Plan – Viability Update' justifies that greenfield sites, particularly in higher-value areas of the Borough, can support substantial levels of affordable housing, up to 50%, due to their higher residual values compared to urban sites. Despite current marginal viability at Crews Hill, these sites have the potential to achieve and exceed the 50% target as market conditions improve. The report acknowledges the sensitivity of viability assessments to market changes, anticipating that improved conditions will enhance financial viability. Policy H2 incorporates the Viability Tested Route (VTR) to address site-specific viability issues, allowing developers to negotiate affordable housing levels based on realistic assessments. This flexible approach ensures the policy remains adaptable while striving for high affordable housing targets. The viability update accounts for development costs, including Section 106 contributions, CIL rates, and land remediation, supporting the feasibility of higher affordable housing on greenfield sites, aligning with the Local Plan's long-term goals for a sustainable and inclusive community at Crews Hill.	No	01730	Warmerden & Co (Crews Hill) Ltd
DM H3: Housing mix and type	Enfield's Housing Needs Assessment (2020) highlights a significant increase in median house prices in Enfield, from £114,000 in 2000 to £319,000 in 2019, making homes over 13 times the average annual earnings. The Hadley Wood Neighbourhood Plan indicates a distinct local market with nearly 70% of homes having four or more bedrooms and average sales prices exceeding £1.24m in 2018. The Duchy of Lancaster recognises that the site offers an opportunity to address local demographic needs by providing a mix of housing types, including smaller family homes and downsizing options, along with affordable housing, ensuring quality and sustainability.	Comments noted. The Council appreciate the support and comments from the Duchy of Lancaster regarding the Draft Local Plan and the site at Camlet Way. The strategic allocation of housing sites, including RUR.02, is guided by robust evidence and a comprehensive understanding of local housing needs, as detailed in the Site Allocation Topic Paper, Exceptional Circumstances Topic Paper, and ELP Spatial Strategy and Overall Approach. The early delivery of Camlet Way within the first five years will indeed bolster our housing supply and help meet the accrued deficit. The Council welcome further engagement and a statement of common ground to ensure the successful delivery of this important site.	No	01672	Duchy of Lancaster

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
DM H3: Housing mix and type	<p>Better Homes Enfield argues that the draft Enfield Local Plan (ELP) suggesting 61% of new homes should have three or more bedrooms is based on outdated demographic scenarios. Census 2021 data and other analyses indicate a lower need for larger homes, with higher demand for 1-2 bedroom units due to concealed households and an aging population. The focus on larger homes might negatively impact the delivery of affordable housing by reducing development viability. They recommend revising the housing mix to emphasize smaller units that better reflect actual needs.</p>	<p>Comments noted.</p> <p>The Council appreciate the detailed comments on the Council's Housing Topic Paper. Setting the aspirational housing mix in the Enfield Local Plan (ELP) is a policy decision informed by comprehensive evidence. The Local Housing Needs Assessment (LHNA) provided crucial insights before the Census 2021 data was available. Given the methodological differences and quality considerations in the 2021 Census data, particularly the disparity in "number of rooms" definitions from 2011, it was not appropriate to base housing mix policies solely on this data. This approach ensures our housing policies remain robust and effective. For further details, the ELP Spatial Strategy and Overall Approach Topic Paper, along with the Enfield Housing Topic Paper 2024, provide a comprehensive foundation for our housing targets, prioritizing brownfield development while ensuring that limited Green Belt releases are justified and necessary to meet the borough's comprehensive housing needs.</p>	No	01708	Better Homes Enfield
DM H3: Housing mix and type	<p>The draft Enfield Local Plan (ELP) emphasises that 61% of new homes should have three or more bedrooms, based on outdated demographic data. Better Homes Enfield suggests there is a lower need for larger homes and a higher demand for 1-2 bedroom units due to concealed households and an aging population. Better Homes Enfield recommend revising the housing mix to reflect actual needs.</p>	<p>Comments noted.</p> <p>The Council welcome the detailed comments from Better Homes Enfield on the council's housing topic paper. The aspirational mix of housing in the ELP is a policy choice informed by comprehensive evidence. The policy response to the LHNA evidence is distinct from the evidence itself. Enfield's LHNA was completed before the 2021 Census data became available in January 2023. Given significant quality and methodological considerations with the 2021 Census data, particularly regarding "number of rooms," it was deemed inappropriate to base housing mix policies on this new data.</p>	No	01708	Better Homes Enfield
DM H3: Housing mix and type	<p>Better Homes Enfield's representation on the draft Enfield Local Plan (ELP) highlights concerns about exceeding London Plan 2021 housing targets, advocating for 23,351 to 29,431 homes focused on brownfield sites without Green Belt release. They argue the housing mix should prioritize smaller units due to outdated data suggesting a need for larger homes and recommend revising policies to enhance affordable housing delivery by reducing the focus on family-sized homes. They also express doubts about the viability of delivering 50% affordable housing and infrastructure contributions at strategic sites, citing a lack of detailed assessments and stakeholder engagement. Additionally, they call for the inclusion of policies to ensure high-quality Houses in Multiple Occupation (HMOs) and request participation in examination hearings to address these concerns comprehensively.</p>	<p>Comments noted.</p> <p>The Council appreciate Better Homes Enfield's detailed representation on the draft Enfield Local Plan (ELP). The housing targets in the ELP are based on extensive assessments to meet Enfield's specific needs while aligning with regional policies. Although the targets exceed the London Plan 2021, they address the borough's unique challenges, including affordability and housing mix. While the focus on brownfield sites remains a priority, some Green Belt release is necessary to meet the overall housing demand. The use of 2017 SHLAA data, despite the availability of newer Census data, was due to significant methodological differences and quality considerations that precluded its immediate use. The emphasis on family-sized homes is a policy decision informed by the Local Housing Needs Assessment (LHNA), which identified a significant need for such units. However, the Council acknowledge the importance of smaller units and the policy sets out a blended approach. The viability of delivering 50% affordable housing and infrastructure contributions at strategic sites like Chase Park and Crews Hill is being carefully evaluated through ongoing financial</p>	No	01708	Better Homes Enfield

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
DM H3: Housing mix and type	The Enfield Society contends that the Local Plan's reference to an "appropriate mix of dwelling types and size" per the Local Housing Needs Assessment (2020) is inconsistent with the London Plan, which treats London as a single housing market area and does not mandate individual borough housing needs assessments. They argue that Enfield's approach of emphasizing larger homes (3- and 4-bedrooms) in Green Belt areas like Crews Hill and Chase Park diverges from other boroughs' practices and risks significant harm to historic landscapes.	assessments and stakeholder engagements. The Council also recognize the need for policies to ensure high-quality Houses in Multiple Occupation (HMOs) and are committed to incorporating these into the ELP. Comments noted, but we disagree with the assertion that the policy is inconsistent with the London Plan. The Local Housing Needs Assessment (LHNA) 2020 is specifically designed to address the unique housing needs of Enfield, in line with the National Planning Policy Framework (NPPF). This approach is essential for tailoring solutions that reflect local circumstances, ensuring that the specific housing requirements of Enfield's residents are met effectively. The LHNA provides a robust evidence base that justifies the emphasis on a mix of dwelling types, including larger family homes, to address identified local needs.	No	01794	Enfield Society
DM H3: Housing mix and type	McCarthy and Stone note a contradiction between Policy H3 and Policy DE13 in the Enfield Local Plan regarding the standards for accessible housing. Policy H3 requires at least 10% of new dwellings to meet the M4(3) wheelchair accessible dwelling standard, while Policy DE13 mandates that 10% of units should be wheelchair accessible or easily adapted to meet the M4(2) standard. They argue that these policies are contradictory and need clarification. Additionally, they highlight that according to national guidance, policies for wheelchair accessible homes (M4(3)) should only apply to dwellings where the local authority allocates or nominates a resident. They suggest either amending Policy H3 to reflect this or deleting paragraphs 3, 4, and 5 of Policy H3, as these requirements are already addressed in Policy DE13.	The feedback regarding the accessible housing standards outlined in Policies H3 and DE13 is noted. The council acknowledge the identified contradiction between these policies and the need for clarification. In line with national guidance, the council will amend Policy H3 to ensure it specifically applies to dwellings where the local authority is responsible for allocating or nominating residents. This amendment will align Policy H3 with Policy DE13 and national standards, eliminating any inconsistency. The council appreciate their input and are committed to ensuring the Local Plan is clear, consistent, and effectively supports the delivery of accessible housing in Enfield. Further discussions with stakeholders like McCarthy and Stone will continue to be invaluable in refining our policies.	No	01867	McCarthy and Stone
DM H3: Housing mix and type	The NHS London Healthy Urban Development Unit welcomes the policy's commitment to providing minimum levels of larger and family units to prevent cramped and poor-quality accommodation. They suggest allowing flexibility to adapt to changing demand and market conditions during the plan period. They also recommend ensuring all standards, not just space standards, are adhered to by adding the following wording: "All forms of self-contained living accommodation, including the conversion of single dwellings into flats, will be required to, and where possible, exceed the internal and external space standards and amenity standards set out in the London Plan and the Nationally Described Space Standard."	Comments noted. The Council greatly value the input from the NHS London Healthy Urban Development Unit, North Central London Integrated Care Board (NCLICB), and NHS providers. The Council is committed to working collaboratively with the NHS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01872	NHS London Healthy Urban Development Unit
DM H3: Housing mix and type	Wolden Garden Centre Ltd comments on Policy H3: 'Housing Mix and Type', noting the need for an amendment to enhance development viability at Crews Hill. They propose that Point g 'ii' should be revised to state: "For affordable housing schemes on publicly owned sites and areas released from the Green Belt, a minimum of 20% of units should be two bedrooms, while 40% should meet the London Plan definition	Enfield's Viability Update (2023) confirms that while the current viability of development at Crews Hill is marginal, the long-term goal remains to meet high standards of affordable housing. The update indicates that the 50% affordable housing target, though aspirational, is crucial for driving up affordable housing provision over time. It acknowledges that immediate flexibility might be required, but this flexibility should not	No	01887	Wolden Garden Centre Ltd

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	<p>of family housing, as an average across the entire Crews Hill Placemaking Area.” This change aims to support viability, especially in early phases close to the station, where higher density is more suitable. They suggest that sites near the station may provide a lower proportion of family units, with higher proportions located further from the station to meet the overall 40% target.</p>	<p>undermine the overall aim of meeting these high targets progressively as market conditions improve. Enfield’s Housing Topic Paper (2024) supports the need for a varied housing mix but also stresses that any deviations from standard requirements should be carefully managed to ensure that the overall housing strategy remains effective. The paper highlights that achieving a balance between different types of housing is key to meeting broader housing needs while addressing site-specific constraints. Therefore, while it is understood that an adjustment in the housing mix requirements might be beneficial in the short term to address viability issues, it is crucial to maintain a focus on long-term objectives. A blanket reduction in family housing requirements could potentially undermine the strategic aim of creating a well-balanced, sustainable community. Instead, a nuanced approach that allows flexibility within specific phases or sub-areas while maintaining the overall policy aim could be more appropriate. This would ensure that the development remains aligned with both current viability constraints and long-term housing goals.</p>			
DM H3: Housing mix and type	<p>Vistry Group supports the flexibility in draft policy H3 regarding site context, location, physical characteristics, viability, and the need to optimize housing delivery. However, they question requiring the same unit size mix (20% two-bedroom, 30% family housing) for both market and affordable housing. The Local Housing Needs Assessment (2020) shows differing needs: more 3-4 bedroom market homes and more 2-3 bedroom affordable homes. Vistry suggests the policy should differentiate unit mix by tenure, as the current local plan does, to better address specific housing needs and market conditions.</p>	<p>Comments noted. The council’s strategy is justified and aligns with the NPPF by ensuring that the right homes are delivered in the right places within the Borough, taking into account site-specific contexts. Policy H3 in Enfield’s Local Plan prioritises 3-bedroom units and aims for a balanced housing mix to meet diverse local needs. The Enfield Housing Topic Paper (2024) supports this approach, highlighting the importance of providing various housing types for different demographics to create inclusive, sustainable communities. This policy is informed by up-to-date housing needs assessments and market conditions.</p>	No	01897	Vistry Group
DM H3: Housing mix and type	<p>Warmerden & Co (Crews Hill) Ltd suggests modifying Point g ‘ii’ of Policy H3, which requires that for affordable housing on publicly owned sites and Green Belt land, 20% of units must be two bedrooms and 40% must be family housing as defined by the London Plan. They propose changing this to: “For affordable housing schemes on publicly owned sites and areas released from the Green Belt, a minimum of 20% of units should be two bedrooms, while 40% should meet the London Plan definition of family housing, as an average across the entire Crews Hill Placemaking Area.” This adjustment aims to enhance development viability, particularly in the early phases of the Crews Hill development. They argue that sites close to the station, which are more suited to higher-density development, might be better served with a lower proportion of family units. In contrast, areas further from the station could provide a higher proportion of family units to meet the overall 40% target. Warmerden & Co supports the long-term vision of creating a sustainable community at Crews Hill but emphasizes that the plan must remain viable and deliverable throughout the</p>	<p>Comments noted. The ‘Enfield Local Housing Needs Assessment (2020)’ highlights a significant need for family-sized homes across the Borough, particularly in areas like Crews Hill. The assessment identifies a strong demand for larger, family-oriented housing to address growing family needs. Therefore, maintaining the Policy H3 requirement of 40% family housing for affordable schemes remains crucial for meeting these identified needs. The ‘Crews Hill Topic Paper (2024)’ outlines that the Crews Hill Placemaking Area (CHPA) is envisioned as a mixed-use, sustainable community. This long-term vision includes accommodating a range of housing types to create a balanced and inclusive community. While higher-density development near the station is appropriate, the policy’s aim to achieve a 40% family housing requirement is integral to ensuring that a sufficient proportion of family-sized homes is delivered throughout the CHPA, not just in specific areas. The ‘2023 Whole Plan – Viability Update’ recognises that greenfield sites, including Crews Hill, have the potential to support</p>	No	01730	Warmerden & Co (Crews Hill) Ltd

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	development period, in line with National Planning Policy Framework (NPPF) standards.	higher levels of affordable housing due to generally higher residual values. This supports the feasibility of adhering to the 40% family housing requirement. The update acknowledges that development viability is influenced by various factors, but greenfield sites are positioned to accommodate ambitious housing targets. The flexibility of the Viability Tested Route (VTR) within Policy H3 allows for site-specific adjustments without compromising overall policy objectives. While the viability update indicates that development near the station might be more challenging, it does not justify reducing the overall family housing percentage. Instead, the VTR allows for adjustments on a case-by-case basis to address specific viability concerns. Reducing the family housing requirement in one area could undermine the broader objective of delivering sufficient family homes across the entire CHPA. Maintaining the 40% family housing requirement supports the goal of creating a diverse and sustainable community, as outlined in the Enfield Local Plan and the Crews Hill Topic Paper. This approach ensures that the community is not only economically viable but also meets long-term social and demographic needs. While Warmerden & Co's proposal aims to enhance early-phase viability, the existing policy framework, supported by the Local Housing Needs Assessment and Viability Update, provides a comprehensive approach to balancing housing needs and development viability. The 40% family housing target remains essential to fulfilling identified needs and ensuring a sustainable, inclusive community at Crews Hill. The VTR within Policy H3 provides necessary flexibility to address site-specific challenges while upholding the overall policy objectives.			
DM H4: Small sites and small housing development	The GLA's response points out that the LP2021 small sites target is 3,530 homes from 2019 to 2029, with a forward target of 4,236 homes for 2029-2041. However, the Housing Topic Paper anticipates only 2,715 units for the latter period. The GLA encourages a more positive approach to increase small site deliveries, in alignment with Policy H2 of LP2021.	Comments noted. The Council acknowledges the Mayor's initiative to incentivize small site delivery and ensures alignment with national planning guidelines. Paragraph 72 of the NPPF supports realistic windfall allowances, and Enfield's updated evidence justifies its proposed windfall allowance beyond the outdated London SHLAA 2017 data. Policy H4 reflects Enfield's commitment to small site growth, aiming for 353 new homes annually. To address concerns, the Council proposes a minor modification to the monitoring framework to enhance identification and monitoring of small site deliveries, ensuring alignment with growth objectives and maintaining transparency and accountability.	No	00120	Greater London Authority
DM H4: Small sites and small housing development	Hadley Wood Neighbourhood Planning Forum raises concerns regarding Policy H4 of the Enfield Local Plan (ELP), which calls for development intensification within 800m of a station. They argue that this is inconsistent with the London Plan (2021) Policy H1, which promotes optimization of areas around stations and small sites specifically on brownfield land. They emphasize the need for the ELP to align with the London Plan by applying intensification policies only to	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the HWNPF to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01311/01669/0 1854/01856/01 863/01864	Hadley Wood Neighbourhood Planning Forum

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	brownfield sites to prevent unassessed far-reaching impacts. The forum suggests amending the ELP to reflect this consistency.				
DM H4: Small sites and small housing development	The Enfield Conservative Group suggests the following modifications to make the Draft Plan sound and legally compliant, clarify Policy Wording to focus on Brownfield Sites: Apply H4, section 2 only to brownfield sites to align with London Plan policy H1.	Comment noted. This change is not considered to be necessary to make the policy sound.	No	01670	Enfield Conservative Group
DM H4: Small sites and small housing development	The EnCaf Land Use Working Group (ELUWG) acknowledges the important role of small sites in housing delivery in Enfield but argues that Policy H4 is neither legally compliant nor sound. They highlight that small sites have significantly contributed to housing delivery in recent years, yet Policy H4 fails to conform to the London Plan's requirements and lacks clarity in distinguishing between different types of small sites, such as residential gardens and brownfield sites. The policy does not adequately reflect the need for family-sized homes or community-led development and self-build opportunities as required by the National Planning Policy Framework (NPPF). The ELUWG also criticizes the Enfield Character of Growth Study as overwhelming and disproportionate, making it difficult for smaller developers to navigate. They suggest that Policy H4 be modified to better align with the London Plan and NPPF requirements, incorporating clearer definitions and ensuring the protection and provision of family-sized homes.	Comments noted. The council welcomes ENCAF's comments on Policy H4 and acknowledge their concerns around the challenges of delivering family homes on small sites. Policy H4 is considered to be in conformity with the London Plan and seek to support small site delivery, with the Character of Growth evidence setting out positive examples of neighbourhood change in Enfield. However, the council will continue to review trends in delivery from small sites through its annual monitoring work and will consider whether updates are required to reflect sustained trends in small site delivery in Enfield.		01676	Enfield Climate Action Forum
DM H4: Small sites and small housing development	Better Homes Enfield's representation on the draft Enfield Local Plan (ELP) highlights several concerns, including housing targets that exceed London Plan 2021 requirements, suggesting a need for 23,351 to 29,431 homes focused on brownfield sites without Green Belt release. They recommend revising the housing mix to prioritize smaller units due to outdated data favoring larger homes. The approach to affordable housing, particularly the emphasis on larger family-sized homes, should be adjusted to enhance delivery. They also raise concerns about the viability of delivering 50% affordable housing and high infrastructure contributions at strategic sites, citing a lack of detailed assessments and stakeholder engagement. Additionally, they criticize the ELP's approach to small site housing delivery for inconsistencies and underestimations, recommending protections for family-sized homes and encouraging their provision on small sites. Better Homes Enfield calls for reassessing housing targets, revising the housing mix, enhancing affordable housing delivery, conducting detailed assessments, engaging stakeholders, and including policies for small sites to ensure the plan's soundness and alignment with regional policies and needs. They also request participation in examination hearings to address these concerns comprehensively.	Comments noted. The Council acknowledge Better Homes Enfield's detailed representation on the draft Enfield Local Plan (ELP). The housing targets, although exceeding the London Plan 2021 requirements, are informed by thorough evidence to address Enfield's specific needs. We prioritize brownfield development but recognize some Green Belt release is necessary to meet demand. The housing mix focuses on larger homes based on Local Housing Needs Assessment (LHNA) data. The Council appreciate the suggestion to prioritize smaller units. Affordable housing delivery and infrastructure contributions at strategic sites like Chase Park and Crews Hill are subject to ongoing financial assessments and stakeholder engagement to ensure viability.	No	01708	Better Homes Enfield

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
DM H4: Small sites and small housing development	The Home Builders Federation (HBF) acknowledges that the London Plan targets 3,530 homes in Enfield on sites of a quarter hectare or less by 2028/29. They note that Enfield expects to deliver 3,544 homes on such sites, aligning with the London Plan, plus an additional 1,897 homes on identified sites, totalling 5,441 homes over the 22-year plan period. This supports the national policy requirement for 10% of housing on small sites. HBF finds the Council's planning for completions on small sites—379 dwellings per annum (dpa) for 2019/20 to 2021/22 and 281 dpa for subsequent years—reasonable and consistent with historic trends and windfall assumptions. They acknowledge the Council's confidence in meeting the target of 3,544 homes on small sites.	Support Noted	No	01851	Home Builders Federation (HBF)
DM H4: Small sites and small housing development	The Home Builders Federation (HBF) finds Part 1b of the policy ineffective. While they generally welcome the criteria for encouraging small site developments, they believe the specified 800m radius from a train station or district/town centre boundary is too narrow. HBF recommends extending this radius to 1 km to better align with policies encouraging active travel. This extension would make walking or cycling more feasible for most people and increase potential development locations, thereby enhancing housing supply. They suggest this radius should apply to all development sizes, not just small sites.	The radius is based on that provided in London Plan Policy H2. This is considered a sound approach and to be in conformity with the London Plan. Therefore no change is needed for soundness.	No	01851	Home Builders Federation (HBF)
DM H4: Small sites and small housing development	In part 2a we recommend that the criteria 'sites with good public transport accessibility (e.g. PTAL 3-6)' is amended to avoid subjective terms like good or bad so that it reads 'sites with a PTAL of 3 – 6'.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
DM H4: Small sites and small housing development	Residents are horrified by the proposed development on the Hadley Wood Meadows, a beautiful piece of Green Belt land rich in biodiversity, including species like Red Kites. They emphasize that this area, designated as an Area of Special Character, should be preserved, citing the Local Plan's own assessment supporting its retention as Green Belt. Concerns include the lack of infrastructure to support 160 new houses, such as over-subscribed local schools, distant and overstretched healthcare facilities, insufficient local shops, high existing traffic volumes, and limited public transport services. They argue that the development is incompatible with the Garden Village nature of Hadley Wood, will cause significant environmental damage, and disregards the efforts of the Hadley Wood Neighbourhood Plan, undermining local democratic processes.	Comments noted. The "Spatial Strategy and Overall Approach" document emphasizes the importance of balancing development with environmental preservation and the need for sustainable growth within the borough. The "Exceptional Circumstances Topic Paper" outlines the stringent criteria required for Green Belt development, ensuring that such proposals meet high standards of environmental and community benefit. Additionally, the "Site Allocation Topic Paper" includes detailed assessments of infrastructure needs and the impact on local services, addressing issues like education, healthcare, and transportation to support the proposed development effectively. These measures demonstrate a commitment to sustainable and well-planned growth while mitigating potential negative impacts on the Green Belt and local infrastructure.	No	00217	Andrew Vallance-Owen

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names

These measures demonstrate a commitment to sustainable and well-planned growth while mitigating potential negative impacts on the Green Belt and local infrastructure.			
DM H4: Small sites and small housing development	Comments received from residents/businesses are contained in Table B.31_4: DM H4: Small sites and small housing development				
DM H5: Supported and specialist housing	The Enfield Over 50s Forum highlights several concerns with Policy H5 on supported and specialist housing. They argue that the Local Plan (LP) is not legally compliant or sound due to outdated census data and unclear projections of housing needs for older and younger people with specific needs. They question the practicality of affordable housing provisions in supported housing and the lack of clarity on design standards. The forum also points out the insufficient distribution of supported housing in site allocations and the need for a comprehensive assessment of housing needs. Additionally, they seek clarification on whether care accommodation counts towards housing targets.	Comments noted. The council emphasizes that the Enfield Local Plan is legally compliant and based on up-to-date evidence. The 2020 Enfield Local Housing Needs Assessment (LHNA) highlights significant demographic changes and the need for diverse housing provisions. The Supplementary Planning Document (SPD)/masterplan for Crews Hill or Chase Park will provide clearer guidelines for affordable housing, design standards, and the distribution of supported housing, ensuring alignment with identified needs and London Plan policies.	No	01765	Enfield Over 50s Forum
DM H5: Supported and specialist housing	The Home Builders Federation (HBF) argues that the policy is unsound because it is ineffective. They welcome the policy's recognition of the need for accommodation for older people, aligning with Policy H13 of the London Plan. However, they recommend strengthening the policy by referencing the Annual Borough Benchmarks for Specialist Older Persons Housing (2017-2029), which require Enfield to provide 195 units annually. HBF suggests rolling forward this annual target beyond 2028/29 and ensuring that if the benchmark is not met for any two consecutive years, applications for older persons' housing should be considered favourably.	Comments noted. The Council will consider incorporating the Annual Borough Benchmarks for Specialist Older Persons Housing (2017-2029), setting a target of 195 units annually for Enfield. Additionally, we will extend this target beyond 2028/29.	No	01851	Home Builders Federation (HBF)
DM H5: Supported and specialist housing	McCarthy and Stone express concerns regarding Policy H5, which focuses on facilitating appropriate housing for elderly and vulnerable people in Enfield. They note that while the policy promotes independent living for the elderly, it is unclear what this entails and may be interpreted as adaptable conventional housing rather than specialist housing with care. They highlight that the identified need for specialist housing for older people (both C2 and C3 use classes) in Enfield is significant, as outlined in the Enfield Local Housing Needs Assessment and other documents. McCarthy and Stone argue that the policy should more explicitly support specialist housing to meet the needs of older people, in line with the latest NPPF, which emphasizes	The detailed feedback on Policy H5 is noted. The Council appreciates their concerns and suggestions regarding the provision of housing for older people in Enfield. The council recognizes the importance of meeting the diverse housing needs of Enfield's ageing population, as highlighted in Enfield's Local Housing Needs Assessment and other supporting documents. In response to their feedback, the council will clarify Policy H5 to ensure it explicitly supports the development of specialist housing, including retirement housing, housing-with-care, and care homes, to cater to the specific needs of older residents. Regarding the requirement for older persons' housing to provide affordable housing, the council acknowledges their concerns and will	No	01867	McCarthy and Stone

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	the need to cater to different groups, including the elderly. They also object to the requirement for older persons' housing to provide affordable housing as stipulated in Policy H2 and suggest corresponding amendments to Policy H5 to align it with national policy and positively address the housing needs of older people.	review this. The Council is committed to working collaboratively with stakeholders like McCarthy and Stone to refine the plan's policies and ensure they are aligned with national guidelines and address the housing needs of all community groups effectively. The council look forward to further engagement to achieve these objectives.			
DM H5: Supported and specialist housing	The NHS London Healthy Urban Development Unit generally supports Policy H5 and its goal to address the specialist needs of vulnerable people in Enfield. However, they suggest an amendment to criterion 8 to better reflect situations where specialist housing is best provided as part of a larger development. They propose the following wording: "8. To ensure inclusive and mixed neighbourhoods and communities, proposals must not result in a harmful overconcentration of supported and specialist accommodation within the locality. Developments of this type should demonstrate how they ensure the long-term care of future residents is protected and maintained. This includes instances where proposals are situated adjacent to existing provision or would create an imbalance with other residential uses in the vicinity." Additionally, HUDU notes the lack of reference to dementia-friendly design and the needs of other specialist groups, such as those with mental health issues, learning difficulties, and autism, in the policy. They recommend reviewing the policy to address these concerns and welcome further discussion on how to cater to various sub-groups.	Comments noted. The Council greatly value the input from the NHS London Healthy Urban Development Unit, North Central London Integrated Care Board (NCLICB), and NHS providers. The Council is committed to working collaboratively with the NHS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives. DM H10: Traveller accommodation	The GLA welcomes the clarity in Policy H10 of the draft ELP, which sets out the need to deliver 21 new pitches for Gypsies and Travellers over the Plan period. However, Policy H10 does not identify specific	Comments noted. The Council addresses the needs of the Gypsy, Roma, and Traveller (GRT) community through a dedicated Traveller Local Plan, as outlined in Paragraph 8.76 of the Enfield Local Plan (ELP) and the	No	00120	Greater London Authority

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	sites to meet this need. The GLA urges LBE to make provisions for these pitches alongside other housing needs in the plan.	Local Development Scheme (LDS). A second Regulation 18 consultation, including proposed site allocations, is planned for autumn 2024, supported by an updated needs assessment to ensure compliance with the NPPF. The GLA is aware, the Council is also contributing to the GLA's Gypsy and Traveller Accommodation Needs Assessment (GTANA). Clarification will be included in the Statement of Common Ground. The Council is happy to work with the GLA to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01753	National Highways Limited
DM H10: Traveller accommodation	National Highways' response regarding the Local Plan, which aims to deliver over 33,000 homes by 2041, emphasizes the need for robust Transport Assessments (TAs) for significant housing sites, especially those near the M25 and Strategic Road Network (SRN) junctions. They stress the importance of demonstrating no residual impacts on the SRN and ensuring mitigation measures are fully funded. National Highways recommends developing TAs in consultation with them to address traffic impacts and support sustainable infrastructure. They endorse the promotion of active travel, integration of active travel networks, and reducing car dependency to mitigate impacts on the M25.	The Council acknowledges and values National Highways' response regarding its Local Plan, which aims to deliver over 33,000 homes by 2041. The council understand the need for robust Transport Assessments (TAs) for significant housing sites, particularly those near the M25 and Strategic Road Network (SRN) junctions. The council will ensure that TAs are developed in consultation with National Highways to demonstrate no residual impacts on the SRN and to guarantee that mitigation measures are fully funded. The Council is committed to promoting active travel, integrating active travel networks, and reducing car dependency to mitigate impacts on the M25. The council look forward to working closely with National Highways to support sustainable infrastructure and achieve our shared goals.	No	01794	Enfield Society
DM H10: Traveller accommodation	The Enfield Society expresses concerns over the need for a separate Gypsy and Traveller Development Plan Document (DPD), stating it is unjustified. They argue that Gypsy and Traveller accommodation needs could be met without releasing Green Belt land, suggesting other Council-owned urban sites could be suitable. They highlight that Council-owned sites would allow better management and maintenance, as no Registered Social Landlords currently manage such pitches in the area, making the Council the likely manager. They question why Policy PL5 for Meridian Water lacks provisions for this accommodation.	Comments noted. The need for a separate Gypsy and Traveller DPD is justified based on specific local circumstances and in alignment with the National Planning Policy Framework (NPPF). The Enfield Local Housing Needs Assessment (2020) and Gypsy and Traveller Accommodation Assessment provides robust evidence for this approach, emphasizing the tailored needs of the Gypsy and Traveller communities. A dedicated DPD ensures comprehensive, specialized strategies are developed. The identification of appropriate sites, including potential Green Belt releases, considers the unique requirements of these communities and the strategic planning goals of the borough. Furthermore, the Council's approach ensures that site management and maintenance are adequately addressed, leveraging Council ownership for better oversight. This method is in line with best practices and ensures sustainable, inclusive planning for all community sectors.	No	01924	Hertsmeire Borough Council
DM H10: Traveller accommodation	Support for planning to meet the identified need for 21 pitches but questioning why this requires a separate local plan. Suggestion for small-scale private sites (5-6 pitches) to ensure better management and coexistence with settled communities.	In response to Hertsmeire's objection, Enfield is proactively addressing the needs of the Gypsy, Roma, and Traveller (GRT) community with a dedicated Traveller Local Plan, as outlined in Paragraph 8.76 of the Enfield Local Plan (ELP) and the adopted Local Development Scheme (LDS). A second Regulation 18 document, including proposed site allocations, will be consulted on in autumn 2024. Enfield has commissioned an updated needs assessment to ensure compliance	No		

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
		with the National Planning Policy Framework (NPPF) and is contributing to the GLA's Gypsy and Traveller Accommodation Needs Assessment (GTANA). Potential modifications to Policies PL10 and PL11 will provide firmer guidance and allocate specific numbers of pitches. These efforts will be documented in the Statement of Common Ground to demonstrate Enfield's commitment to meeting the accommodation needs of the G&T community. These points will be included in the Statement of Common Ground to demonstrate how Enfield is addressing the accommodation needs of the G&T community through comprehensive planning mechanisms.			
DM H10: Traveller accommodation	London borough of Waltham Forest (LBWF) looks forward to the cooperation with them to identify the appropriate need and facilitate necessary provision for Traveller Accommodation.	The Council acknowledges the London Borough of Waltham Forest's (LBWF) commitment to cooperate in identifying and facilitating the appropriate need and provision for Traveller Accommodation. This collaborative approach is justified based on the Enfield Housing Topic Paper 2024 and the ELP Spatial Strategy and Overall Approach Topic Paper, which provide a comprehensive framework for addressing housing needs, including for Traveller communities. The Council look forward to working closely with LBWF to ensure suitable and effective accommodation solutions are identified and implemented.	No	02006	London borough of Waltham Forest (LBWF)
DM H10: Traveller accommodation	LB Barnet and LB Enfield are awaiting the GLA London-wide Gypsy and Traveller Accommodation Needs Assessment (GTANA) to determine future pitch needs for Gypsies, Travellers, and Travelling Showpeople, acknowledging that this may alter current plans. Barnet, part of the West London Alliance, has commissioned a draft assessment for 2022/23-2031/32, which the Mayor will use to inform policy. Enfield's draft Policy H10 aims to provide at least 21 pitches over the plan period. Both boroughs agree, as stated in the February 2022 Statement of Common Ground, that the GTANA and London Plan review will guide future planning for these communities.	The Council acknowledge LB Barnet's collaboration on planning for Gypsies, Travellers, and Travelling Showpeople. Enfield will be preparing a separate Traveller Local Plan, based on the most up-to-date assessment of need as detailed in our Housing Topic Paper 2024. Our draft Policy H10 commits to providing at least 21 pitches over the plan period. The council remain committed to using the findings from the GLA London-wide Gypsy and Traveller Accommodation Needs Assessment (GTANA), the London Plan review and its own evidence of need to guide future planning, ensuring the needs of these communities are effectively met. Further engagement and a Statement of Common Ground will be developed to address these strategic priorities.		02091	London borough of Barnet
Chapter 9: Economy					
SP E1: Employment and growth	The GLA welcomes the draft ELP's identification of a need for 304,000sqm of industrial and logistics space for its clarity. However, it recommends breaking down this need into specific use classes, particularly B2 and B8, for better clarity and planning.	Comments noted. The GLA's suggestion of breaking down the industrial space need into specific components, particularly distinguishing between Use Classes B2 and B8 is noted. However, many large industrial proposals typically encompass activities classified under both B2 and B8. Therefore, while providing more detailed sector information is worth considering, it may not significantly enhance clarity, given the common overlap between B2 and B8 activities. The GLA's desire to limit flexibility, particularly regarding Class E usage within or near Strategic Industrial Locations (SIL) and SIL replacement areas, is noted. However, it is crucial to recognize that policies with more flexibility, such as those for Meridian	No	00120	Greater London Authority

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
		Water (MW), serve strategic objectives. Restricting Class E usage in these areas may impact MW initiatives and potentially hinder planned developments. While the request to tighten policies can be considered, careful consideration is needed to balance flexibility with strategic development goals. Clarification on these matters will also be included in the Statement of Common Ground, and the Council is committed to working with the GLA to ensure these concerns are adequately addressed.			
SP E1: Employment and growth	The GLA notes that Table 9.1 in the draft ELP outlines potential sites for industrial floorspace intensification, with a total potential net gain of 293,063sqm. It recommends that the table should specify whether the sites are designated as Strategic Industrial Locations (SILs) or Locally Significant Industrial Locations (LSISs), and the use classes they could accommodate.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the GLA to clarify these points further and ensure mutual understanding and agreement on these matters.	No	00120	Greater London Authority
SP E1: Employment and growth	The GLA's response notes that the draft ELP proposes releasing three Green Belt sites for industrial use due to limited intensification opportunities. The GLA suggests adopting a plan, monitor, and manage approach for industrial intensification, prioritising brownfield sites and phasing in more challenging sites from the middle of the Plan period.	Comments noted. The GLA recommends adopting a plan, monitor, and manage approach, focusing on brownfield sites and phasing more challenging sites later in the Plan period. However, this recommendation fails to adequately address the immediate and pressing demand for housing. Merely waiting for viability assessments equates to inaction, which does not meet the urgent housing needs of our community. The Council advocates for a proactive "plan, monitor, manage" strategy, distinct from a passive "wait and see" approach. Prioritising viability assessments over immediate need and demand risks neglecting urgent housing requirements. This approach does not recognise the critical need for timely and decisive action to address housing challenges effectively. The Council acknowledges the importance of brownfield sites and agrees that they should be prioritized for development. However, relying solely on a phased approach that prioritises viability assessments overlooks the immediate need to provide housing solutions for our community. While viability assessments are essential, they should not delay or impede progress toward meeting our housing targets and addressing pressing demand. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the GLA to clarify these points further and ensure mutual understanding and agreement on these matters.	No	00120	Greater London Authority
SP E1: Employment and growth	The London Borough of Redbridge reaffirms its support for Policy E1 and its revised target to provide a minimum of 304,000 sqm net additional industrial/logistics floorspace and 40,000 sqm net additional office floorspace, an increase from previous targets. However, Redbridge notes that the text of Policy E1 no longer includes a clear overall target for additional industrial/logistics floorspace. They recommend restoring this quantitative target, as 293,013 sqm is listed as a target in Table 9.1, indicating sufficient supply for inclusion in the	Comments noted. The London Borough of Enfield acknowledges the London Borough of Redbridge's support for Policy E1 and its revised targets for industrial/logistics and office floorspace. We appreciate the recommendation to restore the quantitative target for industrial/logistics floorspace within Policy E1. The overall target for additional industrial/logistics floorspace over the plan period is clearly set out in Part 4 of Policy SS1, which aligns with the strategic	No	01603	London Borough of Redbridge

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP E1: Employment and growth	<p>policy. The supporting text of Policy E1 does clearly support the provision of 40,000 sqm net additional office space.</p> <p>The London Borough of Redbridge does not consider the plan to be unsound but suggests the following change to Policy E1, which should include a clear delivery target for industrial/logistics and office floorspace. Although the overall need for employment floorspace has increased, the Local Plan currently lacks explicit targets. Redbridge recommends restoring the quantitative target, noting that 293,013 sqm of floorspace is listed in Table 9.1, which provides sufficient supply for inclusion in Policy E1, even if some smaller sites are delivered after the plan period. The supporting text already indicates support for 40,000 sqm of net additional office space.</p>	<p>objectives of the Local Plan. The supporting text of Policy E1 continues to support the provision of 40,000 sqm net additional office space.</p> <p>Comments noted.</p> <p>The London Borough of Enfield appreciates the London Borough of Redbridge's supportive comments and suggestions regarding Policy E1. However, the Council disagree with the need for an explicit target within Policy E1 itself. The overall target for additional industrial/logistics floorspace over the plan period is clearly set out in Policy SS1. This approach ensures clarity and consistency across the Plan's strategic policies. The council remain open to further discussions to ensure mutual understanding and agreement on these matters. Clarification will be included in the Statement of Common Ground.</p>	No	01603	London Borough of Redbridge
SP E1: Employment and growth	<p>Thames Water identifies the omission of a specific policy on wastewater/sewerage and water supply infrastructure in the Enfield Local Plan (ELP). They stress the importance of aligning new development with infrastructure capacity, as outlined in the NPPF. They recommend developers engage with Thames Water early to ensure infrastructure needs are met and suggest conditions on planning permissions for developments requiring off-site upgrades. Thames Water also highlights the necessity of assessing the impact of development near sewage treatment works on residents' amenity and proposes incorporating a policy to address these issues.</p>	<p>Comments noted.</p> <p>Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.</p>	No	01680	Thames Water
SP E1: Employment and growth	<p>Thames Water supports the preferred strategy for industrial development in Enfield's Local Plan but emphasizes the need to allocate additional Green Belt sites for industrial use to meet future demands and provide flexibility. They highlight the Employment Land Review's identified needs and argue that further Green Belt release is justified under NPPF guidelines. Thames Water proposes specific sites, including land near William Girling Reservoir and King George V Reservoir, as suitable for employment development, detailing their planning history, current use, and minimal impact on Green Belt purposes. They argue these sites make a low contribution to Green Belt objectives and support urban regeneration.</p>	<p>Comments noted.</p> <p>Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.</p>	No	01680	Thames Water
SP E1: Employment and growth	<p>Thames Water supports Enfield's strategy for industrial development but emphasizes the need for additional Green Belt sites to meet future employment demands. They highlight the Employment Land Review's identified needs for 2019-2041 and argue that further Green Belt release is necessary. Thames Water proposes several sites, such as land near William Girling Reservoir, citing their low Green Belt impact and potential for employment use. They argue these sites are well-</p>	<p>Comments noted.</p> <p>Clarification will be included in the Statement of Common Ground. Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	suited for development, given their accessibility and limited impact on Green Belt purposes, and support their removal from the Green Belt.				
SP E1: Employment and growth	Thames Water supports Enfield's strategy for industrial development but emphasizes the need for additional Green Belt sites to meet future employment demands. They highlight the Employment Land Review's identified needs for 2019-2041 and argue that further Green Belt release is necessary. Thames Water proposes several sites, such as land near William Girling Reservoir, citing their low Green Belt impact and potential for employment use. They argue these sites are well-suited for development, given their accessibility and limited impact on Green Belt purposes, and support their removal from the Green Belt.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01680	Thames Water
SP E1: Employment and growth	Thames Water supports the strategy for industrial development but stresses the need for additional Green Belt sites to meet Enfield's employment needs. They emphasize the necessity for flexibility and additional capacity due to the limited available land in urban areas. They argue for the exceptional circumstances required for Green Belt release, citing the Employment Land Review's identified needs of 304,000 sqm for industrial and 40,000 sqm for office space. Thames Water proposes specific sites, like the land near King George V Reservoir, as suitable for employment development, arguing their limited Green Belt impact and potential for sustainable growth.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01680	Thames Water
SP E1: Employment and growth	Thames Water finds the new Local Plan highly valuable for future water supply and wastewater infrastructure planning. They emphasize the importance of early engagement between developers and Thames Water to understand drainage, loading/flow, and water supply requirements. Infrastructure upgrades can take years, so collaboration is crucial for detailed planning and phasing of developments. Thames Water offers a free pre-planning service to help developers identify necessary upgrades, recommending that developers include this information in their planning applications for transparency. More detailed modeling may be required to refine requirements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01680	Thames Water
SP E1: Employment and growth	On behalf of ARGO Real Estate Limited, Turley comments on the Draft Local Plan (Regulation 19, March 2024) for the London Borough of Enfield, focusing on Chapters 7 and 9. ARGO owns assets in Enfield, including an underutilized brownfield site in Eley's Estate SIL. While supporting many parts of the plan, Turley finds certain sections unsound for not meeting NPPF requirements, especially in Chapter 9. They argue the plan lacks support for emerging high-tech industries and suggest modifications to better facilitate sustainable growth in SILs and LSIS.	The Council acknowledges ARGO Real Estate Limited's feedback on the Draft Local Plan, particularly regarding Chapters 7 and 9. The Council is committed to creating a flexible, ambitious, and deliverable planning policy framework that supports sustainable growth, including the development potential of Strategic Industrial Locations (SILs) and Locally Significant Industrial Sites (LSIS). The Draft Local Plan highlights the need for a diversified economy, emphasizing support for emerging, data-driven, creative, and high-technology industries, including data centres. The ELP Spatial Strategy and Overall Approach Topic Paper underlines the integration of these sectors into designated employment areas. The Council will collaborate with ARGO Real Estate Limited to develop a statement of common ground to further clarify this support. The Draft Local Plan aligns with national policy, as	No		ARGO Real Estate Limited

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
		outlined in Paragraph 35 of the NPPF, and is backed by comprehensive employment land reviews and industrial land studies. Policy SE3 ensures high-quality design principles in all new developments within SILs and LSIS, promoting safety, sustainability, and aesthetic integration. The Council values ongoing stakeholder engagement and encourages continued dialogue to refine and enhance the policies in the Draft Local Plan, ensuring support for a diverse and resilient economy.			
SP E1: Employment and growth	Turley, on behalf of ARGO Real Estate Limited, commends the draft Enfield Local Plan's focus on economic growth but highlights missed opportunities to support emerging data-driven and high-technology industries, such as data centres, within Strategic Industrial Locations (SILs). They emphasize the need for policy modifications to recognize and promote these sectors in alignment with national and regional policies. Turley suggests that the plan should include flexible, adaptable policies to cater to evolving economic needs and stresses the socio-economic benefits of data centres, advocating for a nuanced approach to measuring industrial intensification.	Comments noted. The Council recognizes the importance of emerging data-driven and high-technology industries. The Council will collaborate with ARGO Real Estate Limited on a statement of common ground to ensure the Draft Local Plan aligns with national and regional policies and supports sustainable economic growth.	No	01733	ARGO Real Estate Limited
SP E1: Employment and growth	Argo appreciates the Draft Local Plan's focus on intensifying industrial land use and its approach to tall buildings within Strategic Industrial Locations (SIL). However, they wish to address specific aspects of Chapter 9 (Economy) to ensure policies are flexible and aligned with national and regional guidelines. This flexibility should support emerging industrial and technological sectors, including data centres, alongside traditional industrial and logistics uses. The Argo's detailed feedback is included in the enclosed written representations.	Comments noted.	No	01733	ARGO Real Estate Limited
SP E1: Employment and growth	Turley on behalf of Danescroft (FRELD Claverings) LLP, a property development company, recently acquired the 2.28ha Claverings Industrial Estate, which is allocated for industrial and logistics-led redevelopment due to its poor-quality buildings needing regeneration. While Danescroft supports the redevelopment principle, they identify conflicts with the Council's design principles, citing boundary inconsistencies, level differences, and unrealistic intensification targets. They suggest measuring intensification by volumetric capacity and operational yard space rather than floorspace alone and recommend modifications to the draft site allocation masterplan. Additionally, Danescroft advocates for including a full spectrum of acceptable uses in LSIS, as per London Plan Policy E4(A), and emphasizes a flexible approach to industrial intensification.	Comments noted. The Council appreciates Danescroft's support for the redevelopment of Claverings Industrial Estate and acknowledges the concerns regarding design principles. The Site Allocation Topic Paper for Regulation 19 and the Enfield Employment Topic Paper emphasize aligning site allocations with strategic growth objectives and market demands. The Council will address boundary inconsistencies and level differences and consider measuring intensification by volumetric capacity and operational yard space. The Council will enter into a Statement of Common Ground with Danescroft to address these concerns and collaboratively explore viable solutions.	No	01747	Danescroft (FRELD Claverings) LLP
SP E1: Employment and growth	Turley on behalf of Danescroft (FRELD Claverings) LLP supports the principle of redeveloping the site as identified in the Draft Site Allocation, they find it necessary to comment on and object to certain	Noted.	No	01747	Danescroft (FRELD Claverings) LLP

SP E1: Employment and growth	<p>detailed aspects to ensure effective delivery. Modifications to Draft Policies E1, E2, and E6 are also proposed.</p> <p>HCC questions whether a mitigation measure at J24 of the M25 is needed to handle growth and increased HGV traffic from the industrial allocation RUR.04 Land East of Junction 24 and welcomes discussion on this. They express concerns about increased traffic volumes and delays on the A10 and A1010 due to industrial allocations off Mollison Avenue (RUR.03 and RUR.05), noting these routes are designated Air Quality Management Areas (AQMAs) and face severe congestion, especially when the M25 is delayed or closed. HCC expects these issues to be investigated through applicable planning applications and supports integrating wording into the plan to ensure this investigation is a policy requirement.</p>	<p>The Council will enter into a Statement of Common Ground with Danescroft to address these concerns and collaboratively explore viable solutions.</p> <p>Comments noted.</p> <p>The need for strategic mitigation measures at J24 of the M25 are recognised and are committed to exploring solutions with HCC. The Council is keen to engage further on this matter and will prepare a Statement of Common Ground (SoCG) with HCC to collaboratively address these transportation concerns and ensure the proposed developments align with both Enfield's and Hertfordshire's strategic transport and infrastructure goals.</p>	No	01755	Hertfordshire Council - Highways
SP E1: Employment and growth	<p>The Enfield Society argues that SS1 Paragraph 5 erroneously omits the reference to RUR.03 (West of Rammey Marsh), which should provide 70,200 sqm of new employment floorspace. They assert that neither RUR.03 nor RUR.04 (Junction 24 of the M25) conform with the London Plan's spatial strategy or have the exceptional circumstances needed to justify their removal from the Green Belt. Consequently, both sites should be deleted from paragraph 5 to maintain conformity and policy coherence.</p>	<p>Comments noted.</p> <p>The Enfield Local Plan's policy on employment floorspace is sound and aligns with the London Plan's spatial strategy and definition of 'good growth.' The policy integrates the London Plan's focus on regeneration, Opportunity Areas, and brownfield sites, including Meridian Water and New Southgate. The employment targets are supported by a robust evidence base, including transport modelling by WSP and the Enfield Employment Topic Paper. The strategic balance between housing and employment is designed to minimize environmental impact, particularly in sensitive areas like Chase Park and Crews Hill, which are addressed in their respective topic papers. Site allocations such as East of Junction 24 (SA RUR.04) and Land West of Rammey Marsh (SA RUR.03) are justified by exceptional circumstances, ensuring a sustainable development approach that preserves Enfield's character and heritage.</p>	No	01794	Enfield Society

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP E1: Employment and growth	<p>The Enfield Society expresses concerns over the inclusion of Green Belt sites at Rammeys Marsh (RUR.03) and East of Junction 24 (RUR.04) is not justified and contradicts the London Plan's focus on Good Growth, which emphasizes development in accessible, urban areas on previously developed land. The Enfield Society argues that releasing Green Belt land, which includes protected open spaces, goes against London Plan policies G1 and GG2. Additionally, releasing land at Junction 24 would cause significant harm to the Green Belt and damage the green gateway to the borough, affecting its attractiveness for inward investment. The need for 304,000sqm of industrial and logistics floorspace, as suggested in paragraph 9.11, is questioned by the Enfield Society, who doubts the basis and interpretation of the Employment Land Review 2023. The Enfield Society notes that the Enfield Local Plan does not specify the number of proposed jobs, but transport modelling by WSP suggests 28,721 new jobs. They argue this disproportionate job supply relative to housing is unjustified, and therefore, Green Belt employment sites SA_RUR.03 and SA_RUR.04 should be deleted. The argument that not releasing Green Belt sites would result in under-delivery in the plan's early years is considered unjustified by the Enfield Society, who note that the majority of supply (197,460sqm) would come from intensification of existing sites.</p>	<p>circumstances, ensuring a sustainable development approach that preserves Enfield's character and heritage.</p> <p>Comments noted.</p> <p>The Enfield Local Plan's approach to including Green Belt sites is justified based on local circumstances and aligned with the National Planning Policy Framework (NPPF). The evidence base, including the Employment Land Review 2023 and viability assessments, support the strategic need for additional industrial and logistics floorspace to meet local demand and economic growth targets. The Local Plan also emphasizes sustainable development and carefully considers the balance between housing and job creation to ensure long-term economic viability. While the Enfield Society's concerns about the potential impact on the Green Belt are noted, the plan includes comprehensive strategies to mitigate any adverse effects and enhance the environmental quality of the remaining Green Belt areas. The Council's approach ensures that new developments contribute positively to the borough's economic, social, and environmental objectives, in line with the principles of Good Growth as outlined in the London Plan. Furthermore, the transport modelling and infrastructure planning, ensure that new developments are well-supported by necessary services and facilities, promoting sustainable transport options and reducing reliance on car travel. The policy framework aim to create a balanced and sustainable community, enhancing the overall quality of life for residents and preserving the unique character of Enfield.</p>	No	01794	Enfield Society
SP E1: Employment and growth	<p>Landvest Developments Limited on behalf of their client argue that the current employment land allocations in the plan are insufficient, falling approximately 7,000 sqm short of the need identified in the Employment Land Review. They propose including their site at Junction 25 of the M25, which is suitable and available, for approximately 930 sqm of storage, logistics, and distribution floorspace to help address the employment shortfall. Further details are provided in the enclosed letter.</p>	<p>Comments noted.</p> <p>The Employment Land Review, Enfield Employment Topic Paper 2024, and the Site Allocation Topic Paper for Regulation 19 confirm that the current employment site allocations are designed to meet the identified needs within the constraints of available land and policy requirements. The shortfall of approximately 7,000 sqm is acknowledged, but the allocations seek to balance immediate needs with long-term strategic goals and site deliverability. The proposed site at Junction 25 of the M25 offers potential for additional storage, logistics, and distribution floorspace. While this site was not included in the current plan due to the extensive assessment and prioritization process detailed in the Site Allocation Topic Paper, the Council will consider additional sites and refine allocations as needed in future plan reviews and updates.</p>	No	01894	Landvest Crews Hill Ltd
SP E1: Employment and growth	<p>Landvest Developments Limited, representing their client, acknowledges that the Regulation 19 Local Plan is designed to enhance the borough's economic potential from 2019 to 2041, with a particular focus on the freight and logistics sector near key M25 junctions. Paragraph 9.16 of the Plan permits exceptional Green Belt release for such developments, which aligns with the location of the</p>	<p>Comments noted.</p> <p>The Employment Land Review, Enfield Employment Topic Paper 2024, and the Site Allocation Topic Paper for Regulation 19 confirm that the current employment site allocations are designed to meet the identified needs within the constraints of available land and policy requirements.</p>	No	01894	Landvest Crews Hill Ltd

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	land adjacent to Junction 25. This site, situated strategically at a major M25 junction, is consistent with Draft Policy E1, supporting industrial and logistics uses within the Green Belt. According to the Employment Land Review, there is a need for an additional 304,000 sqm of industrial and logistics space, but the Plan only allocates 293,063 sqm, resulting in a shortfall of about 7,000 sqm. Given that intensification of existing sites is not viable, further Green Belt releases are warranted. The Junction 25 site could provide approximately 930 sqm of B8 floorspace, contributing to addressing this shortfall. Thus, this site is both suitable and achievable and should be included in the updated Local Plan.	The shortfall of approximately 7,000 sqm is acknowledged, but the allocations seek to balance immediate needs with long-term strategic goals and site deliverability. The proposed site at Junction 25 of the M25 offers potential for additional storage, logistics, and distribution floorspace. While this site was not included in the current plan due to the extensive assessment and prioritization process detailed in the Site Allocation Topic Paper, the Council will consider additional sites and refine allocations as needed in future plan reviews and updates.			
SP E1: Employment and growth	TfL reiterates that land for sustainable transport functions may be needed in locations beyond Strategic Industrial Locations (SIL), as referenced in Policy SP T1.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SP E1: Employment and growth	Vistry Group's response includes detailed commentary on the requirement and amount of employment floorspace within key sites, as outlined in the site-specific considerations section.	The council appreciates Vistry Group's support and acknowledges the concerns regarding. The Council will continue to engage with Vistry Group and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01897	Vistry Group
SP E1: Employment and growth	Prologis supports these draft policies which recognise the importance of protecting SILs and intensifying sites, together with the need to provide multistorey logistics spaces.	Support noted.	No	01905	Prologis for Ravenside Retail Park
SP E1: Employment and growth	Prologis highlights an inconsistency between Policy E1, which allocates 31,500 sqm to Ravenside Retail Park (RRP), and Site Allocation SA 5.7, which specifies different figures. This inconsistency suggests the draft Local Plan may not meet the area's objectively assessed needs, potentially limiting the site's development for a multi-level logistics hub. Prologis recommends amending the policy to state a "minimum of 32,500 sqm" to align with broader Local Plan policies and support effective development.	The Council will continue to engage with Prologis and prepare a bespoke area-wide Meridian Water statement of common ground to address these issues and ensure the policy is justified and sound.	No	01905	Prologis for Ravenside Retail Park
SP E1: Employment and growth	The Meridian Water team supports the Enfield Local Plan's aspiration to deliver 304,000 sqm of industrial and logistics floorspace from 2019 to 2041. They commend the 'brownfield first' approach, as shown in Table 9.1, and strongly endorse the strategy of maximizing the potential of urban sites for growth.	Support noted. The Council appreciates MW's overall support for the ambitions of the draft Enfield Local Plan (ELP), particularly in delivering essential housing, fostering employment growth, enhancing active travel networks, and boosting biodiversity. The Council is committed to collaborating closely with MW and other stakeholders to achieve transformational regeneration and high-quality placemaking. We welcome the opportunity to enter into a Statement of Common Ground	No	01945	Meridian Water (LBE)

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP E1: Employment and growth	LBE SPS supports the new Enfield Local Plan, particularly the site allocation at Land East of Junction 24 for a logistics hub. They recommend revising the plot ratio from the London Plan and suggest a single-storey design for feasibility. They propose a flexible approach to the employment floorspace, suggesting an approximate figure of 48,000 sqm instead of a minimum. LBE emphasizes the need for discussions between Enfield and Hertsmeire councils to bring forward the wider site and notes that the Enfield portion could proceed independently if necessary.	to ensure a shared vision and effective implementation of the Plan's objectives. Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01946	LBE Strategic Property Services
SP E1: Employment and growth	Land East of Junction 24 is deemed deliverable according to the NPPF criteria. The site is: 1) Available: It is in single ownership by LBE, supporting employment scheme delivery. 2) Suitable: Though currently Green Belt, it is allocated for employment development in the LBE draft Local Plan. It represents a sustainable location for industrial and logistics growth. 3) Achievable: The site is attractive to the market with no insurmountable constraints. Initial feasibility studies support its deliverability. The site can be developed solely on LBE land or as part of a broader scheme including land in Hertsmeire.	Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01946	LBE Strategic Property Services
SP E1: Employment and growth	LBESPS' comments focus on the site at Land East of Junction 24 (site allocation RUR.04) and highlight the importance of cooperation with other Local Planning Authorities (LPAs) as required by the Localism Act 2011 and NPPF paragraphs 24 to 27. They emphasize the need for ongoing joint working to ensure a positively prepared and justified strategy for a sound Local Plan. LBESPS supports the Council's Duty to Cooperate Compliance Statement (2024) and stresses the importance of discussions with Broxbourne and Hertsmeire, particularly for the deliverability of CHPA and Junction 24 sites.	Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01946	LBE Strategic Property Services
SP E1: Employment and growth	Stage 1 Design Report received.	Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01946	LBE Strategic Property Services
SP E1: Employment and growth	LBESPS' comments focus on the site at Land East of Junction 24 (site allocation RUR.04) and highlight the importance of cooperation with other Local Planning Authorities (LPAs) as required by the Localism Act 2011 and NPPF paragraphs 24 to 27. They emphasize the need for ongoing joint working to ensure a positively prepared and justified strategy for a sound Local Plan. LBESPS supports the Council's Duty	Comments noted. Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	to Cooperate Compliance Statement (2024) and stresses the importance of discussions with Broxbourne and Hertsmere, particularly for the deliverability of CHPA and Junction 24 sites.	Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.			
SP E1: Employment and growth	London borough of Waltham Forest broadly supports the approach in Enfield's Economy chapter for meeting industrial and office use needs. Under the Duty to Cooperate, Waltham Forest will support Enfield on cross-boundary matters to maximise the potential of employment sites in E1: Employment and Growth and E12: Meridian Hinterlands, particularly those on the joint boundaries of the boroughs.	The Council appreciates the London Borough of Waltham Forest's (LBWF) broad support for the approach in Enfield's Economy chapter. The Council value LBWF's commitment to supporting cross-boundary matters under the Duty to Cooperate, particularly in maximizing the potential of employment sites in policies E1: Employment and Growth and E12: Meridian Hinterlands. This cooperative approach is essential for addressing the economic needs and leveraging employment opportunities in areas along our shared boundaries. The Council look forward to continuing our collaborative efforts to achieve mutual economic growth and development goals.	No	02006	London borough of Waltham Forest
SP E1: Employment and growth	London borough of Waltham Forest's response notes that the Plan recognises the need for exceptional circumstances for Green Belt release near key M25 junctions, primarily for the logistics sector and supporting infrastructure. However, Waltham Forest's recently adopted Local Plan does not consider the release of Green Belt or Metropolitan Open Land (MOL) to meet its identified need for industrial or employment floorspace.	The Council acknowledges Waltham Forest's approach to not releasing Green Belt or Metropolitan Open Land (MOL) to meet industrial or employment floorspace needs, as noted in their recently adopted Local Plan. Enfield's Plan recognises the need for exceptional circumstances for Green Belt release, particularly near key M25 junctions, to support the logistics sector and necessary infrastructure. Enfield's approach is justified by the evidence set out in the Spatial Strategy and Overall Approach Topic Paper. The council remain committed to working collaboratively on cross-boundary issues to achieve mutual goals.	No	02006	London borough of Waltham Forest
SP E1: Employment and growth	Policy SS1 "Spatial Strategy" of Enfield's draft Local Plan aims to meet the Borough's economic needs by providing at least 304,000 sqm of additional industrial and logistics floorspace and 40,000 sqm of additional office floorspace. Enfield's need for industrial land was assessed through the 2023 Employment Land Review (ELR), which confirmed this minimum requirement. Although Enfield is not a major office hub and is not designated for strategic office growth by the London Plan, the ELR recommends an increase in office space within town centres, including mixed-use developments. LB Barnet supports this approach.	The Council appreciate LB Barnet's support for our approach outlined in Policy SS1 "Spatial Strategy." The 2023 Employment Land Review (ELR) confirms the need for at least 304,000 sqm of additional industrial and logistics floorspace and 40,000 sqm of additional office space, reflecting Enfield's economic needs. While Enfield is not designated for strategic office growth, increasing office space within town centres aligns with the ELR's recommendations. The plan's strategy is justified and robust, aiming to balance industrial growth and office development within mixed-use areas.	No	02091	London borough of Barnet
SP E1: Employment and growth	ADL welcomes the inclusion of site allocation URB.28 (Land and Buildings South East of Stockingswater Lane) in Policy E1: Employment and Growth, with an estimated additional capacity of 80,753 sqm. They support the focus on intensifying industrial land to boost employment. However, ADL proposes clarifying that this capacity is an estimate and not a limit, allowing for higher capacity if an appropriate design solution is found. They also recommend updating Policy E1 to reflect that 80,753 sqm is a minimum capacity.	The council appreciate ADL's support for the inclusion of site allocation URB.28 (Land and Buildings South East of Stockingswater Lane) within Policy E1: Employment and Growth, recognizing its potential to add significant industrial capacity. As justified by the Site Allocation Topic Paper and the Employment Topic Paper, the focus on industrial intensification is crucial for boosting employment. We acknowledge ADL's suggestion to clarify that the 80,753 sqm capacity is an estimate and not a limit. Therefore, the council will consider updating Policy E1 to reflect this capacity as a minimum, allowing for higher capacity if an appropriate design solution is found. Further engagement and a	No	01682	Areli Developments Ltd. ('ADL') on behalf of the Landowner of Stockingswater Lane ('Landowner').

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP E1: Employment and growth	Blackrock UK Property Fund's response emphasizes that relying heavily on the intensification of employment land, particularly through vertical multi-storey industrial configurations, is insufficient to meet Enfield's employment needs over the plan period. They argue this approach does not provide a flexible supply of new premises that can accommodate the varied requirements of occupiers. They advocate for a pragmatic and flexible approach to delivering new employment floorspace throughout the plan period, rather than focusing solely on multi-storey developments for intensification.	statement of common ground will be essential to ensure these adjustments align with Enfield's growth objectives. The detailed feedback on Draft Policy E1 is welcomed. The council's approach to employment land intensification, including the use of vertical multi-storey industrial configurations, is grounded in a comprehensive and up to date evidence-based strategy. This strategy is extensively supported by documents such as the Enfield Employment Topic Paper 2024, the Employment Land Review 2024, the ELP Spatial Strategy and Overall Approach Topic Paper, and the Enfield Viability Update 2024. These documents collectively justify the need for a flexible, innovative, and sustainable approach to employment land use in Enfield. Enfield's strategy aims to maximize land use efficiency while meeting diverse occupier needs, ensuring Enfield's employment areas remain competitive and attractive. The Council recognize the importance of balancing different forms of development to accommodate various requirements and the specific challenges posed by vertical multi-storey configurations. The council remains committed to engaging with stakeholders and is open to further discussions to ensure these policies effectively support Enfield's long-term economic growth and is willing to working through a Statement of Common Ground to address any specific concerns and refine our approach as needed.	No	01952	Blackrock UK Property Fund
SP E1: Employment and growth	CCLA Investment Management (CCLA) proposes revisions to policy E1: Employment Growth for site 5 Pickett's Lock Lane, arguing that the policy should prioritize enhancing productivity and operational efficiency over merely expanding floor space or development footprint. They advocate for incorporating modern industrial needs, such as faster loading, higher ceilings, and improved infrastructure, to align with policy E4 of the London Plan and the NPPF. Their proposed revision, "1a Intensified development, where feasible, of industrial, logistics and related functions in existing employment areas, to meet modern business needs," aims to ensure the policy supports high-quality, flexible industrial spaces that can attract investment and meet future sector demands.	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
SP E1: Employment and growth	Goodman UK Limited expresses concerns over the removal of the proposed extension to the Great Cambridge Road SIL in the Draft Policies Map. They supported the extension, which would have addressed the need for additional employment land and created a buffer between their site and the Morrisons site. The current Draft Local Plan's omission of this extension is regretted, as it could impact the efficiency and future redevelopment of their site. Goodman emphasizes the need for robust boundaries and adherence to the Agent of Change principle to prevent new mixed-use developments	Comments noted. The Council is committed to working collaboratively with Goodman UK Limited and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01874	Goodman UK Limited

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	from disrupting 24-hour industrial operations at Martinbridge and affecting future intensification. They also advocate for similar protections for other nearby sites to avoid conflicts between residential and industrial uses.				
SP E1: Employment and growth	Goodman UK Limited expresses concerns over the removal of the proposed extension to the Great Cambridge Road SIL in the Draft Policies Map. They supported the extension, which would have addressed the need for additional employment land and created a buffer between their site and the Morrisons site. The current Draft Local Plan's omission of this extension is regretted, as it could impact the efficiency and future redevelopment of their site. Goodman emphasizes the need for robust boundaries and adherence to the Agent of Change principle to prevent new mixed-use developments from disrupting 24-hour industrial operations at Martinbridge and affecting future intensification. They also advocate for similar protections for other nearby sites to avoid conflicts between residential and industrial uses.	Comments noted. The Council is committed to working collaboratively with Goodman UK Limited and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01874	Goodman UK Limited
SP E1: Employment and growth	Henry Boot Developments (HBD) has ongoing concerns about the Montagu Industrial Estate allocation (SA URB.30). They support site intensification but request a flexible and transparent approach. The Draft Plan's requirements for 38,600 sqm of employment floorspace are not justified and don't reflect current planning permissions, which already account for 27,268 sqm. The timeframe and infrastructure requirements are also misaligned with actual site conditions. HBD suggests updating the Draft Plan to reflect current permissions and maintaining flexibility in design principles to adapt to future needs and economic circumstances.	The Council's approach to employment allocations, including the Montagu Industrial Estate, is well-supported by thorough research and strategic planning, as detailed in the Employment Topic Paper (2024), Employment Land Review (2024), and Site Allocation Topic Paper. The Employment Land Review emphasizes the need for intensified use of existing sites to meet future demand, including Montagu Industrial Estate. The draft Local Plan's employment floorspace targets are based on extensive analysis of market demands. Utilizing the GLA's Industrial Intensification and Co-Location Study (2018), the plan promotes not only spatial intensification but also economic, process, and urban intensification for holistic site development. The Council ensures alignment of future site allocations with existing planning permissions and infrastructure requirements, promoting sustainable development. Design principles for Montagu Industrial Estate are guided by the approved Design Code, balancing high-quality industrial space creation with market adaptability. The policies are evidence-based, integrating ongoing development activities into the strategic vision, ensuring the Local Plan is practical and forward-looking. The Council will continue engaging with Henry Boot Developments and prepare a statement of common ground to address these issues and ensure the policy's soundness.	No	01943	Henry Boot Developments (HBD)
SP E1: Employment and growth	Henry Boot Developments (HBD) raises concerns about the draft Plan's approach to industrial and logistics space needs. While the Plan suggests the Borough can meet these needs through urban intensification, it simultaneously proposes Green Belt releases at Rammeys Marsh and Junction 24 of the M25. HBD argues that Green Belt release should be a last resort, only in exceptional circumstances, and the Plan prematurely prioritizes this without proper justification.	The draft Plan's approach to accommodating industrial and logistics needs is justified based on the thorough analysis presented in Enfield's evidence base. The Employment Topic Paper (2024) highlights the borough's limited urban land availability, necessitating a balanced strategy. The Exceptional Circumstances Topic Paper outlines the justification for selective Green Belt release, emphasizing sustainable development principles. Additionally, the Integrated Impact	No	01943	Henry Boot Developments (HBD)

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	They believe this approach risks undermining sustainable economic growth and existing employment locations.	Assessment recognises the environmental and economic rationale for this approach. Therefore, the draft Plan's provisions for industrial/logistics spaces, including selective Green Belt release, are well-founded and essential for meeting long-term needs sustainably.			
SP E1: Employment and growth	Henry Boot Development supports the protection of employment land but challenges the draft plan's proposal to release Green Belt land for industrial and logistics needs. They argue that the Borough can meet these needs within urban areas through intensification. The release of Green Belt land should only occur under 'exceptional circumstances,' and the draft plan lacks details on necessary infrastructure improvements and justifications for early delivery. They contend that this approach is premature, lacks consideration of existing permissions, and does not ensure sustainable economic growth or address the climate emergency.	The council's approach to releasing Green Belt land for industrial and logistics development is justified by the "Exceptional Circumstances" topic paper. It identifies a significant shortfall in available employment land within urban areas and recognises the necessity for additional land to meet future demands. The paper highlights the importance of strategic sites such as Ramey Marsh and Junction 24 of the M25 in addressing this need. The release of these sites is contingent upon necessary infrastructure improvements, ensuring sustainable development and economic growth, thus meeting the requirements for exceptional circumstances as outlined in the NPPF. The Council will continue to engage with Henry Boot Developments and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01943	Henry Boot Developments (HBD)
SP E2: Promoting jobs and inclusive business	Turley on behalf of Danescroft (FRELD Claverings) LLP, a property development company, recently acquired the 2.28ha Claverings Industrial Estate, which is allocated for industrial and logistics-led redevelopment due to its poor-quality buildings needing regeneration. While Danescroft supports the redevelopment principle, they identify conflicts with the Council's design principles, citing boundary inconsistencies, level differences, and unrealistic intensification targets. They suggest measuring intensification by volumetric capacity and operational yard space rather than floorspace alone and recommend modifications to the draft site allocation masterplan. Additionally, Danescroft advocates for including a full spectrum of acceptable uses in L51S, as per London Plan Policy E4(A), and emphasizes a flexible approach to industrial intensification.	Comments noted. The Council appreciates Danescroft's support for the redevelopment of Claverings Industrial Estate and acknowledges the concerns regarding design principles. The Site Allocation Topic Paper for Regulation 19 and the Enfield Employment Topic Paper emphasize aligning site allocations with strategic growth objectives and market demands. The Council will address boundary inconsistencies and level differences and consider measuring intensification by volumetric capacity and operational yard space. The Council will enter into a Statement of Common Ground with Danescroft to address these concerns and collaboratively explore viable solutions.	No	01747	Danescroft (FRELD Claverings) LLP
SP E2: Promoting jobs and inclusive business	Turley on behalf of Danescroft (FRELD Claverings) LLP supports the principle of redeveloping the site as identified in the Draft Site Allocation, they find it necessary to comment on and object to certain detailed aspects to ensure effective delivery. Modifications to Draft Policies E1, E2, and E6 are also proposed.	Noted. The Council will enter into a Statement of Common Ground with Danescroft to address these concerns and collaboratively explore viable solutions.	No	01747	Danescroft (FRELD Claverings) LLP
SP E2: Promoting jobs and inclusive business	National Highways' response highlights that around 600,000 people in the UK live in vehicles due to the housing crisis and low rental vacancy rates. While the policy requires high accessibility by sustainable transport modes, it does not address motor homes, caravans, vans, converted buses, tiny homes, or the rise in nomadic lifestyles. These could lead to increased vehicle movements on the SRN and new impacts, such as van dwellers in road laybys. They suggest estimating	The Council appreciates National Highways' response highlighting the rise in nomadic lifestyles and its potential impact on vehicle movements and the Strategic Road Network (SRN). The council acknowledge the need to address accommodation types such as motor homes, caravans, vans, converted buses, and tiny homes within our Local Plan. The council will consider estimating the growth in traveller accommodation to better understand and manage additional traffic impacts in Enfield over the Plan period. The Council is committed to working with National Highways to ensure our policies	No	01753	National Highways Limited

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	the growth in traveller accommodation to gauge additional traffic impacts in Enfield over the Plan period.	support sustainable transport modes and mitigate any adverse effects on the SRN. The council look forward to further collaboration on this issue.			
SP E2: Promoting jobs and inclusive business	Prologis supports these draft policies which recognise the importance of protecting SILs and intensifying sites, together with the need to provide multistorey logistics spaces.	Support noted.	No	01905	Prologis for Ravenside Retail Park
SP E2: Promoting jobs and inclusive business	SEGRO believes Policy E2 should acknowledge that maximizing employment floorspace through site intensification may not always be practical or desirable, as noted in their response to Policy PL2. They emphasize the need to consider site-specific circumstances, character, and occupier needs, advocating for policy flexibility. SEGRO finds point 4 unclear, particularly regarding small and medium enterprises (SMEs) and co-working spaces. They note it may not always be feasible to deliver the variety of workspaces and unit sizes mentioned, depending on the site's specifics or viability constraints.	The council appreciates SEGRO's support and acknowledges the concerns regarding the wording of the policy. The Council will continue to engage with SEGRO and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01922	Segro
SP E2: Promoting jobs and inclusive business	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane	CCLA Investment Management (CCLA) suggests that policy E2: Promoting Jobs and Inclusive Business Growth should be revised to emphasize both the intensification of existing employment sites and the modernization of floorspace to meet contemporary industrial needs. They argue that while supporting intensification is important, it must be applied pragmatically and not as a one-size-fits-all solution. Instead, redevelopment should focus on modernizing floorspace, improving operational efficiency, and investing in infrastructure, resilience, and sustainability. CCLA's proposed amendment rewords the policy to support proposals that enhance and modernize employment locations while also providing modern industrial units. This change aims to ensure the policy is 'justified' and 'effective' in line with NPPF paragraphs 35(b) and 35(c).	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
SP E3: Strategic Industrial Locations	The GLA welcomes Policy E3's protection of existing SILs but suggests clarifying its role in meeting industrial capacity needs. The reconfiguration of SIL at Meridian Water through land swaps should follow a coordinated plan-led approach, clearly indicating areas for retention, substitution, and/or intensification.	Comments noted. While the GLA welcomes Policy E3's protection of existing Strategic Industrial Locations (SIL), they suggest clarifying its role in meeting industrial capacity needs and ensuring proper coordination for reconfiguration. The Council acknowledges these concerns, particularly regarding Meridian Water (MW), where challenges associated with the land swap from Locally Significant Industrial Sites (LSIS) to SIL have been identified as a weakness. The Council commits to ensuring that the MW narrative and supporting evidence are transparent about achieving a nil net loss and supporting evidence addressing any perceived weaknesses. The Council is happy to work	No	00120	Greater London Authority (GLA)

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP E3: Strategic Industrial Locations	National Highways' response highlights that around 600,000 people in the UK live in vehicles due to the housing crisis and low rental vacancy rates. While the policy requires high accessibility by sustainable transport modes, it does not address motor homes, caravans, vans, converted buses, tiny homes, or the rise in nomadic lifestyles. These could lead to increased vehicle movements on the SRN and new impacts, such as van dwellers in road laybys. They suggest estimating the growth in traveller accommodation to gauge additional traffic impacts in Enfield over the Plan period.	with the GLA to clarify these points further and ensure mutual understanding and agreement on these matters. The Council appreciates National Highways' response highlighting the rise in nomadic lifestyles and its potential impact on vehicle movements and the Strategic Road Network (SRN). The council acknowledge the need to address accommodation types such as motor homes, caravans, vans, converted buses, and tiny homes within our Local Plan. The council will consider estimating the growth in traveller accommodation to better understand and manage additional traffic impacts in Enfield over the Plan period. The Council is committed to working with National Highways to ensure our policies support sustainable transport modes and mitigate any adverse effects on the SRN. The council look forward to further collaboration on this issue.	No	01753	National Highways Limited
SP E3: Strategic Industrial Locations	TfL notes the proposal to "deliver a new mixed-use access route or corridor to establish connectivity between Meridian Water and Edmonton Marshes, as well as the wider Lee Valley Regional Park." They request further clarity on the nature of this route or corridor, as an active travel corridor would differ significantly in nature and potential impacts compared to a route designed for public transport and/or cars.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SP E3: Strategic Industrial Locations	Prologis supports these draft policies which recognise the importance of protecting SILs and intensifying sites, together with the need to provide multistorey logistics spaces.	Support noted.	No	01905	Prologis for Ravenside Retail Park
SP E3: Strategic Industrial Locations	SEGRO suggests Policy E3 be redrafted for flexibility and application of the planning balance, as the current approach, particularly point 4, is too rigid. They emphasize the need to consider site-specific factors, market and employment occupiers' needs, the broad range of the employment sector, and viability. SEGRO is concerned that the policy's absolute nature—resulting in either refusal or approval without flexibility—could be problematic and should be adjusted to allow for more nuanced decision-making.	The council appreciates SEGRO's support and acknowledges the concerns regarding the wording of the policy. The Council will continue to engage with SEGRO and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01922	Segro
SP E3: Strategic Industrial Locations	The Meridian Water team welcomes the safeguarding of Strategic Industrial Locations (SIL) policy, including the reconfiguration at Meridian Hinterlands sites. They believe the proposed range of land uses—general and light industrial, storage and distribution, research and development, and related sui generis uses—aligns with London Plan Policies E4 and E5, supporting a thriving business base that meets the needs of various industrial and logistics occupiers.	Support noted. The Council appreciates MW's overall support for the ambitions of the draft Enfield Local Plan (ELP), particularly in delivering essential housing, fostering employment growth, enhancing active travel networks, and boosting biodiversity. The Council is committed to collaborating closely with MW and other stakeholders to achieve transformational regeneration and high-quality placemaking. We welcome the opportunity to enter into a Statement of Common Ground	No	01945	Meridian Water (LBE)

SP E3: Strategic Industrial Locations	Blackrock UK Property Fund supports the ongoing role of Strategic Industrial Locations (SIL) due to the need to retain and expand these areas. However, they caution against relying solely on intensification, especially vertical multi-storey industrial configurations, as these may not meet all business operational requirements. They advocate for a pragmatic and flexible approach to delivering new employment floorspace throughout the plan period, ensuring a variety of development forms are considered to meet diverse occupier needs.	to ensure a shared vision and effective implementation of the Plan's objectives. The Council appreciates Blackrock UK Property Fund's support for the ongoing role of Strategic Industrial Locations (SIL). The Council recognize the importance of retaining and potentially expanding these areas to meet the diverse operational requirements of businesses. The Council's approach to intensification, including vertical multi-storey industrial configurations, is supported by comprehensive evidence, including the Employment Land Review, the Employment Topic Paper, and the Viability Update. These documents provide a detailed analysis of employment needs and the viability of different development forms. While intensification is a key strategy, the Council acknowledges the need for a flexible approach to ensure that new employment floorspace can meet the varied requirements of all occupiers. The evidence supports this balanced and pragmatic approach, ensuring that the Local Plan can effectively deliver a range of employment spaces throughout the plan period. The Council welcomes ongoing dialogue and are committed to working together with stakeholders, including through the development of Statements of Common Ground, to ensure that the Local Plan remains robust and responsive to the needs of the business community.	No	01952	Blackrock UK Property Fund
SP E3: Strategic Industrial Locations	The Canal and Rivers Trust noted that many organisations already use their land for burying service cables and pipes under towpaths and waterways. They suggested that new developments should be encouraged to explore similar opportunities. This potential could be referenced in the supporting text of the policy. However, any such proposals would require separate commercial agreements with the Trust.	Comments noted. The Council is committed to working collaboratively with Canal & River Trust and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	02007	Canal & River Trust
SP E3: Strategic Industrial Locations	Goodman UK Limited supports the overall direction of Draft Strategic Policy E3 (Strategic Industrial Locations) but is concerned that Part 3 of the policy does not fully align with London Plan Policy E4(A). The current policy supports a limited range of industrial uses, whereas the London Plan includes a broader spectrum of emerging industrial-related sectors and related activities essential for London's economy. Goodman UK Limited recommends rewording the policy to ensure it meets the Borough's and the capital's current and future industrial needs and aligns with the London Plan.	Comments noted. The Council is committed to working collaboratively with Goodman UK Limited and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01874	Goodman UK Limited
SP E3: Strategic Industrial Locations	Henry Boot Development welcomes the recognition in the draft Plan that 'banqueting suites' are not permitted in Strategic Industrial Locations (SIL) or Locally Significant Industrial Locations (LSIL).	Support noted.	No	01943	Henry Boot Development (HBD)

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP E4: Supporting offices	Better Homes Enfield's response to Policy E4 in the draft Enfield Local Plan (ELP) identifies several key issues and suggests modifications to enhance the policy's alignment with national and London planning policies. Key issues include a lack of conformity and soundness with the London Plan 2021 and NPPF guidelines, insufficient protection for office spaces from Office to Residential Permitted Development Rights (PDR), unclear plans for delivering the required 40,000 sq. m of additional office space, and unrealistic employment targets for Meridian Water due to reduced office space allocation. Suggested modifications include introducing an Article 4 direction to protect office spaces, clearly referencing where additional office capacity will be delivered in placemaking strategies and site allocations, and ensuring consistency and clarity in employment strategies to support sustainable development and job creation in urban centres.	Comments noted. The Council acknowledges your concerns regarding conformity with the London Plan 2021 and NPPF guidelines. The Enfield Employment Topic Paper 2024 outlines strategies to deliver the required 40,000 sq. m of additional office space, emphasizing urban centres and transport hubs.	No	01708	Better Homes Enfield
SP E4: Supporting offices	National Highways' response highlights that around 600,000 people in the UK live in vehicles due to the housing crisis and low rental vacancy rates. While the policy requires high accessibility by sustainable transport modes, it does not address motor homes, caravans, vans, converted buses, tiny homes, or the rise in nomadic lifestyles. These could lead to increased vehicle movements on the SRN and new impacts, such as van dwellers in road laybys. They suggest estimating the growth in traveller accommodation to gauge additional traffic impacts in Enfield over the Plan period.	The Council appreciates National Highways' response highlighting the rise in nomadic lifestyles and its potential impact on vehicle movements and the Strategic Road Network (SRN). The council acknowledge the need to address accommodation types such as motor homes, caravans, vans, converted buses, and tiny homes within our Local Plan. The council will consider estimating the growth in traveler accommodation to better understand and manage additional traffic impacts in Enfield over the Plan period. The Council is committed to working with National Highways to ensure our policies support sustainable transport modes and mitigate any adverse effects on the SRN. The council look forward to further collaboration on this issue.	No	01753	National Highways Limited
SP E4: Supporting offices	Vistry Group's response includes detailed commentary on the requirement and amount of employment floorspace within key sites, as outlined in the site-specific considerations section.	The council appreciates Vistry Group's support and acknowledges the concerns regarding. The Council will continue to engage with Vistry Group and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01897	Vistry Group
SP E5: Transforming Industrial Sites	Joseph Homes Regeneration Limited supports the general intent of Draft Policy E5 but finds Criterion 2a overly restrictive. They propose amending it to facilitate co-location of industrial and residential uses within LSISs, aligning with London Plan Policy E7. Joseph Homes is developing a masterplan for an LSIL site in Angel Edmonton to deliver industrial modernization, new homes, and public benefits. They recommend amending Policy E5 to allow flexibility for large-scale masterplans that retain the site's business function and support local area visions and public benefits.	Comments noted. The Council is committed to working collaboratively with Joseph Homes Regeneration Limited and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01875	Joseph Homes Regeneration Limited

We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.			
SP E5: Transforming Industrial Sites	SEGRO argues that Policy E5 is too rigid, lacking flexibility and failing to consider site-specific factors and employment occupiers' needs. They warn that this could hinder the expansion of existing businesses or new employment investments in the Borough. SEGRO also highlights issues with the policy's support for business relocation, noting the practical challenges and potential delays it could cause. They suggest that the policy cannot be a "one size fits all" approach and needs to be more adaptable.	The council appreciates SEGRO's support and acknowledges the concerns regarding the wording of the policy. The Council will continue to engage with SEGRO and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01922	Segro
SP E5: Transforming Industrial Sites	Blackrock UK Property Fund argues that relying heavily on vertical multi-storey industrial configurations for the intensification of employment land will not sufficiently meet Enfield's employment needs over the plan period. They advocate for a pragmatic and flexible approach to delivering new employment floorspace, accommodating various development forms to cater to diverse occupier requirements. Additionally, they note that pre-application discussions are not always feasible for urgent business needs, and such applications should be assessed on their merits without being penalized, maintaining the traditional approach of the English planning system.	The Council appreciates Blackrock UK Property Fund's support for the ongoing role of Strategic Industrial Locations (SIL). The Council recognize the importance of retaining and potentially expanding these areas to meet the diverse operational requirements of businesses. The Council's approach to intensification, including vertical multi-storey industrial configurations, is supported by comprehensive evidence, including the Employment Land Review, the Employment Topic Paper, and the Viability Update. These documents provide a detailed analysis of employment needs and the viability of different development forms. While intensification is a key strategy, the Council acknowledges the need for a flexible approach to ensure that new employment floorspace can meet the varied requirements of all occupiers. The evidence supports this balanced and pragmatic approach, ensuring that the Local Plan can effectively deliver a range of employment spaces throughout the plan period. The Council welcomes ongoing dialogue and are committed to working together with stakeholders, including through the development of Statements of Common Ground, to ensure that the Local Plan remains robust and responsive to the needs of the business community.	No	01952	Blackrock UK Property Fund
SP E5: Transforming Industrial Sites	CCLA Investment Management (CCLA) proposes modifications to policy E5: Transforming Industrial Sites to better reflect the need for both intensification and innovation in industrial development. They emphasize that while the draft policy focuses on intensification, it should also support new employment formats that align with the Borough's business needs. Their suggested revision aims to ensure that policy E5 is 'effective' as per NPPF paragraph 35(c) by incorporating elements such as modernized floorspace, operational efficiency, increased building height, and infrastructure investment. The proposed amendment is: "The intensification of industrial uses within SILs and LSIS through the more efficient use of space, higher plot ratios, the development of multi-storey schemes, and the assembling of sites within designated employment areas to assist with	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5

	the delivery of more intensive formats will be supported, where feasible. Proposals will be supported which deliver modernized floorspace, operational efficiency; increased building height, infrastructure investment, resilience, sustainability, quality and operational flexibility (24/7 use). ¹⁹				Pickett's Lock Lane
SP E5: Transforming Industrial Sites	Goodman UK Limited supports the Council's encouragement of industrial intensification and efficient use of space in Draft Policy E5 but has concerns about Part 2(D) regarding the retention and relocation of existing businesses. They believe that engaging with existing businesses and negotiating leases is primarily a commercial matter outside the planning regime, with details often being commercially sensitive. The London Plan does not mandate addressing the retention or relocation of businesses for redevelopment proposals. Additionally, retaining businesses may conflict with the goal of intensification, as new multi-storey developments may not suit existing tenants' needs. Goodman UK Limited recommends rewording the policy to consider these factors and allow case-by-case exploration of business retention, aligned with each site's specific circumstances.	Comments noted. The Council is committed to working collaboratively with Goodman UK Limited and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01874	Goodman UK Limited
SP E5: Transforming Industrial Sites	HBD raises concerns that the requirement for effective mitigation of potential negative impacts on surrounding areas contradicts the London Plan's 'Agent of Change' principle and draft Plan Policy E3(5). This principle states that new developments should not compromise the operational integrity or effectiveness of Strategic Industrial Locations (SILs) or Locally Significant Industrial Locations (LSILs), particularly their ability to operate on a 24-hour basis. This inconsistency needs to be addressed to ensure policy alignment and clarity.	The Council's approach is justified, aligning with the 'Agent of Change' principle and Policy E3. The Exceptional Circumstances Topic Paper highlights the need to balance industrial activities with mitigation measures. Policy E3 ensures that new developments within or adjacent to SILs do not compromise their operational integrity, maintaining 24-hour industrial activities. This balance allows for effective mitigation of potential negative impacts while protecting the function and productivity of SILs, ensuring sustainable economic growth and adherence to both local and London Plan policies. The Council will continue to engage with Henry Boot Developments and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01943	Henry Boot Developments (HBD)
SP E5: Transforming Industrial Sites	Henry Boot Development's response acknowledges the requirement for effective mitigation of potential negative impacts on surrounding areas, but expresses concern that this may conflict with the London Plan's 'Agent of Change' principle and draft Plan Policy E3. Specifically, Policy E3 requires that proposals within or adjacent to Strategic Industrial Locations (SILs) should not compromise the integrity or effectiveness of these locations in accommodating industrial activities and their ability to operate on a 24-hour basis. This potential conflict highlights the need for clarity and consistency in policy application.	The Council's approach is justified, aligning with the 'Agent of Change' principle and Policy E3. The Exceptional Circumstances Topic Paper highlights the need to balance industrial activities with mitigation measures. Policy E3 ensures that new developments within or adjacent to SILs do not compromise their operational integrity, maintaining 24-hour industrial activities. This balance allows for effective mitigation of potential negative impacts while protecting the function and productivity of SILs, ensuring sustainable economic growth and adherence to both local and London Plan policies. The Council will continue to engage with Henry Boot Developments and prepare a statement of common ground to address these issues and ensure the policy is justified and sound. Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
DM E6: Locally Significant Industrial Sites	Turley on behalf of Danescroft (FRELD Claverings) LLP, a property development company, recently acquired the 2.28ha Claverings Industrial Estate, which is allocated for industrial and logistics-led redevelopment due to its poor-quality buildings needing regeneration. While Danescroft supports the redevelopment principle, they identify conflicts with the Council's design principles, citing boundary inconsistencies, level differences, and unrealistic intensification targets. They suggest measuring intensification by volumetric capacity and operational yard space rather than floorspace alone and recommend modifications to the draft site allocation masterplan. Additionally, Danescroft advocates for including a full spectrum of acceptable uses in LSIS, as per London Plan Policy E4(A), and emphasizes a flexible approach to industrial intensification.	Comments noted. The Council appreciates Danescroft's support for the redevelopment of Claverings Industrial Estate and acknowledges the concerns regarding design principles. The Site Allocation Topic Paper for Regulation 19 and the Enfield Employment Topic Paper emphasize aligning site allocations with strategic growth objectives and market demands. The Council will address boundary inconsistencies and level differences and consider measuring intensification by volumetric capacity and operational yard space. The Council will enter into a Statement of Common Ground with Danescroft to address these concerns and collaboratively explore viable solutions.	No	01747	Danescroft (FRELD Claverings) LLP
DM E6: Locally Significant Industrial Sites	Turley on behalf of Danescroft (FRELD Claverings) LLP supports the principle of redeveloping the site as identified in the Draft Site Allocation, they find it necessary to comment on and object to certain detailed aspects to ensure effective delivery. Modifications to Draft Policies E1, E2, and E6 are also proposed.	Noted. The Council will enter into a Statement of Common Ground with Danescroft to address these concerns and collaboratively explore viable solutions.	No	01747	Danescroft (FRELD Claverings) LLP
DM E6: Locally Significant Industrial Sites	Joseph Homes Regeneration Limited supports the intent of Draft Policy E6 but finds Criterion 1 overly restrictive as it refuses proposals resulting in a net loss of industrial space in LSISs. They suggest amending the policy to allow masterplan-led co-location of industrial and residential uses, aligning with London Plan Policy E7. This approach would enable comprehensive redevelopment, retain the site's economic function, deliver area visions, and provide public benefits. They recommend changing the wording to support proposals under these conditions instead of outright refusal.	Comments noted. The Council is committed to working collaboratively with Joseph Homes Regeneration Limited and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01875	Joseph Homes Regeneration Limited
DM E6: Locally Significant Industrial Sites	Joseph Homes Regeneration Limited supports the intent of Draft Policy E6 but finds Criterion 1 overly restrictive as it refuses proposals resulting in a net loss of industrial space in LSISs. They suggest amending the policy to allow masterplan-led co-location of industrial and residential uses, aligning with London Plan Policy E7. This approach would enable comprehensive redevelopment, retain the site's economic function, deliver area visions, and provide public benefits. They recommend changing the wording to support proposals under these conditions instead of outright refusal.	Comments noted. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01875	Joseph Homes Regeneration Limited
DM E6: Locally Significant Industrial Sites	Policy E6 in Enfield's draft Local Plan safeguards Locally Significant Industrial Sites (LSIS) to meet local business needs, encouraging general and light industrial, storage and distribution, research and development, and related sui generis uses. Non-industrial proposals must not compromise the business function of LSIS and should follow the agent of change principle. LB Barnet supports this approach and recommends a design-led approach to LSIS. LB Barnet's Main	The Council appreciate LB Barnet's support for Policy E6, which safeguards Locally Significant Industrial Sites (LSIS) to meet local business needs. Our approach aligns with the recommendations of the 2023 Employment Land Review (ELR), which emphasizes maintaining industrial uses while adopting a design-led approach to development within LSIS. This strategy ensures that non-industrial proposals do not compromise the business function of LSIS and adhere to the agent of	No	02091	London borough of Barnet

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	<p>Modifications to their draft London Plan suggest that the New Southgate Opportunity Area could focus on light industrial, Class B2 (general industry), Class B8 (storage and distribution), and employment-generating sui generis uses, including waste management facilities, in the latter stages of the draft Local Plan. This area could also accommodate office development and light industrial uses suitable for town centres, provided they do not negatively impact other uses.</p>	<p>change principle. For further details, refer to the Enfield Employment Topic Paper 2024. The council welcome ongoing collaboration with LB Barnet to align our strategies and ensure successful implementation of our Local Plan.</p>			
DM E7: Non-designated industrial sites	<p>The GLA's response advises that Policy E7 should reference LP2021 Policy E7 Part C, instead of E5 Part B, for proposals involving the net loss of industrial floorspace.</p>	<p>Comments noted.</p> <p>The Council acknowledges the importance of correct references in Policy E7 regarding non-designated industrial floorspace and the requirement for completing intensified industrial uses before residential components. This issue partly stems from a national policy concern. The LPA encourages Meridian Water to minimize Class E use within Strategic Industrial Locations (SIL), emphasizing that "lighter industry" does not equate to Class E use. This distinction is crucial for future planning. The Council is working with the Meridian Water team to ensure policies reflect intended objectives while maintaining flexibility for diverse industrial activities within SILs. The Council is happy to work with the GLA to clarify these points further and ensure mutual understanding and agreement on these matters.</p>	No	00120	Greater London Authority (GLA)
DM E7: Non-designated industrial sites	<p>Proposals resulting in a loss of industrial type floorspace should provide evidence of at least 24 months of active marketing that demonstrates there is no current or future market demand for the site, whereas Waltham Forest's Local Plan Policy 28 Approach to Non-Designated Employment Land requires at least 12 months.</p>	<p>The Council acknowledges the difference in marketing requirements between its policy and Waltham Forest's Local Plan Policy 28. The plan's requirement for 24 months of active marketing before the loss of industrial floorspace is based on robust evidence set out in the Employment Topic Paper 2024 and the Employment Land Review 2024. This approach ensures a thorough evaluation of market demand, reflecting the specific economic context and industrial needs of Enfield. The Council recognize that each borough has unique circumstances and remain committed to working collaboratively.</p>	No	02006	London borough of Waltham Forest
DM E7: Non-designated industrial sites	<p>CCLA Investment Management (CCLA) recommends revisions to policy E7: Non-Designated Industrial Sites to better accommodate modern industrial requirements and economic potential. They argue that the policy should not penalize reductions in floor space if they lead to site modernization and increased productivity. Instead, the policy should consider factors such as site suitability, modern business needs, quality of floorspace, and essential infrastructure like service yards and parking. CCLA suggests deleting section 2 of the draft policy to allow for more flexible and innovative development, aligning the policy with Policy E4 of the London Plan and ensuring compliance with NPPF paragraph 35(d).</p>	<p>Comments noted.</p> <p>The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
DM E8: Providing for workspaces	Vistry Group supports the introduction of an affordable workspace policy to meet smaller business needs in the Borough, defined as at least 10% below standard market rates. However, they find the policy high-level and place too much onus on developers to demonstrate viability, provision methods, and engagement with workspace providers. Vistry suggests clearer guidance and expectations are necessary to ensure successful delivery of affordable workspace.	Comments noted. The council considers that Policy E8 in Enfield's Local Plan is justified by the Enfield Employment Topic Paper (2024), which recognises the need to support small businesses and encourage economic growth. The policy aims to provide affordable workspace to sustain and grow the local economy. By setting workspace rents at 10% below market rates, the policy helps smaller businesses thrive in Enfield, ensuring economic diversity and resilience. This approach aligns with broader objectives to create a balanced and sustainable economic environment within the borough.	No	01897	Vistry Group
DM E8: Providing for workspaces	SEGRO expresses concerns about the application of the policy requiring developments proposing more than 1,000 sqm of net additional employment floorspace to assess the viability of providing 10% as affordable workspace. They note that the policy's supporting text is not reflected in the policy itself, creating uncertainty about its application. Additionally, SEGRO highlights the lack of viability assessment in the Plan's Evidence Base and suggests including an option for payment in lieu to accommodate different site scales and operational models.	The council appreciates SEGRO's support and acknowledges the concerns regarding the wording of the policy. The Council will continue to engage with SEGRO and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01922	Segro
DM E8: Providing for workspaces	Blackrock UK Property Fund emphasizes the need for a variety of development forms to meet occupier requirements, rather than focusing solely on multi-storey development for intensification. They argue that affordable workspaces are not always appropriate or viable and highlight that it is often unfeasible to accommodate existing occupants into new development schemes due to phasing issues.	The Council appreciates the feedback provided by Blackrock UK Property Fund. The Council's approach to ensuring a variety of development forms, including multi-storey intensification, is based on comprehensive evidence and strategic planning principles. The Employment Topic Paper (2024) outlines the necessity of a flexible yet robust strategy to meet Enfield's employment needs over the plan period. This includes accommodating a range of business requirements and operational needs while promoting sustainable and efficient use of land. The inclusion of affordable workspaces and mechanisms to support existing occupants are vital to Enfield's holistic vision for economic growth and employment retention in the borough. The Council acknowledges the complexities involved and remain committed to working collaboratively to address these challenges effectively.	No	01952	Blackrock UK Property Fund
DM E8: Providing for workspaces	CCLA Investment Management (CCLA) suggests revisions to policy E8: Providing for Workspaces to better align with market demands and support the needs of expanding and larger businesses. They argue that the policy should not impose specific requirements for small or medium-sized units, as this could hinder the availability of suitable industrial space for growing businesses, potentially leading them to relocate outside London. Instead, each site should be assessed individually based on its ability to meet modern business needs. CCLA proposes amending the policy to focus on supporting the provision of	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	affordable workspaces on appropriate sites, ensuring the policy is 'effective' in accordance with NPPF paragraph 35(c).				behalf of site 5 Pickett's Lock Lane
DM E9: Local jobs, skills and local procurement	The Home Builders Federation (HBF) argues that Part 1 of the policy is unsound and ineffective. The policy requires major developments to secure local employment and provide work-based training and apprenticeships, but it is imprecise and not aligned with the specific skills needs identified by the housebuilding industry and the CITB. HBF points out that addressing construction skills and apprenticeships is more effective at a regional level rather than confined to one borough. They highlight that housebuilders already pay an apprenticeship levy and have their own training strategies. Local policies might dissipate resources from other important planning objectives and fail to address actual skills requirements effectively. Therefore, HBF recommends deleting the policy.	Comments noted. While the council recognize the importance of addressing construction skills at a regional level, we believe local efforts also play a crucial role. The Council will review the policy to ensure it is more precise and aligned with industry needs, potentially including collaborations with regional bodies and leveraging existing housebuilders' training strategies. However, the council maintain that local initiatives are vital for supporting community development and meeting borough-specific needs.	No	01851	Home Builders Federation (HBF)
DM E9: Local jobs, skills and local procurement	SEGRO finds points 2 and a, b, and c of the policy too burdensome, potentially deterring investment rather than encouraging business space regeneration. They suggest the policy should reflect the diversity of the employment sector, accommodate different needs, and be proportionate to promote site redevelopment. SEGRO also notes that "jobs" are not easily quantifiable and calls for clarity in the policy wording. Additionally, they seek clarification on the financial contribution calculation formula outlined in Appendix D.	The council appreciates SEGRO's support and acknowledges the concerns regarding the wording of the policy. The Council will continue to engage with SEGRO and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01922	Segro
DM E9: Local jobs, skills and local procurement	Development proposals of ten or more residential units or sites of 0.5 hectares should secure local employment and provide appropriate work-based training/apprenticeships through section 106 obligations. Waltham Forest's equivalent Policy 33 sets a threshold of 25 homes.	The Council appreciates Waltham Forest's feedback and acknowledges the differing thresholds between its policy and Waltham Forest's Policy 33. Enfield's threshold for developments of ten or more residential units or sites of 0.5 hectares is based on comprehensive evidence, as outlined in its Employment Topic Paper 2024. This approach is designed to maximize local employment opportunities and support workforce development in alignment with Enfield's unique economic context. We are committed to working collaboratively with Waltham Forest to achieve mutually beneficial outcomes.	No	02006	London borough of Waltham Forest
DM E9: Local jobs, skills and local procurement	CCLA Investment Management (CCLA) argues that policy E9: Local Jobs, Skills and Local Procurement unjustifiably penalizes proposals that reduce existing floorspace, potentially affecting the feasibility of such schemes and diminishing Enfield's competitive edge compared to neighbouring areas. They believe that the requirements for relocation of businesses, job creation elsewhere in the Borough, or financial contributions for industrial regeneration and job support, as outlined in section 2 and paragraph 9.65, are excessive and unjustified. CCLA recommends removing these penalizations to ensure the policy aligns with NPPF paragraph 35(b) and does not hinder development potential.	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
DM E10: Fostering a successful economy	No comments				Pickett's Lock Lane
DM E11: Creating a smart and digitally connected Borough	The Canal and Rivers Trust emphasizes the need to improve the environment on the eastern side of the RLN, including the towpath and Towpath Road, which is not sufficiently addressed in the Local Plan (LP). They highlight concerns about access, the potential negative impact of tall buildings, and the necessity for properly designed bridge crossings with pedestrian and cycle access. The Trust calls for the inclusion of these considerations in the policy or supporting text and suggests creating a Meridian Hinterlands SPD for a more effective redevelopment approach. They urge the Council to engage with them to ensure these improvements and protections are implemented.	Comments noted. The Council is committed to working collaboratively with Canal & River Trust and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	02007	Canal & River Trust
DM E12: Meridian Hinterlands	The GLA's response notes that Paragraph 9.77 suggests SIL in Meridian Water can accommodate lighter industrial uses, but Class E offers little protection. The GLA emphasises the need to focus on Class B uses within SIL due to their strategic importance.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the GLA to clarify these points further and ensure mutual understanding and agreement on these matters.	No	00120	Greater London Authority
DM E12: Meridian Hinterlands	The GLA's response states that developments within or adjacent to SILs must not compromise industrial activities, in line with Policy E5 Part D of LP2021 and the Mayor's Agent of Change principle. Additionally, intensified industrial uses should be completed before any residential components are occupied.	Comments noted. The Council acknowledges alignment with LP2021 Policy E5 Part D and the Mayor's Agent of Change principle (Policy D13). The Council recognizes the potential SIL loss in Kenninghall within the Meridian Water masterplan, requires careful consideration. The Agent of Change principle is generally supported, but SIL boundaries need oversight, especially regarding Haringey. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the GLA to clarify these points further and ensure mutual understanding and agreement on these matters.	No	00120	Greater London Authority
DM E12: Meridian Hinterlands	The GLA welcomes key performance indicator 12, which monitors net changes in SIL and LSIS floorspace. However, it recommends breaking down the 50ha target into SIL and LSIS components and providing further details for Class B8 and B2 capacity.	Comments noted. The Council acknowledges the GLA's suggestion for Policy D2 to cover the entire SIL or LSIS areas consistently with LP2021 guidelines. The Council recognizes a short-term delivery gap due to current viability issues and phased Green Belt site options. The GLA's approach seems more "wait and see," which may not address short-term needs. The Council suggests further examination of masterplan scope for effective coverage. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the	No	00120	Greater London Authority

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
DM E12: Meridian Hinterlands	The GLA welcomes the clear presentation of the reconfiguration of SIL at Meridian Water. However, it notes that redesignating sites from LSI5 to SIL does not represent a real gain in capacity since these sites are already in industrial use. The draft ELP should clarify the needs for Class B8 and B2 resulting from the reconfiguration.	GLA to clarify these points further and ensure mutual understanding and agreement on these matters.	No	00120	Greater London Authority
DM E12: Meridian Hinterlands	TfL welcomes the inclusion of public transport connections in response to their comments.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
DM E12: Meridian Hinterlands	The Meridian Water team supports the framework outlined in Policy E13 for industrial-led regeneration in the north and east of the Meridian Water area. They appreciate the clear direction provided, with SIL reconfiguration aimed at delivering new workspaces before any residential development, resulting in a substantial net increase in employment floorspace to meet boroughwide industrial and logistics needs. They emphasize the importance of future masterplanning to ensure successful industrial/logistics operations within a mixed-use context. They also suggest that site allocations policy should reflect this masterplanning process, with indicative capacity determined through future planning to optimize brownfield site capacity in line with London Plan Policy D3.	Support noted. The Council appreciates MW's overall support for the ambitions of the draft Enfield Local Plan (ELP), particularly in delivering essential housing, fostering employment growth, enhancing active travel networks, and boosting biodiversity. The Council is committed to collaborating closely with MW and other stakeholders to achieve transformational regeneration and high-quality placemaking. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01945	Meridian Water (LBE)
DM E12: Meridian Hinterlands	London borough of Waltham Forest broadly supports the approach in Enfield's Economy chapter for meeting industrial and office use needs. Under the Duty to Cooperate, Waltham Forest will support Enfield on cross-boundary matters to maximise the potential of employment sites in E1: Employment and Growth and E12: Meridian Hinterlands, particularly those on the joint boundaries of the boroughs.	The Council appreciates the London Borough of Waltham Forest's (LBWF) broad support for the approach in Enfield's Economy chapter. The Council value LBWF's commitment to supporting cross-boundary matters under the Duty to Cooperate, particularly in maximizing the potential of employment sites in policies E1: Employment and Growth and E12: Meridian Hinterlands. This cooperative approach is essential for addressing the economic needs and leveraging employment opportunities in areas along our shared boundaries. The Council look forward to continuing our collaborative efforts to achieve mutual economic growth and development goals.	No	02006	London borough of Waltham Forest
DM E12: Meridian Hinterlands	The Canal and Rivers Trust highlights the towpath as a crucial traffic-free route for walking and cycling, providing connectivity, recreational opportunities, and promoting health and well-being in line with the NPPF. They welcome the Local Plan's (LP) policies that support towpath improvements, including better connectivity, wayfinding, and bridge access. Additionally, the Trust notes the LP's encouragement of	Comments noted. The Council is committed to working collaboratively with Canal & River Trust and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a	No	02007	Canal & River Trust

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	using the RLN for freight and stresses the importance of applicants/developers consulting with them on related proposals and necessary infrastructure, including any required commercial agreements.	Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.			
Chapter 10: Town Centres and High Streets					
SP TC1: Promoting town centres	National Highways supports commercial and business development and expansion within existing areas or re-occupation of vacant floorspace to reduce traffic on the M25 from short and local trips. They advocate for retail activities in sustainable locations serviced by sustainable transport. They emphasize considering cumulative impacts of changes, as all town centre activities generate trips with origins and destinations. According to para 51 in the circular, if a transport assessment indicates severe residual cumulative impacts on the SRN or unacceptable safety impacts, developers must identify necessary transport improvements. They also note that primary shopping areas, often hosting high-trip attractions like medical centres and childcare venues, generate significant traffic, particularly during peak hours, and people are generally unwilling to walk or cycle to these destinations.	The Council welcomes National Highways' support for commercial and business development within existing areas and the re-occupation of vacant floorspace to reduce traffic on the M25. The council acknowledge the importance of situating retail activities in sustainable locations serviced by sustainable transport. The council will carefully consider the cumulative impacts of these changes, recognizing that all town centre activities generate trips with various origins and destinations. In alignment with paragraph 51 of the DfT Circular 02/2013, the council is committed to ensuring that transport assessments for developments identify necessary improvements if severe residual cumulative impacts on the SRN or unacceptable safety impacts are indicated. The council also recognize that primary shopping areas, often home to high-trip attractions such as medical centres and childcare venues, generate significant traffic, particularly during peak hours. The council will work collaboratively with National Highways to address these challenges and develop effective transport solutions that promote sustainable and safe travel options.	No	01753	National Highways Limited
SP TC1: Promoting town centres	The Enfield Society supports the effort to maintain distinctive features and historic character in town centres as outlined in paragraph 1c. However, they express concern that balancing this with the growth and investment focus of paragraph 1a could lead to the development of tall buildings that may be inappropriate for Conservation Areas. This could result in harm to the historic environment, contrary to national policy and the London Plan protections.	Comments noted. The balance between preserving historic character and promoting growth and investment is essential. The Local Plan adheres to national policy and the London Plan by ensuring that any development within and around town centres is sensitive to the distinctive features and historic significance of these areas. The policy encourages sustainable growth while maintaining rigorous design and heritage standards, ensuring that new developments complement and enhance Conservation Areas rather than detract from them.	No	01794	Enfield Society
SP TC1: Promoting town centres	TfL suggests amending Part 2 to read: "All development must contribute positively to placemaking in town centres, including by supporting an attractive and accessible public realm that is safe (and perceived to be safe) for all to use during the day and night time..."	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SP TC1: Promoting town centres	London borough of Waltham Forest broadly support the approach in this chapter, particularly the focus on growth and investment in Town Centres to ensure long-term vitality and viability. They are pleased with	The Council welcomes the support from the London Borough of Waltham Forest for the approach outlined in the chapter, particularly regarding the focus on growth and investment in Town Centres. The	No	02006	London borough of

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	the references to urban greening and creating links to green and blue networks within town centres. Additionally, they support the sequential approach to development, management of use-classes, markets, and meanwhile uses, as well as support for co-working locations and the approach applied to delivery outside designated centres.	Council appreciate their recognition of the emphasis on urban greening and creating links to green and blue networks within town centres. The support for Enfield's sequential approach to development, management of use-classes, markets, meanwhile uses, and co-working locations is highly valued. The Council look forward to continued collaboration to ensure the long-term vitality and viability of our town centres.			Waltham Forest
SP TC2: Encouraging vibrant and resilient town centres	No comments				
TC3: Floorspace above commercial premises	No comments				
TC4: Markets	No comments				
TC5: Meanwhile uses	No comments				
DM TC6: Managing the clustering of town centre uses	McDonald's expresses disappointment that Policy TC6, which limits the concentration of hot food takeaways, remains unchanged. They argue this approach is unsound as it contradicts the National Planning Policy Framework (NPPF) by not supporting economic growth and lacking relevant evidence. They claim the policy is not positive, justified, effective, or consistent with national policy. McDonald's asserts that the policy fails to define "overconcentration" and does not provide evidence of existing concentration levels, making it unjustifiable and potentially stifling economic development.	Comments noted. The restrictions on hot food takeaways in Policy TC6 are designed to address specific local health and community concerns, supported by evidence in our town centres and high streets studies. The policy aligns with Enfield's commitment to promoting healthier lifestyles and creating balanced, vibrant commercial areas. Our evidence base highlights the importance of managing the mix of uses in town centres to prevent overconcentration and its potential negative impacts on public health and the vitality of high streets. These measures are in line with the NPPF's emphasis on creating healthy, inclusive communities.	No	01917	McDonald's Restaurants Ltd
DM TC6: Managing the clustering of town centre uses	This policy addresses managing clustering in Town Centres and the over-proliferation of certain use classes. It is suggested to strengthen this policy by referencing the positioning of Hot Food Takeaways in relation to each other and to schools, colleges, and youth facilities, in line with the London Plan Policy E9 and Waltham Forest's Local Plan Policy 51 Hot Food Takeaways.	The Council appreciates the suggestion from the London Borough of Waltham Forest regarding the management of clustering in Town Centres and the positioning of Hot Food Takeaways. We recognize the importance of considering their location in relation to schools, colleges, and youth facilities and will review and consider incorporating these elements to strengthen our policy and better address community	No	02006	London borough of Waltham Forest

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
		health and wellbeing concerns. The Council look forward continued collaboration on this matter.			
Chapter 11: Rural Enfield					
DM RE1: Character of the Green Belt and open countryside	The Forty Hill and Bulls Cross Study Group highlights concerns about Paragraph 2a, noting that it refers to tree planting and undefined "earth moulding" as acceptable environmental improvements in the Green Belt. They argue that both could be detrimental to the Green Belt, particularly affecting its views and openness, and are not defined in the NPPF or London Plan.	The Local Plan aims to protect and enhance the Green Belt while allowing for necessary development. It emphasizes tree planting to improve air quality, support wildlife, and enhance the landscape, aligning with the Enfield Green and Blue Infrastructure Strategy and adhering to strict planning regulations and environmental assessments to prevent negative impacts on Green Belt openness. Although "earth moulding" is not specifically defined in national policies, it involves land contour modifications designed to improve ecological habitats and visual impacts, with detailed assessments ensuring alignment with Green Belt protection principles. The Plan includes extensive public consultation and transparent evidence base documentation to support these strategies, ensuring they contribute to ecological health and sustainable green infrastructure while preserving the Green Belt's character.	No	01879	Forty Hill and Bulls Cross Study Group
DM RE1: Character of the Green Belt and open countryside	London Wildlife Trust welcome and support the policies in this chapter RE1-4.	Support noted.	No	01974	London Wildlife Trust
DM RE2: Improving access to the countryside and green corridors	The Enfield Society expresses concerns about the policy's applicability to small urban sites, the protection of tenant farmers' rights, and the definitions of 'strategic link route' and 'green grid network.' They strongly support paragraph 1e for prohibiting development at Chase Park to preserve its historic landscape. They also request that the policy number be added to the key on the policies map and that a functional link to the definitive footpaths and rights of way map be provided online.	Comments noted. The Enfield Local Plan aims to enhance walking and cycling routes for all developments, but the scale of improvement for small urban sites will be proportionate. Tenant farmers' rights will be protected to avoid disruptions to agricultural activities. Paragraph 1e is aligned with the London Plan and NPPF, ensuring no development harms the historic landscape at Chase Park. Clarity on strategic links and the green grid network will be provided. The definitive map link issue will be addressed to ensure public access to footpaths and rights of way information.	No	01794	Enfield Society
DM RE2: Improving access to the countryside and green corridors	London Wildlife Trust welcome and support the policies in this chapter RE1-4.	Support noted.	No	01974	London Wildlife Trust

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP RE3: Supporting the rural economy	The Enfield Society is concerned that paragraph 8 of the policy proposes developments such as camping, caravanning, chalet, or similar facilities that may be inconsistent with national Green Belt policy. They believe these types of developments could potentially undermine the protections intended for Green Belt areas.	Comments noted. The proposed developments of camping, caravanning, chalet, or similar facilities within Green Belt areas are consistent with national policy under specific conditions. The National Planning Policy Framework (NPPF) paragraph 145, certain types of development are considered appropriate in the Green Belt, provided they preserve the openness and do not conflict with the purposes of including land within it. This includes facilities for outdoor sport, recreation, and cemeteries, as long as they maintain the openness of the Green Belt and do not harm its character. The proposed policy aligns with these guidelines, ensuring that any such development will be carefully assessed to meet the NPPF's criteria and maintain the integrity of the Green Belt.	No	01794	Enfield Society
SP RE3: Supporting the rural economy	The Enfield Society expresses that multiple proposals within the policy are inconsistent with national Green Belt policy. They emphasize that while some development may be warranted, it is crucial to ensure that any ancillary buildings and vehicular entrances do not compromise the rural and open character of areas like Whitewebbs Lane. Ensuring minimal impact on the landscape and preserving the heritage and environmental values of such areas are paramount.	Comments noted.	No	01794	Enfield Society
SP RE3: Supporting the rural economy	London Wildlife Trust welcome and support the policies in this chapter RE1-4.	Support noted.	No	01974	London Wildlife Trust
DM RE4: Farm diversification and rural employment	The Enfield Society is concerned that supporting uses that contribute to regeneration and strategic policy priorities, such as landscape restoration, culture, and tourism, may lead to uses inconsistent with national Green Belt policy. They argue that the proposals for 'compensation,' including tourism and rural transformation, are not justified. These uses might invite developments that conflict with the principles of preserving the openness and purposes of the Green Belt, as outlined in their representations on Policy PL9 and SS1.	Comments noted. The policy supports uses in the Green Belt that align with national guidelines, ensuring that they contribute positively to regeneration and strategic priorities, such as landscape restoration and tourism, without compromising the integrity of the Green Belt. According to the NPPF, development proposals in the Green Belt should not undermine its openness and should enhance its beneficial uses (paragraph 141). The Enfield Local Plan incorporates these principles, aiming for sustainable development that supports economic and environmental goals while preserving the Green Belt's character and function. The "compensation" proposals are aligned with national policy and are essential for balanced development.	No	01794	Enfield Society
DM RE4: Farm diversification and rural employment	London Wildlife Trust welcome and support the policies in this chapter RE1-4.	Support noted.	No	01974	London Wildlife Trust

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
Chapter 12: Culture, Leisure and Recreation					
SP CL1: Promoting culture and creativity	The Theatres Trust welcomes the policy for protecting existing cultural facilities, aligning with NPPF paragraph 97. They also support the plan's encouragement of new cultural facilities within the borough.	The Council appreciate The Theatres Trust's recognition of our alignment with NPPF paragraph 97 and our efforts to foster new cultural developments. Your feedback reinforces our commitment to maintaining and enhancing Enfield's cultural infrastructure. We look forward to continued collaboration to ensure the vibrancy of our cultural landscape.	No		The Theatres Trust
DM CL2: Leisure and tourism	National Highways acknowledges the policies for leisure tourism and visitor accommodation, supporting the use of the NPPF sequential test for appropriateness. They recommend that Enfield Council ensures all development proposals include robust strategies, policies, and initiatives to: <ul style="list-style-type: none"> • Manage travel demand more effectively. • Mitigate the impact of additional traffic and alleviate recurring congestion. • Address planned or unplanned special events and tourism seasons. • Support the delivery of normal operations. 	The Council appreciates National Highways' acknowledgment of its policies for leisure tourism and visitor accommodation and their support for using the NPPF sequential test. The council agree on the importance of including robust strategies, policies, and initiatives in all development proposals to effectively manage travel demand, mitigate the impact of additional traffic, and alleviate recurring congestion. The council also recognize the need to address the challenges posed by planned or unplanned special events and tourism seasons to support the delivery of normal operations. The council is committed to working closely with National Highways to ensure that these elements are comprehensively addressed in our Local Plan, promoting sustainable and efficient travel for all users.	No	01753	National Highways Limited
DM CL2: Leisure and tourism	The Lee Valley Regional Park Authority (LVRPA) seeks a minor amendment to Policy CL2 Leisure and Tourism. They request that the term "Lee Valley" be changed to "Lee Valley Regional Park" to enhance clarity and align with the PL9 Rural Enfield policy objectives. This amendment supports the strategic significance of the Lee Valley Leisure Complex at Pickett's Lock and ensures consistency in promoting the Regional Park as a key leisure and recreational resource without harming local biodiversity or water quality.	Comments noted. The detailed feedback is welcomed. The Council propose working closely with the Lee Valley Regional Park Authority (LVRPA) to develop a Statement of Common Ground (SoCG). This collaborative approach will ensure that the Local Plan accurately reflects the strategic importance of the Park, aligns with the Park Development Framework, and supports enhancements to green and blue infrastructure and leisure provisions within the borough.	No	01934	Lee Valley Regional Park Authority
DM CL3: Visitor accommodation	National Highways acknowledges the policies for leisure tourism and visitor accommodation, supporting the use of the NPPF sequential test for appropriateness. They recommend that Enfield Council ensures all development proposals include robust strategies, policies, and initiatives to: <ul style="list-style-type: none"> • Manage travel demand more effectively. • Mitigate the impact of additional traffic and alleviate recurring congestion. 	The Council appreciates National Highways' acknowledgment of its policies for leisure tourism and visitor accommodation and their support for using the NPPF sequential test. The council agree on the importance of including robust strategies, policies, and initiatives in all development proposals to effectively manage travel demand, mitigate the impact of additional traffic, and alleviate recurring congestion. 	<ul style="list-style-type: none"> Address planned or unplanned special events and tourism seasons. Support the delivery of normal operations. 	comprehensively addressed in our Local Plan, promoting sustainable and efficient travel for all users.			
DM1 CL3: Visitor accommodation	The Lee Valley Regional Park Authority (LVRPA) seeks an amendment to Policy CL3 Visitor Accommodation, specifically under paragraph 4. They previously suggested that the Regional Park be recognized as a location for potential visitor accommodation facilities, including camping grounds, hotels, and lodges. Although the Council's Statement on Regulation 18 Consultation acknowledged this suggestion, it was not included in the current draft of the Local Plan. The LVRPA requests a modification to Policy CL3 to explicitly reference the Regional Park as a suitable location for such accommodations.	<p>Comments noted.</p> <p>The detailed feedback is welcomed. The Council propose working closely with the Lee Valley Regional Park Authority (LVRPA) to develop a Statement of Common Ground (SoCG). This collaborative approach will ensure that the Local Plan accurately reflects the strategic importance of the Park, aligns with the Park Development Framework, and supports enhancements to green and blue infrastructure and leisure provisions within the borough.</p>	No	01934	Lee Valley Regional Park Authority
SP CL4: Promoting sporting excellence	Friends of Whitewebbs Park argue that prioritizing sporting excellence in policy is legally flawed, unsound, and confusing. They assert that local authorities should focus on providing accessible amenities for all ages to improve public health rather than supporting elite sports, which have ample funding. The park's natural state benefits community health, and intensive sports facilities should be near population centres, not on valuable green belt land. They highlight a High Court judgment indicating limited public access to elite sports facilities, questioning the justification for such developments in Whitewebbs Park for commercial gain by wealthy entities.	<p>Comments noted.</p> <p>Such developments can provide significant community benefits by inspiring local talent, creating jobs, and stimulating economic growth. When carefully integrated, these facilities can enhance rather than diminish local amenities by incorporating public-access features and contributing additional resources for park maintenance. Such sports venues, when planned with community needs in mind, can coexist with and even improve public access to green spaces, aligning with broader goals of public health and well-being.</p>	No	01912	Friends of Whitewebbs Park
SP CL4: Promoting sporting excellence	Tottenham Hotspur FC supports Policy CL4's aim to promote sporting excellence but seeks several modifications for clarity and effectiveness. They suggest removing development management criteria from Policy CL4 and including them in Allocation RUR.07 instead. They also recommend specifying that public access should only be required where compatible with professional sports environments and that the term "maximise" in reference to public access should be replaced with "enhance." Additionally, they request the inclusion of precise language to ensure policy clarity and alignment with strategic goals. These changes are deemed necessary to ensure the Local Plan's soundness.	<p>The Council will continue to engage with Tottenham Hotspur and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.</p>	No	01861	Tottenham Hotspur FC
SP CL4: Promoting sporting excellence	Sport England considers the current policies on sport and recreation facilities unsound due to the lack of a robust and up-to-date evidence base. An updated evidence base and strategy documents are essential to ensure the policies are justified and effective.	<p>Comments noted.</p> <p>The Council is committed to working collaboratively with Sport England and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of</p>	No	01967	Sport England

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP CL4: Promoting sporting excellence	Paragraph 1.b states that publicly accessible strategic sport and leisure facilities will be provided based on a location hierarchy, but this hierarchy lacks up-to-date evidence. This could lead to facilities being placed in non-strategically identified locations. The 2018 PPS does not mention Tottenham Hotspur's Training Facility, and the Enfield Health and Wellbeing Strategy does not reference the priority facilities listed. While Picketts Lock, Enfield Playing Fields, and Firs Farm are mentioned in the Blue and Green Infrastructure Strategy, there is insufficient information on what sport and recreation facilities will be delivered and the supporting evidence base for these decisions.	Common Ground to ensure a shared vision and effective implementation of the Plan's objectives. Comments noted. The Council is committed to working collaboratively with Sport England and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01967	Sport England
SP CL4: Promoting sporting excellence	Sport England supports policy CL5: Sport, Open Space and Recreation but notes it focuses more on open space, while sport is also played indoors. This is acknowledged in Paragraph 12.25 of the supporting text, but Sport England recommends highlighting this more within the policy itself.	Comments noted. The Council is committed to working collaboratively with Sport England and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01967	Sport England
SP CL4: Promoting sporting excellence	The resident raises several legal and ethical concerns regarding Enfield Council's proposal to use Whitewebbs golf course for professional sport. They argue that the proposal violates the public trust status of the land, which was acquired with public funds for public use, and that the planned lease to Tottenham Hotspur would unlawfully limit public access. The resident criticizes the plan for not maximizing publicly accessible space as required and for primarily benefiting a single corporation rather than the broader community. They also express concerns about the site's physical accessibility, the limited scope of health and wellbeing benefits, the impact on important local views, and the inappropriate strategy of prioritizing elite training facilities over public recreational use. Furthermore, they challenge the ethical validity of biodiversity offsetting and the overall environmental impact, arguing that it fails to adequately compensate for the loss of natural habitats essential for local wildlife.	Comments noted. The Enfield Local Plan acknowledges the historical significance of Whitewebbs Park as public trust land since 1931 and aims to enhance its accessibility and utility while balancing land use needs. The plan justifies some greenbelt development to meet housing and infrastructure needs, with stringent measures to protect and enhance biodiversity, such as creating wildflower meadows and habitat banks. Policy SP CL4 promotes sporting excellence and ensures new facilities benefit both professional athletes and local residents, addressing concerns about location and accessibility through transport infrastructure improvements. The council is addressing legal challenges and ensuring all developments comply with legal and ethical standards, with detailed strategies available in the Enfield Local Plan and Exceptional Circumstances Topic Paper.	No	00004	Sam Gracie Tillbrook
SP CL4: Promoting sporting excellence	Residents are concerned about the proposal to use Whitewebbs golf course for professional sports, which is currently under legal challenge at the high court. They argue that the "statutory purpose" of Whitewebbs, held as open space land for the public funded by public money, conflicts with plans to dispose of the area for private use. Further details are available at Enfield Dispatch: Judicial review case concludes with final plea to quash Spurs lease of Whitewebbs Park.	Comments noted. The council acknowledges the concerns about public trust land, environmental impact, public access, traffic, and infrastructure. The Local Plan contains policies to protect biodiversity, enhancing public transport, and addressing pressure on local services. Policies in the plan also ensure the development maintains the area's character and important views. The Council will ensure that all planning policies, including those related to Green Belt protection and sustainable development, are strictly adhered to throughout the planning process.	No	01778	Angelika Harrington

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP CL4: Promoting sporting excellence	Residents object to Enfield Council's plan for Whitewebbs, arguing it misuses public trust land bought for public use in 1931. They claim the proposal to lease the land to Tottenham Hotspur for an elite training facility is illegal, misleading, and will terminate public access rights. Concerns include the significant reduction of publicly accessible space, loss of almost 50% of Green Belt land, and the plan's failure to maximize public access. The proposal also threatens the area's biodiversity and historical landscape, increases urbanization and traffic, and inadequately addresses public transport issues. Additionally, it places pressure on local services, such as water, sewage, hospitals, and schools, and risks losing popular garden centers and associated businesses. Residents suggest the land should remain public and be designated as a natural reserve to preserve biodiversity and provide public recreational space.	Comments noted. The council acknowledges the concerns about public trust land, environmental impact, public access, traffic, and infrastructure. The Local Plan contains policies to protecting biodiversity, enhancing public transport, and addressing pressure on local services. Policies in the plan also ensure the development maintains the area's character and important views. The Council will ensure that all planning policies, including those related to Green Belt protection and sustainable development, are strictly adhered to throughout the planning process.	No	01877	Andy Harrington
SP CL4: Promoting sporting excellence	Residents object to Policy RUR.07 concerning Whitewebbs Golf Course and land within the vicinity of Tottenham Hotspurs Football Club Training Ground, arguing that the proposed lease to a private organization is legally incompatible with the land's statutory purpose as public trust land. They highlight that the land, acquired with public funds in 1931 for public use, should remain fully accessible. Leasing 50% of Whitewebbs Park to a private entity contradicts the design principle that development must maximize public access, effectively minimizing it instead. The removal of public access for private use contravenes the land's intended purpose and only benefits a small percentage of Enfield residents, negatively impacting public health and well-being. Additionally, residents argue that the proposals under Policy CL4 are inappropriate given the irreversible damage to open land, wildlife, and biodiversity, which cannot be offset by the proposed wildflower meadow and habitat enhancements.	Comments noted. The council acknowledges the concerns about public trust land, environmental impact, public access, traffic, and infrastructure. The Local Plan contains policies to protecting biodiversity, enhancing public transport, and addressing pressure on local services. Policies in the plan also ensure the development maintains the area's character and important views. The Council will ensure that all planning policies, including those related to Green Belt protection and sustainable development, are strictly adhered to throughout the planning process.	No	02036	Ruth De Wynter

No	02066	Melisa Zulu

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP CL4: Promoting sporting excellence	The resident has grave concerns about losing Whitewebbs parkland to private use by a large sporting company. This historic public trust land is intended for shared recreational use, not restricted access. Policy CL4's promise of promoting health and sporting excellence feels misleading, benefiting only a few Enfield residents. Moreover, the development will lead to significant habitat loss, negatively impacting wildlife and biodiversity	Comments noted. The Enfield Local Plan acknowledges the historical significance of Whitewebbs Park as public trust land since 1931 and aims to enhance its accessibility and utility while balancing land use needs. The plan justifies some greenbelt development to meet housing and infrastructure needs, with stringent measures to protect and enhance biodiversity, such as creating wildflower meadows and habitat banks. Policy SP CL4 promotes sporting excellence and ensures new facilities benefit both professional athletes and local residents, addressing concerns about location and accessibility through transport infrastructure improvements. The council is addressing legal challenges and ensuring all developments comply with legal and ethical standards, with detailed strategies available in the Enfield Local Plan and Exceptional Circumstances Topic Paper.	No	04343	James Halstead

No	04622	Natalie Dawkins
DM CL5: Sport, open space and recreation	The EnCaf Land Use Working Group (ELUWG) supports the intentions of Policy CL5: Sport, Open Space, and Recreation in the Enfield Local Plan (Reg 19) but identifies several issues that render it non-compliant with relevant legislation and not sound. While acknowledging the health, social, and environmental benefits of open space, ELUWG highlights the lack of up-to-date evidence, particularly regarding the Playing Pitch Strategy, which limits the policy's effectiveness in addressing local deficiencies in sports facilities. They argue that the plan fails to provide adequate new open spaces in areas with existing deficits, such as Edmonton, where significant population growth is anticipated. ELUWG criticizes the plan's reliance on outdated assessments and the unclear responsibility for managing new green spaces, which raises concerns about the viability and delivery of CL5's objectives. Furthermore, they point out inconsistencies between the policy and the overarching goals of the London Plan 2021 and the National Planning Policy Framework (NPPF 2023), particularly in terms of promoting healthy, safe communities and addressing open space needs. ELUWG suggests that the monitoring metrics should be	Comment noted. This change is not considered to be necessary to make the policy sound.	No	01676	Enfield Climate Action Forum

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	improved to better track gains and losses in open space, allotments, play spaces, and playing pitches to ensure the policy effectively addresses identified needs and deficiencies.				
DM CL5: Sport, open space and recreation	Sport England is concerned that there is no reference to enhancing or providing sports facilities to meet current deficits or future needs in major place expansions. They recommend including wording similar to policy CL5 paragraph 9 to ensure new developments provide sport and physical activity provisions to meet growing demand.	<p>Comments noted.</p> <p>The Council is committed to working collaboratively with Sport England other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01967	Sport England
DM CL5: Sport, open space and recreation	Sport England recommends that the inclusion of 'in terms of quantity and quality' is included in this paragraph to ensure that replacement facilities meet the needs of the community.	<p>Comments noted.</p> <p>The Council is committed to working collaboratively with Sport England other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01967	Sport England
DM CL5: Sport, open space and recreation	Sport England would recommend that an additional criterion is added that requires new artificial grass pitches to meet a demonstratable local community need. This would ensure that there is not an over-proliferation of such facilities and that the facility can generate enough income to be sustainable in the long-term.	<p>Comments noted.</p> <p>The Council is committed to working collaboratively with Sport England other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01967	Sport England
DM CL5: Sport, open space and recreation	Sport England DO NOT support the space standard approach in relation to playing pitches as this does not fully reflect the nuance of sport needs. As a result, as suggested in paragraph 12.28, developments should be assessed on a case by case basis and any sport facility requirements should be based on needs/issues identified in sport facility strategies and pre-application discussions. Therefore, Sport England recommends that Table 12.1 is amended to omit the requirements for playing pitches in the table and notes that sports provision would be considered on a case by case basis. Sport England would like to see the removal of the sentence from 12.29 which states '...expected to meet the standards relating to quality, quantity and accessibility set out in Table 12.1' as Sport England do not support the standards approach in relation to playing pitches.	<p>Comments noted.</p> <p>The Council is committed to working collaboratively with Sport England other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01967	Sport England
DM CL5: Sport, open space and recreation	Sport England supports the inclusion of the agent of change principle, which protects sport sites from issues like noise from artificial grass pitches affecting new dwellings or ball strikes from cricket sites. They suggest explicitly mentioning the latter example in the policy,	<p>Comments noted.</p> <p>The Council is committed to working collaboratively with Sport England other stakeholders to refine and update the Local Plan policies where necessary. DM CL6: Protecting and attracting public houses	CAMRA supports Enfield's new pub protection policy but raises several concerns making Policy CL6 unsound. They suggest the three-month marketing requirement should occur immediately prior to a planning application and recommend involving an expert to review marketing exercises. They highlight the need for heightened protection in areas with a severe shortage of pubs, like Edmonton, and broader protection for pub-related elements such as gardens and car parks. CAMRA also worries about the assessment of community value being potentially biased and suggests clear criteria for such assessments. They advocate for removing references to pubs in Policy CL1 due to conflicts with CL6 and stress the importance of requiring new pubs in	Comments noted. Enfield's new pub protection policy (CL6) is designed to balance development needs with community interests, ensuring sustainable growth. The three-month marketing exercise, while a positive step, can be refined to specify it must occur immediately prior to applications. Involving an expert for marketing reviews can enhance objectivity, and protections for ancillary elements of pubs can be incorporated. However, the policy already aligns with broader strategies for maintaining community assets, and the emphasis on new pubs in	No	02045	Campaign to Protect Real Ale

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	major redevelopment areas. Lastly, they recommend enforcement action when pubs are lost without planning consent.	redevelopment areas underscores the council's commitment to enhancing local amenities.			
Chapter 13: Movement and connectivity					
SP T1: A sustainable and decarbonised transport system	The London Borough of Redbridge supports the proposed measures and policy expectations for strategic transport improvements, public transport, and active travel. They also endorse the safeguarding approach for Crossrail 2, contingent on future funding availability.	Support noted. The London Borough of Enfield appreciates the London Borough of Redbridge's endorsement of our proposed measures and policy expectations for strategic transport improvements, public transport, and active travel. Enfield also value their support for our safeguarding approach for Crossrail 2, which is contingent on future funding availability. These measures align with Enfield's commitment to enhancing sustainable transport infrastructure and connectivity across the borough.	No	01603	London Borough of Redbridge
SP T1: A sustainable and decarbonised transport system	National Highways supports the requirement for Transport Assessments (TAs) in policies T1 and T3 to ensure sustainable infrastructure but highlights several concerns. They note that the NPPF (2023) does not mandate TAs or travel plans (TPs), and these assessments may not be sufficient to achieve net zero emissions and 20-minute neighbourhoods, particularly for large developments. TAs might obscure traffic impacts with optimistic work-from-home assumptions, and TPs, often voluntary and non-binding, may be neglected by developers. They recommend considering the "Vision Led" TA process from DfT Circular 01/2022. Additional issues include the lack of tailored TP guidance for new developments, varying quality of TPs, difficulty in setting targets for unknown end-users, and limited resources for local governments to monitor and enforce TPs. National Highways stresses the need for new processes to move away from a 'predict and provide' approach.	The Council acknowledges and appreciates National Highways' detailed feedback on Policies T1 and T3 regarding Transport Assessments (TAs) and Travel Plans (TPs). We recognize the challenges highlighted, including the limitations in achieving net zero emissions and 20-minute neighbourhoods, the voluntary nature of TPs, and enforcement issues. To address these, we will work to enhance the expertise of planning officers, improve monitoring mechanisms, and ensure consistent quality in TPs. Enfield Council is eager to collaborate with National Highways and other stakeholders to refine our approach, align with sustainable development principles, and effectively support our goals for reduced emissions, sustainable infrastructure, and vibrant 20-minute neighbourhoods. The council is willing to work together and seek further engagement and a statement of common ground to ensure all transport-related aspects of the Local Plan are robust and deliverable.	No	01753	National Highways Limited.
SP T1: A sustainable and decarbonised transport system	HCC's response emphasizes that Enfield's Local Plan should align with Hertfordshire's Local Transport Plan (LTP4), focusing on sustainable transport and reducing car dependency. They highlight the importance of infrastructure for walking, cycling, and public transport, and managing travel demand. HCC supports Enfield's sustainable travel policies but notes specific concerns about some spatial allocations. They stress the need for cross-boundary impacts to be addressed, ensuring strategic sites are accessible by sustainable travel to mitigate congestion in areas bordering Enfield.	Comments noted. The Council acknowledge HCC's key principles of supporting sustainable transport, prioritizing walking, cycling, and public transport, and managing travel demand. Enfield Council is committed to addressing potential cross-boundary impacts and enhancing sustainable travel connections. The Council will ensure these concerns are addressed through a Statement of Common Ground (SoCG) with Hertfordshire County Council.	No	01755	Hertfordshire County Council - Highways
SP T1: A sustainable and decarbonised transport system	HCC's response highlights several active travel initiatives in Broxbourne that interface with Enfield, including a cycle path along the New River from the M25 to Wormley, active travel improvements for the A10, and several cycle routes around Waltham Cross town centre. HCC welcomes discussions with Enfield to integrate these initiatives	Comments noted. The Council appreciates HCC's proactive approach and is keen to collaborate to integrate these initiatives with Enfield's active travel plans. We welcome discussions to create strategic cycling connections	No	01755	Hertfordshire County Council - Highways

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
transport system	with Enfield's active travel connections, aiming to create strategic cycling connections between Hertfordshire, Enfield, and beyond, including those created through development.	between Hertfordshire, Enfield, and beyond, with the aims to enhance connectivity and promote sustainable travel options for our communities. The Council looks forward to engaging with HCC to ensure seamless integration of these important active travel networks.			
SP T1: A sustainable and decarbonised transport system	The NHS London Healthy Urban Development Unit (HUDU) strongly supports Enfield's commitment to achieving an 80% mode share for active and sustainable travel by 2041. They suggest emphasising the significant benefits of walking and cycling within the policy.	The Local Plan seeks to ensure that walking and cycling are prioritised as modes of transport and reduce the need to travel. Planning policy can only apply where developments need planning permission and the policy is reasonably related to the development that is being proposed. The Council is committed to working collaboratively with the NHS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01872	NHS London Healthy Urban Development Unit (HUDU)
SP T1: A sustainable and decarbonised transport system	Car Parking Policies: The approach to car parking is now addressed in policies T2 and T3.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SP T1: A sustainable and decarbonised transport system	Mitigation Requirements: TfL appreciates the expanded requirements for mitigation in parts 10a and 10b, but recommends clarifying that part 10b also applies to additional rail station capacity. They also suggest adding bus priority measures, bus stands, and bus drivers' facilities to the list of bus network infrastructure in part 9a.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SP T1: A sustainable and decarbonised transport system	Service Frequency Improvements: While noting the aspiration to improve frequency on Enfield Town/Cheshunt services, TfL states they cannot commit to such improvements due to current funding constraints.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SP T1: A sustainable and decarbonised transport system	Crossrail 2 Project: Previous comments on the Crossrail 2 project remain unchanged, with no updates in status or safeguarding.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP T1: A sustainable and decarbonised transport system	Cycling Support: TfL supports the positive approach to cycling in part 8, including London Plan targets, but suggests specifying that cycle route designs should follow London Cycling Design Standards (LCDS). Part 8c should confirm that London Plan cycle parking standards will be met, accommodating adapted cycles and cargo bikes, and that hire bike/scooter provisions should be additional to cycle parking requirements.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SP T1: A sustainable and decarbonised transport system	Network Rail (NR) emphasises the importance of managing safety risks associated with developments near rail infrastructure and urges early engagement from developers for necessary agreements, especially for new rail crossings, which should be bridges. Enhancements to footways on road bridges and upgrades to railway boundary fences may be required, funded by developers. NR highlights the importance of connectivity improvements at New Southgate, Crews Hill, and Chase Park.	Comments noted. The Council appreciates Network Rail's emphasis on managing safety risks associated with developments near rail infrastructure and the call for early engagement from developers. The necessity for bridges for new rail crossings, improvements to footways on road bridges, and upgrades to railway boundary fences funded by developers is noted. The Council is committed to enhancing connectivity at New Southgate, Crews Hill, and Chase Park. Further engagement and a statement of common ground will be pursued to address and resolve these issues collaboratively.	No	01933	Network Rail
SP T1: A sustainable and decarbonised transport system	Network Rail (NR) currently has no capacity concerns regarding proposed housing numbers but requires ongoing consultation. NR welcomes private investment for capacity and accessibility improvements at stations and in the network. They highlight the importance of integrated travel improvements and the potential for Crossrail 2 on the West Anglia Main Line, while discouraging permanent redevelopment within the safeguarded Crossrail 2 corridor.	Comments noted. The Council appreciates Network Rail's confirmation of no current capacity concerns regarding proposed housing numbers and the importance of ongoing consultation. The Council welcomes Network Rail's support for private investment for capacity and accessibility improvements at stations and within the network. The emphasis on integrated travel improvements and the potential for Crossrail 2 on the West Anglia Main Line is acknowledged. The Council agrees on discouraging permanent redevelopment within the safeguarded Crossrail 2 corridor. Further engagement and a statement of common ground will be pursued to address these matters collaboratively.	No	01891	Network Rail
SP T1: A sustainable and decarbonised transport system	Network Rail (NR) requires future consultation as specific development plans progress to understand impacts. Informative guidelines for works near NR infrastructure are provided. NR is keen to remain engaged in the preparation and ongoing consultations for the Enfield Local Plan.	Comments noted. The Council acknowledges Network Rail's requirement for future consultation as specific development plans progress to understand impacts. The Council appreciates the informative guidelines provided for works near NR infrastructure and values NR's keen interest in remaining engaged in the preparation and ongoing consultations for the Enfield Local Plan and look forward to further collaboration and a statement of common ground to ensure comprehensive planning and safety around NR infrastructure.	No	01891	Network Rail

SP T1: A sustainable and decarbonised transport system	Appendix A contains specific Asset Protection (ASPRO) informative for developers.	Comments noted and the council looks forward to further collaboration and a statement of common ground to ensure comprehensive planning and safety around NR infrastructure.	No	01891	Network Rail
SP T1: A sustainable and decarbonised transport system	Network Rail (NR) welcomes the opportunity to discuss further policy, site protection, and infrastructure intensification in Enfield, considering impacts on local, regional, or national levels. NR is particularly interested in collaborating with the Council on urban regeneration aspirations, as referenced in the Council's policy document on Pg. 324 and elsewhere.	Comments noted. The Council is pleased to engage further with Network Rail on policy, site protection, and infrastructure intensification in Enfield. The Council appreciates NR's interest in collaborating on urban regeneration aspirations as referenced in its policy document. The Council looks forward to ongoing discussions to ensure that local, regional, and national impacts are considered, and a statement of common ground can be developed to support these initiatives effectively.	No	01891	Network Rail
SP T1: A sustainable and decarbonised transport system	Network Rail (NR) emphasises the importance of infrastructure plans and site intensification impacting the operational railway. Sites should not be considered free of impact or favourably allocated for residential or mixed-use unless they are supported by, beneficial to, or confirmed to have no notable detrimental impact on the railway.	Comments noted. The Council acknowledges the importance of ensuring that infrastructure plans and site intensification do not negatively impact the operational railway. The Council will carefully consider the effects on railway operations when allocating sites for residential or mixed-use development. The Council look forward to ongoing collaboration with Network Rail to ensure that developments are either beneficial to the railway or have no significant detrimental impact. Further engagement and the development of a statement of common ground will help address these concerns effectively.	No	01891	Network Rail
SP T1: A sustainable and decarbonised transport system	While supporting active travel, resident is worried that redeveloping large retail sites with car parks into mixed-use facilities with less parking, as referenced in PL8 on Palmers Green, might backfire. Instead of switching to walking or public transport, people might drive further to sites with available parking, especially for large weekly shops, which are incompatible with active travel.	The Enfield Local Plan's Spatial Strategy and Overall Approach, as well as the Site Allocation Topic Paper, prioritize sustainable development and improved infrastructure. While promoting active travel, the plan includes considerations for mixed-use developments that integrate necessary parking solutions to ensure accessibility. This approach aims to balance reducing car dependency with providing practical options for residents, thereby supporting a transition to more sustainable transportation methods without causing undue inconvenience.	No	01714	Michael Clary
SP T1: A sustainable and decarbonised transport system	Residents are concerned that the proposed development will reduce access to public transport and parking, especially affecting those with	The Enfield Local Plan's Spatial Strategy and Overall Approach, as well as the Site Allocation Topic Paper, prioritize sustainable	No	03999	Dawn Branigan

decarbonised transport system	disabilities who rely on car parks to reach central London. The local plan is criticized for potentially increasing traffic and pollution, lacking necessary infrastructure, and negatively impacting the area's historical character. Residents suggest considering alternative areas for development to minimize inconvenience and ensure inclusivity.	development and improved infrastructure. While promoting active travel, the plan includes considerations for mixed-use developments that integrate necessary parking solutions to ensure accessibility. This approach aims to balance reducing car dependency with providing practical options for residents, thereby supporting a transition to more sustainable transportation methods without causing undue inconvenience.	No	01311/01669/0 1854/01856/01 863/01864	Hadley Wood Neighbourhood Planning Forum
DM T2: A healthy and connected Enfield	The Hadley Wood Neighbourhood Planning Forum is concerned that the Enfield Local Plan (ELP) contradicts the Mayor of London's Transport Strategy by proposing Green Belt developments with low public transport accessibility, weakening existing policies. Examples include vague compensatory requirements for garden developments (BG6), softened alignment requirements for rear extensions (DE15), reduced protections for wildlife corridors (BG1), and less stringent measures for tree conservation (BG8). These changes, with non-definitive language, risk making the policies ineffective and unenforceable.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the HWNPF to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01989	Martin Holland
DM T2: A healthy and connected Enfield	Resident consider policy is not legally compliant and not sound, and should be deleted from the plan.	The Enfield Local Plan's Spatial Strategy and Overall Approach, as well as the Site Allocation Topic Paper, prioritize sustainable development and improved infrastructure. While promoting active travel, the plan includes considerations for mixed-use developments that integrate necessary parking solutions to ensure accessibility. This approach aims to balance reducing car dependency with providing practical options for residents, thereby supporting a transition to more sustainable transportation methods without causing undue inconvenience.	No	01753	National Highways Limited
DM T2: A healthy and connected Enfield	National Highways' response to policies T1 and T3 regarding the requirement for a Transport Assessment (TA) supports the need for TAs to ensure sustainable infrastructure but raises several concerns. They note that the NPPF (2023) does not mandate TAs or travel plans (TPs) and question their sufficiency in achieving net zero emissions and 20-minute neighborhoods, particularly for large developments. Concerns include the potential for TAs to obscure traffic impacts through optimistic work-from-home assumptions, the non-binding nature of TPs, and the lack of expertise among planning officers in assessing and mitigating transport impacts. They suggest considering the "Vision Led" TA process as referenced by DfT Circular 01/2022. Issues with TPs include their tailored nature to existing workplaces, the varying quality submitted with applications, difficulties in setting targets for unknown end-users, and local governments' lack of resources for effective monitoring and enforcement. National Highways emphasizes the need for new processes and assessments to move away from the 'predict and provide' approach.	The Council acknowledges and appreciates National Highways' detailed feedback on Policies T1 and T3 regarding Transport Assessments (TAs) and Travel Plans (TPs). We recognize the challenges highlighted, including the limitations in achieving net zero emissions and 20-minute neighborhoods, the voluntary nature of TPs, and enforcement issues. To address these, we will work to enhance the expertise of planning officers, improve monitoring mechanisms, and ensure consistent quality in TPs. Enfield Council is eager to collaborate with National Highways and other stakeholders to refine our approach, align with sustainable development principles, and effectively support our goals for reduced emissions, sustainable infrastructure, and vibrant 20-minute neighborhoods. The council is willing to work together and seek further engagement and a statement of common ground to ensure all transport-related aspects of the Local Plan are robust and deliverable.	No		

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
DM T2: A healthy and connected Enfield	National Highways supports commercial and business development and expansion within existing areas or re-occupation of vacant floorspace to reduce traffic on the M25 from short and local trips. They advocate for retail activities in sustainable locations serviced by sustainable transport. They emphasize considering cumulative impacts of changes, as all town centre activities generate trips with origins and destinations. According to para 51 in the circular, if a transport assessment indicates severe residual cumulative impacts on the SRN or unacceptable safety impacts, developers must identify necessary transport improvements. They also note that primary shopping areas, often hosting high-trip attractions like medical centres and childcare venues, generate significant traffic, particularly during peak hours, and people are generally unwilling to walk or cycle to these destinations.	The Council welcomes National Highways' support for commercial and business development within existing areas and the re-occupation of vacant floorspace to reduce traffic on the M25. The council acknowledge the importance of situating retail activities in sustainable locations serviced by sustainable transport. The council will carefully consider the cumulative impacts of these changes, recognizing that all town centre activities generate trips with various origins and destinations. In alignment with paragraph 51 of the DfT Circular 02/2013, the council is committed to ensuring that transport assessments for developments identify necessary improvements if severe residual cumulative impacts on the SRN or unacceptable safety impacts are indicated. The council also recognize that primary shopping areas, often home to high-trip attractions such as medical centres and childcare venues, generate significant traffic, particularly during peak hours. The council will work collaboratively with National Highways to address these challenges and develop effective transport solutions that promote sustainable and safe travel options.	No	01753	National Highways Limited
DM T2: A healthy and connected Enfield	HCC notes the policy statement: "utilising the London Plan parking standards as the maximum permitted but may consider further reductions in car parking provision based on local considerations. This could include limiting on-site parking spaces designated for disabled people where necessary, and/or essential operational or servicing needs only." HCC seeks clarification on whether it should read: "This could include limiting on-site parking to spaces designated for disabled people..."	Comments noted. The Council is keen to engage further on this matter and will prepare a Statement of Common Ground (SoCG) with HCC to collaboratively address these transportation concerns and ensure the proposed developments align with both Enfield's and Hertfordshire's strategic transport and infrastructure goals.	No	01755	Hertfordshire County Council - Strategic Transport & Rail
DM T2: A healthy and connected Enfield	The Enfield Society argues that Enfield Town has functioned effectively as a Major Town Centre under the current Core Strategy (Core Policy 6) and does not require the introduction of tall buildings to maintain its status within the town centre hierarchy. They contend that the current structure has supported the town's role successfully for many years, indicating that significant changes like tall buildings are unnecessary.	Comments noted. The Enfield Local Plan recognizes Enfield Town as a Major Centre and aims to maintain its role while adapting to future needs. Tall buildings are not required but are considered where they enhance the town's vibrancy and resilience without compromising its historical character. The policy ensures that any new developments align with the town's established identity and contribute positively to its growth. By integrating modern needs with historical preservation, the plan supports sustainable development while safeguarding Enfield Town's unique character. The Enfield Local Plan, including TC2, aligns with the National Planning Policy Framework (NPPF) by promoting sustainable, balanced growth that preserves historical and cultural heritage. The evidence base for the Local Plan, including the Enfield Characterisation Study and the Town Centre Strategies, supports the need for adaptable and resilient town centres while maintaining their distinctive character. This approach is consistent with the London Plan's guidelines for town centre development and heritage conservation.	No	01794	Enfield Society

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
DM T2: A healthy and connected Enfield	The NHS London Healthy Urban Development Unit (HUDU) welcomes the policy's recognition that active travel and mobility are essential components of a healthy lifestyle. They also support adherence to the 'Healthy Streets indicators' as appropriate.	Comments noted. The Council greatly value the input from the NHS London Healthy Urban Development Unit, North Central London Integrated Care Board (NCLICB), and NHS providers. The Council is committed to working collaboratively with the NHS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No		NHS London Healthy Urban Development Unit (HUDU)
DM T2: A healthy and connected Enfield	TfL welcomes the reference to the goal of achieving zero road deaths by the specified year.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
DM T2: A healthy and connected Enfield	Car Parking Policies: The approach to car parking is now addressed in policies T2 and T3.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
DM T2: A healthy and connected Enfield	Support for Active Transport: TfL strongly supports parts 2a and 2b, which aim to encourage a substantial shift from private car journeys to active transport modes and to create quieter neighbourhoods by removing road traffic and prioritizing active travel measures.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
DM T2: A healthy and connected Enfield	Parking Standards: TfL welcomes the statement in part 3 that the Council will limit parking availability by adhering to the London Plan parking standards as the maximum permitted. They suggest a minor modification to the final sentence of part 3a for clarity: "This could include limiting on-site parking to spaces designated for disabled people where necessary, and/or essential operational or servicing needs only."	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
DM T2: A healthy and connected Enfield	Parking Permits and Car Parks: TfL also supports part 3b, which prohibits issuing parking permits for new developments, and part 3c, which considers redeveloping existing car parks for alternative uses.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a	No	01891	Transport for London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
		Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.			
DM T2: A healthy and connected Enfield	Support for Car-Free and Low Parking Developments: TfL welcomes the statement in part 1 that developments well connected by public transport and with active travel opportunities should be designed as car-free or with very low parking provision, in line with London Plan standards. They also support the emphasis on well-connected, high-quality, convenient, and safe active travel routes.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
DM T2: A healthy and connected Enfield	SEGro acknowledges the general approach toward a healthy and connected Enfield but requests greater flexibility in the policy wording to reflect the specific requirements of employment sites and their occupiers. They emphasize the need for adequate car parking that meets employment occupiers' needs while providing for other transportation modes. SEGRO stresses that the policy should consider site-specific characteristics and operational needs to ensure the delivered floorspace remains attractive and lettable to the market.	The council appreciates SEGRO's support and acknowledges the concerns regarding the wording of the policy. The Council will continue to engage with SEGRO and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01922	Segro
DM T2: A healthy and connected Enfield	London borough of Waltham Forest broadly supports Enfield's policy agenda of encouraging investment in active and sustainable transport infrastructure. However, they suggest that Enfield go further in Policy T2 Part 3 to reduce car parking, ensuring it supports the active and sustainable travel program and meets MTS targets on vehicle trip reduction and road safety through Vision Zero. Enfield should consider setting its own car parking standards that exceed the London Plan, as the flexibility in the London Plan can allow significant car parking in low PTAL, outer London areas, potentially increasing vehicle traffic. Additionally, they encourage Enfield to make a stronger commitment to redeveloping existing car parks for alternative uses.	The Council appreciates the support from the London Borough of Waltham Forest for Enfield's policy agenda on active and sustainable transport infrastructure. The Council acknowledge the suggestion to strengthen Policy T2 Part 3 by reducing car parking further to support active and sustainable travel, meeting MTS targets on vehicle trip reduction and Vision Zero for road safety. The Council will consider setting more stringent car parking standards that exceed the London Plan, especially for low PTAL, outer London areas. Additionally, the council will explore stronger commitments to redevelop existing car parks for alternative uses, promoting sustainable urban development. The Council look forward to continued collaboration to achieve these goals.	No	02006	London borough of Waltham Forest
DM T2: A healthy and connected Enfield	Asda Stores Ltd has no comments in relation to the legal compliance of the Plan. Whilst Asda generally considers the Plan to be sound, it does have specific comments and recommendations in relation to this part of the Plan, which are detailed in the enclosed letter.	Comments noted,	No	01732	Asda Stores Ltd
DM T2: A healthy and connected Enfield	Savills, on behalf of Asda, supports the Placemaking Vision for Southgate as a thriving District Centre and the specific policy for Southgate, including the identification of Asda's store within the District Centre boundary. They recommend clarifying Figure 3.7 to avoid ambiguity. While supporting enhancements to the pedestrian environment and reducing surface car parks, Savills emphasizes the need for appropriate vehicular parking for food shopping. They also suggest amending Strategic Policy TC2 to include "where appropriate to do so" for Criteria 2 requirements, acknowledging that minor	The council welcomes Asda's support of the Placemaking Vision for Southgate and the specific policy for Southgate. The council appreciate their feedback on Figure 3.7 and will ensure it is clarified to avoid ambiguity. The council acknowledge the importance of appropriate vehicular parking for food shopping and will consider this in our policies. The council will amend Strategic Policy TC2 to include "where appropriate to do so" for Criteria 2 requirements to reflect the nature of minor developments. The approach aligns with Enfield's commitment to sustainable development and community-focused	No	01732	Asda Stores Ltd

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	developments might not contribute to all policy matters. Additionally, Asda welcomes engaging with the Council on a future SPD to support the placemaking vision.	planning as outlined in the ELP Spatial Strategy and Overall Approach Topic Paper. The council welcome further engagement with Asda on developing the future SPD to support our placemaking vision.			
DM T3: Constructing a vibrant and safe Enfield for everyone	TfL reiterates that contributions towards public transport improvements should have equal priority with affordable housing to align with the London Plan. Such contributions are necessary for development in the Placemaking areas, as specified in the individual policies. This priority should be reflected in the Infrastructure Delivery Plan.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
Chapter 14: Environment Protection					
DM ENV1: Local environmental protection	The Metropolitan Police Service Design Out Crime Team highlights the importance of lighting in enhancing community safety and supporting nighttime activities. However, the policy seeks to prevent light pollution, including glare and light spillage, to avoid negatively impacting residential amenities or the countryside's character. The goal is to balance the benefits of lighting for safety and evening activities with the need to protect the environment and quality of life.	Comments noted. The council is supportive of a design-led approach to achieve optimum site density while prioritizing safety and security through the implementation of Secured by Design principles. This policy ensures the integration of proven crime prevention measures from the design and planning stages, significantly enhancing the safety and security of residents and the broader community. Each application will be evaluated individually, ensuring tailored solutions that promote safety, resilience, and community well-being.	No	01721	Metropolitan Police Service Design Out Crime Team
DM ENV1: Local environmental protection	Natural England welcomes Policy ENV1's commitment to ensuring all major developments are at least air quality neutral, which will help reduce air quality impacts on designated European sites. However, they emphasize the need for further measures to ensure smaller developments do not harm these designated sites.	Comments noted. The council acknowledges Natural England's emphasis on the need for measures to ensure smaller developments do not harm designated European sites, in addition to the commitment to air quality neutrality for major developments. The council will be preparing a Statement of Common Ground with Natural England to address these concerns comprehensively.	No	01743	Natural England
DM ENV1: Local environmental protection	Recommendation to change "should explore" to "must explore" infrastructure improvements and remove "where feasible."	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01926	Environment Agency
DM ENV1: Local environmental protection	Sport England recommends listing Sport and Recreation facilities under "other priorities" in Figure 15.1 of the Local Plan. Given the plan's focus on health and wellbeing and the mention of developer contributions in policy CL5, this inclusion would ensure that new developments contribute to meeting the increased demand for sport	Comments noted. The Council is committed to working collaboratively with Sport England other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of	No	01967	Sport England

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	and physical activity provision, fostering healthier and more physically active communities in Enfield.	Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.			
DM ENV1: Local environmental protection	London Wildlife Trust supports policy ENV1 and recommends adding to paragraph 14.17 that lighting should avoid unnecessary energy use and adverse impacts on road safety and wildlife. Specifically, lighting can disrupt ecosystems of nocturnal species, especially near water and migration paths like the Lee Valley. It is essential to ensure lighting is focused only on intended areas to prevent spillover effects on surroundings.	Comments noted. The Council acknowledge the importance of addressing these issues comprehensively. We will consider incorporating specific measures in the policy or supporting paragraphs to ensure that buildings are designed and located to mitigate adverse impacts on biodiversity. This may include facade treatments, detailed lighting plans, and measures to reduce wind tunneling effects. Additionally, we will refine Policy ENV1 to include more specific guidance on lighting to address its impact on wildlife.	No	01974	London Wildlife Trust
DM ENV1: Local environmental protection	CCLA Investment Management (CCLA) stresses the need for a balance between environmental protection and practical development realities in policy ENV1: Local Environmental Protection. They argue that the draft policy should avoid imposing excessively stringent requirements unless they are thoroughly justified by evidence, as overly onerous conditions could undermine project viability. CCLA advocates for ensuring that environmental policies support sustainable outcomes without placing undue burdens on stakeholders.	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
Chapter 15: Delivering and Monitoring					
SP D1: Securing contributions to mitigate the impact of development	The Home Builders Federation (HBF) argues that aspects of the policy are unsound and contrary to national policy. They appreciate the Council's prioritisation of affordable housing but note concerns with other priorities. HBF asserts that biodiversity net gain (BNG) of 10% is already a legislative requirement and should not be included in S106 agreements. They oppose the plan's 20% BNG requirement, as only 10% was tested for viability. HBF also recommends removing climate change goals from the list, as these are covered by Building Regulations. Additionally, they argue that skills training is a strategic issue better addressed at a national or London-wide level and not suitable for local planning gain. They suggest concentrating development gains on affordable housing and key infrastructure.	Comments noted. The Council acknowledge HBF's concerns. The Council recognize the legislative requirement for a 10% BNG. The proposed 20% BNG target is intended to exceed basic compliance and our evidence base on viability testing considers various factors impacting the deliverability of development projects, and any adjustments will be made in light of these findings. While Climate Change Goals are integral to our sustainability agenda, we will ensure that they do not duplicate Building Regulations requirements. Our policies aim to support and complement national standards without imposing additional burdens. We understand the importance of addressing skills training at regional and national levels. We will focus local resources more effectively and ensure alignment with broader strategies to support the construction industry. Our approach will be informed by our viability studies to	No	01851	Home Builders Federation (HBF)

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP D1: Securing contributions to mitigate the impact of development	The NHS London Healthy Urban Development Unit (HUDU) supports Policy D1's commitment to securing funds for infrastructure through CIL and s106 contributions. They suggest health infrastructure should be prioritized higher in the Infrastructure Priorities list in figure 15.1, despite its interlinkage with other priorities like air quality and active travel. HUDU recommends that all site allocations mitigate their development's impact on health infrastructure, prioritizing contributions to existing health site capacity. They also suggest that where site allocations include a health facility, the plan should reassess its necessity as it progresses, and s106 agreements should specify design requirements or include a fallback financial contribution if the space cannot meet NHS needs.	ensure that any requirements do not undermine the overall feasibility of development projects. The need to address health infrastructure requirements is understood. Providing sufficient health infrastructure is reliant to a large extent in identifying needs arising from development and identifying solutions to meet that need. In absence of this any policy is likely to be generic. It is recognised that greater emphasis could be placed in the Place policies on consistency on health infrastructure. The Council is committed to working collaboratively with the NHS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01872	NHS London Healthy Urban Development Unit (HUDU)
SP D1: Securing contributions to mitigate the impact of development	TfL welcomes the requirement for developments to contribute towards improvements at Enfield Town station, although they cannot commit to increased peak hour frequencies. They also support the requirement for car-free development, consistent with the London Plan and considering the PTAL of up to 6a.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SP D1: Securing contributions to mitigate the impact of development	Vistry Group supports reducing financial contributions for job loss and apprentice requirements while acknowledging the importance of adjusting financial obligations for inflation. However, they seek clarity on various contributions not listed in Appendix E, such as flood mitigation, public transport, cooling measures, green infrastructure, heritage impacts, conservation appraisals, public art, and EV charging points. Understanding these contributions is essential for assessing site viability and informing proposals. Additionally, they request more details on contributions related to Epping Forest and conservation area appraisals.	The council appreciates Vistry Group's support and acknowledges the concerns regarding. The Council will continue to engage with Vistry Group and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01897	Vistry Group
SP D1: Securing contributions to mitigate the impact of development	Places for London request that Section 4 of Draft Policy SP D1 in relation to review mechanisms make reference to and accord with Policy H5 of the London Plan, Threshold Approach to Applications.	Comments noted. The council acknowledges the importance of collaboration and agrees to work together with Places for London. We will formalize our mutual understanding and agreements through a Statement of Common Ground, ensuring that all recommendations and concerns are addressed cohesively within the planning framework. This collaborative approach will help us effectively accommodate growth, enhance sustainable travel, and support higher density development in areas with high transport accessibility.	No	01937	TfL Places for London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP D1: Securing contributions to mitigate the impact of development	The allocation does not appear to impact on the existing playing field, however it does impact on the existing MUGA, therefore this site allocation does not meet with the NPPF paragraph 103 as well as Sport England's playing field guidance. If there are indoor sport facilities at the school, then these should be replaced to ensure there is no loss of sport provision in the area and displacement of clubs. The sport facilities must be replaced to, at least, the same quality, quantity and accessibility as the existing site as outlined in the local plan. This should be made clear in the allocation. Sport England are also concerned that the existing playing field will not be managed or maintained if the existing schools is to be replaced.	Comments noted. The Council is committed to working collaboratively with Sport England other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01967	Sport England
SP D1: Securing contributions to mitigate the impact of development	NHS Property Services (NHSPS) supports Draft Policy D1, which requires that new developments meet relevant policies and infrastructure requirements in a timely manner, with an allowance for reduced S106 contributions if demonstrated to render the development unviable. NHSPS particularly welcomes Parts 3 and 5, which ensure that developments provide on-site infrastructure or, where not possible, contribute to off-site provisions. They appreciate that planning applications may be refused if nil or reduced contributions make the development unacceptable in planning terms, even after considering alternative funding sources. NHSPS requests continued engagement with the Council to refine healthcare needs and solutions identified in the Infrastructure Delivery Plan (IDP). They emphasize the need for flexibility in determining how to meet healthcare needs, including financial contributions, new on-site infrastructure, free land/infrastructure/property, or a combination thereof. It is crucial that the NHS and its partners collaborate with the Council to formulate appropriate mitigation measures.	The Council appreciates feedback from NHS Property Services and recognizes the importance of addressing key workers' housing needs, including NHS staff. Draft Policy H2 is supported by the Local Housing Need Assessment (2020), the Enfield Housing Topic Paper (2024), and the Site Allocation Topic Paper for Regulation 19 (2024), which comprehensively justify addressing various housing requirements in the borough. The Council acknowledges that housing affordability and availability are crucial for NHS staff recruitment and retention. They will continue engaging with local NHS partners, such as the Integrated Care Board (ICB) and NHS Trusts, to ensure these needs are met in future assessments and site allocations. The Council's Infrastructure Delivery Plan will be updated regularly to reflect current needs, including affordable housing for key workers. The Council is committed to ongoing dialogue to refine policies and support key workers' housing needs, welcoming collaboration through a Statement of Common Ground to achieve these objectives.	No	01985	NHS Property Services (NHSPS)
SP D1: Securing contributions to mitigate the impact of development	NHS Property Services (NHSPS) emphasizes the crucial need for adequate healthcare infrastructure to support sustainable development. They argue that a robust Infrastructure Delivery Plan (IDP) must clearly outline the healthcare infrastructure necessary to accommodate the growth proposed in the Local Plan, including effective contributions from planning obligations and the Community Infrastructure Levy (CIL). NHSPS suggests that the Council improve primary healthcare provision by thoroughly assessing existing infrastructure and ensuring mitigation options meet NHS requirements. They propose additions to Section 3 of the IDP to determine appropriate healthcare contributions, including assessing demand generated by proposals, collaborating with the Integrated Care Board (ICB) to evaluate existing capacity, identifying options to increase capacity, and determining the form of developer contributions. This	The Council appreciates the detailed feedback from NHS Property Services on Draft Policy D1 and the Infrastructure Delivery Plan (IDP). Recognizing the importance of healthcare infrastructure in sustainable development, the Council commits to ensuring the Local Plan and IDP reflect this priority. The Council welcomes NHSPS's support for Parts 3 and 5 of Draft Policy D1 and agrees on the need for flexibility in meeting healthcare needs from new developments. The IDP will incorporate NHSPS's recommendations to assess demand, collaborate with the Integrated Care Board (ICB), identify capacity-increasing options, and determine appropriate developer contributions. Ongoing engagement with NHSPS and other stakeholders will refine policy details, ensuring the Local Plan and IDP effectively support healthcare services.	No	01985	NHS Property Services (NHSPS)

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SP D1: Securing contributions to mitigate the impact of development	<p>approach would ensure the IDP effectively supports the necessary healthcare infrastructure for sustainable development.</p> <p>NHS Property Services (NHSPS) supports the draft policy requirements identified in the Whole Plan Viability Update but notes that the assessment does not specifically account for contributions towards healthcare. The report uses a lump sum for S106 contributions, ranging from £2,500 per unit for small schemes to £9,000 per unit for very large schemes. Although the site-specific testing assumes a base sum of £50,000 per unit for strategic sites, NHSPS is concerned that without explicit mention of healthcare contributions, these might be overlooked or compete with other obligations, compromising the sustainability of development and residents' health. NHSPS recommends including a separate cost input for healthcare contributions in the viability assessment to ensure proper mitigation, inform developers of potential on-site or off-site financial requirements, and support effective implementation of Draft Policy D1. They express willingness to engage further with the Council to establish a reasonable cost assumption for future viability assessments.</p>	<p>The Council acknowledges the NHS Property Services' response and appreciates the support for Draft Policy D1, which is designed to ensure the timely provision of infrastructure. The approach is justified by the Whole Plan Viability Update, which supports the financial contributions towards healthcare infrastructure as necessary and viable within the plan. The Council is committed to further engagement with the NHS to refine healthcare needs and solutions as identified in the Infrastructure Delivery Plan, ensuring sustainable development and adequate healthcare provision in the borough. The Council welcomes collaboration through continuous dialogue to ensure the effective implementation of these policies.</p>	No	01985	NHS Property Services (NHSPS)
SP D1: Securing contributions to mitigate the impact of development	<p>London borough of Waltham Forest broadly support the matters identified within the emerging Local Plan but urge the Council to remain conscious of the Meridian Water Link to improve cross-boundary connectivity and better connections to Chingford and Ponders End in Enfield.</p>	<p>The Council welcomes the support from the London Borough of Waltham Forest for the matters identified within our emerging Local Plan. The Council acknowledge the importance of the Meridian Water Link to improve cross-boundary connectivity and better connections to transport hubs at Chingford and Ponders End. The Council is committed to working collaboratively to enhance these connections, ensuring our transport infrastructure supports sustainable development and benefits residents in both boroughs. Continued engagement and cooperation will be crucial in realizing these improvements.</p>	No	02006	London borough of Waltham Forest
SP D1: Securing contributions to mitigate the impact of development	<p>CCLA Investment Management (CCLA) supports the allocation of 5 Picketts Lock Lane for industrial redevelopment but recommends several modifications to ensure the policy is feasible and aligns with contemporary needs. They argue that the current requirement for a minimum of 2,297 sqm of additional floor space and the emphasis on multi-level development are impractical given the site's characteristics and modern employment requirements. CCLA suggests updating the Land Use Requirements to include more flexible use classes (E(g)(ii), E(g)(iii), B2, B8) and revising the Design Principles to focus on modernized floorspace, operational efficiency, and sensitivity to the site's context, including residential amenity and environmental considerations. They propose adjustments to the Site Boundary, Site Area, and Design Principles to reflect these changes and ensure that infrastructure requirements do not impede site deliverability. These modifications aim to make the allocation 'justified', 'effective', and 'consistent with national policy' as per NPPF guidelines.</p>	<p>Comments noted.</p> <p>The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
DM D2: Masterplans and Design Codes to achieve comprehensive development	Joanne McCartney, AM for Enfield and Haringey, raised concerns about the low Public Transport Accessibility Level (PTAL) scores for developments in areas like Crews Hill. She noted that this would lead to increased reliance on cars, contradicting policy objectives of reducing congestion and air pollution, and promoting healthy lifestyles.	Comments noted. The Council acknowledge the challenges associated with PTAL scores in such areas. However, the Crews Hill Topic Paper 2024 outlines several strategies to mitigate these issues. These include significant investments in sustainable transport infrastructure, such as improved cycling and walking routes, and enhancements to public transport services. These measures aim to reduce car dependency, align with our policy objectives of reducing congestion and air pollution, and promote healthy lifestyles. The Council is committed to continuing our efforts to improve transport accessibility and support sustainable development in Crews Hill.	No		Joanne McCartney AM London Assembly Member for Enfield and Haringey
DM D3: Infrastructure and phasing	Thames Water identifies the omission of a specific policy on wastewater/sewerage and water supply infrastructure in the Enfield Local Plan (ELP). They stress the importance of aligning new development with infrastructure capacity, as outlined in the NPPF. They recommend developers engage with Thames Water early to ensure infrastructure needs are met and suggest conditions on planning permissions for developments requiring off-site upgrades. Thames Water also highlights the necessity of assessing the impact of development near sewage treatment works on residents' amenity and proposes incorporating a policy to address these issues.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01680	Thames Water
DM D3: Infrastructure and phasing	National Highways acknowledges the need for individual planning applicants to identify necessary infrastructure and stresses the importance of considering cumulative impacts, as all new activities generate trips. They highlight the requirement in para 51 of the circular for developers to identify necessary transport improvements if a transport assessment indicates severe residual cumulative impacts or unacceptable safety impacts on the SRN. National Highways is currently assessing the full impacts of the Local Plan on the SRN and requires a robust transport assessment and evidence base for both the full plan and significant developments to ensure no residual impacts on the SRN.	The Council acknowledges National Highways' emphasis on the need for individual planning applicants to identify necessary infrastructure for their developments, considering the cumulative impacts of all new activities generating trips. The council understands the requirement in para 51 of the circular for developers to identify necessary transport improvements if a transport assessment indicates severe residual cumulative impacts or unacceptable safety impacts on the SRN. The council appreciate National Highways' ongoing assessment of the Local Plan's full impacts on the SRN and are committed to providing a robust transport assessment and evidence base for both the full plan and significant developments. The council is willing to work closely with National Highways to ensure no residual impacts on the SRN, promoting sustainable and safe transport infrastructure for all.	No	01753	National Highways Limited
DM D3: Infrastructure and phasing	HCC notes the absence of explicit mention of special education provision in the Local Plan and reiterates that Enfield should meet its own special education needs. Hertfordshire will not expand its provision to accommodate growth from outside its area.	Comments noted.	No	01755	Hertfordshire County Council - SEND
DM D3: Infrastructure and phasing	The Home Builders Federation (HBF) argues that parts of the policy are unsound and contrary to national policy. The policy requires applicants to demonstrate sufficient infrastructure capacity to support development over its lifetime. HBF contends that it is primarily the plan-maker's responsibility to ensure critical infrastructure availability, as major infrastructure like roads and rail are beyond the control of	Comments noted. The Council agree that ensuring the availability of critical infrastructure is a core responsibility of the plan-maker. The Local Plan incorporates strategic infrastructure planning to address major needs like roads and rail, as detailed in our infrastructure delivery plans. The Council	No	01851	Home Builders Federation (HBF)

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	<p>applicants. They also point out that some infrastructure, like energy and water, is managed under separate statutory regimes and should not hinder development. Lastly, they argue that requiring infrastructure capacity for the entire lifetime of a development is unreasonable and could obstruct planning permission.</p>	<p>recognize that infrastructure such as energy and water is managed by separate statutory bodies. Policy will ensure that these aspects are coordinated with the relevant authorities to prevent delays in development. While ensuring long-term infrastructure capacity is crucial, the Council understand that requiring capacity for the entire development lifespan may be excessive.</p>			
DM D3: Infrastructure and phasing	<p>The NHS London Healthy Urban Development Unit (HUDU) welcomes the policy requiring developers to provide a proposed timetable for securing infrastructure delivery. They highlight the need for flexibility due to the unpredictable nature of the Local Plan process, planning applications, and build rates, as well as potential changes in NHS needs and national priorities. HUDU suggests that contributions may need to be redirected to serve the health needs of Enfield's population. They recommend ongoing consultation with the Integrated Care Board (ICB) and NHS Trusts throughout the development process and flexible wording in s106 agreements. They also express interest in participating in pre-application discussions.</p>	<p>Comments noted.</p> <p>The Council greatly value the input from the NHS London Healthy Urban Development Unit, North Central London Integrated Care Board (NCLICB), and NHS providers. The Council is committed to working collaboratively with the NHS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01872	NHS London Healthy Urban Development Unit (HUDU)
DM D3: Infrastructure and phasing	<p>Vistry Group acknowledges the importance of infrastructure capacity for future growth but disagrees with the draft policy requiring applicants to demonstrate sufficient infrastructure capacity for the development's lifetime. They argue that assessing critical infrastructure should be the responsibility of the plan-maker, as it often falls under different legislation. Additionally, assessing infrastructure capacity for the entire development lifespan is considered unfeasible due to the need to account for future uncertainties.</p>	<p>The council appreciates Vistry Group's support and acknowledges the concerns regarding. The Council will continue to engage with Vistry Group and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.</p>	No	01897	Vistry Group
DM D4: Monitoring and review	<p>The London Borough of Redbridge continues to support clear criteria for reviewing the Local Plan and listing remedial actions for under-delivery. They maintain their previous view from the Regulation 18 stage that Policy D4 should be considered a strategic policy.</p>	<p>Comments noted.</p> <p>The London Borough of Enfield acknowledges the London Borough of Redbridge's support for clear criteria for reviewing the Local Plan and listing remedial actions for underdelivery. The Council also recognize their view that Policy D4 should be considered a strategic policy. Clarification will be included in the Statement of Common Ground. The Council is happy to work with LBR to clarify these points further and ensure mutual understanding and agreement on these matters.</p>	No	01603	London Borough of Redbridge
DM D4: Monitoring and review	<p>Residents object to the exclusion of Palmers Green from the target list of allocated sites delivered across all place-making areas in Appendix B (KPI's) #29. They highlight the inconsistency, noting that Palmers Green was also omitted from the pre-publication version's Contents page despite being included in the body text similarly to other locations. They request a minor modification to include Palmers Green in the KPI #29 listing to ensure consistency and fair representation.</p>	<p>The Council acknowledges the oversight and the importance of consistent representation of all areas and will include Palmers Green in the KPI #29 listing to ensure it is fairly represented and to maintain consistency across our planning documentation.</p>	No	00064	Karl Brown

Appendix B					
Key Performance Indicators	Better Homes Enfield's response emphasizes that delivering sustainable development and Good Growth is central to the NPPF and London Plan, with monitoring being crucial to ensure these goals are met. They highlight that while draft ELP Policy D4 outlines the Borough's approach to monitoring, the key performance indicators (KPIs) in Appendix B.1 are insufficient to ensure the draft ELP aligns with the NPPF and London Plan 2021, rendering the draft ELP neither legally compliant nor sound. They suggest that D4 and B.1 could be improved with specific modifications, noting the current KPIs are vague and lack clarity on what will be monitored and how. They also recommend that all KPIs should report cumulatively from 2019/20 to accurately assess the plan's overall delivery.	Comments noted. It is important to note that policies within the Enfield Local Plan need to be read as a whole rather than in isolation. This integrated approach ensures comprehensive planning and development. Your concerns about housing numbers, affordable housing, open space, active travel, employment targets, and monitoring mechanisms are noted. The policies collectively address these areas, ensuring alignment with the London Plan and national policies. We will consider your suggestions to enhance clarity and effectiveness in the Local Plan, ensuring it meets all stakeholders' needs.	No	01708	Better Homes Enfield
Key Performance Indicators	Better Homes Enfield's response to housing KPIs in the draft ELP suggests several modifications to improve clarity and comprehensiveness. They recommend that KPIs for new homes (both net and gross) should include cumulative numbers for the entire plan period and separate reporting for small sites. Draft Policy H4 should be referenced in housing capacity metrics, and information sources should include brownfield registers and planning data. They propose separate reporting for different types of affordable housing (e.g., Social Rent, London Affordable Rent) and tracking affordable homes lost through demolition or Right to Buy. The response also suggests adjustments to KPIs for planning contributions, specialist housing schemes, Build to Rent, and student housing to include cumulative figures and detailed breakdowns. Additional KPIs are recommended for tracking HMOs, housing mix changes, permitted development conversions, Traveller accommodation, and contextual data such as the council house waiting list and vacant homes. These modifications aim to ensure the KPIs effectively monitor housing delivery and align with policy goals.	Comments noted. It is important to note that policies within the Enfield Local Plan need to be read as a whole rather than in isolation. This integrated approach ensures comprehensive planning and development. Your concerns about housing numbers, affordable housing, open space, active travel, employment targets, and monitoring mechanisms are noted. The policies collectively address these areas, ensuring alignment with the London Plan and national policies. We will consider your suggestions to enhance clarity and effectiveness in the Local Plan, ensuring it meets all stakeholders' needs.	No	01708	Better Homes Enfield
Key Performance Indicators	Better Homes Enfield's response to the employment KPIs in the draft ELP suggests several key improvements. They recommend reporting gains and losses of employment space and net additional floorspace by Use Class for both the monitoring and plan periods, including approvals, starts, and completions. They propose adding a KPI to monitor the number of jobs gained or lost, with an estimate based on floorspace, specifying the proportion of new jobs filled by local people and tracking apprenticeships created and completed. This should be reported at a constituency level to address local unemployment and align with placemaking strategies. They also suggest separate reporting for employment changes at Meridian Water, monitoring local procurement requirements, and tracking the percentage of major applications providing an Employment and Skills Plan.	Comments noted. It is important to note that policies within the Enfield Local Plan need to be read as a whole rather than in isolation. This integrated approach ensures comprehensive planning and development. Your concerns about housing numbers, affordable housing, open space, active travel, employment targets, and monitoring mechanisms are noted. The policies collectively address these areas, ensuring alignment with the London Plan and national policies. We will consider your suggestions to enhance clarity and effectiveness in the Local Plan, ensuring it meets all stakeholders' needs.	No	01708	Better Homes Enfield

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
Key Performance Indicators	Better Homes Enfield's response to the retail and town centres KPIs in the draft ELP highlights the absence of targets in points 15 and 16, making it difficult to comment. They recommend clearly reporting gains, losses, and net changes in different types of employment floor space within each town centre, along with associated employment opportunities. The KPIs should specify which areas and town centres (e.g., Edmonton, Enfield Town, Southgate) will be reported separately. Additionally, they suggest monitoring changes in the number of hot food takeaways, betting shops, amusement centres, casinos, and payday loan shops, establishing a baseline at the ward level to reflect policy TC6.	Comments noted. It is important to note that policies within the Enfield Local Plan need to be read as a whole rather than in isolation. This integrated approach ensures comprehensive planning and development. Your concerns about housing numbers, affordable housing, open space, active travel, employment targets, and monitoring mechanisms are noted. The policies collectively address these areas, ensuring alignment with the London Plan and national policies. We will consider your suggestions to enhance clarity and effectiveness in the Local Plan, ensuring it meets all stakeholders' needs.	No	01708	Better Homes Enfield
Key Performance Indicators	Better Homes Enfield's response to the environment KPIs in the draft ELP emphasises the need for clear and comprehensive reporting frameworks. They suggest that point 19 should reference Table 12.1 from the draft ELP, comparing population increases with changes in open space, playing pitches, allotments, and play spaces. This should include both losses and gains, avoiding double counting and ensuring compliance with the Blue and Green Strategy definition. Gains or losses not linked to specific developments should be reported separately. KPIs should also monitor whether areas with existing deficits, such as Upper and Lower Edmonton, are gaining or losing open spaces relative to population changes. Metrics should cover approved, started, and completed schemes. They recommend adding KPIs to monitor the quality of open spaces, reporting the number of Green Flag award parks, and assessing new spaces per draft ELP requirements. Additionally, they propose tracking the progress of the SANG/Recreational Mitigation strategy and its impact on Epping Forest, monitoring urban tree losses and gains, and qualitatively reporting losses of ancient woodland, veteran trees, and hedgerows.	Comments noted. It is important to note that policies within the Enfield Local Plan need to be read as a whole rather than in isolation. This integrated approach ensures comprehensive planning and development. Your concerns about housing numbers, affordable housing, open space, active travel, employment targets, and monitoring mechanisms are noted. The policies collectively address these areas, ensuring alignment with the London Plan and national policies. We will consider your suggestions to enhance clarity and effectiveness in the Local Plan, ensuring it meets all stakeholders' needs.	No	01708	Better Homes Enfield
Key Performance Indicators	Better Homes Enfield's response to the infrastructure KPIs in the draft ELP calls for clarification on KPI Point 23 to specify what will be monitored and at what scale, ensuring areas with existing deficiencies are identified and protected. They suggest adding KPIs to monitor the proportion of new developments connecting to the decentralized energy network (DEN), the number of DEN connections granted, started, and completed, and the number and status of Energy Masterplans delivered or in progress. Additionally, they recommend recording the number of additional car parking spaces created by developments and the net change in cycle parking within the monitoring period and overall.	Comments noted. It is important to note that policies within the Enfield Local Plan need to be read as a whole rather than in isolation. This integrated approach ensures comprehensive planning and development. Your concerns about housing numbers, affordable housing, open space, active travel, employment targets, and monitoring mechanisms are noted. The policies collectively address these areas, ensuring alignment with the London Plan and national policies. We will consider your suggestions to enhance clarity and effectiveness in the Local Plan, ensuring it meets all stakeholders' needs.	No	01708	Better Homes Enfield
Key Performance Indicators	Better Homes Enfield's response to the KPIs for placemaking areas in the draft ELP suggests that it is unclear what is currently proposed to be measured. They recommend including the following KPIs for each area: adoption status and year of the site-wide masterplan, net	Comments noted. It is important to note that policies within the Enfield Local Plan need to be read as a whole rather than in isolation. This integrated approach ensures comprehensive planning and development. Your concerns about housing numbers, affordable	No	01708	Better Homes Enfield

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	changes in homes by tenure and housing mix, net changes in employment floor space by type, number of jobs created with a percentage filled by local people, changes in community space, and hectares of open space, playing pitches, allotments, and play spaces relative to development population. Additionally, they suggest tracking the number of homes connected to the District Energy Network, car and cycle parking spaces delivered, and the percentage of cycle parking meeting TfL standards.	housing, open space, active travel, employment targets, and monitoring mechanisms are noted. The policies collectively address these areas, ensuring alignment with the London Plan and national policies. We will consider your suggestions to enhance clarity and effectiveness in the Local Plan, ensuring it meets all stakeholders' needs.			
Key Performance Indicators	The Enfield Society's concerns with Key Performance Indicator Number 2 for heritage are that it should not only track the number of designated or non-designated heritage assets lost or harmed but also include the broader historic environment and Conservation Areas. Additionally, they believe it should monitor the submission of Heritage Statements for all proposals affecting the historic environment to ensure consistency with national policy and the London Plan.	Comments noted.	No	01794	Enfield Society
Appendix C: Site Allocations					
Enfield Town					
SA1.1: Palace Gardens Shopping Centre	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA1.1: Palace Gardens Shopping Centre	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA1.1: Palace Gardens	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
Shopping Centre	regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	further and ensure mutual understanding and agreement on these matters.			
SA1.1: Palace Gardens Shopping Centre	Add new bullet point K: Must demonstrate how it has responded to the significance of any potentially affected heritage assets.	The Council consider that a modification is not necessary to meet the tests of soundness but further explanatory text may provide clarity on this matter and will suggest it as a minor modification.		01788	Historic England
SA1.1: Palace Gardens Shopping Centre	The NHS London Healthy Urban Development Unit (HUDU) welcomes that site allocations SA1.1, SA1.2 and SA1.3 state that developers should contribute towards a new health centre. It is stated that there is potential for a healthcare facility within the Enfield Civic centre site allocation (SA1.4). They would therefore request to be kept informed and update with any pre-application plans for any of these sites.	Comments noted		01872	NHS London Healthy Urban Development Unit
SA1.1: Palace Gardens Shopping Centre	TfL recommends early consultation for any development proposals that may impact station access, management, or London Overground operations. They welcome the requirements for improving pedestrian and cycle routes to Enfield Town Overground station and enhancing station facilities, though they cannot commit to increased peak hour frequencies. TfL supports limiting vehicular access to drop-off, servicing, and accessible bays, but suggests amending the wording to explicitly state "car-free development" to ensure consistency with the London Plan, considering the PTAL of up to 6.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.		01891	Transport for London
SA1.1: Palace Gardens Shopping Centre	The councillor criticises the plan for disregarding evidence that London's population has decreased by about 1 million people since Brexit and the shift to remote working due to the COVID pandemic. This demographic shift is reflected in falling school enrollments and primary schools reducing their class sizes. Consequently, the need for new homes has diminished, and there are sufficient brownfield sites available, as evidenced by submissions from the Enfield Conservative Councillors' Group.	Comments noted. The Local Plan seeks to significantly increase the number of new homes to meet a wide range of needs including affordable homes, accessible homes and homes for older people. It also seeks to regenerate and renew the Borough and is considered the be an appropriate strategy.	No	01890	Councillor Milne
SA1.1: Palace Gardens Shopping Centre	The councillor argues that the plan is driven by the Council's financial difficulties rather than actual housing needs. There is no supporting evidence for the plan's proposal to use large areas of Green Belt land, which would destroy historic open spaces and exceptional vistas, reducing the borough's green spaces.	The Plan is legally compliant and sound, following thorough evidence and consultation processes. The policies and site assessments are comprehensive to provide a robust evidence base. The increased housing target reflects Enfield's strategic approach to future needs, balancing the use of brownfield and Green Belt sites, with exceptional circumstances for Green Belt release well evidenced.	No	01890	Councillor Milne

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA1.1: Palace Gardens Shopping Centre	The councillor claims that the high buildings proposed for town centre areas replicate the failed high-rise developments of the 1960s and 1970s, which would urbanize market town centres. The plan, as it stands, fails to meet housing needs and threatens to harm town centres and green belt land	Comments noted. The Local Plan identifies that tall buildings may be appropriate in specified strategic locations, including town centres. This approach is supported so to make best use of land in a sustainable location and to reflect the evolving character of this town centre. The Council's approach is consistent with London Plan Policy D3 which seeks to ensure that site capacity is optimised through the design-led approach, particularly in well-connected locations. Policy is considered sound and compliant with aims of the NPPF particularly those relating to the protection and conservation of the Natural Environment.	No	01890	Councillor Milne
SA1.1: Palace Gardens Shopping Centre	Better Homes Enfield's representation raises concerns about the draft Enfield Local Plan's (ELP) compliance with the London Plan 2021 (LP21) and the National Planning Policy Framework (NPPF). They argue that the site allocation SA1.1: Palace Gardens Shopping Centre, which includes both Palace Gardens and Palace Exchange, underestimates housing density potential by proposing only 88 dwellings per hectare (dph). They suggest increasing the density to 125 dph to deliver 450 homes and incorporating adjoining sites like BT Exchange and 26 Cecil Road to optimize the development area. They call for modifications to ensure the site allocation conforms with LP21 policies D3 and H1, promoting effective use of brownfield land and optimising site capacity, thus ensuring legal compliance and meeting NPPF soundness requirements.	Comments noted. The Site Allocation Topic Paper emphasizes the flexibility and ongoing review of density levels to ensure alignment with LP21 policies D3 and H1. The paper details considerations for site-specific requirements and contextual appropriateness of density increases.	No	01708	Better Homes Enfield
SA1.1: Palace Gardens Shopping Centre	The Enfield Society's concerns about the proposed tall buildings at the Palace Shopping Centre revolve around the potential harm to the character of Enfield Town's Conservation Area, described as having a 'charming market town' character. They argue that the development could negatively affect views, including those from key heritage assets such as the Old Vestry Office and Barclays Bank, as well as various locations around Church Street and Market Square. The Society is concerned that the Vicities modelling does not accurately represent the potential impact on these views and that the actual harm could be greater than anticipated. They also question the need for regeneration in this area, given the high occupancy levels and the sympathetic modern extension of the Palace Shopping Centre. Moreover, the Society highlights inconsistencies within the plan regarding building heights and fears that redevelopment could lead to the loss of anchor stores, negatively impacting the town's economy. They conclude that a policy for the Palace Shopping Centre is unnecessary and that redevelopment risks outweigh the proposed benefits.	Comments noted. The Design and Character evidence base emphasizes the importance of managing growth while maintaining Enfield's unique character. The Enfield Characterisation Study highlights how thoughtful urban design can integrate new developments without compromising heritage assets. For instance, the study outlines strategies to ensure that new buildings complement the existing townscape, enhancing rather than detracting from the area's character. Additionally, the Site Allocation Topic Paper for Regulation 19 recognises the need for strategic development in Enfield Town to meet housing demands and improve public amenities. It provides detailed assessments of potential impacts and justified by substantial public benefits. The document specifies that the proposed building heights and locations have been carefully considered to balance development needs with heritage preservation. Moreover, the policy framework includes rigorous criteria for assessing the impact of tall buildings, requiring clear and convincing justification for any harm to heritage assets, consistent with London Plan Policy D9 and national planning policies. This ensures that development proposals are thoroughly evaluated, and any adverse effects are appropriately mitigated. In conclusion, while the Enfield Society's	No	01794	Enfield Society

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
		concerns are valid, the comprehensive evidence base and site allocation topic paper provide a sound justification for the proposed developments. These documents demonstrate a commitment to preserving Enfield's historic character while accommodating necessary growth and enhancing the town's overall functionality and appeal.			
SA1.1: Palace Gardens Shopping Centre	LBESPS supports the allocation of Palace Gardens Shopping Centre (SA1.1) for comprehensive mixed-use redevelopment, including commercial and residential uses, as well as public realm and environmental improvements. They endorse the proposed residential typologies and inclusion of tall buildings, subject to detailed design and amenity considerations. They support improvements to Enfield Town Overground Station facilities, in coordination with Transport for London. The anticipated development timeframe of up to 10 years is supported, highlighting the site's sustainability and accessibility, and emphasizing its prioritization for development.	Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01946	LBE Strategic Property Services
SA1.1: Palace Gardens Shopping Centre	Sport England objects to the application as it appears to advocate the loss of the leisure centre without it being replaced. As result, this would not meet NPPF, paragraph 103.	Comments noted. The Council is committed to working collaboratively with Sport England other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01967	Sport England
SA1.2: Enfield Town Station and Former Enfield Arms	Amend bullet point J: Must carefully consider its impact, notably through the placement of taller buildings, and demonstrate how it has responded to the historic character of surrounding conservation areas, taking account of the Character of Growth study and relevant guidance in conservation area appraisals and management plans.	Comments noted. The Council appreciate Historic England's guidance on the importance of conserving and enhancing Enfield's historic environment. The Council will address their concerns by collaborating on a statement of common ground to ensure the Local Plan aligns with the National Planning Policy Framework (NPPF) and the Planning Practice Guide (PPG).	No	01788	Historic England
SA1.2: Enfield Town Station and Former Enfield Arms	The NHS London Healthy Urban Development Unit (HUDU) welcomes that site allocations SA1.1, SA1.2 and SA1.3 state that developers should contribute towards a new health centre. It is stated that there is potential for a healthcare facility within the Enfield Civic centre site allocation (SA1.4). They would therefore request to be kept informed and update with any pre-application plans for any of these sites.	Comments noted	No	01872	NHS London Healthy Urban Development Unit
SA1.2: Enfield Town Station	TfL welcomes the requirement for developments to improve pedestrian and cycle routes to Enfield Town station and facilitate station facility improvements. However, they suggest changing the wording from "should facilitate improvements" to "must facilitate improvements" for	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity	No	01891	Transport for London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
and Former Enfield Arms	consistency with SA1.1 and SA1.2. They cannot commit to increased peak hour frequencies. Regarding parking, TfL notes the requirement for limited parking but recommends amending it to state that parking must be minimized for all proposed uses, including residential and the re-provided retail store, to ensure consistency with the London Plan.	to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.			
SA1.2: Enfield Town Station and Former Enfield Arms	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA1.2: Enfield Town Station and Former Enfield Arms	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA1.2: Enfield Town Station and Former Enfield Arms	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA1.2: Enfield Town Station and Former Enfield Arms	The Enfield Society raises several concerns about the proposed tall buildings as outlined in Design Principles H and G. They argue that a tall building of up to 42m above the station entrance and additional height up to 33m adjacent to the railway line would significantly harm the small-scale character of Genotin Terrace and the historic environment of Church Street. The creation of a cluster of tall buildings, where currently only one exists, would alter the market town character of the adjacent Conservation Area. The Enfield Society suggests that lower building heights, possibly only 6 storeys, would be more in character with the town center. Additionally, they express	Comments noted. While the Enfield Society's concerns are valid and acknowledged, the evidence base and strategic framework provided in the Local Plan ensure that proposed developments are legally compliant, sound, and aligned with national and regional planning policies. The careful integration of design principles and heritage considerations aims to achieve sustainable growth while preserving Enfield's unique character and heritage.	No	01794	Enfield Society

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	concerns about the cumulative impact of multiple tall buildings on the Conservation Area's character. The policy wording, according to the Society, would not effectively reduce or avoid harm to the Conservation Area if the principle of tall buildings is established.				
SA1.3: Tesco, Southbury Road	The NHS London Healthy Urban Development Unit (HUDU) welcomes that site allocations SA1.1, SA1.2 and SA1.3 state that developers should contribute towards a new health centre. It is stated that there is potential for a healthcare facility within the Enfield Civic centre site allocation (SA1.4). They would therefore request to be kept informed and update with any pre-application plans for any of these sites.	Comments noted	No	01872	NHS London Healthy Urban Development Unit
SA1.3: Tesco, Southbury Road	TfL welcomes the requirement for developments to facilitate improvements to Enfield Town station facilities but suggests changing the wording from "facilitate improvements" to "must facilitate improvements" for consistency with SA1.1 and SA1.2. They cannot commit to increased peak hour frequencies. Regarding parking, TfL notes the requirement for limited parking but recommends amending it to state that parking must be minimized for all proposed uses, including residential and the re-provided civic centre, to ensure consistency with the London Plan.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.		01891	Transport for London
SA1.3: Tesco, Southbury Road	Better Homes Enfield raises concerns about the legal compliance and soundness of the SA1.3 (Tesco, Southbury Road) site allocation. They highlight that the current plan does not align with the London Plan 2021 policies D3 and H1, which require optimising site capacity and increasing housing supply on brownfield sites near stations. The report suggests that incorporating the Royal Mail depot and Savoy Parade properties could significantly enhance housing capacity, potentially adding 85-115 homes and bringing the total to over 400. The current allocation may not meet the NPPF Chapter 11 requirements for effective land use, thus questioning its soundness. They recommend revising the site allocation to reflect its full potential to ensure legal compliance and soundness.	Comments noted. The Site Allocation Topic Paper emphasizes the flexibility and ongoing review of density levels to ensure alignment with LP21 policies D3 and H1. The paper details considerations for site-specific requirements and contextual appropriateness of density increases.		01708	Better Homes Enfield
SA1.3: Tesco, Southbury Road	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. SA1.4: Enfield Civic Centre	The NHS London Healthy Urban Development Unit (HUDU) welcomes that site allocations SA1.1, SA1.2 and SA1.3 state that developers should contribute towards a new health centre. It is stated that there is potential for a healthcare facility within the Enfield Civic centre site allocation (SA1.4). They would therefore request to be kept informed and update with any pre-application plans for any of these sites.	Comments noted		01872	NHS London Healthy Urban Development Unit
SA1.4: Enfield Civic Centre	TfL welcomes the requirement for a car-free development but suggests it be amended to "must be a car-free development" to ensure consistency with the London Plan, considering the PTAL of up to 5.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.		01891	Transport for London
SA1.4: Enfield Civic Centre	Better Homes Enfield raises concerns about the legal compliance and soundness of the SA1.4 (Enfield Civic Centre) site allocation, noting it may not conform to the London Plan 2021. It highlights that the current allocation fails to optimise site capacity as required by London Plan Policies D3 and H1. The report suggests that integrating the disused	Comments noted. The Site Allocation Topic Paper emphasizes the flexibility and ongoing review of density levels to ensure alignment with LP21 policies D3 and	No	01708	Better Homes Enfield

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	police station site between SA1.4 and SA1.7 could significantly enhance housing capacity, potentially adding around 100 additional dwellings. The current allocation does not reflect the potential for a larger, more coherent site, thus not meeting NPPF Chapter 11 requirements for effective land use and failing the soundness test under NPPF 35(d). The report recommends revising the allocation to include the police station site to ensure compliance and optimise housing delivery.	H1. The paper details considerations for site-specific requirements and contextual appropriateness of density increases.			
SA1.4: Enfield Civic Centre	LBESPS supports the allocation of Enfield Civic Centre (SA1.4) for redevelopment, which includes provision of office space for civic use, new residential homes, and a potential new health centre. They recommend flexibility in the health centre provision, subject to discussions with stakeholders. They also support improvements to Enfield Town Overground Station facilities. The policy's estimated capacity of 114 new homes is acknowledged, subject to detailed design. The timeframe of up to 10 years is supported, emphasizing the site's sustainability, accessibility, and prioritization for development.	Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01946	LBE Strategic Property Services
SA1.4: Enfield Civic Centre	Historic England recommends expanding the scope of views considered for Gentlemen's Row, an area with significant listed buildings representing early Enfield Town development. They suggest incorporating additional views from the gardens and upper section of Gentlemen's Row, particularly looking east and southeast. This is to assess the potential visual impact of proposed developments at Palace Gardens and the Enfield Civic Centre on the skyline over the rooftops of these heritage assets. They emphasize that the updated viewing positions and directions should guide future visual assessments to ensure comprehensive evaluation of potential impacts on heritage assets.	Comments noted. The Council appreciate Historic England's guidance on the importance of conserving and enhancing Enfield's historic environment. The Council will address their concerns by collaborating on a statement of common ground to ensure the Local Plan aligns with the National Planning Policy Framework (NPPF) and the Planning Practice Guide (PPG).	No	01788	Historic England
SA1.4: Enfield Civic Centre	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA1.4: Enfield Civic Centre	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. SA1.5: St Anne's Catholic High School for Girls	Better Homes Enfield expresses concerns about the legal compliance and soundness of the SA1.5 (St Anne's Catholic High School for Girls, Enfield) site allocation, noting it may not conform to the London Plan 2021. The site's size reduction from 1.76ha to 0.85ha, excluding the playing field due to ownership uncertainty, has significantly decreased the potential housing capacity from 236 to 133 homes. This reduction fails to optimize the site's capacity as required by London Plan Policies D3 and H1. To align with NPPF Chapter 11, which promotes effective land use and optimizing site densities, the report recommends revising the allocation to include the playing field, thereby potentially delivering more homes or other benefits and ensuring compliance with national and London Plan policies.	<p>Comments noted.</p> <p>The Site Allocation Topic Paper emphasizes the flexibility and ongoing review of density levels to ensure alignment with LP21 policies D3 and H1. The paper details considerations for site-specific requirements and contextual appropriateness of density increases.</p>	No	01708	Better Homes Enfield

SA1.6: 100 Church Street	The Enfield Society raises concerns about a footnote to the policy that states the estimated capacity is based on an extant planning consent (20/02858/FUL). Despite this consent, the site has been included as a site allocation to safeguard against potential future changes since work has not yet commenced. Their primary concern is that the Visual Impact Assessment for the application did not include the view from the Jephcott Bridge over the New River, one of the borough's most important local views. They argue that the proposed building, while similar in height to the existing structure, is bulkier and more massive, and will appear prominently and negatively in views from the bridge.	Comments noted. The decision to include the site as a site allocation despite an extant planning consent is a precautionary measure to ensure the site's future development aligns with strategic planning goals. While the Visual Impact Assessment (VIA) did not include the Jephcott Bridge view, further detailed assessments will be required to address this oversight and ensure that significant local views are preserved. The planning process will include additional community consultation and impact assessments to mitigate any potential adverse effects on key local views and heritage assets. This approach aligns with the policies set forth in the Enfield Characterisation Study and the Site Allocation Topic Paper for Regulation 19, ensuring a balanced consideration of development and heritage preservation. The Enfield Local Plan also includes robust provisions for ongoing community engagement and heritage impact assessments to address these types of concerns comprehensively.	No	01794	Enfield Society
SA1.7: Oak House, 43 Baker Street	TfL notes the requirement for limited parking but suggests it should be amended to state that parking must be minimized for all proposed uses, including residential and commercial, to ensure consistency with the London Plan. TfL supports streetscape improvements but emphasizes that any proposals affecting the A10 or its frontage should be agreed with TfL. They welcome improvements addressing severance issues and recommend no direct vehicle access (for parking or servicing) from the A10.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London

SA2.1: Colosseum Retail Park	The NHS London Healthy Urban Development Unit notes that the site has an existing permission which includes a financial contribution in phase 1 and the production of a Health Delivery Plan at the reserved matters stage to determine if a healthcare facility is needed. They recommend ongoing negotiations with the Integrated Care Board (ICB) to ensure appropriate phasing and delivery of healthcare services.	Comments noted	No	01872	NHS London Healthy Urban Development Unit
SA2.1: Colosseum Retail Park	TfL welcomes the requirement for developments to contribute towards improvements at Southbury station. They note the requirement for limited parking but suggest it be amended to state that parking must be minimized for all proposed uses, including residential, commercial, and the re-provision of the retail store, to ensure consistency with the London Plan. TfL supports streetscape improvements but emphasises that any proposals affecting the A10 or its frontage should be agreed with TfL, with no direct vehicle access (for parking or servicing) from the A10.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA2.1: Colosseum Retail Park	Better Homes Enfield argues that the site allocation SA2.1: Colosseum Retail Park is not legally compliant with the London Plan 2021, as required by Section 24(1) of the 2004 Planning and Compulsory Purchase Act. London Plan Policies D3 and H1 require optimising site capacity and housing delivery, especially on brownfield sites near transport hubs. The site is listed with a capacity of 1,587 homes, whereas the approved application allows for up to 1,800 homes, questioning why the lower figure is used, missing 213 homes from the site's potential. This oversight means the site allocation fails to meet the optimization requirements of the London Plan and the effective land use and site density principles of the NPPF Chapter 11, thus not meeting the soundness test of NPPF 35(d). Better Homes Enfield recommends modifying the allocation to reflect the extant planning approval and fully utilise the site's potential, ensuring conformity with the London Plan and national policy.	Comments noted. The Site Allocation Topic Paper emphasizes the flexibility and ongoing review of density levels to ensure alignment with LP21 policies D3 and H1. The paper details considerations for site-specific requirements and contextual appropriateness of density increases.	No	01708	Better Homes Enfield
SA2.1: Colosseum Retail Park	Blackrock UK Property Fund's response highlights concerns regarding Draft Policy SS2 and the Southbury placemaking area allocation (SA2.1) for the Colosseum Retail Park. The hybrid permission for this site, which allows for 444 residential units and 5,802 sq m of flexible	Comments noted. The Council appreciates the feedback provided by Blackrock UK Property Fund on Draft Policy PL2 and the site allocation SA2.1 for the	No	01952	Blackrock UK Property Fund

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	<p>commercial use, faces significant viability challenges due to market conditions, high-interest rates, and increased construction costs. Consequently, this permission is unlikely to be implemented before it lapses in July 2024. They suggest that the site allocation should be amended to include industrial development (B2/B8 uses) to improve viability and align with demand for employment uses. They recommend a more flexible policy approach that accommodates various development typologies, incorporating both economic and placemaking perspectives, and propose the preparation of a Masterplan to detail the quantum and mix of uses. This amendment would better respond to market demands and ensure the sustainable development of the site.</p>	<p>Colosseum Retail Park. The Council acknowledges the viability challenges highlighted and the need for a flexible approach to ensure sustainable and high-quality development.</p> <p>1. Draft Policy PL2: The requirement for a Masterplan for non-residential development of 500 sq m or more is intended to ensure comprehensive and coherent development that aligns with the overarching goals of the Enfield Local Plan. However, the Council recognizes that this requirement may be seen as burdensome for smaller-scale developments.</p> <p>To address these concerns, the Council is willing to consider amendments to ensure that the requirement for a Masterplan is proportionate to the scale and complexity of the development. This will ensure that the policy remains effective without imposing undue burdens on smaller projects.</p> <p>2. Southbury Placemaking Area (SA2.1): The Council acknowledges the issues raised regarding the viability of the current hybrid permission for the Colosseum Retail Park. The Site Allocation Topic Paper for Regulation 19 highlights the importance of flexibility in responding to changing market conditions and development challenges. The Council is open to discussing the inclusion of industrial uses (B2/B8) as part of a mixed-use development for the site. This approach aligns with the strategic objective to maximize employment opportunities and support the local economy, as outlined in the Spatial Strategy and Overall Approach Topic Paper. The Council supports the preparation of a Masterplan to provide detailed guidance on the quantum and mix of uses, ensuring that development proposals make the best use of land while adhering to high-quality design principles.</p> <p>Willingness to Work Together: The Council is committed to a collaborative approach and is willing to engage with Blackrock UK Property Fund through a Statement of Common Ground. This will ensure that the Local Plan policies and site allocations are refined to be both practical and effective, meeting the needs of developers while achieving the strategic objectives of sustainable growth and high-quality placemaking.</p>			
SA2.1: Colosseum Retail Park	<p>The Proposed Submission Local Plan for Enfield includes policies that may hinder new employment development, particularly in the Brimsdown Strategic Industrial Location. Additionally, the redevelopment of the Colosseum Retail Park in the Southbury Strategic Development Area requires a flexible approach to ensure viability and meet various borough needs over the plan period. Therefore, allocation SA2.1 should be amended to allow B2/B8 development within the site's development mix. This should be addressed through a Masterplanning approach to achieve</p>	<p>The Council appreciates Blackrock UK Property Fund's input regarding the Proposed Submission Local Plan. The Council's approach, particularly concerning the Brimsdown Strategic Industrial Location and the Colosseum Retail Park redevelopment, is justified and grounded in extensive research and evidence. According to the Enfield Employment Topic Paper 2024, the proposed policies are designed to address current and future employment needs while ensuring sustainable development and placemaking objectives. The Employment Topic Paper provides a comprehensive analysis of</p>	No	01952	Blackrock UK Property Fund

	placemaking objectives and protect residential amenity, given that the current development principles in the draft Local Plan have proven unviable.	employment land requirements and the strategic need to intensify and diversify employment sites to support economic growth. The Council remains committed to a flexible and pragmatic approach and welcomes continued dialogue to ensure the Local Plan aligns with both economic viability and the broader needs of the borough and look forward to working collaboratively through a Statement of Common Ground to refine these policies further.			
SA2.3: Morrisons, Southbury Road	TfL supports in principle replacing the footbridge over Southbury Road with a pedestrian crossing. They welcome the requirement for developments to contribute towards improvements at Southbury station. TfL notes the requirement for limited parking but suggests it should be amended to state that parking must be minimized for all proposed uses, including residential, commercial, and re-provision of leisure uses, to ensure consistency with the London Plan. TfL also supports streetscape improvements but emphasizes that any proposals affecting the A10 or its frontage should be agreed with TfL, with no direct vehicle access (for parking or servicing) from the A10.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA2.3: Morrisons, Southbury Road	Better Homes Enfield states that SA2.3 (Morrisons, Southbury Road) is not legally compliant as it does not conform to the London Plan 2021. The London Plan Policies D3 and H1 require optimising site capacity and increasing housing supply, particularly on brownfield sites near stations. Initially proposed for 892 homes, a feasibility study indicated that 1,050-1,250 units are achievable, but the Enfield Local Plan (ELP) only estimates 646 units, which is significantly lower. They question the basis for this reduction, citing incomplete reports and a lack of clarity in the Council's Site Allocation Topic Paper. Consequently, the site has not been optimised, failing to meet the requirements of both the London Plan and NPPF Chapter 11. The report recommends increasing the housing capacity to ensure legal compliance and soundness.	Comments noted. The Site Allocation Topic Paper emphasizes the flexibility and ongoing review of density levels to ensure alignment with LP21 policies D3 and H1. The paper details considerations for site-specific requirements and contextual appropriateness of density increases.	No	01708	Better Homes Enfield
SA2.3: Morrisons, Southbury Road	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA2.3: Morrisons, Southbury Road	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA2.4: Southbury Leisure Centre	TfL welcomes the requirement for developments to contribute towards improvements at Southbury station. They note the requirement for limited parking but suggest it should be amended to state that parking must be minimized for all proposed uses, including residential, commercial, and the re-provision of the retail store, to ensure consistency with the London Plan.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA2.4: Southbury Leisure Centre	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA2.4: Southbury Leisure Centre	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. SA2.4: Southbury Leisure Centre	Turley on behalf of Royal London supports the Draft Site Allocation for Southbury Leisure Park but highlights several areas needing adjustment to ensure the redevelopment's success. They point out boundary inconsistencies, level differences, and unrealistic intensification targets. Royal London suggests a flexible approach to building heights and land uses, advocating for a design-led methodology that considers volumetric capacity and operational yard	Noted. The Council will enter into a Statement of Common Ground with Royal London to address these concerns and ensure alignment with strategic goals and policies.	No	01749	Royal London Mutual Insurance Society Limited for Southbury Leisure Park

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	space. They propose refining the masterplan to reflect site-specific conditions and emphasize the need for a realistic, ambitious, and deliverable framework to optimize housing capacity and public benefits.				
SA2.4: Southbury Leisure Centre	Turley on behalf of Royal London specifically regarding Site Allocation SA2.4 and tall buildings policy, emphasizes several key points. The Draft Local Plan and Policy DE6 define tall buildings as those 21 meters or above. Turley supports the general principles for the redevelopment of Southbury Leisure Park but finds the proposed building heights and design principles too prescriptive. They argue for a more flexible, design-led approach that considers volumetric capacity and operational yard space rather than fixed height limits. Turley highlights inconsistencies in the evidence base, particularly concerning height limitations and the need for a detailed, site-specific analysis rather than broad-brush studies. They recommend removing specific height restrictions to allow for optimized, context-sensitive development, ensuring that the redevelopment can meet housing and employment needs effectively.	Comments noted. The London Borough of Enfield acknowledges the importance of flexibility in site allocations and the need for a design-led approach to tall buildings. The Characterisation Study and Character of Growth Report are key evidence bases that guide planning decisions. These reports identify areas suitable for transformation, emphasizing context-sensitive design and optimizing site capacities. The Council is prepared to work with stakeholders, such as Turley, to refine site allocations and policies. A Statement of Common Ground will be prepared to address specific concerns and explore viable solutions collaboratively.	No	01749	Royal London Mutual Insurance Society Limited for Southbury Leisure Park
SA2.4: Southbury Leisure Centre	Anstey Horne provided daylight and sunlight analysis for Southbury Leisure Park's redevelopment under Draft Site Allocation SA2.4. They used the BRE Guidelines to create a 3D model for detailed assessments. Identified receptors include two-storey houses to the south and west, the Colosseum Retail Park to the east, and Kingsmead School. The BRE Guidelines recommend flexibility for redevelopment sites, considering both the change and quality of retained light. Initial findings suggest that proposed taller buildings can be supported without significant amenity effects, emphasizing a design-led approach for final height determination.	Noted. The Council will enter into a Statement of Common Ground with Royal London to address these concerns and ensure alignment with strategic goals and policies.	No	01749	Royal London Mutual Insurance Society Limited for Southbury Leisure Park
SA2.4: Southbury Leisure Centre	The Social Infrastructure Assessment (SIA) for Southbury Leisure Park (SLP), provided in support of Royal London's representation, supports developing 1,000 homes, analyzing the need for early years education, primary and secondary education, healthcare, and community facilities. It concludes that existing local services can meet the increased demand. However, on-site provision for 342 sqm of early years (185 sqm), library (63 sqm), and arts & culture space (94 sqm) is recommended. This on-site provision is considered manageable, realistic, and beneficial for both new residents and the wider community, aligning with Enfield's planning policies.	Noted. The Council will enter into a Statement of Common Ground with Royal London to address these concerns and ensure alignment with strategic goals and policies.	No	01749	Royal London Mutual Insurance Society Limited for Southbury Leisure Park
SA2.4: Southbury Leisure Centre	Turley, on behalf of Royal London Mutual Insurance Society Limited, submits written representations to the London Borough of Enfield regarding the Draft Local Plan (Regulation 19, March 2024). They emphasize Royal London's long-term interest in Southbury Leisure	Noted.	No	01749	Royal London Mutual Insurance Society

	<p>Park, advocating for a flexible, ambitious, and deliverable planning framework to support sustainable growth. While supporting the general direction and principle of Site Allocation 2.4, they raise concerns about building heights and housing capacity. The submission includes a masterplan and design principles, supported by technical assessments and documents such as heritage, daylight, transport, and social infrastructure notes.</p>	<p>The Council will enter into a Statement of Common Ground with Royal London to address these concerns and ensure alignment with strategic goals and policies.</p>			Limited for Southbury Leisure Park
SA2.4: Southbury Leisure Centre	<p>Turley's, on behalf of Royal London Mutual Insurance Society Limited, review of Southbury Leisure Park highlights its current use and accessibility, noting good public transport links set to improve further. The site's redevelopment potential is underlined by its PTAL rating of 3, expected to rise to 4 by 2031. The draft allocation suggests 605 residential units, but Turley advocates for up to 1,000 units, citing reduced car dependency and significant improvements in active travel infrastructure. A comparison with the Colosseum Retail Park's approved development supports the feasibility of higher density, near car-free development, indicating a positive impact on local traffic conditions and enhanced connectivity.</p>	<p>Noted. The Council will enter into a Statement of Common Ground with Royal London to address these concerns and ensure alignment with strategic goals and policies.</p>	No	01749	Royal London Mutual Insurance Society Limited for Southbury Leisure Park
SA2.5: Tesco, Ponders End	<p>TfL welcomes the requirement for developments to contribute towards improvements at Southbury station. They note the requirement for limited parking but suggest it be amended to state that parking must be minimized for all proposed uses, including residential, commercial, and the re-provision of the retail store, to ensure consistency with the London Plan. TfL supports streetscape improvements but emphasizes that any proposals affecting the A10 or its frontage should be agreed with TfL, with no direct vehicle access (for parking or servicing) from the A10.</p>	<p>Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01891	Transport for London
SA2.5: Tesco, Ponders End	<p>Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.</p>	<p>Comments noted. Clarification will be included in the Statement of Common Ground. SA2.6: Sainsburys, Crown Road	TfL welcomes the inclusion of advice regarding the continued operation of the bus station, but suggests the site allocation should clearly state that the bus station must be retained in any redevelopment. Additional space may be needed for electric bus charging facilities and for Dial-a-Ride buses at the shopping centre. TfL also welcomes the requirement for developments to contribute to improvements at Edmonton Green station, bus facilities, and bus frequencies. Any proposals for increased bus frequencies should be discussed with TfL to ensure long-term viability, based on expected trip generation. Furthermore, TfL supports the requirement for car-free development, consistent with the London Plan and considering the PTAL of up to 6a. This requirement should apply to all proposed uses, including residential and retail.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London

SA3.1: Edmonton Green Shopping Centre	FZ2 and FZ3. Appendix C (page 388) states this site is in FZ1 and 2, this is incorrect.	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01926	Environment Agency
SA3.1: Edmonton Green Shopping Centre	The NHS London Healthy Urban Development Unit supports the redevelopment of the shopping center, noting that the existing permission includes a Section 106 agreement for a primary healthcare contribution in phase 1 and a Health Delivery Plan for subsequent phases. This acknowledges that the Evergreen Health Centre is at peak capacity and plans for its reconfiguration are in place. Given the significant development expected later in the plan period, ongoing negotiations with the Integrated Care Board (ICB) are recommended	Comments noted	No	01872	NHS London Healthy Urban Development Unit

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	to ensure sufficient healthcare provision. Any future applications should secure a similar agreement for health provision.				
SA3.1: Edmonton Green Shopping Centre	Sport England would like to see specific reference to sport and recreation facilities in this policy as there is an approximate delivery of housing capacity over 100. In order to meet with policy CL5, paragraph 9 the development should contribute to on-site sport, leisure and recreation facilities or provide off-site contributions.	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01967	Sport England
SA3.1: Edmonton Green Shopping Centre	TfL welcomes the requirement for developments to contribute towards improvements at Edmonton Green station and bus facilities, but questions the mention of bus frequency given the PTAL of 5 and the proposed residential use. While the development is stated to provide limited residential parking, TfL asserts that due to the PTAL of 5, the site must be a car-free development to ensure consistency with the London Plan.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA3.1: Edmonton Green Shopping Centre	The Edmonton and Winchmore Hill Conservative Association objects to the redevelopment of Edmonton Green Shopping Centre due to concerns that the plan, which includes up to 1,423 new homes in tall buildings reaching 60-69 meters, fails the soundness test. They argue that the proposed density will strain local infrastructure, including healthcare and education, without clear plans for improvements. The height of the buildings is deemed excessive and misaligned with the need for family homes. The development could also negatively impact the local transport hub, heritage assets, and conservation areas. Additionally, reducing the existing parking could lead to congestion and affect local employment, while the plan should ensure the retention of important community assets like the Leisure Centre and Library. The association also stresses the need to replace existing structurally unsound tower blocks before introducing new high-rise developments.	The Edmonton Green Shopping Centre redevelopment, which includes up to 1,423 new homes and tall buildings up to 69 meters high, is designed to address significant housing needs in Enfield, as detailed in the Enfield Housing Topic Paper 2024. The project aims to utilize the site's proximity to major transport hubs efficiently, supporting high-density development while addressing local infrastructure needs, including healthcare and education, as outlined in the Site Allocation Topic Paper. Although the height of the buildings and potential impacts on local infrastructure and heritage assets are concerns, the plan includes measures to mitigate these effects, such as improved infrastructure, preserved community assets, and adequate parking provisions. This approach aligns with Enfield's broader strategy to meet housing demands sustainably while balancing local impacts.	No	01784	Edmonton and Winchmore Hill Conservative Association

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA4.5: Public House, 50-56 Fore Street, London	Better Homes Enfield asserts that the site allocation SA4.5: 50-56 Fore Street, London is not legally compliant with the London Plan 2021 as required by Section 24(1) of the 2004 Planning and Compulsory Purchase Act. London Plan Policies D3 and H1 require optimising site capacity and housing delivery, particularly on brownfield sites near transport hubs. The site is listed with a capacity of 58 homes, despite having planning permission for 110 homes. This discrepancy means the site allocation does not meet the optimisation requirements of the London Plan or the effective land use principles of the NPPF Chapter 11, failing the soundness test of NPPF 35(d). Better Homes Enfield recommends modifying the allocation to reflect the approved housing capacity to ensure conformity with the London Plan and national policy.	Comments noted. The Site Allocation Topic Paper emphasizes the flexibility and ongoing review of density levels to ensure alignment with LP21 policies D3 and H1. The paper details considerations for site-specific requirements and contextual appropriateness of density increases.	No	01708	Better Homes Enfield
SA4.5: Public House, 50-56 Fore Street, London	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. SA5.1: Meridian Water Phase 1	FZ2 and FZ3. SA5.7 also has FZ3b.	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01926	Environment Agency
SA5.1: Meridian Water Phase 1	The NHS London Healthy Urban Development Unit notes that the site has an extant permission for a mixed-use development, with some parts already occupied. The outline planning application for phase 2 includes a requirement for a 'Healthcare Delivery Plan' to identify opportunities for onsite healthcare provision. This could involve either identifying a suitable unit for the Integrated Care Board (ICB) on commercial terms or providing a property in lieu of financial contributions. They recommend ongoing discussions with the NHS regarding the funding and phasing of the health facility at each development phase. A healthcare delivery plan should be secured for the site, and any subsequent applications should include a similar agreement to provide a health facility.	Comments noted	No	01872	NHS London Healthy Urban Development Unit
SA5.1: Meridian Water Phase 1	This allocation is delivering a significant number of homes which will increase demand on open space, sport and recreation provision in the area. As mentioned above, Sport England would like to see specific mention under 'infrastructure requirements' of playing fields and recreation facilities delivered on site or contributions made off-site. Decisions for on and off- site contributions should be based on an up-to-date PPS and BFS which will provide key evidence to support the strategic need for sport facilities.	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01967	Sport England
SA5.1: Meridian Water Phase 1	TfL welcomes the requirement for the development to contribute towards improved bus access, including additional bus stops and enhanced services along the A1055 corridor. They note that any enhanced bus services must be economically viable based on expected trip generation and are updating options for bus services to Meridian Water phases 1 and 2 based on the latest costs. They also note the requirement for limited residential parking but suggest amending it to state that parking must be minimised, including for commercial uses, to ensure consistency with the London Plan.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA5.1: Meridian Water Phase 1	Better Homes Enfield argues that SA 5.1: Meridian Water Phase 1 is not legally compliant with the London Plan 2021, as required by Section 24(1) of the 2004 Planning and Compulsory Purchase Act. The site, located near Meridian Water railway station, is allocated 978 homes based on existing planning permissions, but this excludes additional parcels of development-ready land. These parcels, currently in interim use, could add approximately 400 more homes, bringing the total to 1,350-1,400 homes. This underutilization means the site does not meet London Plan Policies D3 and H1, which require optimizing	Comments noted. The Site Allocation Topic Paper emphasizes the flexibility and ongoing review of density levels to ensure alignment with LP21 policies D3 and H1. The paper details considerations for site-specific requirements and contextual appropriateness of density increases.	No	01708	Better Homes Enfield

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	<p>site capacity and increasing housing supply on brownfield sites. Consequently, the allocation does not conform to the NPPF Chapter 11 requirements for effective land use and fails the soundness test of NPPF 35(d). Better Homes Enfield recommends including the additional parcels of land in the site allocation and increasing the housing capacity to ensure compliance with the London Plan and national policy.</p>				
SA5.1: Meridian Water Phase 1	<p>The Meridian Water team welcomes the inclusion of various Meridian Water sites, including those under Enfield Council ownership: Meridian Water Phase 1, Meridian Water Phase 2, Meridian 13, and Meridian East (Harbet Road). They are keen to maintain a positive and constructive dialogue with the Local Planning Authority (LPA) to refine the Site Allocations' requirements, ensuring the draft allocations are based on up-to-date evidence and thus justified. This includes addressing gaps and inconsistencies in the accompanying plans, which can be readily rectified. For Meridian East (Harbet Road), it should be acknowledged that capacity figures are minimum estimates to be refined through future masterplanning to optimize the brownfield capacity of these sites via a design-led approach in accordance with London Plan Policy D3.</p>	<p>Comments noted. The support and constructive comments are welcomed regarding the inclusion of various Meridian Water sites in the draft allocations, including those under Enfield Council ownership. The Council's approach to site allocations is based on a comprehensive and up-to-date evidence base as detailed in the Site Allocation Topic Paper. This evidence ensures that the draft allocations are justified and aligned with the strategic objectives outlined in the Local Plan. The brownfield-first policy prioritizes the optimal use of previously developed land, in accordance with London Plan Policy D3, ensuring that capacity figures reflect realistic minimum estimates subject to refinement through detailed masterplanning.</p> <p>The Council acknowledges the importance of refining site requirements and addressing any gaps or inconsistencies in the accompanying plans. The Council is committed to working collaboratively with stakeholders like the Meridian Water team to ensure that the final allocations are robust, evidence-based, and supportive of the overarching goals for housing and employment growth. The Council will continue its positive dialogue and propose entering into a Statement of Common Ground to facilitate ongoing collaboration and ensure that the site allocations and related policies are effectively tailored to meet shared objectives.</p>	No	01945	Meridian Water (LBE)
SA5.1: Meridian Water Phase 1	<p>Vistry Group supports the draft site allocation for Meridian Water Phase 1 (SA 5.1) but requests amendments to reflect planning permissions and development potential. They propose including a row for non-residential floorspace in the table, updating Footnote 8 to reference extant planning permissions, and revising design principles to allow for buildings up to 100m in height. Additionally, they seek to align the draft site allocation with the Tall Building Maps in Appendix C, reflecting the approved heights and ongoing discussions with the Council.</p>	<p>The council appreciates Vistry Group's support and acknowledges the concerns regarding the wording of policy SA 5.1. The Council will continue to engage with Vistry Group and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.</p>	No	01897	Vistry Group
SA5.2: Meridian Water Phase 2	<p>FZ2 and FZ3. SA5.7 also has FZ3b.</p>	<p>Comments noted. Further engagement and statement of common ground to consider how to resolve issue.</p>	No	01926	Environment Agency

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA5.2: Meridian Water Phase 2	National Grid has reviewed the Enfield Local Plan and identified that several proposed development sites, including RUR.06 (Land at Picketts Lock), SA5.2 (Meridian Water Phase 2), and SA5.6 (Meridian East - Harbet Road), are crossed or in close proximity to NGET assets. They propose modifications to include site-specific criteria, such as a strategy for responding to NGET overhead transmission lines, ensuring the NGET Design Guide and Principles are applied during masterplanning to reduce the impact through good design.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with National Grid to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01658	National Grid
SA5.2: Meridian Water Phase 2	The NHS London Healthy Urban Development Unit notes that the site has an extant permission for a mixed-use development, with some parts already occupied. The outline planning application for phase 2 includes a requirement for a 'Healthcare Delivery Plan' to identify opportunities for onsite healthcare provision. A healthcare delivery plan should be secured for the site, and any subsequent applications should include a similar agreement to provide a health facility.	Comments noted.	No	01872	NHS London Healthy Urban Development Unit
SA5.2: Meridian Water Phase 2	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA5.2: Meridian Water Phase 2	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water

The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA5.2: Meridian Water Phase 2	TfL welcomes the requirement for public transport improvements but suggests specifying the improvements, such as bus service capacity to meet demand and the retention and enhancement of bus standing facilities. Enhanced bus services must be economically viable based on expected trip generation, and TfL is updating options for bus services to Meridian Water phases 1 and 2 based on the latest costs. Additionally, the Design Principles should include a requirement to minimise parking for residential and commercial uses to ensure consistency with the London Plan.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA5.2: Meridian Water Phase 2	Better Homes Enfield states that SA5.2 (Meridian Water Phase 2) is not legally compliant as it does not conform to the London Plan 2021. The London Plan Policies D3 and H1 require optimizing site capacity and increasing housing supply, particularly on brownfield sites near stations. Although planning permission was granted for up to 2,300 residential units plus student accommodation/shared living, the site allocation only includes 2,230 homes, missing the potential for at least 70 additional units. Additionally, opportunities for optimizing certain parcels within SA5.2, such as increasing homes in Meridian Two from 274 to 453, have not been fully explored. Consequently, the site allocation does not reflect the site's full potential and fails to meet NPPF Chapter 11 requirements, thus questioning its soundness. The report recommends revising the allocation to accurately reflect planning approval and the site's potential, including for student housing/shared living, to ensure compliance and soundness.	Comments noted. The Site Allocation Topic Paper emphasizes the flexibility and ongoing review of density levels to ensure alignment with LP21 policies D3 and H1. The paper details considerations for site-specific requirements and contextual appropriateness of density increases.	No	01708	Better Homes Enfield
SA5.2: Meridian Water Phase 2	The Meridian Water team welcomes the inclusion of various Meridian Water sites, including those under Enfield Council ownership: Meridian Water Phase 1, Meridian Water Phase 2, Meridian 13, and Meridian East (Harbet Road). 	to be refined through future masterplanning to optimize the brownfield capacity of these sites via a design-led approach in accordance with London Plan Policy D3.	detailed masterplanning. The Council acknowledges the importance of refining site requirements and addressing any gaps or inconsistencies in the accompanying plans. The Council is committed to working collaboratively with stakeholders like the Meridian Water team to ensure that the final allocations are robust, evidence-based, and supportive of the overarching goals for housing and employment growth. The Council will continue its positive dialogue and propose entering into a Statement of Common Ground to facilitate ongoing collaboration and ensure that the site allocations and related policies are effectively tailored to meet shared objectives.			
SA5.2: Meridian Water Phase 2	Vistry Group supports the draft site allocation for Meridian Water Phase 2 (SA 5.2) but requests amendments for accuracy. They suggest updating the residential capacity to 2,300 homes, reflecting the outline permission, and including a reference to student accommodation. They also note an inconsistency in the draft Tall Building Maps, requesting the identification of Area 11.08 on the plan to match the description. These changes would ensure the allocation aligns with the existing planning permissions and development potential.	Comments noted. The council appreciates Vistry Group's support and acknowledges the concerns regarding the wording of policy SA 5.2. The Council will continue to engage with Vistry Group and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01897	Vistry Group
SA5.3: Former IKEA store, Glover Drive	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. SA5.3: Former IKEA store, Glover Drive	TfL welcomes the requirement for the development to provide improved bus access and stops but seeks clarification on what is meant by "diversions." They emphasize that any enhanced bus services must be economically viable based on expected trip generation. Additionally, TfL suggests that the Design Principles should include a requirement to minimise parking for residential and commercial uses, including any re-provided retail store, to ensure consistency with the London Plan.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA5.3: Former IKEA store, Glover Drive	Better Homes Enfield states that SA5.3 (Former IKEA, Meridian Water) is not legally compliant as it does not conform to the London Plan 2021. The London Plan Policies D3 and H1 require optimising site capacity and increasing housing supply, particularly on brownfield sites near stations. Although the council's planning brief envisions 10,000 homes at Meridian Water, and a masterplan proposed 2,830 homes for the former IKEA site, the current allocation is only 1,500 homes. This allocation is based on outdated estimates and does not reflect the site's potential. Consequently, the site allocation does not meet NPPF Chapter 11 requirements for effective land use and fails the soundness test under NPPF 35(d). The report recommends revising the allocation to reflect the site's potential and the council's vision for delivering 10,000 homes at Meridian Water.	Comments noted. The Site Allocation Topic Paper emphasizes the flexibility and ongoing review of density levels to ensure alignment with LP21 policies D3 and H1. The paper details considerations for site-specific requirements and contextual appropriateness of density increases.	No	01708	Better Homes Enfield
SA5.3: Former IKEA store, Glover Drive	General support for policies that promote the conservation and enhancement of the historic environment. Objection to the approach towards tall buildings, particularly the wording suggesting acceptable harm to heritage assets. Amendments to Policy DE6 to align with NPPF and relevant legislation. Willingness to collaborate through a Statement of Common Ground or participate in hearings if necessary.	Comments noted.	No	01930	on behalf of Tottenham Hotspur Football Co Ltd
SA5.3: Former IKEA store, Glover Drive	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. SA5.5: Meridian 13 (also known as Teardrop)	TfL welcomes the requirement to ensure the re-provision of the existing Arriva bus garage in line with London Plan Policy T3, unless a suitable alternative has been provided elsewhere. They suggest amending the wording to "must ensure re-provision" due to the bus garage's importance in supporting the local bus network. The re-provision should consider transitioning to an all-electric bus fleet and the need for additional space for charging facilities, and this should be reinforced by including the re-provided bus garage in the Land Use Requirements. The Infrastructure Requirements should explicitly require contributions towards public transport, which could include bus service improvements and/or bus stops/stands to improve connectivity. Any enhanced bus services must be economically viable based on expected trip generation. TfL is updating options to provide bus services to Meridian Water phases 1 and 2 based on the latest costs. The Design Principles should state that the development must minimise parking for residential and commercial uses to ensure consistency with the London Plan.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01691	Transport for London
SA5.5: Meridian 13	Better Homes Enfield asserts that SA5.5 (Meridian 13) is not legally compliant as it does not conform to the London Plan 2021. SA5.6: Meridian East (also known as Harbet Road)	TfL welcomes the requirement for the development to contribute towards identified upgrades to the London Underground network serving Southgate. They note that making Southgate station step-free is not currently viable, so station improvements should focus on general access or capacity enhancements. TfL also notes the requirement for limited parking but suggests it should be amended to state that parking must be minimised to ensure consistency with the London Plan.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA5.6: Meridian East (also known as Harbet Road)	Better Homes Enfield argues that SA5.6: Meridian East (Harbet Road) is not legally compliant with the London Plan 2021, as required by Section 24(1) of the 2004 Planning and Compulsory Purchase Act. London Plan Policies D3 and H1 mandate optimising site capacity and increasing housing supply on suitable brownfield sites. The current allocation of 2,095 homes does not align with the council's commitment to delivering over 10,000 homes across Meridian Water.	Comments noted. The Site Allocation Topic Paper emphasizes the flexibility and ongoing review of density levels to ensure alignment with LP21 policies D3 and H1. The paper details considerations for site-specific requirements and contextual appropriateness of density increases.	No	01708	Better Homes Enfield

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	with the plan showing only 7,990 homes including those beyond the plan period. This discrepancy creates uncertainty and risks deterring investment. Additionally, the layout and connection issues with the proposed site could lead to poor integration of residential and industrial areas. Consequently, the allocation does not meet the NPPF Chapter 11 requirements for effective land use and site density optimisation, failing the soundness test of NPPF 35(d). Better Homes Enfield recommends modifying the allocation to reflect the site's actual potential and providing clear plans for delivering the council's vision for Meridian Water.				
SA5.6: Meridian East (also known as Harbet Road)	The Meridian Water team welcomes the inclusion of various Meridian Water sites, including those under Enfield Council ownership: Meridian Water Phase 1, Meridian Water Phase 2, Meridian 13, and Meridian East (Harbet Road). They are keen to maintain a positive and constructive dialogue with the Local Planning Authority (LPA) to refine the Site Allocations' requirements, ensuring the draft allocations are based on up-to-date evidence and thus justified. This includes addressing gaps and inconsistencies in the accompanying plans, which can be readily rectified. For Meridian East (Harbet Road), it should be acknowledged that capacity figures are minimum estimates to be refined through future masterplanning to optimize the brownfield capacity of these sites via a design-led approach in accordance with London Plan Policy D3.	Comment noted. The support and constructive comments are welcomed regarding the inclusion of various Meridian Water sites in the draft allocations, including those under Enfield Council ownership. The Council's approach to site allocations is based on a comprehensive and up-to-date evidence base as detailed in the Site Allocation Topic Paper. This evidence ensures that the draft allocations are justified and aligned with the strategic objectives outlined in the Local Plan. The brownfield-first policy prioritizes the optimal use of previously developed land, in accordance with London Plan Policy D3, ensuring that capacity figures reflect realistic minimum estimates subject to refinement through detailed masterplanning. The Council acknowledges the importance of refining site requirements and addressing any gaps or inconsistencies in the accompanying plans. The Council is committed to working collaboratively with stakeholders like the Meridian Water team to ensure that the final allocations are robust, evidence-based, and supportive of the overarching goals for housing and employment growth. The Council will continue its positive dialogue and propose entering into a Statement of Common Ground to facilitate ongoing collaboration and ensure that the site allocations and related policies are effectively tailored to meet shared objectives. 	be considered throughout the site, with precise heights determined through a design-led approach. This amendment will ensure the Local Plan is flexible and that the site is deliverable, making it effective in accordance with paragraph 35 criterion c) of the NPPF.	throughout the site, with precise heights determined through a design-led approach.			
SA7.3: Ladderswood Estate	In summary, New Ladderswood LLP supports the principle of Site Allocation SA7.3 Ladderswood Estate for estate regeneration. However, certain policy items in their current form would constrain redevelopment options, making them ineffective and inconsistent with national policy. Thus, the draft Local Plan, as it stands, is not sound. With the suggested amendments, they believe the draft Local Plan would be sound.	The Council appreciates New Ladderswood LLP's support for the principle of Site Allocation SA7.3 Ladderswood Estate. The Council acknowledges the concerns raised regarding certain policy constraints and their potential impact on redevelopment options. The Council believes that the draft Local Plan, including Site Allocation SA7.3, is justified by the evidence base, as outlined in the Enfield Local Housing Needs Assessment and Housing Topic Paper. However, the Council is committed to ongoing dialogue and will consider the suggested amendments to ensure the plan is effective, flexible, and consistent with national policy. The Council look forward to working together to refine the Local Plan, ensuring it meets the needs of all stakeholders.	No	02090	New Ladderswood LLP
SA7.4: Arnos Grove Station Car Park	The NHS London Healthy Urban Development Unit notes that sites SA7.1, SA7.3, and SA7.4 are expected to deliver housing within the next five years. They welcome discussions as soon as possible to address how the healthcare requirements for the area will be accommodated following the anticipated population increase.	Comments noted	No	01872	NHS London Healthy Urban Development Unit
SA7.4: Arnos Grove Station Car Park	TfL notes the reference to contributions for a rapid transit route but reiterates that there is no funding or commitment for an East West Transit route. They suggest that contributions would be better directed towards supporting the recently introduced SL1 limited stop express bus service, including enhanced bus priority and improved infrastructure. TfL recommends changing the wording to reflect this.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London

SA7.4: Arnos Grove Station Car Park	The resident opposes the construction of 52 homes/apartments at the Arnos Grove underground station car park, citing concerns about overdevelopment, insufficient infrastructure and services (such as schools and doctors' surgeries), and increased congestion. They note that recent developments nearby have already contributed to these issues. Additionally, the resident highlights existing parking challenges and believes new homes will worsen the situation, particularly for residents of nearby roads like Seafield Road.	Comments noted. The Council recognizes the importance of balancing development with infrastructure and services. The plan's Spatial Strategy and Overall Approach Topic Paper sets out the approach towards new developments with a focus on sustainable growth, ensuring that local services such as schools and healthcare facilities are enhanced to support increased demand. The Site Allocation Topic Paper emphasizes creating well-designed, accessible spaces that address local parking and congestion issues. The proposed Site Allocation includes considerations for improved infrastructure and transport options to mitigate these concerns.	No	00004	Sam Gracie Tillbrook
	Residents are concerned that the proposal under SA7.4 to remove off-street parking at Arnos Grove Station Car Park will eliminate a crucial facility for commuters, potentially leading to increased car usage and congestion as commuters from further afield seek alternative parking solutions. They worry that the absence of this off-street parking will force more drivers to use on-street parking, which could significantly impact local residents by increasing traffic and congestion in residential areas. This shift is expected to negatively affect the character of the local area, disrupting the existing community and diminishing the quality of life for residents.	Comments noted. A balanced response to mitigate potential negative impacts is considered in the plan. The Spatial Strategy and Overall Approach Topic Paper highlights that any changes to parking facilities must consider the broader implications on commuter behavior and local traffic patterns. It emphasizes that the plan includes provisions for comprehensive transport and traffic assessments to understand and address the impact of removing off-street parking. The Site Allocation Topic Paper outlines that proposals must incorporate alternative solutions to accommodate commuters, such as enhanced public transport options or nearby off-street parking facilities, to mitigate increased reliance on on-street parking. Additionally, the plan includes measures to ensure that any new parking arrangements are designed to minimize disruption to local residents and preserve the character of the area. These measures aim to balance the need for efficient transportation infrastructure with the need to protect local residential environments and ensure a smooth transition for all affected parties.	No	03325	Michael Lord
SA7.4: Arnos Grove Station Car Park	Residents are concerned that the proposal under SA7.4 to remove off-street parking at Arnos Grove Station Car Park will eliminate a crucial facility for commuters, potentially leading to increased car usage and congestion as commuters from further afield seek alternative parking solutions. SA8.2: Lodge Drive Car Park	TfL notes the requirement for limited parking in the development but suggests it should be amended to state that parking must be minimised, including for commercial uses. They support streetscape improvements but emphasize that any proposals affecting the North Circular Road or its frontage should be agreed with TfL. Additionally, there should be no direct vehicle access (for parking or servicing) from the North Circular Road.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA8.2: Lodge Drive Car Park	Residents are concerned that the proposal to build on Lodge Drive Car Park is short-sighted and misconceived. They argue that Palmers Green is a busy and congested shopping area, and Lodge Drive is currently the only off-street parking available, including free short-stay bays that help minimize congestion on Green Lanes. While they support the Council's aim to reduce unnecessary car use, residents feel this proposal, along with others to close car parks in the borough, appears driven by political policy rather than practicality and the needs of Enfield residents and commercial businesses.	The Council aims to balance development needs with practical considerations for residents and businesses. The proposed allocation for Lodge Drive includes plans to maintain sufficient parking options to support local commerce and minimize congestion on Green Lanes. The Council's broader strategy seeks to reduce unnecessary car use while ensuring that development proposals are practical and considerate of the community's needs. Infrastructure improvements and alternative transport options are being explored to mitigate potential impacts, aiming to enhance overall accessibility and support the vibrant commercial environment in Palmers Green.	No	01650	Christopher Harper

SA8.4: Travis Perkins, Palmers Green	TfL recommends that the design principles state any car parking must be minimised and aligned with the goal of achieving a 75% sustainable transport mode share. This requires car parking to be significantly lower than the London Plan maximum standards and should consider future rather than existing PTAL. The infrastructure requirements should explicitly require substantial contributions towards public transport to improve connectivity to a level comparable with urban placemaking areas in the borough. A costed and agreed Infrastructure Delivery Plan should be submitted to outline the full package of transport infrastructure for all Chase Park sites. TfL is concerned that dividing the Chase Park placemaking area into four separate site allocations could lead to parts being developed before agreeing on the necessary infrastructure requirements and costs for the entire area.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
C1: Housing and Mixed use Allocations – Chase Park					
SA10.1: Land at Chase Park	Residents express concerns regarding legal compliance, specifically the clarity of the term "Heritage Asset" in Policies DE4 and DE10. While the incorporation of Historic England's 2019 recommendations is acknowledged, residents urge that the definition in the 'Acronym Buster and Glossary' explicitly include both built and buried heritage resources. For Chase Park (section PL10), residents are worried about the lack of consideration for the likely multi-period buried archaeological resources in the development area, particularly prehistoric archaeology evidenced in other parts of Enfield Chase. They recommend that the Masterplan include a comprehensive archaeological assessment based on fieldwork. Additionally, while welcoming the proposal to create a heritage park at the former Slades Hill army camp and AA gun site, they stress the necessity of full	Comments noted. The Council acknowledges the concerns regarding the clarity of the term "Heritage Asset" in Policies DE4 and DE10 and will amend the glossary to include both built and buried heritage resources. For Chase Park, a comprehensive archaeological assessment based on fieldwork will be required in the Masterplan to address potential multi-period archaeological resources. Additionally, full archaeological documentation and necessary excavation will be prerequisites for developing the heritage park at the former Slades Hill army camp and AA gun site, ensuring effective site interpretation.	No	00002	Enfield Archaeological Society

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	archaeological documentation and possible excavation prior to development for effective site interpretation.				
SA10.1: Land at Chase Park	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA10.1: Land at Chase Park	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA10.1: Land at Chase Park	Enfield Road Watch's response to the local plan highlights several concerns. They dispute Design Principle D's characterization of Enfield Road as a "highways dominated space," emphasizing its urban-rural interface and separation between Enfield Town and Oakwood. They question the replacement of the 2021 Green Belt study, arguing the fields south of Enfield Road should qualify as a Site of Importance for Nature Conservation due to their ecological richness. The response also underscores the area's historic significance, criticizes the plan for not respecting local character and design codes, and opposes including Trent Park Equestrian Centre in the development area due to its recreational and historical value.	Comments noted. The Council's plan aligns with strategic priorities and has undergone thorough consultation and cooperation with stakeholders and adjacent authorities, ensuring compliance with broader regional goals (Duty to Cooperate Statement). The ELP Spatial Strategy outlines a balanced approach to development, focusing on sustainability and preserving essential green spaces (ELP Spatial Strategy and Overall Approach Topic Paper). Furthermore, the Chase Park Topic Paper highlights the planned green infrastructure and recreational benefits, addressing the perceived loss of green space by creating high-quality new parks and open spaces. Alternatives have been explored and assessed in the Integrated Impact Assessment (IIA), demonstrating a thorough consideration of various options to meet housing needs sustainably.	No	01687	Enfield Road Watch
SA10.1: Land at Chase Park	CPRE London opposes the development of Green Belt land at Chase Park/Trent Park Equestrian Centre (SA10.1), highlighting its importance to the Metropolitan Green Belt and arguing that Enfield has sufficient brownfield land and existing major sites like Meridian Water for housing development. They assert that development would result in the loss of high-quality countryside, closure of the Trent Park Equestrian Centre, and the removal of separation between Oakwood	Comments noted. The Council acknowledges CPRE London's concerns about the development of Green Belt land at Chase Park (PL10). The Enfield Local Plan is designed to balance housing needs with environmental preservation. The ELP Spatial Strategy and Overall Approach Topic Paper justifies why some Green Belt land must be allocated to meet housing targets sustainably. The Chase Park Topic Paper 2024 details extensive assessments ensuring the developments are planned	No	01726	CPRE London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	and Enfield. Therefore, they believe this site should be removed from the list of site allocations.	thoughtfully, considering environmental and community impacts. The plan prioritizes brownfield sites and protects significant green spaces where possible to maintain the area's character and identity.			
SA10.1: Land at Chase Park	HCC's response notes that the development at Chase Park (PL10, SA10.1 – SA10.4) could generate similar issues to those identified for Crews Hill, such as ecological impact and increased visitor pressure. However, because Chase Park is located slightly further south, there may be fewer concerns regarding proximity impacts on Hertfordshire.	<p>Comments noted.</p> <p>HCC's concerns regarding the ecological impact and increased visitor pressure from the Chase Park development are acknowledged. The Chase Park Topic Paper outlines Enfield's commitment to integrating Biodiversity Net Gain and thoughtful design to enhance ecological characteristics. Given Chase Park's location further south, the proximity impacts on Hertfordshire are expected to be fewer. Enfield is committed to mitigating recreational impacts through the Enfield Recreation Mitigation Strategy 2023. This strategy includes measures such as managing visitor access, enhancing green spaces, and providing alternative recreational opportunities to reduce pressure on sensitive areas. The forthcoming masterplan will detail Green Infrastructure proposals, ensuring ecological preservation and sustainable development. Enfield will continue to collaborate with stakeholders to address specific concerns and ensure alignment with national policies.</p>	No	01755	Hertfordshire County Council - Ecology
SA10.1: Land at Chase Park	The Councillor highlights concerns about limited public transport, increased traffic congestion, and significant harm to the area's character and countryside. The development would urbanize the Enfield Chase Area of Special Character, impacting the Trent Park Conservation Area and historic landscape. It also notes the loss of green spaces that contribute to physical and mental health, as emphasized by Historic England. The proposal is deemed unsound and recommended for deletion from the draft plan.	<p>Comments noted.</p> <p>The concerns raised about the Chase Park development proposal are acknowledged, particularly regarding public transport limitations, potential traffic congestion, and the impact on the area's character. Policy PL10 is supported by extensive evidence base, in particular the Chase Park Topic Paper which outlines extensive transport improvements, including new bus routes and cycle paths to enhance connectivity. The plan also incorporates significant green spaces, mitigating environmental impacts and preserving public amenities. These measures, aligned with the National Planning Policy Framework, ensure the development is sustainable, balancing growth with environmental and community needs. Further details can be found in the Chase Park Topic Paper.</p>	No	01779	Councillor Fallart
SA10.1: Land at Chase Park	The Enfield Society's concerns about Policy PL10: Chase Park focus on the significant harm that development on both sides of Enfield Road would cause to the semi-rural character of the area and the sense of separation between Enfield Town and Oakwood. They highlight ENPlan's assessment that the high-density, up to 4-5 storey core of the development would have a major adverse visual impact, particularly on high-sensitivity receptors using the London Loop. Additionally, the development would surround the Merryhills Way with housing, compromising its rural character and value as a local open space. The Society also raises concerns about the potential development of the Trent Park Equestrian Centre, which they argue is	<p>Comments noted.</p> <p>The Enfield Society's concerns about the development's impact on the semi-rural character and visual effects are justified through comprehensive planning strategies outlined in the Chase Park Topic Paper 2024 and relevant placemaking documents. The Policy requires development to include substantial green buffers and open spaces, particularly around Merryhills Way and the Trent Park Conservation Area. This approach maintains the rural feel and provides visual separation between Enfield Town and Oakwood, aligning with local and London Plan policies. The development's design guidelines prioritize high-quality, context-sensitive architecture that respects the</p>	No	01794	Enfield Society

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	inappropriate for the Trent Park Conservation Area due to its rural nature.	existing landscape. The strategy includes lower building heights and density gradients to transition smoothly from urban to rural areas, mitigating visual impact and maintaining the area's character. Phased implementation allows for continuous assessment and adjustment based on real-time data and community feedback, ensuring the development remains responsive to local needs and concerns. This adaptive approach helps to integrate the development seamlessly with its surroundings. The plan emphasizes sustainable transport options and improved connectivity, reducing car dependency and traffic impacts. Enhanced bus and cycle routes will provide efficient, eco-friendly transportation alternatives, supporting the goal of sustainable urban growth. The integration of green and blue infrastructure throughout the development preserves and enhances ecological networks, supporting biodiversity and providing recreational opportunities for residents. In summary, the development at Chase Park is designed to balance growth with the preservation of the area's character and ecological integrity, addressing the Enfield Society's concerns through careful planning and community engagement.	No	01817	Barnet Society
SA10.1: Land at Chase Park	The Barnet Society objects to any erosion of the Green Belt, particularly the loss of the green buffer between Barnet and Enfield. This buffer is crucial for maintaining the distinct identities of Barnet, Hadley, Cockfosters, and Enfield Town, preventing their merge into a single suburban area. These countryside areas, especially north and south of Hadley Road and Enfield Road, are vital for preserving the character and separation of these communities.	Comments noted. The Enfield Local Plan includes a comprehensive assessment of "exceptional circumstances" required for Green Belt alterations. These circumstances are detailed in the Exceptional Circumstances Topic Paper. The Plan aims to balance development needs with the preservation of essential green spaces, ensuring any changes are justified and beneficial to the wider community.	No	01852	Herts & Middlesex Wildlife Trust
SA10.1: Land at Chase Park	Policy PL10 should be deleted from the plan.	Enfield's Site Allocation Topic Paper sets out the process which was used to select sites. This states that Stage 3b considered non-absolute constraints including Ecology. Biodiversity net gain will ensure that any planning permission that comes forward on sites follows the mitigation hierarchy and provides a statutory net gain to biodiversity. Enfield is targeting an ambitious 20% net gain with its Local Plan to further ensure that biodiversity in the borough is safeguarded, and any impacts appropriately mitigated. Under the statutory biodiversity metric, all habitats are considered replaceable through off-site mitigation via the statutory net gain system, except those on a closed list. As part of the Placemaking Topic Paper for the area, Enfield Council commissioned external consultants to undertake a range of baseline studies, including ecology. There is no evidence that any of these habitats exists on the site, and as such the impact of developing the site on habitats is considered to be feasible to mitigate via restoration offsets, for example through Enfield Council's ambitious Landscape Recovery Project at Enfield Chase.	No	01891	Transport for London
SA10.1: Land at Chase Park	TfL does not consider the sites at Chase Park (PL10) SA10.1 – SA10.4, Crews Hill (PL11) SA11.1 – SA11.6, land opposite Enfield Crematorium (RUR.01), and land between Camlet Way and Crescent	Comments noted.	No		

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	West, Hadley (RUR.02) suitable for housing. This is due to their poor transport connectivity and the high costs required to provide sustainable transport access comparable to urban sites in the borough. Developing these sites is likely to lead to car-dependent development, which is contrary to the Good Growth objectives of the London Plan and the NPPF.	The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.			
SA10.1: Land at Chase Park	TfL notes the requirement for limited residential parking but suggests it should be amended to state that parking must be minimised and aligned with the goal of achieving a 75% sustainable mode share. They recommend submitting a costed and agreed Infrastructure Delivery Plan to outline the full package of transport infrastructure for all Chase Park sites. TfL is concerned that dividing the Chase Park placemaking area into four separate site allocations could lead to parts being developed before agreeing on the necessary infrastructure requirements and costs for the entire area.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA10.1: Land at Chase Park	FZ2, FZ3 and FZ3b. EA recommend that any prospective development that comes forward undertakes new modelling to fully understand the flood risks on site.	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01926	Environment Agency
SA10.1: Land at Chase Park	Comer Homes supports the allocation of Chase Park, including Vicarage Farm, as a key placemaking area to help meet Enfield's housing targets, particularly for family and affordable housing. They commend the Council's proactive approach to addressing the housing shortage. However, they raise concerns about specific aspects of Policy PL10. They argue that Vicarage Farm, currently designated as public open space and proposed woodland, is unsuitable for these uses due to its function as a working farm. They also express concerns about the potential road link to Hadley Road, which may impact the farm's viability and development costs, and question its necessity without full assessments. Additionally, they note that the draft map incorrectly designates their site as Ancient Woodland, which could hinder future development.	Support noted. The Council will review the cartography to ensure the accuracy of the Ancient Woodland designation and consider a minor modification to the labelling of large areas of public open space in the illustrative spatial framework. Additionally, comments regarding the road link to Hadley Road have been noted, and the Council will assess its necessity and impact as the plan progresses.	No	01926	Comer Homes Group
SA10.1: Land at Chase Park	Comer Homes supports the Chase Park Placemaking Area as a crucial opportunity to address significant housing needs, acknowledging the flexible use of the term "approximately" for the estimated residential capacity of 3,700 homes, with 2,550 anticipated within the plan period up to 2041. They argue that the policy should clarify that these figures are minimum targets, not maximum limits, to ensure the site fully contributes to housing supply. Comer Homes believes that Chase Park, including Chase Farm, has the potential to deliver more homes than currently identified and that the numbers should not constrain the site's development.	Support for the Chase Park Placemaking Area is noted, and the Council appreciates the feedback regarding the residential capacity figures. The estimated capacity of around 3,700 homes, with 2,550 within the current plan period up to 2041, represents a strategic target that reflects current assessments and constraints. As highlighted in the Site Allocation Topic Paper, the figures provided are based on an understanding of existing infrastructure, environmental considerations, and development feasibility. The use of the term "approximately" in the policy indicates flexibility to accommodate changes in design and demand over time. The Council recognizes the potential for higher residential densities and is committed to ensuring that the Chase Park site can contribute as effectively as possible to meeting housing	No	01926	Comer Homes Group

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
		needs. However, any adjustments to capacity will need to be balanced with detailed masterplanning and infrastructure assessments. The Council will consider all relevant factors to ensure the site is utilized optimally while addressing practical constraints and delivering sustainable development.			
SA10.1: Land at Chase Park	Comer Homes supports the inclusion of employment-generating uses within the Chase Park development, particularly the integration of small-scale co-working spaces. They emphasize that while these uses are important for creating a vibrant community, the policy should clearly reflect that the primary focus of the development is residential. Point 1 of the policy already notes that development will be residential-led with limited employment uses. Comer Homes suggests that the policy should explicitly acknowledge this to avoid future ambiguity, clarifying that the goal is not to develop a major employment hub but rather to offer flexible spaces for local working and small businesses.	The suggested modifications regarding employment-generating uses within the Chase Park development are not necessary to make the plan sound. The policy, as outlined, aims to incorporate employment uses primarily within the local centre, which inherently limits the scale of these uses. This approach is consistent with the objective of maintaining a residential-led development while providing flexible spaces for small-scale business activities. However, if the Inspector deems that clarifying the policy as suggested would enhance understanding, the Council has no objection to this and will propose it as a minor modification.	No	01926	Comer Homes Group
SA10.1: Land at Chase Park	Comer Homes agrees with Criterion 12d, which emphasizes the importance of responding to the area's topography and the presence of Salmons and Merryhills Brooks. They highlight that areas with lower topography, as illustrated in previous promotion work, can support taller buildings with minimal impact on sensitive landscapes, suggesting this should be explicitly acknowledged in the policy. However, they express concern that Point 12g, which mandates reduced building heights away from the local centre and main transport corridors, contradicts this principle by being overly restrictive. They argue that this could hinder development if it does not align with technical assessments and a landscape-led approach as outlined in Point 12a.	The suggested modifications are not necessary to make the plan sound. However, the Council acknowledges the need for clarity in relation to building heights. To address this, we are open to incorporating a minor modification to Criterion 12g by adding "in broad terms" after "building heights should." This adjustment will provide additional flexibility while maintaining the overall intent of the policy to balance topographical considerations with the broader design principles.	No	01926	Comer Homes Group
SA10.1: Land at Chase Park	Comer Homes expresses concern about Criterion 13c, which calls for the Chase Park Placemaking Area to facilitate a natural extension of Trent Country Park into the northern part of the area. While supportive of the intention to incorporate parkland features such as woodland, trees, and green spaces, they highlight that Vicarage Farm is an active farm and will continue to operate alongside the development. They request that any references to the Country Park be worded flexibly to ensure compatibility with the ongoing agricultural use of the farm.	Comments noted. The Council acknowledges the concern regarding the integration of the natural extension of Trent Country Park with the ongoing use of Vicarage Farm. This aspect will be carefully considered and investigated further during the detailed masterplanning phase to ensure compatibility and practicality.	No	01926	Comer Homes Group
SA10.1: Land at Chase Park	Comer Homes supports the objectives of creating diverse open spaces within the Chase Park Placemaking Area but raises practical concerns regarding the designation of Vicarage Farm, a working farm, as a hilltop view park. The current designation on the Illustrative Framework Plan is impractical because the farm's fields are used for crops and livestock, making public access challenging. They suggest that, while some public access through rural footpaths might be feasible, a formal designation as open space could impact the farm's viability. They recommend reconsidering the open space designation on Vicarage	Comments noted. The Council will review the references to Vicarage Farm and how such land is designated, ensuring compatibility with its continued use as a working farm. This issue can be explored further during the detailed masterplanning stage. If necessary, the Council is open to making modifications to improve clarity.	No	01926	Comer Homes Group

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	Farm and highlight that ample public open space is already planned within the Chase Farm allocation.				
SA10.1: Land at Chase Park	Comer Homes comments that while they support the principle of aiming for a high level of biodiversity net gain, the criteria in PL10 should initially require a minimum of 10% net gain, in line with government requirements. They argue that setting a rigid 20% target may be unrealistic at this stage and should be reconsidered, suggesting that a 10% minimum with a target of 20% would be more practical and achievable.	The policy for a 20% BNG is informed by the unique local circumstances and strategic environmental goals outlined in the Blue and Green Enfield evidence base. The higher percentage is aimed at significantly enhancing biodiversity across the borough, aligning with Enfield's broader sustainability and environmental enhancement objectives. While the Environment Act sets a minimum of 10%, local authorities can require higher gains if justified by local conditions and strategic priorities. The policy aims to enhance public accessibility and the quality of open spaces, which is crucial for supporting community well-being and biodiversity. As indicated in our Blue and Green Enfield strategy, these improvements will be determined through detailed planning applications and development management processes, ensuring that the enhancements are practical and aligned with local needs.	No	01926	Comer Homes Group
SA10.1: Land at Chase Park	Comer Homes supports the principle of providing a new three-form entry primary school near the local centre but emphasizes the need for flexibility in the policy due to recent declines in birth rates. They suggest that the policy should include a provision to review the need for the school based on current demands. Additionally, they raise concerns about placing school playing fields in publicly accessible open space, citing safeguarding issues, and recommend reconsidering this approach to ensure the facilities are appropriately secured.	The Council acknowledges the importance of maintaining flexibility regarding the need for the proposed three-form entry primary school, particularly in light of changing demographic trends. We will consider including a review mechanism in the policy to adapt to future needs. Regarding the provision of playing fields, we understand the concerns about safeguarding and will explore alternatives to ensure school facilities are both secure and accessible. These matters will be addressed further during detailed masterplanning, and we are open to modifying the policy if it enhances clarity and feasibility.	No	01926	Comer Homes Group
SA10.1: Land at Chase Park	Comer Homes supports Policy PL10 but emphasizes the need for flexibility due to viability concerns. They highlight that significant infrastructure costs, such as those for a potential bus route and drainage improvements, as well as affordable housing requirements, may impact the development's feasibility. Comer Homes suggests that the policy should explicitly account for these viability issues and allow flexibility in its application. They also propose that the Council consider a £0 CIL (Community Infrastructure Levy) rate for the Chase Park Placemaking Area to facilitate more effective S106 negotiations and ensure critical infrastructure, like a new school, is delivered without being constrained by CIL costs. Comer Homes will continue to work with the Council to address these issues and refine policy wording as needed.	Comments noted. The Council is committed to working collaboratively with Comer Homes and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01926	Comer Homes Group
SA10.1: Land at Chase Park	Within the land use requirements there is mention of formal play and playing pitch provision but in the infrastructure requirements under the proposal, there is no mention of formal sport and recreational	Comments noted. The Council is committed to working collaboratively with Sport England and other stakeholders to refine and update the Local Plan policies where	No	01967	Sport England

	<p>provision. Sport England would like to see a line referencing the need for on-site formal sport and playing fields.</p>	<p>necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No		
SA10.1: Land at Chase Park	<p>The Federation of Enfield Residents & Allied Associations, represented by Peter Gibbs, raised several significant concerns about the Enfield Local Plan, particularly regarding Policies PL10 and PL11, for Policy PL10: They argue that the development proposal for the A110 is invalid due to its ribbon development approach, which is not supported by the NPPF. This infill between distinct communities would compromise Trent Country Park's ecological value and rural quality. They also express concerns about the influence of Comer, a major developer, which might lead to aggressive development strategies that harm local living conditions. The proposed site is constrained by the A110 road, which cannot handle increased traffic from the new development, affecting quality of life and transport infrastructure. They also criticize the plan for not addressing the high density and inadequate infrastructure, including poor transport links and lack of local employment opportunities, which would exacerbate commuting issues and detract from the area's overall quality of life. In both cases, the Federation asserts that the plans should be revised or deleted to ensure they meet legal and planning soundness requirements.</p>	<p>The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. The A110 development aligns with the Enfield Local Plan's overall spatial strategy, which aims to accommodate necessary housing growth while maintaining a balance with environmental and infrastructural considerations. The plan acknowledges the potential impacts on Trent Country Park but includes comprehensive mitigation strategies to protect and enhance the park's ecological value and recreational use. This approach is in line with the spatial strategy's emphasis on sustainable growth and protecting green spaces. The plan includes provisions for upgrading the A110 and associated transport links to support increased traffic and mitigate congestion. The intention is to improve road capacity and enhance public transport connections, addressing concerns about the current limitations of the A110. These improvements are designed to integrate with the broader transport strategy, which includes enhancements to local bus services and potential future rail improvements. The inclusion of the site and site allocations in the Local Plan are based on a rigorous evaluation of potential benefits and challenges. The developer, Comer Homes and others, is required to adhere to strict quality standards and community engagement processes, ensuring that the development meets high standards and addresses local needs. The plan aims to deliver a balanced mix of housing types, including family homes, and incorporates community amenities to support a vibrant, sustainable neighbourhood. In summary, the Enfield Local Plan's policies are designed to address the Federation's concerns by incorporating robust mitigation measures, infrastructure enhancements, and community-focused strategies to balance housing needs with environmental protection and quality of life considerations.</p>	No	03272	Federation of Enfield Residents & Allied Associations
SA10.1: Land at Chase Park	<p>Lansdown are promoters of land at Trent Park Equestrian Centre which forms part of the Chase Park site allocation (SA 10.1). This comment relates to the whole plan. Lansdown support the New Enfield Local Plan – Regulation 19 version and believe that the Plan as drafted is well considered and proactively plans for a sustainable future for the Borough. It sets out a bold vision which seeks to tackle the complex and serious issues the Borough is facing. These issues include the need for a step change in the delivery of housing (including family housing, affordable housing and specialist housing for older people) in a sustainable manner. The spatial strategy is positively prepared and justified, with clear evidence that shows the need to</p>	<p>Support noted.</p>	No	01998	Lansdown

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	release Green Belt land to meet the development needs over the plan period.				
SA10.1: Land at Chase Park	Comments received from residents/businesses are contained in Table B.3: SP PL10: Chase Park and SA10.1: Land at Chase Park				
SA10.2: Arnold House (66 Ridgeway) and land to the rear of 66 The Ridgeway (west)	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA10.2: Arnold House (66 Ridgeway) and land to the rear of 66 The Ridgeway (west)	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA10.2: Arnold House (66 Ridgeway) and land to the rear of 66 The Ridgeway (west)	Enfield Road Watch's response to the Local Plan expresses concerns about the handling of the planning application for Arnold House's demolition. They argue the access road to the proposed Chase Park development was not transparently communicated, potentially harming the Vicarage Farm and Rifles Site SINC, contradicting NPPF Paragraph 185a. Additionally, they claim the area's slope and gradient do not support active travel, making the development unsustainable.	Comments noted. The plan ensures compliance with NPPF guidelines by mapping and safeguarding local wildlife habitats, thus supporting sustainable growth and protecting ecological networks.	No	01687	Enfield Road Watch
SA10.2: Arnold House (66 Ridgeway) and land to the rear of 66 The Ridgeway (west)	HCC's response notes that the development at Chase Park (PL10, SA10.1 – SA10.4) could generate similar issues to those identified for Crews Hill, such as ecological impact and increased visitor pressure. However, because Chase Park is located slightly further south, there may be fewer concerns regarding proximity impacts on Hertfordshire.	Comments noted. HCC's concerns regarding the ecological impact and increased visitor pressure from the Chase Park development are acknowledged. The Chase Park Topic Paper outlines Enfield's commitment to integrating Biodiversity Net Gain and thoughtful design to enhance ecological characteristics. Given Chase Park's location further south, the proximity impacts on Hertfordshire are expected to be fewer. Enfield is committed to mitigating recreational impacts through the Enfield Recreation Mitigation Strategy 2023. This strategy includes measures such as managing visitor access, enhancing green spaces, and providing alternative recreational opportunities to reduce pressure on	No	01755	Hertfordshire County Council - Ecology

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
		<p>sensitive areas. The forthcoming masterplan will detail Green Infrastructure proposals, ensuring ecological preservation and sustainable development. Enfield will continue to collaborate with stakeholders to address specific concerns and ensure alignment with national policies.</p>			
SA10.2: Arnold House (66 Ridgeway) and land to the rear of 66 The Ridgeway (west)	<p>The Councillor highlights concerns about limited public transport, increased traffic congestion, and significant harm to the area's character and countryside. The development would urbanize the Enfield Chase Area of Special Character, impacting the Trent Park Conservation Area and historic landscape. It also notes the loss of green spaces that contribute to physical and mental health, as emphasized by Historic England. The proposal is deemed unsound and recommended for deletion from the draft plan.</p>	<p>Comments noted.</p> <p>The concerns raised about the Chase Park development proposal are acknowledged, particularly regarding public transport limitations, potential traffic congestion, and the impact on the area's character. Policy PL10 is supported by extensive evidence base, in particular the Chase Park Topic Paper which outlines extensive transport improvements, including new bus routes and cycle paths to enhance connectivity. The plan also incorporates significant green spaces, mitigating environmental impacts and preserving public amenities. These measures, aligned with the National Planning Policy Framework, ensure the development is sustainable, balancing growth with environmental and community needs. Further details can be found in the Chase Park Topic Paper.</p>	No	01779	Councillor Fallart
SA10.2: Arnold House (66 Ridgeway) and land to the rear of 66 The Ridgeway (west)	<p>The Enfield Society's response highlights concerns about the addition of an area in Chase Park at Regulation 19 Stage, primarily due to access issues from Enfield Road. They criticize the handling of a planning application at Arnold House, noting the lack of consideration for Local Plan proposals. They also express significant concerns over ecological damage to the Vicarage Farm and Rifles Site SINC from proposed road construction, non-compliance with NPPF guidelines on habitat protection, and the unlikelihood of achieving sustainable transport targets due to site topography. Furthermore, they question the clarity of the 'placemaking area' concept on the policies map.</p>	<p>Comments noted.</p> <p>The Enfield Society's concerns about the addition of the Chase Park area and its impacts are justified in the Chase Park Topic Paper 2024 and relevant placemaking materials. The inclusion of new areas aims to provide comprehensive transport solutions, enhancing connectivity and ensuring efficient traffic management. The plans incorporate detailed traffic assessments and infrastructure improvements to minimize congestion and integrate sustainable transport options. The development plan emphasizes preserving ecological value, with strategies to mitigate impacts on the Vicarage Farm and Rifles Site SINC. This includes creating wildlife corridors and ensuring biodiversity net gain, aligning with NPPF guidelines. Despite topographical challenges, the plan promotes active travel through improved cycling and walking infrastructure. Design principles include enhancements to streetscapes and public transport connectivity, aiming for sustainable mode shares. The policies map and placemaking strategies provide clear guidelines for development, ensuring that new projects are well-integrated, context-sensitive, and beneficial to the community.</p>	No	01794	Enfield Society
SA10.2: Arnold House (66 Ridgeway) and land to the rear of 66 The Ridgeway (west)	<p>The Barnet Society objects to any erosion of the Green Belt, particularly the loss of the green buffer between Barnet and Enfield. This buffer is crucial for maintaining the distinct identities of Barnet, Hadley, Cockfosters, and Enfield Town, preventing their merge into a single suburban area. These countryside areas, especially north and south of Hadley Road and Enfield Road, are vital for preserving the character and separation of these communities.</p>	<p>Comments noted.</p> <p>The Enfield Local Plan includes a comprehensive assessment of "exceptional circumstances" required for Green Belt alterations. These circumstances are detailed in the Exceptional Circumstances Topic Paper. The Plan aims to balance development needs with the</p>	No	01817	Barnet Society

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA10.2: Arnold House (66 Ridgeway) and land to the rear of 66 The Ridgeway (west)	Policy PL10 should be deleted from the plan.	preservation of essential green spaces, ensuring any changes are justified and beneficial to the wider community. Enfield's Site Allocation Topic Paper sets out the process which was used to select sites. This states that Stage 3b considered non-absolute constraints including Ecology. Biodiversity net gain will ensure that any planning permission that comes forward on sites follows the mitigation hierarchy and provides a statutory net gain to biodiversity. Enfield is targeting an ambitious 20% net gain with its Local Plan to further ensure that biodiversity in the borough is safeguarded, and any impacts appropriately mitigated. Under the statutory biodiversity metric, all habitats are considered replaceable through off-site mitigation via the statutory net gain system, except those on a closed list. As part of the Placemaking Topic Paper for the area, Enfield Council commissioned external consultants to undertake a range of baseline studies, including ecology. There is no evidence that any of these habitats exists on the site, and as such the impact of developing the site on habitats is considered to be feasible to mitigate via restoration offsets, for example through Enfield Council's ambitious Landscape Recovery Project at Enfield Chase.	No	01852	Herts & Middlesex Wildlife Trust
SA10.2: Arnold House (66 Ridgeway) and land to the rear of 66 The Ridgeway (west)	Capel Manor College generally supports Policy PL10 and the Chase Park Placemaking Area (CPPA) allocation, recognizing its potential to enhance local development. The College owns land behind Arnold House at 66 The Ridgeway, which is now surplus and available for the CPPA. While the land is relatively small, it is crucial for linking The Ridgeway with the new development, facilitating integration with existing residential areas and improving access to amenities. However, the College questions the inclusion of Figure 3.12 in the Local Plan, as it may pre-empt the outcome of the more detailed comprehensive masterplan required by PL10. The College advocates for a detailed masterplan that aligns with the policy requirements, ensuring that planning is informed by a thorough and coordinated approach rather than relying on preliminary illustrative frameworks.	The Council is supportive of a masterplan, which would integrate strategic and detailed planning, supporting both housing and infrastructure delivery, and resolving the potential delays for the effective realization of Chase Park's development potential, ensuring that housing and infrastructure are aligned with Enfield's overall housing strategy and addressing the identified shortfalls and constraints.	No	01885	Capel Manor College
SA10.2: Arnold House (66 Ridgeway) and land to the rear of 66 The Ridgeway (west)	TfL does not consider the sites at Chase Park (PL10) SA10.1 – SA10.4, Crews Hill (PL11) SA11.1 – SA11.6, land opposite Enfield Crematorium (RUR.01), and land between Camlet Way and Crescent West, Hadley (RUR.02) suitable for housing. This is due to their poor transport connectivity and the high costs required to provide sustainable transport access comparable to urban sites in the borough. Developing these sites is likely to lead to car-dependent development, which is contrary to the Good Growth objectives of the London Plan and the NPPF.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA10.2: Arnold House (66 Ridgeway) and	TfL recommends that the design principles state any car parking must be minimised and aligned with the goal of achieving a 75% sustainable transport mode share. This requires parking to be significantly lower	Comments noted.	No	01891	Transport for London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
land to the rear of 66 The Ridgeway (west)	than London Plan maximum standards and should consider future PTAL rather than existing PTAL. Additionally, the infrastructure requirements should explicitly call for substantial contributions towards public transport to improve connectivity to a level comparable with urban placemaking areas in the borough.	The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.			
SA10.2: Arnold House (66 Ridgeway) and land to the rear of 66 The Ridgeway (west)	Geras Estates Limited and Hebe Developments Limited support Policy PL10 and the Chase Park Placemaking Area, specifically the SA10.2 allocation. They back the Draft Plan's housing strategy, which includes 33,280 new homes over the plan period, recognizing the need to release Green Belt land for development due to insufficient brownfield sites. They highlight their involvement with two key sites: Arnold House and Land to the Rear. Arnold House is a brownfield site with an imminent planning permission for a 95-bed care home, which they support as part of SA10.2. The Land to the Rear, currently Green Belt, is also backed for development, noting its accessibility and integration into the built-up area, despite its current SINC and TPO constraints. They agree with the plan's removal of this land from the Green Belt, seeing it as a logical extension for residential development. Overall, Geras and Hebe are committed to advancing both sites within the Chase Park Placemaking Area and seek to contribute to meeting Enfield's housing needs while adhering to the Draft Plan's vision.	Support noted.	No	01915	Geras Estates Limited and Hebe Developments Limited
SA10.2: Arnold House (66 Ridgeway) and land to the rear of 66 The Ridgeway (west)	Nicholas Holdings Ltd and the consortium of landowners for Site Allocation SA10.2 support the strategic approach of Policy SS1 in delivering the housing target for Enfield, particularly through the Chase Park urban extension (PL10). However, they argue that the land to the west of Arnold House within SA10.2 has not been adequately explored in the Reg 19 Local Plan and could contribute additional housing early in the plan period. They emphasize the need for a comprehensive and coordinated approach to development, including a west-to-east link from Chase Park through SA10.2 to The Ridgeway and Gordon Hill. The consortium of landowners should be more actively involved in discussions and the Chase Park developer forum, as they have not been included thus far. They also propose that Policy SS1 be amended to incorporate the opportunities identified in the Initial Concept Layout Document for SA10.2, to ensure the delivery of sustainable and well-integrated development.	Support noted. The suggested modifications are not needed to make the plan sound but further exploration of east - east connections will be made through the next phase of masterplanning.	No	01927	Nicholas Holdings Ltd and the consortium of landowners for Site Allocation SA10.2
SA10.2: Arnold House (66 Ridgeway) and land to the rear of 66 The Ridgeway (west)	Nicholas Holdings Ltd and the consortium of landowners for Site Allocation SA10.2 express concerns regarding Policy SS2, which mandates that all developments contribute positively to sustainable development and require masterplans, particularly for sites with multiple owners. They highlight that SA10.2 is crucial for linking Chase Park to The Ridgeway and Gordon Hill. However, the consortium has not been included in the Chase Park developer forums, which impedes achieving the necessary sustainable and green infrastructure links. They argue that without the consortium's involvement, the Council's	Support noted. The suggested modifications are not needed to make the plan sound but further exploration of east - east connections will be made through the next phase of masterplanning.	No	01927	Nicholas Holdings Ltd and the consortium of landowners for Site Allocation SA10.2

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA10.2: Arnold House (66 Ridgeway) and land to the rear of 66 The Ridgeway (west)	<p>strategy for creating sustainable places is unachievable and fails to meet NPPF sustainability requirements. They recommend that Policy SS2 be modified to specify how the consortium will be engaged to ensure effective delivery of these strategic sustainability links.</p> <p>Nicholas Holdings Ltd and the consortium of landowners for Site Allocation SA10.2 support the principle of Policy PL10 for Chase Park Placemaking Area (CPA), which aims to deliver around 3,700 new homes, with 2,550 expected by 2041 and the remainder beyond. They agree with the flexible housing approach but criticize the policy for not detailing how the proposed pedestrian, cycle, and vehicular link from SA10.2 to The Ridgeway will be delivered. The consortium, not yet involved in the CPA developer forums, argues that the Local Plan overlooks the potential for additional housing on the southern part of SA10.2, which could facilitate the required link and provide early housing delivery. They propose an infill development of approximately 100 dwellings, which would meet exceptional circumstances, enhance green infrastructure, and align with sustainability goals. They assert that without this inclusion, Policy PL10 fails to meet NPPF sustainability standards and is not a fully justified strategy for the urban extension.</p>	<p>Support noted.</p> <p>The suggested modifications are not needed to make the plan sound but further exploration of east - east connections will be made through the next phase of masterplanning.</p>	No	01927	Nicholas Holdings Ltd and the consortium of landowners for Site Allocation SA10.2
SA10.2: Arnold House (66 Ridgeway) and land to the rear of 66 The Ridgeway (west)	<p>Nicholas Holdings Ltd and the consortium of landowners for Site Allocation SA10.2 have raised concerns about Policy H1, which identifies housing development sites. They note a discrepancy between the estimated capacity of 3,600 homes mentioned in Policy H1 for the Chase Park urban extension (including SA10.2) and the 3,700 dwellings referred to in Policy PL10. Policy H1 lacks specific details on the number of dwellings allocated for SA10.2, particularly the potential additional capacity in the western part of the site. This potential, mentioned in Appendix C of the Reg 19 Local Plan, is not reflected in Policies H1, PL10, or the illustrative framework plan (Figure 3.12). The consortium argues that this inconsistency requires a more detailed policy to address housing delivery on the land west of Arnold House and to align with the overall development strategy.</p>	<p>The plan acknowledges that Policy PL10 refers to "around 3,700" homes for the Chase Park urban extension, which is a flexible figure intended to accommodate the large-scale and complex nature of the development. The estimated capacity of 3,600 homes identified in Policy H1 is consistent with this flexible approach and reflects the current understanding of development potential. Regarding the potential for additional development at the western part of SA10.2, including the area to the west of Arnold House, this is recognized as a possible future opportunity. The plan notes the potential for further residential capacity, which will be carefully reviewed in the forthcoming masterplanning phase. This approach ensures that any additional development is thoroughly considered, taking into account environmental constraints and sustainability requirements. The plan's consistency across policies and appendices is maintained, and the need for detailed policy amendments at this stage is not deemed necessary. The additional housing potential and the provision of a local centre will be addressed in subsequent stages of the masterplanning process, ensuring alignment with the overall development strategy and policy objectives.</p>	No	01927	Nicholas Holdings Ltd and the consortium of landowners for Site Allocation SA10.2

This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA10.3: Chase Park North East	Enfield Road Watch's response to the local plan highlights several concerns regarding the extension of Trent Country Park. They argue that Vicarage Farm already serves as an extension to the historic park, preserving its landscape setting and providing wildlife habitats. The creation of new viewpoints would replace valued rural views with urbanized landscapes. Additionally, they emphasize that the topography of site SA10.3 discourages active travel due to slopes and gradients, making it likely car-dependent and thus unsustainable.	Comments noted. While Enfield Road Watch raises valid points about the current role of Vicarage Farm in preserving the historic landscape and wildlife habitats, the proposed extension of Trent Country Park as outlined in the Chase Park Topic Paper aims to enhance these qualities further by integrating new parks and open spaces. The plan includes careful consideration of the area's topography, aiming to balance development with the preservation of key views and promoting sustainable travel options where feasible. Active travel routes are designed to mitigate the impact of slopes and gradients, ensuring that new developments contribute positively to the overall landscape and community connectivity.	No	01687	Enfield Road Watch
SA10.3: Chase Park North East	HCC's response notes that the development at Chase Park (PL10, SA10.1 – SA10.4) could generate similar issues to those identified for Crews Hill, such as ecological impact and increased visitor pressure. However, because Chase Park is located slightly further south, there may be fewer concerns regarding proximity impacts on Hertfordshire.	Comments noted. HCC's concerns regarding the ecological impact and increased visitor pressure from the Chase Park development are acknowledged. The Chase Park Topic Paper outlines Enfield's commitment to integrating Biodiversity Net Gain and thoughtful design to enhance ecological characteristics. Given Chase Park's location further south, the proximity impacts on Hertfordshire are expected to be fewer. Enfield is committed to mitigating recreational impacts through the Enfield Recreation Mitigation Strategy 2023. This strategy includes measures such as managing visitor access, enhancing green spaces, and providing alternative recreational opportunities to reduce pressure on sensitive areas. The forthcoming masterplan will detail Green Infrastructure proposals, ensuring ecological preservation and sustainable development. Enfield will continue to collaborate with stakeholders to address specific concerns and ensure alignment with national policies.	No	01755	Hertfordshire County Council - Ecology
SA10.3: Chase Park North East	The objection to the Chase Park (Vicarage Farm) development highlights concerns about limited public transport, increased traffic congestion, and significant harm to the area's character and countryside. The development would urbanize the Enfield Chase Area of Special Character, impacting the Trent Park Conservation Area and	Comments noted. The concerns raised about the Chase Park development proposal are acknowledged, particularly regarding public transport limitations, potential traffic congestion, and the impact on the area's character.	No	01779	Councillor Fallart

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	<p>historic landscape. It also notes the loss of green spaces that contribute to physical and mental health, as emphasized by Historic England. The proposal is deemed unsound and recommended for deletion from the draft plan.</p>	<p>Policy PL10 is supported by extensive evidence base, in particular the Chase Park Topic Paper which outlines extensive transport improvements, including new bus routes and cycle paths to enhance connectivity. The plan also incorporates significant green spaces, mitigating environmental impacts and preserving public amenities. These measures, aligned with the National Planning Policy Framework, ensure the development is sustainable, balancing growth with environmental and community needs. Further details can be found in the Chase Park Topic Paper.</p>			
SA10.3: Chase Park North East	<p>The Enfield Society raises concerns that new neighbourhoods in areas SA10.3 and SA10.4 are being planned with the assumption of a new bus route through the Country Park extension to meet the 400m maximum distance to a bus stop as required. They argue that proximity to a bus stop does not guarantee effective public transport access, particularly as details about the destinations and frequency of the proposed service are unclear. Additionally, any new service might require passengers to change buses at Chase Farm Hospital, raising doubts about the overall efficacy of the proposed public transport provision.</p>	<p>Comments noted.</p> <p>The Chase Park Topic Paper 2024 outlines that the proposed transport framework is illustrative and subject to detailed masterplanning. This ensures that any new public transport services, including bus routes, will be thoroughly planned to meet the required 400m maximum distance to a bus stop. Detailed masterplanning will address the specifics of bus stop locations, service destinations, and frequency to ensure effective and reliable public transport access for residents. This approach provides flexibility to adapt and refine plans based on further analysis and stakeholder input, ensuring that the public transport provisions will be practical and efficient.</p>	No	01794	Enfield Society
SA10.3: Chase Park North East	<p>The Enfield Society expresses concerns that the Chase Park development will negatively impact visual aesthetics, causing significant harm to the rural landscape's character, especially from key viewpoints like the London Loop at Cuckolds Hill. They also highlight the potential degradation of biodiversity within the SINC due to the introduction of playing fields and other infrastructure. Questions are raised about the suitability of high-density housing in this sensitive area, the feasibility of promoting active travel given the site's topography, and the practicality of integrating movement frameworks and sustainable transport links effectively.</p>	<p>Comments noted.</p> <p>The concerns raised by the Enfield Society about the visual and environmental impacts of the Chase Park development are addressed in the Chase Park Topic Paper 2024 and relevant placemaking materials. Careful design principles are incorporated to mitigate visual impacts, including maintaining significant green buffers and low-density development near sensitive areas. The creation of new public open spaces and viewpoints, such as the Hilltop View Park, is designed to enhance the visual experience and provide community benefits. Strategies to protect and enhance the Site of Importance for Nature Conservation (SINC) are included, aligning with NPPF guidelines. New woodland, grassland, and wetland habitats are planned to support biodiversity and provide natural buffers. Despite topographical challenges, the development plan promotes active travel and sustainable transport options. Enhanced cycling and walking routes, integrated with the wider area, aim to reduce car dependency and support the London Plan's sustainable transport targets. The development emphasizes creating a cohesive community with integrated movement frameworks, connecting new and existing neighbourhoods while preserving the area's character and heritage. This balanced approach ensures that development aligns with broader strategic goals and community needs.</p>	No	01794	Enfield Society

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA10.3: Chase Park North East	The Barnet Society objects to any erosion of the Green Belt, particularly the loss of the green buffer between Barnet and Enfield. This buffer is crucial for maintaining the distinct identities of Barnet, Hadley, Cockfosters, and Enfield Town, preventing their merge into a single suburban area. These countryside areas, especially north and south of Hadley Road and Enfield Road, are vital for preserving the character and separation of these communities.	Comments noted. The Enfield Local Plan includes a comprehensive assessment of "exceptional circumstances" required for Green Belt alterations. These circumstances are detailed in the Exceptional Circumstances Topic Paper. The Plan aims to balance development needs with the preservation of essential green spaces, ensuring any changes are justified and beneficial to the wider community.	No	01817	Barnet Society
SA10.3: Chase Park North East	Policy PL10 should be deleted from the plan.	Enfield's Site Allocation Topic Paper sets out the process which was used to select sites. This states that Stage 3b considered non-absolute constraints including Ecology. Biodiversity net gain will ensure that any planning permission that comes forward on sites follows the mitigation hierarchy and provides a statutory net gain to biodiversity. Enfield is targeting an ambitious 20% net gain with its Local Plan to further ensure that biodiversity in the borough is safeguarded, and any impacts appropriately mitigated. Under the statutory biodiversity metric, all habitats are considered replaceable through off-site mitigation via the statutory net gain system, except those on a closed list. As part of the Placemaking Topic Paper for the area, Enfield Council commissioned external consultants to undertake a range of baseline studies, including ecology. There is no evidence that any of these habitats exists on the site, and as such the impact of developing the site on habitats is considered to be feasible to mitigate via restoration offsets, for example through Enfield Council's ambitious Landscape Recovery Project at Enfield Chase.	No	01852	Herts & Middlesex Wildlife Trust
SA10.3: Chase Park North East	TfL does not consider the sites at Chase Park (PL10) SA10.1 – SA10.4, Crews Hill (PL11) SA11.1 – SA11.6, land opposite Enfield Crematorium (RUR.01), and land between Camlet Way and Crescent West, Hadley (RUR.02) suitable for housing. This is due to their poor transport connectivity and the high costs required to provide sustainable transport access comparable to urban sites in the borough. Developing these sites is likely to lead to car-dependent development, which is contrary to the Good Growth objectives of the London Plan and the NPPF.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA10.3: Chase Park North East	TfL recommends that the design principles state any car parking must be minimised and consistent with the ambition of achieving a 75% sustainable transport mode share, requiring substantially lower parking levels than London Plan maximum standards and considering future PTAL rather than existing PTAL. Despite the reference to a primary street suitable for buses in the design principles, the infrastructure requirements should explicitly call for substantial contributions towards public transport to improve connectivity to a level comparable with urban placemaking areas in the borough. Additionally, a costed and agreed Infrastructure Delivery Plan should be submitted to outline the full package of transport infrastructure for all Chase Park sites. TfL is	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	concerned that dividing the Chase Park placemaking area into four separate site allocations could lead to parts being developed before agreeing on the necessary infrastructure requirements and costs for the entire area.				
SA10.3: Chase Park North East	FZ2, FZ3 and FZ3b. EA recommend that any prospective development that comes forward undertakes new modelling to fully understand the flood risks on site.	FZ2, FZ3 and FZ3b. EA recommend that any prospective development that comes forward undertakes new modelling to fully understand the flood risks on site.	No	01926	Environment Agency
SA10.3: Chase Park North East	The Federation of Enfield Residents & Allied Associations, represented by Peter Gibbs, raised several significant concerns about the Enfield Local Plan, particularly regarding Policies PL10 and PL11, for Policy PL10: They argue that the development proposal for the A110 is invalid due to its ribbon development approach, which is not supported by the NPPF. This infill between distinct communities would compromise Trent Country Park's ecological value and rural quality. They also express concerns about the influence of Comer, a major developer, which might lead to aggressive development strategies that harm local living conditions. The proposed site is constrained by the A110 road, which cannot handle increased traffic from the new development, affecting quality of life and transport infrastructure. They also criticize the plan for not addressing the high density and inadequate infrastructure, including poor transport links and lack of local employment opportunities, which would exacerbate commuting issues and detract from the area's overall quality of life. In both cases, the Federation asserts that the plans should be revised or deleted to ensure they meet legal and planning soundness requirements.	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. The A110 development aligns with the Enfield Local Plan's overall spatial strategy, which aims to accommodate necessary housing growth while maintaining a balance with environmental and infrastructural considerations. The plan acknowledges the potential impacts on Trent Country Park but includes comprehensive mitigation strategies to protect and enhance the park's ecological value and recreational use. This approach is in line with the spatial strategy's emphasis on sustainable growth and protecting green spaces. The plan includes provisions for upgrading the A110 and associated transport links to support increased traffic and mitigate congestion. The intention is to improve road capacity and enhance public transport connections, addressing concerns about the current limitations of the A110. These improvements are designed to integrate with the broader transport strategy, which includes enhancements to local bus services and potential future rail improvements. The inclusion of the site and site allocations in the Local Plan are based on a rigorous evaluation of potential benefits and challenges. The developer, Comer Homes and others, is required to adhere to strict quality standards and community engagement processes, ensuring that the development meets high standards and addresses local needs. The plan aims to deliver a balanced mix of housing types, including family homes, and incorporates community amenities to support a vibrant, sustainable neighbourhood. In summary, the Enfield Local Plan's policies are designed to address the Federation's concerns by incorporating robust mitigation measures, infrastructure enhancements, and community-focused strategies to balance housing needs with environmental protection and quality of life considerations.	No	03273	Federation of Enfield Residents & Allied Associations

SA10.4: Chase Park North West	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA10.4: Chase Park North West	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA10.4: Chase Park North West	Enfield Road Watch acknowledges the proposed extension of Trent Country Park but argues that Vicarage Farm already serves this purpose by preserving the historic landscape and wildlife habitats. They express concerns over the loss of valued views and the impact of urbanization on undulating farmland. They highlight that the topography of SA10.3 discourages active travel, making it likely car-dominated and unsustainable. They also criticize the potential replacement of Trent Park Equestrian Centre with Vicarage Farm, questioning its viability and accessibility.	Comments noted. The Council recognizes the value of Vicarage Farm and its role in extending the historic landscape of Trent Country Park. However, the Chase Park Topic Paper emphasizes that the proposed development aims to enhance green infrastructure and recreational opportunities, creating high-quality parks and open spaces. The development will include measures to protect and enhance the ecological value of the area, addressing concerns about urbanization and loss of views. Additionally, active travel routes and public transport improvements are planned to ensure sustainability and reduce car dependency.	No	01687	Enfield Road Watch
SA10.4: Chase Park North West	HCC's response notes that the development at Chase Park (PL10, SA10.1 – SA10.4) could generate similar issues to those identified for Crews Hill, such as ecological impact and increased visitor pressure. However, because Chase Park is located slightly further south, there may be fewer concerns regarding proximity impacts on Hertfordshire.	Comments noted. HCC's concerns regarding the ecological impact and increased visitor pressure from the Chase Park development are acknowledged. The Chase Park Topic Paper outlines Enfield's commitment to integrating Biodiversity Net Gain and thoughtful design to enhance ecological characteristics. Given Chase Park's location further south, the proximity impacts on Hertfordshire are expected to be fewer. Enfield is committed to mitigating recreational impacts through the Enfield Recreation Mitigation Strategy 2023. This strategy includes measures such as managing visitor access, enhancing green spaces, and providing alternative recreational opportunities to reduce pressure on sensitive areas. The forthcoming masterplan will detail Green Infrastructure proposals, ensuring ecological preservation and sustainable development. SA10.4: Chase Park North West	<p>The Enfield Society raises concerns about the visual impact of the Chase Park development, stating it would be clearly visible from key viewpoints and harm the area's rural character. They argue that the proposed country park does not compensate for the loss of historic landscapes and would not preserve the scenic quality of Merryhills Way. The Society also highlights that the development would degrade important ecological areas and questions the feasibility of integrating sustainable transport and active travel due to the site's topography and configuration. They suggest that a broader extension of the country park would be more effective.</p>	<p>Comments noted.</p> <p>The concerns raised by the Enfield Society about the visual and environmental impacts of the Chase Park development are comprehensively justified in the Chase Park Topic Paper 2024 and relevant placemaking documents. Careful design principles are included to mitigate visual impacts and preserve the rural landscape's character. Strategic green infrastructure, such as the creation of new woodland, grassland, and wetland habitats, aims to integrate the development seamlessly into the existing landscape. PL10 seeks to retain significant green buffers and open spaces ensures that key views and the scenic quality of the area are maintained. The planned Hilltop View Park and other public open spaces will provide new opportunities for residents to enjoy nature, enhancing the overall visual experience. PL10 prioritizes the protection and enhancement of ecological areas, aligning with national policy and the London Plan. New wildlife corridors and habitat creation will support biodiversity and maintain the ecological integrity of the Site of Importance for Nature Conservation (SINC). These measures ensure that the development does not compromise the area's ecological value. Despite the site's topographical challenges, the development promotes sustainable transport options, including enhanced cycling and walking routes. These improvements are designed to reduce car dependency and support the London Plan's sustainable transport targets. The integrated movement framework connects new and existing neighbourhoods, providing safe and efficient routes for active travel. The development plan emphasizes community engagement and phased implementation, allowing for continuous assessment and adjustment based on real-time data and feedback. This adaptive approach ensures that the project remains responsive to local needs and concerns. Additionally, the plan includes measures to protect and enhance heritage assets, ensuring that the historic character of the area is preserved. SA10.4: Chase Park North West	Residents object to the plan due to the anticipated loss of the Equestrian Centre, which they consider a valuable local asset providing recreational opportunities for young people and preserving the area's rural character. They are concerned about job losses related to the Equestrian Centre and connected industries. Additionally, they fear the development will lead to increased traffic on Enfield Road and result in higher pollution levels, negatively impacting the local environment and quality of life.	balance housing needs with environmental protection and quality of life considerations. The Chase Park Topic Paper (2024), the Council has carefully considered the balance between development and the preservation of valuable community assets. The proposed allocation aims to integrate green spaces and retain the rural essence of the area as much as possible. While the Equestrian Centre's closure is a significant change, the development plan includes provisions for new community amenities and recreational spaces, potentially offering new job opportunities and retaining the area's recreational appeal. Traffic and pollution concerns are addressed with plans for sustainable transport options and infrastructure improvements to mitigate negative impacts on Enfield Road. The overall strategy is to ensure that the development supports sustainable growth while enhancing the quality of life for residents.	No	01505	Nigel Malleson
SA10.4: Chase Park North West	Comments received from residents/businesses are contained in Table B.31_6: SP PL10: Chase Park and SA10.4: Chase Park North West				
C1: Housing and Mixed use Allocations – Crews Hill					
SA11.1: Land at Crews Hill	The Edmonton and Winchmore Hill Conservative Association objects to the proposal for 5,500 homes on the Crews Hill Green Belt site, citing concerns about the capacity of local transport infrastructure, particularly the already overburdened Herford Loop line. The potential increase in commuter demand could exacerbate congestion on peak services, impacting stations further along the line such as Grange Park and Winchmore Hill. Additionally, they highlight potential adverse effects on local Sites of Importance for Nature Conservation, views from the Ridgeway, and the rural character of nearby landmarks and businesses. They argue that these issues undermine the soundness of the plan, suggesting it should be reconsidered.	The Enfield Local Plan's spatial strategy and site allocation papers emphasize the importance of integrating significant residential developments with transport infrastructure and environmental considerations. Transport Capacity: The plan acknowledges the current strain on the Herford Loop line but outlines strategies for improving rail capacity and connectivity to mitigate potential impacts. This includes coordination with transport providers to explore enhancements and better integrate new developments with existing transport infrastructure, ensuring that increased commuter demand does not overwhelm the system. Environmental Impact: The Crews Hill Topic Paper highlights that the development will incorporate measures to protect local Sites of Importance for Nature Conservation, views from the Ridgeway, and the rural character of surrounding areas. Mitigation strategies, such as preserving key green spaces and integrating natural features into the development, aim to balance housing needs with environmental preservation. Local Services and Amenities: The plan recognizes the need to maintain and potentially enhance local services and amenities, including garden centres and businesses, by integrating these considerations into the development framework to prevent adverse impacts on existing community assets. Overall, the Enfield Local Plan addresses these concerns by aligning development with strategic infrastructure improvements and environmental safeguards, aiming to ensure that the proposed	No	01784	Edmonton and Winchmore Hill Conservative Association

SA11.1: Land at Crews Hill	<p>The Federation of Enfield Residents & Allied Associations, represented by Peter Gibbs, raised several significant concerns about the Enfield Local Plan, particularly regarding Policies PL10 and PL11 - for Policy PL11: They contend that the Crews Hill development plan, which proposes several thousand residential units, conflicts with the NPPF's quality-of-life objectives. The plan is criticized for not addressing the site's Green Belt status and the potential loss of valued horticultural enterprises and leisure facilities. The site's road access and infrastructure are deemed insufficient for the proposed scale of development, exacerbating existing congestion issues and pollution concerns. They argue that the plan fails to address the quality of living issues and does not provide a feasible solution for local employment or transportation, which would result in a commuter-centric development without adequate local amenities. In both cases, the Federation asserts that the plans should be revised or deleted to ensure they meet legal and planning soundness requirements.</p>	<p>development at Crews Hill is sustainable and beneficial for the community.</p> <p>The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. The Crews Hill proposal carefully considers the Green Belt status and includes provisions for maintaining essential green spaces while allowing for necessary housing development. The Local Plan emphasizes the protection of Green Belt land and includes measures to minimize impact, such as maintaining buffers and enhancing surrounding green areas. The proposal reflects the plan's strategic need to balance housing demand with environmental preservation.</p> <p>Infrastructure and Employment: The development plan includes comprehensive infrastructure improvements, including road upgrades and enhanced public transport options. Although the site is currently constrained by limited road access, the Local Plan outlines specific measures to address these constraints, including potential upgrades to local roads and connections to the M25. The plan also seeks to integrate local employment opportunities by retaining some existing commercial uses and encouraging new business ventures in the area.</p> <p>The plan acknowledges the value of existing horticultural businesses and includes strategies to support their continued operation where possible. The impact on local businesses and the environment is being managed through detailed planning and consultation processes, ensuring that the development aligns with the Local Plan's goals for sustainable growth and quality of life improvements. In summary, the Enfield Local Plan's policies are designed to address the Federation's concerns by incorporating robust mitigation measures, infrastructure enhancements, and community-focused strategies to balance housing needs with environmental protection and quality of life considerations.</p>	No	03272	Federation of Enfield Residents & Allied Associations
SA11.1: Land at Crews Hill	<p>Berkeley Homes supports the allocation of land at Crews Hill for residential-led mixed-use development under Strategic Policy PL11, acknowledging the plan's aim to create a sustainable new settlement centered around the existing train station. Berkeley owns several land parcels within this area, including the Owls Hall Estate, which is also covered by Site Allocation SA11.1. Berkeley generally agrees with the allocation policy for SA11.1 but suggests modifications to better reflect the development's feasibility and to align with the Local Plan's broader objectives. Key points include: 1) Housing Capacity: Berkeley proposes adjusting the estimated housing capacity for SA11.1 from 800 to approximately 650 homes, based on their assessments of site constraints and infrastructure needs. 2) Infrastructure Requirements: Berkeley supports the need for a comprehensive infrastructure plan</p>	<p>The Council welcomes Berkeley Homes' support for the allocation of land at Crews Hill and appreciates their commitment to the strategic aims of Policy PL11. We are encouraged by their constructive feedback on Site Allocation SA11.1 and value their detailed analysis. The Council acknowledges Berkeley's suggestion to modify the estimated housing capacity for SA11.1. While we understand the rationale behind this suggestion, our recent work on spatial frameworks indicates that the current capacity estimate is achievable. Further masterplanning will refine these estimates and ensure they are aligned with the site's constraints and opportunities. Detailed proposals, to be submitted with planning applications, will be assessed based on comprehensive supporting work, so we believe that a modification at this stage is not necessary to ensure the plan's</p>	No	03273	Berkeley Homes (North East London) Ltd

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	<p>but argues against overly prescriptive requirements at this stage. Specifically, they challenge the necessity of a new public transport bridge and a primary school as mandated by the current policy. Berkeley believes that these infrastructure elements should be determined through detailed masterplanning rather than being set in the allocation policy. Policy Modifications: 1) Housing Capacity: Update the policy to reflect the revised estimate of 650 homes for clarity. 2) Infrastructure Flexibility: Amend the policy to ensure that infrastructure provisions, such as the bridge and school, are flexible and determined in subsequent planning stages rather than being fixed at this stage. 3) Masterplan Framework: Ensure that detailed infrastructure requirements are addressed through the masterplan framework (SPD) rather than being pre-emptively set in the allocation policy. Berkeley emphasizes that these changes are intended to make the policy more practical and aligned with ongoing planning processes, without altering the overall soundness of the Crews Hill Placemaking Area. They advocate for continued collaboration to develop a Statement of Common Ground (SoCG) to address these issues and refine the Local Plan.</p>	<p>soundness. Regarding the suggested changes to infrastructure requirements, the Council maintains that the existing plan adequately addresses these needs. The Local Plan outlines that additional infrastructure work will be undertaken through a subsequent SPD or similar framework. This approach allows for detailed assessment and refinement of infrastructure needs, ensuring that the development is supported effectively. As such, we believe that the proposed modifications to infrastructure requirements are not required to make the plan sound. The Council is committed to working with Berkeley Homes and other stakeholders on a Statement of Common Ground (SoCG) to address any outstanding issues and further refine the plan. This collaborative approach will help ensure that the development of Crews Hill meets both current and future needs.</p>			
SA11.1: Land at Crews Hill	<p>Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.</p>	<p>Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.</p>	No	01681	Thames Water
SA11.1: Land at Crews Hill	<p>Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.</p>	<p>Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.</p>	No	01681	Thames Water
SA11.1: Land at Crews Hill	<p>Enfield Road Watch raises concerns about the Local Plan regarding Land North of Cattlegate Road, questioning the feasibility and viability of a new road bridge over the railway and arguing that even with bus access, the potential for sustainable transport is poor. They state that existing trees and buffers are inadequate to preserve the countryside setting and that the development would significantly urbanize the</p>	<p>Comments noted. The Council has outlined a detailed approach in the Crews Hill Topic Paper to address transport and heritage concerns, including provisions for sustainable transport and careful heritage impact assessments. The spatial framework for Crews Hill is illustrative, providing a flexible guide for development. Additionally, the Integrated Impact Assessment</p>	No	01687	Enfield Road Watch

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	<p>countryside. They also note that heritage impacts on the Grade II listed Owls Hall have not been clearly assessed.</p>	<p>(IIA) supports the viability and feasibility of infrastructure improvements, ensuring thorough evaluation of potential impacts and alignment with strategic goals. The Council has also committed to preparing a Supplementary Planning Document (SPD) for the Crews Hill area to ensure detailed planning and implementation. Further details on viability assessments can be found in the Council's evidence base, which demonstrates the plan's economic soundness and feasibility.</p>			
SA11.1: Land at Crews Hill	<p>HCC's response highlights that the site contains areas of the main river Turkey Brook, which drains areas of Hertfordshire. Any new outfalls must restrict discharge rates and volumes to greenfield levels to ensure upstream areas in Hertfordshire can drain effectively. The site also includes areas within Flood Zone 2 and 3, and HCC recommends consulting the Environment Agency on any proposals for this site.</p>	<p>Comments noted.</p> <p>The Council will ensure early engagement between Enfield LLFA and developers to address these recommendations. The Council will seek to address these concerns through a Statement of Common Ground (SoCG) with Hertfordshire County Council and the Environment Agency.</p>	No	01755	Hertfordshire County Council as Lead Local Flood Authority (LLFA)
SA11.1: Land at Crews Hill	<p>HCC views the PL11 (SA11.1 – SA11.6) Crews Hill development as having a slightly negative ecological impact on Hertfordshire, reducing habitat extent and connectivity. The mixed-use area will shift from agriculture, development, and leisure to potentially enhance some ecological features through Biodiversity Net Gain initiatives. Although the current land lacks substantial ecological interest, indirect impacts like increased visitor pressure on local wildlife sites and reserves are uncertain. The extent of these impacts depends on the Green Infrastructure proposals for Crews Hill within Enfield, which are currently unknown.</p>	<p>Comments noted.</p> <p>The Crews Hill Topic Paper and supporting evidence emphasize Enfield's commitment to integrating Biodiversity Net Gain initiatives and thoughtful design into the Crews Hill development. The development is designed to enhance ecological characteristics, and a forthcoming Supplementary Planning Document (SPD) will address Green Infrastructure (GI) proposals, ensuring a balanced approach to ecological preservation and development. Additionally, early engagement between Enfield's Local Lead Flood Authority (LLFA) and developers is planned to manage ecological impacts effectively. The council will also prepare a Statement of Common Ground with HCC and the Environment Agency to address specific concerns and ensure adherence to national policy and best practices. This collaborative approach aims to mitigate potential negative impacts and optimize ecological benefits for both Enfield and Hertfordshire.</p>	No	01755	Hertfordshire County Council - Ecology
SA11.1: Land at Crews Hill	<p>The Enfield Society is concerned that the proposed 800 homes at the site near Crews Hill will harm the historic and natural landscape. They argue it will suburbanize Owls Hall, a Grade II listed asset, causing substantial harm to its setting. The development breaches the boundary provided by the railway line and extends into open countryside, negatively impacting the scenic quality, tranquility, and sense of remoteness of Enfield Chase. ENPlan's assessment highlights the significant adverse visual effects and landscape harm this development would cause, suggesting the area should remain undeveloped to preserve its openness.</p>	<p>Comments noted.</p> <p>The proposed development of 800 homes in the site allocation aligns with strategic goals to enhance local infrastructure and provide significant housing. This site aims to utilize the area's capacity for growth while maintaining sustainable development principles. The planning framework includes detailed assessments to mitigate environmental impacts, emphasizing the integration of green infrastructure and preserving natural landscapes. Measures to protect heritage assets, such as Owls Hall, and the implementation of visual impact assessments ensure that the development respects and enhances the existing character of the area.</p>	No	01794	Enfield Society

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.1: Land at Crews Hill	The Barnet Society supports concentrating new development around Crews Hill Station and retaining the area's horticultural and food-producing industries. However, they express strong reservations about the commercial viability of Crews Hill's businesses due to rising land values and traffic congestion. They request a commitment in the Plan to protect these businesses. Additionally, they stress the need for significant rail, road, and other transport improvements to accompany any development, noting a lack of detailed proposals for Crews Hill in Enfield's Strategic Policies T1, T2, and T3.	Comments noted. The Council recognizes the importance of maintaining Crews Hill's horticultural and food-producing industries and aims to address commercial viability concerns through comprehensive planning and support. The council's Strategic Policies T1, T2, and T3 are designed to address transportation improvements, with specific enhancements to Crews Hill's infrastructure being developed in alignment with the overall strategic growth objectives. The detailed transport proposals will ensure that the area can support new developments while maintaining its commercial and environmental integrity.	No	01817	Barnet Society
SA11.1: Land at Crews Hill	TfL does not consider the sites at Chase Park (PL10) SA10.1 – SA10.4, Crews Hill (PL11) SA11.1 – SA11.6, land opposite Enfield Crematorium (RUR.01), and land between Camlet Way and Crescent West, Hadley (RUR.02) suitable for housing. This is due to their poor transport connectivity and the high costs required to provide sustainable transport access comparable to urban sites in the borough. Developing these sites is likely to lead to car-dependent development, which is contrary to the Good Growth objectives of the London Plan and the NPPF.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA11.1: Land at Crews Hill	TfL recommends that the requirements state any car parking must be minimized and align with the ambition of achieving a 75% sustainable transport mode share, requiring parking levels substantially lower than London Plan maximum standards and considering future rather than existing PTAL. While there is a requirement for a public transport bridge over the railway, the infrastructure requirements should also explicitly call for substantial contributions towards public transport to improve connectivity to a level comparable with urban placemaking areas in the borough. TfL notes the absence of a reference to development being within 400 meters of a bus stop, which is included in the design principles for SA11.1 and SA11.3. A costed and agreed Infrastructure Delivery Plan should be submitted to outline the full package of transport infrastructure for all Crews Hill sites. TfL is concerned that dividing the Crews Hill placemaking area into six separate site allocations could lead to parts being developed before agreeing on the necessary infrastructure requirements and costs for the entire area.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA11.1: Land at Crews Hill	Lea Valley Growers Association object to the loss of popular garden centers and supporting businesses in Crews Hill for housing development. They advocate enhancing horticultural activities to make it a hub for food and plant production. They argue that Enfield's housing targets can be met on brownfield sites, as evidenced in the "Space to Build" report, which identifies locations for 37,000 homes. They emphasize the Green Belt's value for environmental, ecological,	Comments noted. The Council's strategy is justified. The plan's target of 1,246 net new homes a year us considered the minimum required. The plan sets out general presumption of brownfield first approach to delivering sustainable growth by focusing development within growth areas, district town centres and around transport hubs. Plan is supported by the Infrastructure Delivery Plan (IDP) which identifies Enfield's	No	01910	Lea Valley Growers Association

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	<p>economic, and public health reasons, urging the Council to protect it in line with the London Plan and NPPF.</p>	<p>infrastructure needs comprehensively. The Enfield Exceptional Circumstances Topic Paper outlines the justification for releasing Green Belt land to meet Enfield's housing and employment needs. It evaluates the balance between development requirements and Green Belt protection, ensuring alignment with national and regional policies like the NPPF and London Plan. The paper details the specific circumstances under which Green Belt boundaries may be adjusted, emphasizing the necessity of sustainable development while maintaining the Green Belt's primary functions, such as preventing urban sprawl and preserving open space.</p>			
SA11.1: Land at Crews Hill	<p>Overall, Taylor Wimpey is supportive of the strategic allocation at Crews Hill but raises concerns about the clarity of housing targets, the practicality of masterplanning, and infrastructure planning. Taylor Wimpey's concerns regarding Policy SS1 are as follows, 1) Housing Delivery Test: Enfield is currently failing the Housing Delivery Test, achieving only 73% of the required homes, which triggers the 'tilted balance' as per the NPPF. This necessitates a 20% buffer for land supply due to underdelivery. 2) Housing Shortfall: The Council's housing delivery has been insufficient, with a shortfall of 3,738 homes and an end-loaded delivery trajectory. There is concern over Enfield's ability to meet housing targets due to constraints and delays in large site developments. 3) Inconsistent Targets: There is inconsistency in the housing requirement figures across various documents. Policy SS1 and the Housing Topic Paper show differing targets and available land supply figures, creating confusion over the precise housing need. 4) Exceptional Circumstances: Taylor Wimpey supports the release of Green Belt land, including the Crews Hill site, citing exceptional circumstances such as high housing and employment needs, and the demand for affordable and family housing. 5) Masterplanning Requirements: Part 12 of SS1 requires a masterplan or Supplementary Planning Document (SPD) for new developments like Crews Hill. There are concerns about potential delays if stakeholder engagement and SPD preparation are not timely and coordinated with the Local Plan. 6) Infrastructure Delivery: There is a need for a detailed Infrastructure Delivery Plan to ensure fair distribution of infrastructure costs across sites. The current policy may lead to disproportionate costs for early developments if not properly managed.</p>	<p>The Local Plan acknowledges the shortfall in housing delivery. The stepped trajectory approach accounts for the phasing of large sites and is intended to align with realistic delivery timescales. This approach is supported by the evidence in the Housing Topic Paper, which includes a detailed assessment of housing needs and delivery constraints. The variation in housing figures reflects the complexities of different planning contexts and stages of planning. The Enfield Housing Topic Paper (2024, Table 4) provides a revised target of approximately 34,280 homes, aligning with a detailed assessment of housing need and supply. This figure takes into account both the immediate and long-term housing requirements and is supported by evidence from the Housing Topic Paper and the Enfield Infrastructure Planning evidence base. The justification for Green Belt release is well-documented in the Exceptional Circumstances Topic Paper. The release is necessary to address substantial housing and employment needs, the demand for affordable and family housing, and limitations on urban capacity (Exceptional Circumstances Topic Paper, p. 12). The evidence indicates that relying solely on urban sites would not meet the borough's needs and could impact critical industries in Enfield. The requirement for a masterplan or Supplementary Planning Document (SPD) for strategic areas like Crews Hill ensures comprehensive planning and stakeholder engagement. The Crews Hill Topic Paper (2024, p. 15) emphasizes the importance of preparing these documents concurrently with the Local Plan to prevent delays. The Council is committed to working collaboratively with stakeholders to address detailed design and planning requirements. The Infrastructure Delivery Plan (IDP) outlines the framework for identifying, justifying, and funding infrastructure needs (Enfield Infrastructure Planning). This includes assessing infrastructure costs and ensuring that they are fairly apportioned across sites. The IDP supports the Local Plan by detailing the necessary infrastructure to support new development and ensuring that costs are not disproportionately borne by early-developing sites. While we appreciate Taylor Wimpey's concerns, the Local Plan's approach to housing delivery, Green Belt release, and infrastructure planning is designed to meet the borough's needs effectively and align with national policies. The Plan is supported by robust evidence from the</p>	No	01919	Taylor Wimpey

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.1: Land at Crews Hill	Taylor Wimpey supports the vision for Crews Hill under Policy PL11, which includes developing around 5,583 new homes and enhancing local services. However, they are concerned about the lack of clear timescales for adopting the Supplementary Planning Document (SPD) and Infrastructure Delivery Plan (IDP), which could lead to delays in delivering the allocated homes and coordinating development across the Crews Hill Placemaking Area. They stress that timely adoption of these documents is crucial to ensure that the development progresses as planned and meets the housing targets within the plan period.	Enfield Infrastructure Planning documents and aligns with strategic objectives to deliver sustainable growth. Comments noted. The Council appreciates Taylor Wimpey's support for the vision of Crews Hill as outlined in Policy PL11, including the provision of approximately 5,583 new homes and enhanced local services. The Council acknowledges the concern regarding the timing of the Supplementary Planning Document (SPD) and is committed to expediting the preparation of the SPD to ensure effective coordination of development and timely delivery of infrastructure. The SPD will be prepared alongside the Local Plan process to provide a comprehensive framework for the development, and the IDP will be updated to reflect the latest evidence and requirements. The Council recognizes the importance of these documents in facilitating the successful implementation of the policy, with the aim is to provide certainty for developers and stakeholders and to support the delivery of the planned homes within the anticipated timeframe.	No	01919	Taylor Wimpey
SA11.1: Land at Crews Hill	Taylor Wimpey supports the split of Site Allocation SA11 into separate allocations (1-6) and the associated housing targets and infrastructure requirements. However, they emphasize the need for the Supplementary Planning Document (SPD) and Infrastructure Delivery Plan (IDP) to be available for consultation as part of the Local Plan process. They stress that new local infrastructure must support the new settlement, with contributions proportional to the impact of development. Contributions should be evenly distributed across the Site Allocation rather than disproportionately affecting the initial sites. An IDP should be prepared alongside the Local Plan to ensure infrastructure needs and costs are properly assessed and justified during the Examination in Public.	Comments noted. The Council appreciates Taylor Wimpey's support for the split of the site allocations at Crews Hill as outlined in Policy PL11. The Council acknowledges the concern regarding the timing of the Supplementary Planning Document (SPD) and is committed to expediting the preparation of the SPD to ensure effective coordination of development and timely delivery of infrastructure. The SPD will be prepared alongside the Local Plan process to provide a comprehensive framework for the development, and the IDP will be updated to reflect the latest evidence and requirements. The Council recognizes the importance of these documents in facilitating the successful implementation of the policy, with the aim is to provide certainty for developers and stakeholders and to support the delivery of the planned homes within the anticipated timeframe. However, they express strong reservations about the commercial viability of Crews Hill's businesses due to rising land values and traffic congestion. They request a commitment in the Plan to protect these businesses. Additionally, they stress the need for significant rail, road, and other transport improvements to accompany any development, noting a lack of detailed proposals for Crews Hill in Enfield's Strategic Policies T1, T2, and T3.</p>	<p>extensive public consultation and evidence-based assessments to mitigate potential impacts, ensuring that any development enhances rather than detracts from the area's historic and natural value.</p> <p>Comments noted.</p> <p>The Council recognizes the importance of maintaining Crews Hill's horticultural and food-producing industries and aims to address commercial viability concerns through comprehensive planning and support. The council's Strategic Policies T1, T2, and T3 are designed to address transportation improvements, with specific enhancements to Crews Hill's infrastructure being developed in alignment with the overall strategic growth objectives. The detailed transport proposals will ensure that the area can support new developments while maintaining its commercial and environmental integrity.</p>	No	01817	Barnet Society
SA11.2: Land South of Cattlegate Road, Crews Hill	<p>TfL does not consider the sites at Chase Park (PL10) SA10.1 – SA10.4, Crews Hill (PL11) SA11.1 – SA11.6, land opposite Enfield Crematorium (RUR.01), and land between Camlet Way and Crescent West, Hadley (RUR.02) suitable for housing. This is due to their poor transport connectivity and the high costs required to provide sustainable transport access comparable to urban sites in the borough. Developing these sites is likely to lead to car-dependent development, which is contrary to the Good Growth objectives of the London Plan and the NPPF.</p>	<p>Comments noted.</p> <p>The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01891	Transport for London
SA11.2: Land South of Cattlegate Road, Crews Hill	<p>TfL recommends that the requirements state any car parking must be minimized and align with the ambition of achieving a 75% sustainable transport mode share, requiring parking levels substantially lower than London Plan maximum standards and considering future rather than existing PTAL. While there is a requirement for a public transport bridge over the railway, the infrastructure requirements should also explicitly call for substantial contributions towards public transport to improve connectivity to a level comparable with urban placemaking areas in the borough. TfL prefers the wording that development should limit areas within 400 meters of a bus stop, rather than just locating development within 400 meters of a bus stop, as stated in SA11.1. A costed and agreed Infrastructure Delivery Plan should be submitted to outline the full package of transport infrastructure for all Crews Hill sites. TfL is concerned that dividing the Crews Hill placemaking area into six separate site allocations could lead to parts being developed before agreeing on the necessary infrastructure requirements and costs for the entire area.</p>	<p>Comments noted.</p> <p>The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01891	Transport for London
SA11.2: Land South of Cattlegate Road, Crews Hill	<p>Lea Valley Growers Association object to the loss of popular garden centres and supporting businesses in Crews Hill for housing development. They advocate enhancing horticultural activities to make it a hub for food and plant production. They argue that Enfield's</p>	<p>Comments noted. The Council's strategy is justified. The plan's target of 1,246 net new homes a year is considered the minimum required. The plan sets out general presumption of brownfield first approach to delivering sustainable growth by focusing development within growth</p>	No	01910	Lea Valley Growers Association

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
Road, Crews Hill	housing targets can be met on brownfield sites, as evidenced in the "Space to Build" report, which identifies locations for 37,000 homes. They emphasize the Green Belt's value for environmental, ecological, economic, and public health reasons, urging the Council to protect it in line with the London Plan and NPPF.	areas, district town centres and around transport hubs. Plan is supported by the Infrastructure Delivery Plan (IDP) which identifies Enfield's infrastructure needs comprehensively. The Enfield Exceptional Circumstances Topic Paper outlines the justification for releasing Green Belt land to meet Enfield's housing and employment needs. It evaluates the balance between development requirements and Green Belt protection, ensuring alignment with national and regional policies like the NPPF and London Plan. The paper details the specific circumstances under which Green Belt boundaries may be adjusted, emphasizing the necessity of sustainable development while maintaining the Green Belt's primary functions, such as preventing urban sprawl and preserving open space.			
SA11.2: Land South of Cattlegate Road, Crews Hill	FZ1. Appendix C (page 449 and 451) state these sites are in flood zones 1-3, the wider PL.11 does fall in 1-3, these two allocations are just in FZ1.	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01926	Environment Agency
SA11.2: Land South of Cattlegate Road, Crews Hill	London Borough of Enfield Strategic Property Services (LBE SPS) supports the spatial vision and strategic objectives of the draft Local Plan, particularly for Crews Hill. They endorse the inclusion of placemaking areas as key components of the spatial strategy and support the vision for CHPA, advocating flexibility to exceed the 5,500 home target as detailed design progresses. They suggest a unified housing figure across documents, recognize the Council's role in collaboration, and emphasize the importance of phased development and ecological protection. They also recommend a flexible masterplan approach to expedite housing delivery and advocate for clear phasing details and viability considerations.	Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01946	LBE Strategic Property Services
SA11.2: Land South of Cattlegate Road, Crews Hill	The allocation suggests that there could potentially be the loss of playing field land and associated facilities. The 2018 PPS clearly states on page 72 that these playing pitches should be reinstated as there is a strategic need for this space in order to meet existing demand. This site allocation currently does not meet with paragraph 103 of the NPPF or Sport England Playing Field policy. In order to meet with policy, the allocation would have to meet with one of three of the exceptions in paragraph 103 of the NPPF.	Comments noted. The Council is committed to working collaboratively with Sport England other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01967	Sport England
SA11.2: Land South of Cattlegate Road, Crews Hill	The Edmonton and Winchmore Hill Conservative Association objects to the proposal for 5,500 homes on the Crews Hill Green Belt site, citing concerns about the capacity of local transport infrastructure, particularly the already overburdened Herford Loop line. The potential increase in commuter demand could exacerbate congestion on peak services, impacting stations further along the line such as Grange Park and Winchmore Hill. Additionally, they highlight potential adverse effects on local Sites of Importance for Nature Conservation, views	The Enfield Local Plan's spatial strategy and site allocation papers emphasize the importance of integrating significant residential developments with transport infrastructure and environmental considerations. Transport Capacity: The plan acknowledges the current strain on the Herford Loop line but outlines strategies for improving rail capacity and connectivity to mitigate potential impacts. This includes coordination with transport providers to explore enhancements and better integrate new developments with existing	No	01784	Edmonton and Winchmore Hill Conservative Association

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	<p>from the Ridgeway, and the rural character of nearby landmarks and businesses. They argue that these issues undermine the soundness of the plan, suggesting it should be reconsidered.</p>	<p>transport infrastructure, ensuring that increased commuter demand does not overwhelm the system. Environmental Impact: The Crews Hill Topic Paper highlights that the development will incorporate measures to protect local Sites of Importance for Nature Conservation, views from the Ridgeway, and the rural character of surrounding areas. Mitigation strategies, such as preserving key green spaces and integrating natural features into the development, aim to balance housing needs with environmental preservation. Local Services and Amenities: The plan recognizes the need to maintain and potentially enhance local services and amenities, including garden centers and businesses, by integrating these considerations into the development framework to prevent adverse impacts on existing community assets. Overall, the Enfield Local Plan addresses these concerns by aligning development with strategic infrastructure improvements and environmental safeguards, aiming to ensure that the proposed development at Crews Hill is sustainable and beneficial for the community.</p>	No	03272	Federation of Enfield Residents & Allied Associations
SA11.2: Land South of Cattlegate Road, Crews Hill	<p>The Federation of Enfield Residents & Allied Associations, represented by Peter Gibbs, raised several significant concerns about the Enfield Local Plan, particularly regarding Policies PL10 and PL11 - for Policy PL11: They contend that the Crews Hill development plan, which proposes several thousand residential units, conflicts with the NPPF's quality-of-life objectives. The plan is criticized for not addressing the site's Green Belt status and the potential loss of valued horticultural enterprises and leisure facilities. The site's road access and infrastructure are deemed insufficient for the proposed scale of development, exacerbating existing congestion issues and pollution concerns. They argue that the plan fails to address the quality of living issues and does not provide a feasible solution for local employment or transportation, which would result in a commuter-centric development without adequate local amenities. In both cases, the Federation asserts that the plans should be revised or deleted to ensure they meet legal and planning soundness requirements.</p>	<p>The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. The Crews Hill proposal carefully considers the Green Belt status and includes provisions for maintaining essential green spaces while allowing for necessary housing development. The Local Plan emphasizes the protection of Green Belt land and includes measures to minimize impact, such as maintaining buffers and enhancing surrounding green areas. The proposal reflects the plan's strategic need to balance housing demand with environmental preservation.</p> <p>Infrastructure and Employment: The development plan includes comprehensive infrastructure improvements, including road upgrades and enhanced public transport options. Although the site is currently constrained by limited road access, the Local Plan outlines specific measures to address these constraints, including potential upgrades to local roads and connections to the M25. The plan also seeks to integrate local employment opportunities by retaining some existing commercial uses and encouraging new business ventures in the area.</p> <p>The plan acknowledges the value of existing horticultural businesses and includes strategies to support their continued operation where possible. The impact on local businesses and the environment is being managed through detailed planning and consultation processes, ensuring that the development aligns with the Local Plan's goals for sustainable growth and quality of life improvements. In summary, the Enfield Local Plan's policies are designed to address the Federation's concerns by incorporating robust mitigation measures, infrastructure</p>			

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.2: Land South of Cattlegate Road, Crews Hill	The proposals under this policy will significantly impact the historic Enfield Chase, causing harm to the remaining parts of this historic landscape and diminishing the views from the Ridgeway. Development of SA11.2, a current golf course, will obstruct historic landscape views from the public right-of-way between Cattlegate Road and Strayfield Road. The scale of the proposed development is substantial, likely leading to increased car use on narrow country roads. Although a bus service serves Crews Hill, it does not connect to the railway station due to a long-standing land dispute. Additionally, the development could result in the closure of numerous small and medium businesses, leading to significant job losses.	The Enfield Local Plan is both sound and legally compliant, having been developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs.	No	04218	Bush Hill Park Residents Association
SA11.2: Land South of Cattlegate Road, Crews Hill	Berkeley Homes (North East London) Ltd supports the allocation of land at Crews Hill for residential-led mixed-use development as outlined in Strategic Policy PL11. They are particularly supportive of the Local Plan's overall vision and the designation of Crews Hill for growth. However, Berkeley suggests modifications to Site Allocation SA11.2 to improve its effectiveness and ensure soundness. They propose increasing the estimated housing capacity for SA11.2 from 200 to approximately 350 homes, considering compensatory measures for the existing SINC and enhanced development potential on adjacent land. Berkeley also recommends including provisions in both Policy SA11.2 and Policy PL11 to address compensatory measures and the broader scope of a comprehensive masterplan, which should encompass retained Green Belt areas beyond the immediate development zone. These modifications aim to provide flexibility and ensure that the plan can accommodate the full potential of the site while addressing ecological and compensatory needs.	The Council acknowledges and appreciates Berkeley's support for the Crews Hill allocation as a sustainable growth area. The Council values Berkeley's detailed analysis and proposed modifications aimed at refining the site's development capacity and addressing ecological considerations. The Council is committed to ensuring that the Local Plan is both robust and responsive to the needs and concerns of stakeholders. In particular, the Council recognizes the importance of addressing the compensatory measures for the SINC and the broader implications for Green Belt land surrounding the Crews Hill Placemaking Area. The Council is committed to collaborating on a Statement of Common Ground (SoCG) with Berkeley Homes and other stakeholders. This will facilitate a shared understanding and agreement on the proposed modifications and the effective implementation of the Local Plan, ensuring it meets both the current and future needs of the Borough while addressing all ecological and planning considerations.	No	01916	Berkeley Homes (North East London) Ltd
SA11.2: Land South of Cattlegate Road, Crews Hill	Residents object to the proposal for 5,500 homes at Crews Hill, arguing it fails to comply with Green Belt regulations and the NPPF. They believe it will destroy the area's character, harm the environment and biodiversity, and lead to urban sprawl. Concerns include the loss of open landscapes, agricultural land, popular garden centers, and Sites of Importance for Nature Conservation. The car-dependent development would increase congestion and pollution. Residents argue the proposal does not address the housing crisis effectively and fails to meet the "exceptional circumstances" required for Green Belt development.	Comments noted. The Local Plan seeks to significantly increase the number of new homes to meet a wide range of needs including affordable homes, accessible homes and homes for older people. It also seeks to regenerate and renew the Borough and is considered to be an appropriate strategy. The Enfield Exceptional Circumstances Topic Paper outlines the justification for releasing Green Belt land to meet Enfield's housing and employment needs. It evaluates the balance between development requirements and Green Belt protection, ensuring alignment with national and regional policies like the NPPF and London Plan. The paper details the specific circumstances under which Green Belt boundaries may be adjusted, emphasizing the necessity of sustainable development while maintaining the Green Belt's primary functions, such as preventing	No	01900	Alison Gracie

SA11.3: Land South of M25, Crews Hill	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA11.3: Land South of M25, Crews Hill	Enfield Road Watch's response to the local plan for Land South of M25 raises concerns about the proposed 440 new homes likely to be occupied before the Local Centre is established, fostering car-dependency and conflicting with the London Plan's objectives. They question the feasibility and scale of the Local Centre, which may be insufficient for 5,500 homes. The Enfield Characterisation Study highlights the area as part of the historic Theobalds Estate and a "valuable green gateway," deeming it unsuitable for development.	Comments noted. The Crews Hill Topic Paper and Integrated Impact Assessment (IIA) outline plans to ensure phased development with infrastructure and Local Centre delivery, addressing concerns of car-dependency. The historic significance and environmental factors have been considered, with plans to incorporate green spaces to maintain the character of the Theobalds Estate. Additionally, the Infrastructure Delivery Plan supports sustainable transport and local services to align with strategic objectives.	No	01687	Enfield Road Watch
SA11.3: Land South of M25, Crews Hill	HCC's response specifies that if the site is designed to drain to Cuffley or Turkey Brook, any discharge must be restricted to greenfield rates and volumes.	Comments noted. The Council will ensure early engagement between Enfield LLFA and developers to address these recommendations. The Council will seek to address these concerns through a Statement of Common Ground (SoCG) with Hertfordshire County Council and the Environment Agency.	No	01755	Hertfordshire County Council as Lead Local Flood Authority (LLFA)
SA11.3: Land South of M25, Crews Hill	HCC views the PL11 (SA11.1 – SA 11.6) Crews Hill development as having a slightly negative ecological impact on Hertfordshire, reducing habitat extent and connectivity. The mixed-use area will shift from agriculture, development, and leisure to potentially enhance some ecological features through Biodiversity Net Gain initiatives. Although the current land lacks substantial ecological interest, indirect impacts like increased visitor pressure on local wildlife sites and reserves are uncertain. The extent of these impacts depends on the Green Infrastructure proposals for Crews Hill within Enfield, which are currently unknown.	Comments noted. The Crews Hill Topic Paper and supporting evidence emphasize Enfield's commitment to integrating Biodiversity Net Gain initiatives and thoughtful design into the Crews Hill development. The development is designed to enhance ecological characteristics, and a forthcoming Supplementary Planning Document (SPD) will address Green Infrastructure (GI) proposals, ensuring a balanced approach to ecological preservation and development. Additionally, early engagement between Enfield's Local Flood Authority (LLFA) and developers is planned to manage ecological impacts effectively. The council will also prepare a Statement of Common Ground with HCC and the Environment Agency to address specific concerns and ensure adherence to national policy and best practices. This collaborative approach aims to mitigate potential negative impacts and optimize ecological benefits for both Enfield and Hertfordshire.	No	01755	Hertfordshire County Council - Ecology

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.3: Land South of M25, Crews Hill	Hertfordshire County Council (HCC) views the Crews Hill development proposal (PL11, SA11.1-SA11.6) as slightly negative for Hertfordshire's ecology, reducing semi-natural habitats' extent and connectivity. While the current landscape has limited ecological value due to intensive farming, the development may alter mixed land uses and degrade some ecological characteristics but could enhance others through Biodiversity Net Gain initiatives. Potential indirect impacts include increased visitor pressure on Hertfordshire's rural sites. The extent of these impacts depends on the Green Infrastructure (GI) proposals for Crews Hill.	Comments noted. The Council is committed to addressing potential ecological impacts through our comprehensive planning framework and the forthcoming Supplementary Planning Document (SPD). The Crews Hill Topic Paper (2024) emphasizes the integration of Green Infrastructure (GI) and Biodiversity Net Gain (BNG) initiatives to enhance ecological value and connectivity. Strategic measures will be employed to mitigate visitor pressure on nearby sites, supported by our Green and Blue Infrastructure (GBI) strategies. Cross-boundary collaboration will be key, and the Council is open to working closely with HCC to ensure effective implementation and mitigation strategies, promoting sustainable growth and ecological enhancement in both regions.	No	01755	Hertfordshire County Council - Ecology
SA11.3: Land South of M25, Crews Hill	The Enfield Society's concerns regarding the development at Crews Hill focus on the impact on the Grade II* listed building, The Paddocks, and its associated barns. Their Heritage Impact Assessment (HIA) indicates that the development would sever The Paddocks from its historical agricultural landscape, causing substantial harm to its setting and significance. The proposed new road and housing would erode the remnants of Theobalds Park, negatively impacting the legibility and understanding of the farmstead. This conflicts with Local Plan policies and NPPF paragraph 206, which requires clear justification for any harm to heritage assets.	Comments noted. Robust measures to mitigate these impacts are set out in the planning framework. The Crews Hill Topic Paper and the Enfield Blue and Green Infrastructure Strategy emphasize strategies to preserve heritage assets while accommodating development. Specific mitigation measures include the creation of buffer zones, sensitive integration of new infrastructure, and enhancements to the surrounding landscape to maintain the historic character of The Paddocks and its setting. These measures ensure that development aligns with both local and national policies on heritage conservation.	No	01794	Enfield Society
SA11.3: Land South of M25, Crews Hill	The Barnet Society supports concentrating new development around Crews Hill Station and retaining the area's horticultural and food-producing industries. However, they express strong reservations about the commercial viability of Crews Hill's businesses due to rising land values and traffic congestion. They request a commitment in the Plan to protect these businesses. Additionally, they stress the need for significant rail, road, and other transport improvements to accompany any development, noting a lack of detailed proposals for Crews Hill in Enfield's Strategic Policies T1, T2, and T3.	Comments noted. The Council recognizes the importance of maintaining Crews Hill's horticultural and food-producing industries and aims to address commercial viability concerns through comprehensive planning and support. The council's Strategic Policies T1, T2, and T3 are designed to address transportation improvements, with specific enhancements to Crews Hill's infrastructure being developed in alignment with the overall strategic growth objectives. The detailed transport proposals will ensure that the area can support new developments while maintaining its commercial and environmental integrity.	No	01817	Barnet Society
SA11.3: Land South of M25, Crews Hill	Enfield's Pre-Submission Draft Regulation 19 Local Plan 2019-2041 aims to update and replace the Core Strategy (2010) and the Development Management Document (2014) to foster sustainable development and regeneration. Strategic Policy SS1 in the Local Plan prioritizes growth in four key placemaking areas, including Crews Hill, designated as a new settlement area (Policy SP PL11). The plan envisions Crews Hill evolving into a sustainable community with development extending beyond 2041. The Draft Local Plan confirms that parts of Crews Hill, currently within the Green Belt, will be reallocated for development to meet housing needs and promote	Comments noted. Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	environmental and economic benefits through sustainable, mixed-use projects, particularly around Crews Hill station. This approach supports the transformation of urbanized Green Belt land to accommodate both residential and commercial uses.				
SA11.3: Land South of M25, Crews Hill	Homewood Farm, located within Site Allocation SA11.3 'Land South of M25, Crews Hill', is highlighted for its potential to support both residential and commercial development. The Draft ELP indicates a requirement for approximately 700 new homes, with significant public open space and community facilities. However, the current site allocation does not specify non-residential capacity. Given Homewood Farm's location near the M25, it is proposed that the allocation include a minimum of 30,000 sq. m of commercial space to accommodate businesses relocating within the CHPA. The '2023 Whole Plan – Viability Update' identifies development at Crews Hill as marginal, influenced by high costs and low residual values. The report suggests flexibility in affordable housing and contributions to improve viability. It is recommended that the Site Allocation include provisions for reduced S.106 costs, potential CIL adjustments, and flexible affordable housing targets. Additionally, updates to the site's infrastructure requirements and design principles are suggested, including incorporating commercial development to support local businesses and varying residential models to enhance viability. The Homewood Farm site is considered a key opportunity for enabling development, potentially increasing the residential capacity from the current estimate of 280 homes.	The recent 'Enfield Viability Update' confirms that while current development at Crews Hill is assessed as "marginal" with residual values below the benchmark land value, this does not negate the potential to achieve high affordable housing targets over time. The Update underscores that development viability is influenced by factors such as market conditions and strategic planning adjustments. Despite the current challenges, the Council is committed to aligning affordable housing targets with both present and future market conditions. The 50% target is aspirational, aimed at driving high standards where feasible, with the Council adopting a pragmatic approach in the initial phases to allow flexibility in affordable housing delivery. This approach will enable gradual progress towards the higher targets as conditions improve. The SPD will be crucial in addressing site-specific challenges, including additional financial contributions and land remediation costs, ensuring that the planning framework supports sustainable development while being responsive to viability concerns.	No	01881	Paddington Corporation Ltd
SA11.3: Land South of M25, Crews Hill	Paddington Corporation Ltd support the principle of Biodiversity Net Gain (BNG) enhancement but note a discrepancy in the '2023 Whole Plan – Viability Update', which uses a 10% BNG figure for residential appraisals instead of the 20% required by Policy CR11. To ensure consistency with the viability assessment, Policy CR11 should either adopt a 10% BNG figure or re-run appraisals with the 20% figure. The 20% BNG is also referenced in Policy BG4 and its supporting text, which includes both 10% and 20% figures. We emphasize the importance of ensuring that the Crews Hill development remains viable and effective over the plan period, aligning with the 'Soundness' tests of the NPPF, given the long-term vision for creating a new sustainable community.	The requirement for a 20% biodiversity net gain reflects the borough's commitment to ambitious environmental targets and aligns with emerging national standards. The higher target supports Enfield's nature recovery plans, which have been recognized by DEFRA, and aims to address local biodiversity challenges. The Local Plan provides a clear rationale for this target and includes mechanisms for reviewing and adjusting requirements in response to specific development contexts and evidence.	No	01881	Paddington Corporation Ltd
SA11.3: Land South of M25, Crews Hill	The Homewood Farm site, located along the northern boundary of the Crews Hill Placemaking Area (CHPA), is less suitable for residential use due to M25 noise but presents an opportunity for intensified commercial and industrial development. This could accommodate existing businesses from the central CHPA area, allowing them to relocate and release their sites for residential development. Homewood Farm is well-suited for providing 'turnkey' commercial units, supporting business continuity while facilitating residential	Noted. 	<p>Update indicates that development at Crews Hill is currently "marginal," with residual values below the benchmark land value, suggesting challenges in achieving the 50% target. The update calls for a flexible approach to affordable housing in Crews Hill, especially in the early phases, and highlights concerns about additional costs such as S.106 contributions and site remediation that could further impact viability.</p>	<p>of meeting high affordable housing targets over time. The report highlights that development viability can be influenced by various factors, including market conditions and strategic planning adjustments. Moreover, the Update recognises that, despite current viability challenges, the Council remains committed to ensuring that the affordable housing target reflects both current and future market conditions. It is also important to consider that the 50% target is an aspirational figure aimed at driving high standards of affordable housing provision where feasible. The Council is prepared to adopt a pragmatic approach, particularly in the initial phases of development, allowing for flexibility in affordable housing delivery while aiming to gradually meet the higher targets as market conditions improve. Regarding additional financial contributions and site-specific challenges such as land remediation costs, these factors are taken into account within the broader viability framework. The Council remains open to reviewing and adjusting planning policies and contributions as necessary to support sustainable development and address viability concerns. Therefore, while immediate achievement of the 50% target may face practical challenges, the Council's approach ensures that development remains viable and progressively aligns with the affordable housing goals set forth.</p>			
SA11.3: Land South of M25, Crews Hill	<p>TfL does not consider the sites at Chase Park (PL10) SA10.1 – SA10.4, Crews Hill (PL11) SA11.1 – SA11.6, land opposite Enfield Crematorium (RUR.01), and land between Camlet Way and Crescent West, Hadley (RUR.02) suitable for housing. This is due to their poor transport connectivity and the high costs required to provide sustainable transport access comparable to urban sites in the borough. Developing these sites is likely to lead to car-dependent development, which is contrary to the Good Growth objectives of the London Plan and the NPPF.</p>	<p>Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01891	Transport for London
SA11.3: Land South of M25, Crews Hill	<p>TfL recommends that the requirements state any car parking must be minimised and align with the ambition of achieving a 75% sustainable transport mode share. This will require parking levels substantially lower than London Plan maximum standards and should consider future rather than existing PTAL. The infrastructure requirements should explicitly call for substantial contributions towards public transport to improve connectivity to a level comparable with urban placemaking areas in the borough. TfL notes the absence of a reference to development being within 400 meters of a bus stop, which is included in the design principles for SA11.1 and SA11.3. A costed and agreed Infrastructure Delivery Plan should be submitted to outline the full package of transport infrastructure for all Crews Hill sites. TfL is concerned that dividing the Crews Hill placemaking area into six separate site allocations could lead to parts being developed before agreeing on the necessary infrastructure requirements and costs for the entire area.</p>	<p>Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01891	Transport for London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.3: Land South of M25, Crews Hill	Lea Valley Growers Association object to the loss of popular garden centres and supporting businesses in Crews Hill for housing development. They advocate enhancing horticultural activities to make it a hub for food and plant production. They argue that Enfield's housing targets can be met on brownfield sites, as evidenced in the "Space to Build" report, which identifies locations for 37,000 homes. They emphasize the Green Belt's value for environmental, ecological, economic, and public health reasons, urging the Council to protect it in line with the London Plan and NPPF.	Comments noted. The Council's strategy is justified. The plan's target of 1,246 net new homes a year is considered the minimum required. The plan sets out general presumption of brownfield first approach to delivering sustainable growth by focusing development within growth areas, district town centres and around transport hubs. Plan is supported by the Infrastructure Delivery Plan (IDP) which identifies Enfield's infrastructure needs comprehensively. The Enfield Exceptional Circumstances Topic Paper outlines the justification for releasing Green Belt land to meet Enfield's housing and employment needs. It evaluates the balance between development requirements and Green Belt protection, ensuring alignment with national and regional policies like the NPPF and London Plan. The paper details the specific circumstances under which Green Belt boundaries may be adjusted, emphasizing the necessity of sustainable development while maintaining the Green Belt's primary functions, such as preventing urban sprawl and preserving open space.	No	01910	Lea Valley Growers Association
SA11.3: Land South of M25, Crews Hill	FZ1. Appendix C (page 449 and 451) state these sites are in flood zones 1-3, the wider PL11 does fall in 1-3, these two allocations are just in FZ1.	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01926	Environment Agency
SA11.3: Land South of M25, Crews Hill	Tile Kiln Farm support the principle of Biodiversity Net Gain (BNG) enhancement but note a discrepancy in the '2023 Whole Plan – Viability Update', which uses a 10% BNG figure for residential appraisals instead of the 20% required by Policy CR11. To ensure consistency with the viability assessment, Policy CR11 should either adopt a 10% BNG figure or re-run appraisals with the 20% figure. The 20% BNG is also referenced in Policy BG4 and its supporting text, which includes both 10% and 20% figures. We emphasize the importance of ensuring that the Crews Hill development remains viable and effective over the plan period, aligning with the 'Soundness' tests of the NPPF, given the long-term vision for creating a new sustainable community.	The requirement for a 20% biodiversity net gain reflects the borough's commitment to ambitious environmental targets and aligns with emerging national standards. The higher target supports Enfield's nature recovery plans, which have been recognized by DEFRA, and aims to address local biodiversity challenges. The Local Plan provides a clear rationale for this target and includes mechanisms for reviewing and adjusting requirements in response to specific development contexts and evidence.	No	02001	Tile Kiln Farm
SA11.3: Land South of M25, Crews Hill	This site, located along the northern boundary of the Crews Hill Placemaking Area (CHPA), is less suitable for residential use due to M25 noise but presents an opportunity for intensified commercial and industrial development. This could accommodate existing businesses from the central CHPA area, allowing them to relocate and release their sites for residential development. Homewood Farm is well-suited for providing 'turnkey' commercial units, supporting business continuity while facilitating residential redevelopment. They support the release of Crews Hill from the Green Belt to foster a sustainable community and stress the importance of ensuring that the development remains viable and effective over the plan period, as per the NPPF's 'Soundness' tests.	Noted. We appreciate your feedback and will consider these points in preparing the Statement of Common Ground (SoCG).	No	02001	Tile Kiln Farm

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.3: Land South of M25, Crews Hill	<p>The site is located within Site Allocation SA11.3 'Land South of M25, Crews Hill', is highlighted for its potential to support both residential and commercial development. The Draft ELP indicates a requirement for approximately 700 new homes, with significant public open space and community facilities. However, the current site allocation does not specify non-residential capacity. Given Homewood Farm's location near the M25, it is proposed that the allocation include a minimum of 30,000 sq. m of commercial space to accommodate businesses relocating within the CHPA. The '2023 Whole Plan – Viability Update' identifies development at Crews Hill as marginal, influenced by high costs and low residual values. The report suggests flexibility in affordable housing and contributions to improve viability. It is recommended that the Site Allocation include provisions for reduced S.106 costs, potential CIL adjustments, and flexible affordable housing targets. Additionally, updates to the site's infrastructure requirements and design principles are suggested, including incorporating commercial development to support local businesses and varying residential models to enhance viability. The Homewood Farm site is considered a key opportunity for enabling development, potentially increasing the residential capacity from the current estimate of 280 homes.</p>	<p>The recent 'Enfield Viability Update' confirms that while current development at Crews Hill is assessed as "marginal" with residual values below the benchmark land value, this does not negate the potential to achieve high affordable housing targets over time. The Update underscores that development viability is influenced by factors such as market conditions and strategic planning adjustments. Despite the current challenges, the Council is committed to aligning affordable housing targets with both present and future market conditions. The 50% target is aspirational, aimed at driving high standards where feasible, with the Council adopting a pragmatic approach in the initial phases to allow flexibility in affordable housing delivery. This approach will enable gradual progress towards the higher targets as conditions improve. The SPD will be crucial in addressing site-specific challenges, including additional financial contributions and land remediation costs, ensuring that the planning framework supports sustainable development while being responsive to viability concerns.</p>	No	02001	Tile Kiln Farm
SA11.3: Land South of M25, Crews Hill	<p>Policy H2 proposes a minimum of 50% affordable housing for rural Placemaking Areas like Crews Hill. Paragraph 8.18 of the supporting text justifies this target based on findings from the Whole Plan Viability Assessment, which indicated that greenfield sites could support higher affordable housing levels due to their viability and potential for substantial developer contributions. However, the 2023 Viability Update indicates that development at Crews Hill is currently "marginal," with residual values below the benchmark land value, suggesting challenges in achieving the 50% target. The update calls for a flexible approach to affordable housing in Crews Hill, especially in the early phases, and highlights concerns about additional costs such as S.106 contributions and site remediation that could further impact viability.</p>	<p>The Council acknowledges the concerns regarding the viability of achieving a 50% affordable housing target at Crews Hill, the Enfield Viability Update (August 2023) presents a nuanced view of development potential. The update confirms that while development at Crews Hill is currently assessed as "marginal" with residual values below the benchmark land value, this does not preclude the possibility of meeting high affordable housing targets over time. The report highlights that development viability can be influenced by various factors, including market conditions and strategic planning adjustments. Moreover, the Update recognises that, despite current viability challenges, the Council remains committed to ensuring that the affordable housing target reflects both current and future market conditions. It is also important to consider that the 50% target is an aspirational figure aimed at driving high standards of affordable housing provision where feasible. The Council is prepared to adopt a pragmatic approach, particularly in the initial phases of development, allowing for flexibility in affordable housing delivery while aiming to gradually meet the higher targets as market conditions improve. Regarding additional financial contributions and site-specific challenges such as land remediation costs, these factors are taken into account within the broader viability framework. The Council remains open to reviewing and adjusting planning policies and contributions as necessary to support sustainable development and address viability concerns. Therefore, while immediate achievement of the 50% target may face practical challenges, the Council's approach</p>	No	02001	Tile Kiln Farm

SA11.3: Land South of M25, Crews Hill	<p>The Edmonton and Winchmore Hill Conservative Association objects to the proposal for 5,500 homes on the Crews Hill Green Belt site, citing concerns about the capacity of local transport infrastructure, particularly the already overburdened Hertford Loop line. The potential increase in commuter demand could exacerbate congestion on peak services, impacting stations further along the line such as Grange Park and Winchmore Hill. Additionally, they highlight potential adverse effects on local Sites of Importance for Nature Conservation, views from the Ridgeway, and the rural character of nearby landmarks and businesses. They argue that these issues undermine the soundness of the plan, suggesting it should be reconsidered.</p>	<p>ensures that development remains viable and progressively aligns with the affordable housing goals set forth.</p> <p>The Enfield Local Plan's spatial strategy and site allocation papers emphasize the importance of integrating significant residential developments with transport infrastructure and environmental considerations. Transport Capacity: The plan acknowledges the current strain on the Hertford Loop line but outlines strategies for improving rail capacity and connectivity to mitigate potential impacts. This includes coordination with transport providers to explore enhancements and better integrate new developments with existing transport infrastructure, ensuring that increased commuter demand does not overwhelm the system. Environmental Impact: The Crews Hill Topic Paper highlights that the development will incorporate measures to protect local Sites of Importance for Nature Conservation, views from the Ridgeway, and the rural character of surrounding areas. Mitigation strategies, such as preserving key green spaces and integrating natural features into the development, aim to balance housing needs with environmental preservation. Local Services and Amenities: The plan recognizes the need to maintain and potentially enhance local services and amenities, including garden centers and businesses, by integrating these considerations into the development framework to prevent adverse impacts on existing community assets. Overall, the Enfield Local Plan addresses these concerns by aligning development with strategic infrastructure improvements and environmental safeguards, aiming to ensure that the proposed development at Crews Hill is sustainable and beneficial for the community.</p>	No	01784	Edmonton and Winchmore Hill Conservative Association
SA11.3: Land South of M25, Crews Hill	<p>The Federation of Enfield Residents & Allied Associations, represented by Peter Gibbs, raised several significant concerns about the Enfield Local Plan, particularly regarding Policies PL10 and PL11 - for Policy PL11: They contend that the Crews Hill development plan, which proposes several thousand residential units, conflicts with the NPPF's quality-of-life objectives. The plan is criticized for not addressing the site's Green Belt status and the potential loss of valued horticultural enterprises and leisure facilities. The site's road access and infrastructure are deemed insufficient for the proposed scale of development, exacerbating existing congestion issues and pollution concerns. They argue that the plan fails to address the quality of living issues and does not provide a feasible solution for local employment or transportation, which would result in a commuter-centric development without adequate local amenities. In both cases, the Federation asserts that the plans should be revised or deleted to ensure they meet legal and planning soundness requirements.</p>	<p>The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. The Crews Hill proposal carefully considers the Green Belt status and includes provisions for maintaining essential green spaces while allowing for necessary housing development. The Local Plan emphasizes the protection of Green Belt land and includes measures to minimize impact, such as maintaining buffers and enhancing surrounding green areas. The proposal reflects the plan's strategic need to balance housing demand with environmental preservation.</p> <p>Infrastructure and Employment: The development plan includes comprehensive infrastructure improvements, including road upgrades and enhanced public transport options. Although the site is currently constrained by limited road access, the Local Plan outlines specific measures to address these constraints, including potential upgrades to local roads and connections to the M25. The plan also seeks to</p>	No	03272	Federation of Enfield Residents & Allied Associations

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
		<p>integrate local employment opportunities by retaining some existing commercial uses and encouraging new business ventures in the area.</p> <p>The plan acknowledges the value of existing horticultural businesses and includes strategies to support their continued operation where possible. The impact on local businesses and the environment is being managed through detailed planning and consultation processes, ensuring that the development aligns with the Local Plan's goals for sustainable growth and quality of life improvements. In summary, the Enfield Local Plan's policies are designed to address the Federation's concerns by incorporating robust mitigation measures, infrastructure enhancements, and community-focused strategies to balance housing needs with environmental protection and quality of life considerations.</p>			
SA11.3: Land South of M25, Crews Hill	<p>Glasgow Stud's concerns highlight several potential issues with the Local Plan's adherence to the National Planning Policy Framework (NPPF), particularly regarding the clarity and effectiveness of policies and the overall strategy for development. The Local Plan, as represented in figures 3.13 and 3.14, shows broad areas for development without detailed, specific allocations. This vagueness conflicts with NPPF requirements for clear, unambiguous policies. The site allocation maps and the unclear status of "white land" and other areas potentially compromise the plan's effectiveness and transparency. Glasgow Stud's land is significantly impacted by the current proposals. The Regulation 19 Plan labels large portions of their land as part of "Whitewebbs Park," which the Trust believes may be an error. The proposed access routes and their safety are also questioned, indicating a lack of thorough engagement with site-specific details and concerns.</p>	<p>The Local Plan provides a clear framework for development through the Crews Hill Topic Paper and Site Allocation Topic Paper. Figures 3.13 and 3.14 offer a strategic overview of development areas, while acknowledging that detailed allocations will be further refined through Supplementary Planning Documents (SPDs). This approach aligns with NPPF guidelines, which emphasize the need for policies to be clearly written and unambiguous while allowing for detailed site-specific plans to be developed in subsequent stages.</p>	No	01869	The Glasgow Stud
SA11.3: Land South of M25, Crews Hill	<p>Glasgow Stud argues that a significant portion of their site is previously developed land, which the NPPF suggests should be prioritized for development. They question the exclusion of their land from the development area despite its potential for use and its existing condition as previously developed land. The Trust contends that the ecological value of their land has been misrepresented. They argue that the site's ecological importance, as assessed by their Preliminary Ecological Appraisal (PEA), is lower than suggested by the LPA. They claim that the site is suitable for development and that the environmental constraints have been overstated.</p>	<p>The plan recognizes the value of previously developed land, consistent with NPPF Paragraphs 123 and 124, which emphasize prioritizing such land for development. The evidence base for the Local Plan, as detailed in the Site Allocation Topic Paper, considers various site characteristics, including previously developed status, to ensure that development is both sustainable and aligned with strategic priorities. The Enfield Local Plan incorporates comprehensive ecological and environmental assessments, as detailed in the Crews Hill Topic Paper. These assessments inform site allocations and ensure that environmental constraints are adequately considered. The Council remains open to reviewing additional ecological surveys provided by Glasgow Stud and integrating their findings into the planning process where applicable. We propose to work collaboratively with Glasgow Stud and other stakeholders to develop a Statement of Common Ground that addresses specific concerns about land use, access routes, and infrastructure.</p>	No	01869	The Glasgow Stud

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.4: Land North and South of Cattlegate Road	GF Planning, on behalf of their client confirms the landowners are working together and confirms that the sites are suitable (SA11.5: Land East of Theobalds Road Park, Crews Hill and SA11.4: Land North and South of Cattlegate Road).	Comments noted	No	00014	GfPlanning
SA11.4: Land North and South of Cattlegate Road	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA11.4: Land North and South of Cattlegate Road	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA11.4: Land North and South of Cattlegate Road	Enfield Road Watch's response to the local plan for Land North and South of Cattlegate Road raises concerns about the feasibility and effectiveness of the proposal for 2,250 new homes and a new Local Centre. They argue that the policy is unlikely to be effective due to the lack of landowner cooperation and unclear financial resources for land acquisition or compulsory purchase orders (CPO). The response highlights the risk of piecemeal development due to vague phasing timeframes and insufficient clarity on deliverable sites. Concerns are also raised about ecological impacts on the Glasgow Stud SINC and potential disruption to local businesses.	Comments noted. Enfield Road Watch's concerns about the feasibility and ecological impacts of the Crews Hill development are acknowledged. However, the spatial framework for Crews Hill is illustrative, allowing flexibility to address these concerns. The viability assessment and preparation of an SPD ensure that the development is realistic within financial constraints, mitigating risks related to land acquisition and phasing. The ELP REG19 IIA and appendices address ecological impacts, ensuring wildlife habitat protection. Extensive consultations and cooperation align the plan with regional goals, making the development feasible, sustainable, and compliant with planning policies.	No	01687	Enfield Road Watch
SA11.4: Land North and South of Cattlegate Road	HCC views the PL11 (SA11.1 – SA 11.6) Crews Hill development as having a slightly negative ecological impact on Hertfordshire, reducing habitat extent and connectivity. The mixed-use area will shift from agriculture, development, and leisure to potentially enhance some ecological features through Biodiversity Net Gain initiatives. Although the current land lacks substantial ecological interest, indirect impacts	Comments noted. The Crews Hill Topic Paper and supporting evidence emphasize Enfield's commitment to integrating Biodiversity Net Gain initiatives and thoughtful design into the Crews Hill development. The development is designed to enhance ecological characteristics, and a	No	01755	Hertfordshire County Council - Ecology

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	like increased visitor pressure on local wildlife sites and reserves are uncertain. The extent of these impacts depends on the Green Infrastructure proposals for Crews Hill within Enfield, which are currently unknown.	forthcoming Supplementary Planning Document (SPD) will address Green Infrastructure (GI) proposals, ensuring a balanced approach to ecological preservation and development. Additionally, early engagement between Enfield's Local Lead Flood Authority (LLFA) and developers is planned to manage ecological impacts effectively. The council will also prepare a Statement of Common Ground with HCC and the Environment Agency to address specific concerns and ensure adherence to national policy and best practices. This collaborative approach aims to mitigate potential negative impacts and optimize ecological benefits for both Enfield and Hertfordshire.	No	01755	Hertfordshire County Council - Ecology
SA11.4: Land North and South of Cattlegate Road	Hertfordshire County Council (HCC) views the Crews Hill development proposal (PL11, SA11.1-SA11.6) as slightly negative for Hertfordshire's ecology, reducing semi-natural habitats' extent and connectivity. While the current landscape has limited ecological value due to intensive farming, the development may alter mixed land uses and degrade some ecological characteristics but could enhance others through Biodiversity Net Gain initiatives. Potential indirect impacts include increased visitor pressure on Hertfordshire's rural sites. The extent of these impacts depends on the Green Infrastructure (GI) proposals for Crews Hill.	Comments noted. The Council is committed to addressing potential ecological impacts through our comprehensive planning framework and the forthcoming Supplementary Planning Document (SPD). The Crews Hill Topic Paper (2024) emphasizes the integration of Green Infrastructure (GI) and Biodiversity Net Gain (BNG) initiatives to enhance ecological value and connectivity. Strategic measures will be employed to mitigate visitor pressure on nearby sites, supported by our Green and Blue Infrastructure (GBI) strategies. Cross-boundary collaboration will be key, and the Council is open to working closely with HCC to ensure effective implementation and mitigation strategies, promoting sustainable growth and ecological enhancement in both regions.	No	01794	Enfield Society
SA11.4: Land North and South of Cattlegate Road	The Enfield Society's concerns about the land north and south of Cattlegate Road in Crews Hill include potential delays in delivering the Local Centre, which could increase car-based trips and affect rural lanes. They question the effectiveness of a comprehensive masterplanned approach due to the complexity and number of landowners. They also highlight the visual impact of taller buildings and the intrusion into views from The Ridgeway. Furthermore, the necessity for exceptional circumstances to introduce new development in the Greenbelt area is emphasized, with a suggestion to consider the vacant site adjacent to the Plough Public House.	Comments noted. The Enfield Local Plan for Crews Hill ensures a balanced approach to development, integrating high-quality design, landscape restoration, and sustainable transport. The plan preserves significant views and minimizes visual impacts by concentrating taller buildings and integrating green infrastructure. Exceptional circumstances for Green Belt development are justified through robust compensatory measures, enhancing public access and biodiversity. This approach aligns with the strategic needs of the area, balancing growth with heritage conservation and environmental stewardship, as detailed in the Crews Hill Topic Paper 2024.	No	01817	Barnet Society
SA11.4: Land North and South of Cattlegate Road	The Barnet Society supports concentrating new development around Crews Hill Station and retaining the area's horticultural and food-producing industries. However, they express strong reservations about the commercial viability of Crews Hill's businesses due to rising land values and traffic congestion. They request a commitment in the Plan to protect these businesses. Additionally, they stress the need for significant rail, road, and other transport improvements to accompany any development, noting a lack of detailed proposals for Crews Hill in Enfield's Strategic Policies T1, T2, and T3.	Comments noted. The Council recognizes the importance of maintaining Crews Hill's horticultural and food-producing industries and aims to address commercial viability concerns through comprehensive planning and support. The council's Strategic Policies T1, T2, and T3 are designed to address transportation improvements, with specific enhancements to Crews Hill's infrastructure being developed in alignment with the overall strategic growth objectives. The detailed transport proposals	No	01817	Barnet Society

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.4: Land North and South of Cattlegate Road	Wolden Garden Centre Ltd supports Strategic Policy SS1 and its focus on sustainable growth across Enfield, particularly the development plans for Crews Hill. They agree with the removal of their site from the Green Belt as part of the broader vision to establish a new sustainable community. They highlight that the site's current use has contributed to an urbanized character, making it suitable for residential and mixed-use development. This, they argue, aligns with the Council's aim to create a new residential community and supports the transition from Green Belt to more intensive use at Crews Hill.	will ensure that the area can support new developments while maintaining its commercial and environmental integrity. Support noted.	No	01887	Wolden Garden Centre Ltd
SA11.4: Land North and South of Cattlegate Road	Wolden Garden Centre Ltd suggests updating Figure 2.2 of the Draft Enfield Local Plan (ELP) to accurately reflect that the Crews Hill Placemaking Area is no longer within the Green Belt, as indicated in Figure 2.4. Alternatively, they propose clarifying Figure 2.2 to indicate that it represents the current status rather than the proposed future designation.	Comments noted	No	01887	Wolden Garden Centre Ltd
SA11.4: Land North and South of Cattlegate Road	Policy H2 proposes a minimum of 50% affordable housing for rural Placemaking Areas like Crews Hill. Paragraph 8.18 of the supporting text justifies this target based on findings from the Whole Plan Viability Assessment, which indicated that greenfield sites could support higher affordable housing levels due to their viability and potential for substantial developer contributions. However, the 2023 Viability Update indicates that development at Crews Hill is currently "marginal," with residual values below the benchmark land value, suggesting challenges in achieving the 50% target. The update calls for a flexible approach to affordable housing in Crews Hill, especially in the early phases, and highlights concerns about additional costs such as S.106 contributions and site remediation that could further impact viability.	The Council acknowledge the concerns regarding the viability of achieving a 50% affordable housing target at Crews Hill, the Enfield Viability Update (August 2023) presents a nuanced view of development potential. The update confirms that while development at Crews Hill is currently assessed as "marginal" with residual values below the benchmark land value, this does not preclude the possibility of meeting high affordable housing targets over time. The report highlights that development viability can be influenced by various factors, including market conditions and strategic planning adjustments. Moreover, the Update recognises that, despite current viability challenges, the Council remains committed to ensuring that the affordable housing target reflects both current and future market conditions. It is also important to consider that the 50% target is an aspirational figure aimed at driving high standards of affordable housing provision where feasible. The Council is prepared to adopt a pragmatic approach, particularly in the initial phases of development, allowing for flexibility in affordable housing delivery while aiming to gradually meet the higher targets as market conditions improve. Regarding additional financial contributions and site-specific challenges such as land remediation costs, these factors are taken into account within the broader viability framework. The Council remains open to reviewing and adjusting planning policies and contributions as necessary to support sustainable development and address viability concerns. Therefore, while immediate achievement of the 50% target may face practical challenges, the Council's approach ensures that development remains viable and progressively aligns with the affordable housing goals set forth.	No	01887	Wolden Garden Centre Ltd

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.4: Land North and South of Cattlegate Road	Policy CR11 part 'K' of the Draft Enfield Local Plan mandates a minimum of 20% biodiversity net gain (BNG). However, the 2023 Whole Plan – Viability Update by HDH Planning & Development uses a 10% BNG figure for residential appraisals, which suggests a discrepancy. To ensure consistency, either Policy CR11 should be adjusted to reflect a 10% BNG or the viability appraisals should be updated to accommodate a 20% BNG. The Draft ELP should clarify the BNG target to avoid confusion.	The requirement for a 20% biodiversity net gain reflects the borough's commitment to ambitious environmental targets and aligns with emerging national standards. The higher target supported by Enfield's nature recovery plans, which have been recognized by DEFRA, and aims to address local biodiversity challenges. The Local Plan provides a clear rationale for this target and includes mechanisms for reviewing and adjusting requirements in response to specific development contexts and evidence.	No	01887	Wolden Garden Centre Ltd
SA11.4: Land North and South of Cattlegate Road	Wolden Garden Centre Ltd comments on Policy H3: 'Housing Mix and Type', noting the need for an amendment to enhance development viability at Crews Hill. They propose that Point g 'ii' should be revised to state: "For affordable housing schemes on publicly owned sites and areas released from the Green Belt, a minimum of 20% of units should be two bedrooms, while 40% should meet the London Plan definition of family housing, as an average across the entire Crews Hill Placemaking Area." This change aims to support viability, especially in early phases close to the station, where higher density is more suitable. They suggest that sites near the station may provide a lower proportion of family units, with higher proportions located further from the station to meet the overall 40% target.	Enfield's Viability Update (2023) confirms that while the current viability of development at Crews Hill is marginal, the long-term goal remains to meet high standards of affordable housing. The update indicates that the 50% affordable housing target, though aspirational, is crucial for driving up affordable housing provision over time. It acknowledges that immediate flexibility might be required, but this flexibility should not undermine the overall aim of meeting these high targets progressively as market conditions improve. Enfield's Housing Topic Paper (2024) supports the need for a varied housing mix but also stresses that any deviations from standard requirements should be carefully managed to ensure that the overall housing strategy remains effective. The paper highlights that achieving a balance between different types of housing is key to meeting broader housing needs while addressing site-specific constraints. Therefore, while it is understood that an adjustment in the housing mix requirements might be beneficial in the short term to address viability issues, it is crucial to maintain a focus on long-term objectives. A blanket reduction in family housing requirements could potentially undermine the strategic aim of creating a well-balanced, sustainable community. Instead, a nuanced approach that allows flexibility within specific phases or sub-areas while maintaining the overall policy aim could be more appropriate. This would ensure that the development remains aligned with both current viability constraints and long-term housing goals.	No	01887	Wolden Garden Centre Ltd
SA11.4: Land North and South of Cattlegate Road	Wolden Garden Centre Ltd has raised concerns regarding the financial contributions required for new developments at Crews Hill. Specifically, they seek clarification on whether the £3,324 per dwelling contribution towards school and childcare places is included within the £50,000 per unit viability assessment for Crews Hill or if it is an additional cost. They express concern that if these contributions are additional, it could further impact the viability of development at Crews Hill. The company hopes that as the viability of the Crews Hill Placemaking Area improves over the plan period, these financial contributions will not unduly hinder development.	Wolden Garden Centre Ltd's concerns about additional financial contributions, such as the £3,324 per dwelling towards school and childcare places, are included in the overall £50,000 per unit viability assessment for Crews Hill outlined in the "Enfield Viability Update" (August 2023). This comprehensive assessment aims to balance essential contributions with development feasibility. While current viability is assessed as "marginal," the Update confirms a commitment to ongoing reviews and adjustments of planning policies and contributions to ensure that development remains feasible and sustainable as market conditions evolve. Thus, any significant impact on viability from additional contributions will be addressed through this flexible and adaptive approach.	No	01887	Wolden Garden Centre Ltd

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.4: Land North and South of Cattlegate Road	Wolden Garden Centre Ltd's comments focus on the site allocation SA11.4 for Crews Hill in the Draft Enfield Local Plan (ELP). The site, which includes Wolden Garden Centre, is situated near Crews Hill Railway Station and falls within a broader area designated for around 2,250 new homes, public spaces, and a new local centre. The comments highlight concerns about the impact of strategic infrastructure requirements and off-site school construction on development viability, noting that these could affect early phases of the project. They suggest updating the site allocation to offer more flexibility on infrastructure contributions and affordable housing to enhance viability. The company also advocates for including diverse residential uses and higher density development options to optimize the site's potential. They emphasize the importance of a viable and comprehensive development approach for Crews Hill to align with long-term planning goals and ensure the success of the area's transformation.	The Enfield Viability Update (2023) highlights that while current development viability at Crews Hill is assessed as marginal, this should not preclude the achievement of higher development and infrastructure goals over time. The Crews Hill Topic Paper (2024) recognises the importance of a phased development approach to address initial viability issues while maintaining long-term aspirations for the area. The viability update acknowledges that strategic adjustments, including flexible infrastructure contributions and varied housing models, can significantly improve development feasibility. Therefore, while immediate adjustments to site allocation and financial contributions may be necessary, the Council's approach to phased development and adaptability aims to balance current viability with future growth potential, ensuring that ambitious targets for Crews Hill remain achievable.	No	01887	Wolden Garden Centre Ltd
SA11.4: Land North and South of Cattlegate Road	Wolden Garden Centre Ltd support the principle of Biodiversity Net Gain (BNG) enhancement but note a discrepancy in the '2023 Whole Plan – Viability Update,' which uses a 10% BNG figure for residential appraisals instead of the 20% required by Policy CR11. To ensure consistency with the viability assessment, Policy CR11 should either adopt a 10% BNG figure or re-run appraisals with the 20% figure. The 20% BNG is also referenced in Policy BG4 and its supporting text, which includes both 10% and 20% figures. We emphasize the importance of ensuring that the Crews Hill development remains viable and effective over the plan period, aligning with the 'Soundness' tests of the NPPF, given the long-term vision for creating a new sustainable community.	The requirement for a 20% biodiversity net gain reflects the borough's commitment to ambitious environmental targets and aligns with emerging national standards. The higher target supports Enfield's nature recovery plans, which have been recognized by DEFRA, and aims to address local biodiversity challenges. The Local Plan provides a clear rationale for this target and includes mechanisms for reviewing and adjusting requirements in response to specific development contexts and evidence.	No	01887	Wolden Garden Centre Ltd
SA11.4: Land North and South of Cattlegate Road	Wolden Garden Centre Ltd suggests a correction is needed. They request correcting the name in Figure 3.14 of the Draft ELP from "Burn Farm Ride" to "Burnt Farm Ride.	Comments noted.	No	01887	Wolden Garden Centre Ltd
SA11.4: Land North and South of Cattlegate Road	TfL does not consider the sites at Chase Park (PL10) SA10.1 – SA10.4, Crews Hill (PL11) SA11.1 – SA11.6, land opposite Enfield Crematorium (RUR.01), and land between Camlet Way and Crescent West, Hadley (RUR.02) suitable for housing. This is due to their poor transport connectivity and the high costs required to provide sustainable transport access comparable to urban sites in the borough. Developing these sites is likely to lead to car-dependent development, which is contrary to the Good Growth objectives of the London Plan and the NPPF.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.4: Land North and South of Cattlegate Road	TfL recommends that the requirements state any car parking must be minimized and consistent with the ambition of achieving a 75% sustainable transport mode share. This will necessitate parking levels substantially lower than London Plan maximum standards and should consider future rather than existing PTAL. The infrastructure requirements should explicitly call for substantial contributions towards public transport to improve connectivity to a level comparable with urban placemaking areas in the borough. TfL notes the absence of a reference to development being within 400 meters of a bus stop, which is included in the design principles for SA11.1 and SA11.3. A costed and agreed Infrastructure Delivery Plan should be submitted to outline the full package of transport infrastructure for all Crews Hill sites. TfL is concerned that dividing the Crews Hill placemaking area into six separate site allocations could result in parts being developed before agreeing on the necessary infrastructure requirements and costs for the entire area.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA11.4: Land North and South of Cattlegate Road	Lea Valley Growers Association object to the loss of popular garden centers and supporting businesses in Crews Hill for housing development. They advocate enhancing horticultural activities to make it a hub for food and plant production. They argue that Enfield's housing targets can be met on brownfield sites, as evidenced in the "Space to Build" report, which identifies locations for 37,000 homes. They emphasize the Green Belt's value for environmental, ecological, economic, and public health reasons, urging the Council to protect it in line with the London Plan and NPPF.	Comments noted. The Council's strategy is justified. The plan's target of 1,246 net new homes a year us considered the minimum required. The plan sets out general presumption of brownfield first approach to delivering sustainable growth by focusing development within growth areas, district town centres and around transport hubs. Plan is supported by the Infrastructure Delivery Plan (IDP) which identifies Enfield's infrastructure needs comprehensively. The Enfield Exceptional Circumstances Topic Paper outlines the justification for releasing Green Belt land to meet Enfield's housing and employment needs. It evaluates the balance between development requirements and Green Belt protection, ensuring alignment with national and regional policies like the NPPF and London Plan. The paper details the specific circumstances under which Green Belt boundaries may be adjusted, emphasizing the necessity of sustainable development while maintaining the Green Belt's primary functions, such as preventing urban sprawl and preserving open space.	No	01910	Lea Valley Growers Association
SA11.4: Land North and South of Cattlegate Road	FZ2 and FZ3	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01926	Environment Agency
SA11.4: Land North and South of Cattlegate Road	The Edmonton and Winchmore Hill Conservative Association objects to the proposal for 5,500 homes on the Crews Hill Green Belt site, citing concerns about the capacity of local transport infrastructure, particularly the already overburdened Herford Loop line. The potential increase in commuter demand could exacerbate congestion on peak services, impacting stations further along the line such as Grange Park	The Enfield Local Plan's spatial strategy and site allocation papers emphasize the importance of integrating significant residential developments with transport infrastructure and environmental considerations. Transport Capacity: The plan acknowledges the current strain on the Herford Loop line but outlines strategies for improving rail capacity and connectivity to mitigate potential impacts.	No	01784	Edmonton and Winchmore Hill Conservative Association

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	<p>and Winchmore Hill. Additionally, they highlight potential adverse effects on local Sites of Importance for Nature Conservation, views from the Ridgeway, and the rural character of nearby landmarks and businesses. They argue that these issues undermine the soundness of the plan, suggesting it should be reconsidered.</p>	<p>This includes coordination with transport providers to explore enhancements and better integrate new developments with existing transport infrastructure, ensuring that increased commuter demand does not overwhelm the system. Environmental Impact: The Crews Hill Topic Paper highlights that the development will incorporate measures to protect local Sites of Importance for Nature Conservation, views from the Ridgeway, and the rural character of surrounding areas. Mitigation strategies, such as preserving key green spaces and integrating natural features into the development, aim to balance housing needs with environmental preservation. Local Services and Amenities: The plan recognizes the need to maintain and potentially enhance local services and amenities, including garden centres and businesses, by integrating these considerations into the development framework to prevent adverse impacts on existing community assets. Overall, the Enfield Local Plan addresses these concerns by aligning development with strategic infrastructure improvements and environmental safeguards, aiming to ensure that the proposed development at Crews Hill is sustainable and beneficial for the community.</p>	No	03272	Federation of Enfield Residents & Allied Associations
SA11.4: Land North and South of Cattlegate Road	<p>The Federation of Enfield Residents & Allied Associations, represented by Peter Gibbs, raised several significant concerns about the Enfield Local Plan, particularly regarding Policies PL10 and PL11, for Policy PL11: They contend that the Crews Hill development plan, which proposes several thousand residential units, conflicts with the NPPF's quality-of-life objectives. The plan is criticized for not addressing the site's Green Belt status and the potential loss of valued horticultural enterprises and leisure facilities. The site's road access and infrastructure are deemed insufficient for the proposed scale of development, exacerbating existing congestion issues and pollution concerns. They argue that the plan fails to address the quality of living issues and does not provide a feasible solution for local employment or transportation, which would result in a commuter-centric development without adequate local amenities. In both cases, the Federation asserts that the plans should be revised or deleted to ensure they meet legal and planning soundness requirements.</p>	<p>The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. The Crews Hill proposal carefully considers the Green Belt status and includes provisions for maintaining essential green spaces while allowing for necessary housing development. The Local Plan emphasizes the protection of Green Belt land and includes measures to minimize impact, such as maintaining buffers and enhancing surrounding green areas. The proposal reflects the plan's strategic need to balance housing demand with environmental preservation.</p> <p>Infrastructure and Employment: The development plan includes comprehensive infrastructure improvements, including road upgrades and enhanced public transport options. Although the site is currently constrained by limited road access, the Local Plan outlines specific measures to address these constraints, including potential upgrades to local roads and connections to the M25. The plan also seeks to integrate local employment opportunities by retaining some existing commercial uses and encouraging new business ventures in the area.</p> <p>The plan acknowledges the value of existing horticultural businesses and includes strategies to support their continued operation where possible. The impact on local businesses and the environment is being managed through detailed planning and consultation processes, ensuring that the development aligns with the Local Plan's goals for sustainable growth and quality of life improvements. In summary, the Enfield Local Plan's policies are designed to address the Federation's concerns by incorporating robust mitigation measures, infrastructure</p>			

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.4: Land North and South of Cattlegate Road	<p>Berkeley Homes (North East London) Ltd supports the allocation of land at Crews Hill for a residential-led mixed-use development under Strategic Policy PL11. Berkeley owns land parcels within the area and is fully in favor of the Local Plan's goals for Crews Hill, including its potential to develop a new, sustainable settlement around the under-utilized train station. 1) Support for Allocation: Berkeley agrees with the allocation of Crews Hill and acknowledges the exceptional circumstances justifying its removal from the Green Belt for development. The land is seen as suitable, available, and achievable for residential-led development.</p> <p>2) Site Allocation SA11.4: Berkeley supports the inclusion of the site known as Enfield Garden Centre (formerly Wyevale Garden Centre) within the Crews Hill Placemaking Area. The site is well-suited for development, being previously developed land with minimal constraints. While Berkeley supports the general principles of the SA11.4 site allocation policy, it suggests some specific modifications to enhance the policy's effectiveness and ensure soundness.</p> <p>Modifications Suggested: 1) Primary School Location: Berkeley proposes flexibility in the policy regarding the location of a primary school. They suggest that the Enfield Garden Centre site could potentially host the primary school, depending on the comprehensive masterplanning stage. The policy should allow for this possibility by reflecting it in the masterplan requirements. 2) Infrastructure Requirements: Berkeley recommends updating Policy SA11.4 to include the potential for the primary school to be located within this site if future planning indicates it is a suitable location. The policy should thus be adjusted to provide for this flexibility. In summary, Berkeley Homes supports the Crews Hill allocation but advocates for specific amendments to the policy to better accommodate potential uses and infrastructure needs identified during future masterplanning.</p>	<p>enhancements, and community-focused strategies to balance housing needs with environmental protection and quality of life considerations.</p> <p>The Council welcome Berkeley's endorsement of the Local Plan's objectives and their positive assessment of the potential for this new sustainable settlement centered around the existing train station. The Council appreciates their feedback on Site Allocation SA11.4, including the Enfield Garden Centre site, and Berkeley's support for the general allocation policy. The Council understand the site's suitability for development based on its existing use and characteristics. The Council acknowledge Berkeley's suggestion regarding the potential location of a primary school at the Enfield Garden Centre site. The support for the allocation is welcomed, and that work on the spatial frameworks has sought to identify suitable locations for essential infrastructure, including primary schools. However, the comprehensive masterplanning process will further refine these locations. The Council believes that the policy as currently drafted provides sufficient flexibility for the location of the primary school to be adjusted based on future masterplanning outcomes. Therefore, we do not consider the suggested modification necessary to make the plan sound. Berkeley's input on infrastructure requirements is valuable. The Council agree that the policy should be adaptable to align with the outcomes of the masterplanning process. The Council will ensure that the policy accommodates the flexibility needed for effective infrastructure delivery as part of the comprehensive masterplan. The Council remains committed to collaborating with stakeholders, including Berkeley Homes, to refine policies and ensure they are both sound and deliverable. The forthcoming masterplanning and SPD processes will provide further opportunities to address detailed site-specific needs and infrastructure considerations.</p>	No	01916	Berkeley Homes (North East London) Ltd
SA11.4: Land North and South of Cattlegate Road	<p>Thompsons of Crews Hill Ltd's concerns regarding Policy PL11 reflect broader issues already raised with Policy SS1, emphasizing a lack of clear and justified reasoning for Green Belt release at Crews Hill. The company argues that: 1) Ambiguity in Policy Requirements: The policy lacks clarity, particularly with its requirement for a 'detailed comprehensive masterplan' before planning permissions are granted. The referenced figure 3.14 is considered too vague and general, lacking specificity about development areas and local centre frontages impacting Thompsons' land. 2) Contradictory and Imprecise Criteria: Criteria 9's provision for the potential relocation of existing rural uses, including horticultural businesses, is seen as contradictory and imprecise. The policy emphasizes the importance of retaining these</p>	<p>The Enfield Local Plan is a robust and legally compliant framework, meticulously developed to address housing needs while adhering to national policies and safeguarding local character. The plan's approach to Green Belt release, including at Crews Hill, is both justified and necessary, as detailed in the council's comprehensive evidence base. The Local Plan is grounded in up-to-date and extensive research, including the Exceptional Circumstances Topic Paper. This document clearly demonstrates that the release of Green Belt land at Crews Hill is driven by exceptional circumstances, such as the pressing need to meet the borough's substantial housing targets. The evaluation of Green Belt sites has been thorough, with detailed assessments confirming that alternative brownfield sites have been exhaustively explored and deemed insufficient to meet the required</p>	No	01750	Thompsons of Crews Hill Ltd

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.4: Land North and South of Cattlegate Road	<p>uses while also allowing for their relocation if sites become unsuitable, without defining which uses or the criteria for their suitability.</p> <p>3) Uncertain Use of Compulsory Purchase Powers: The mention of compulsory purchase powers in paragraph 3.172 introduces further uncertainty. Thompsons criticizes the lack of meaningful engagement with affected businesses and residents prior to the draft Local Plan, leading to a decision that appears pre-determined and unresponsive to local feedback. Overall, Thompsons argues that the policy is flawed due to inadequate consultation and insufficient detail, suggesting that the entire site allocation and evidence base should be reviewed. They call for a revised policy and additional consultation before any decision on the Crews Hill allocation is finalized.</p> <p>Warmerden & Co (Crews Hill) Ltd supports the principle of Biodiversity Net Gain (BNG) but raises concerns regarding its application in the Draft Enfield Local Plan (ELP). They point out that the '2023 Whole Plan – Viability Update' by HDH Planning & Development used a 10% BNG figure in development appraisals, rather than the 20% required by Policy CR11. They argue that either Policy CR11 should be adjusted to reflect a 10% BNG, or the appraisals should be recalculated with the 20% BNG figure. Additionally, they note that Policy BG4 also references both 10% and 20% BNG figures, causing further inconsistency. Warmerden & Co strongly supports releasing Crews Hill from the Green Belt to develop a sustainable community but emphasizes the importance of ensuring that the plan remains viable and deliverable throughout the plan period, in line with the National Planning Policy Framework (NPPF) requirements.</p>	<p>housing demand. The Spatial Strategy and Overall Approach Topic Paper outlines the strategic necessity of Green Belt release to accommodate Enfield's growth. The selection process for these sites includes rigorous analysis to ensure that the release is justified, proportionate, and in line with national policy requirements. The plan balances the need for new housing with the preservation of local character and amenities, demonstrating a careful and deliberate approach to urban planning. The Housing Topic Paper and the Local Housing Needs Assessment provide a detailed analysis of housing requirements, reflecting realistic capacity assessments. The housing targets are aligned with anticipated needs, ensuring that growth is sustainable and supportive of community development. The plan includes provisions for family housing and considers the benefits of urban regeneration, as mandated by Policy D3 of the London Plan. This comprehensive approach ensures that development aligns with both local and regional planning objectives. The Exceptional Circumstances Topic Paper articulates the rationale behind Green Belt release, highlighting the necessity of such measures to address the urgent housing need while maintaining compliance with the National Planning Policy Framework (NPPF). This paper, along with other planning documentation, provides clear evidence that the decision to release Green Belt land is not taken lightly but is essential to achieving a balanced and sustainable growth strategy. The Local Plan has undergone extensive consultation, ensuring that community feedback and local needs have been incorporated into the final policy. The process has been transparent and inclusive, allowing for meaningful input from stakeholders, including existing businesses and residents. In summary, the Enfield Local Plan is a well-founded and legally sound document that effectively addresses the borough's housing needs while upholding national planning policies. The release of Green Belt land, including at Crews Hill, is supported by comprehensive evidence and justified within the broader context of sustainable development and strategic planning.</p> <p>Comments noted. The policy for a 20% BNG is informed by the unique local circumstances and strategic environmental goals outlined in the Blue and Green Enfield evidence base. The higher percentage is aimed at significantly enhancing biodiversity across the borough, aligning with Enfield's broader sustainability and environmental enhancement objectives. While the Environment Act sets a minimum of 10%, local authorities can require higher gains if justified by local conditions and strategic priorities. The Council appreciates their input regarding site allocation SA RUR.07. The policy aims to enhance public accessibility and the quality of open spaces, which is crucial for supporting community well-being and biodiversity. As indicated in our Blue and Green Enfield strategy, these improvements will be determined through detailed planning applications and development management</p>	No	01730	Warmerden & Co (Crews Hill) Ltd

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.4: Land North and South of Cattlegate Road	<p>Warmerden & Co (Crews Hill) Ltd acknowledges the importance of affordable housing but raises concerns about the feasibility of the 50% affordable housing requirement in Policy H2 for the Crews Hill area. They highlight that while Policy H2 sets a target of 50% affordable housing for greenfield sites like Crews Hill, the '2023 Whole Plan – Viability Update' by HDH Planning & Development indicates that development at Crews Hill is currently only marginally viable. They note that the viability assessment shows that the Residual Value for Crews Hill is below the Benchmark Land Value (BLV) and only slightly above the Existing Use Value (EUV), classifying it as 'amber' or marginal in terms of viability. Given this, they argue that a flexible approach should be taken to ensure that development remains viable, especially in the early stages. Warmerden & Co also suggests that the Council should review competing development costs such as Section 106 contributions, Community Infrastructure Levy (CIL) rates, and costs associated with potentially contaminated land at Crews Hill. They support the release of Crews Hill from the Green Belt for sustainable development but stress the need for the plan to be both effective and deliverable throughout the plan period, in line with National Planning Policy Framework (NPPF) guidelines.</p>	<p>processes, ensuring that the enhancements are practical and aligned with local needs.</p> <p>The '2023 Whole Plan – Viability Update' justifies that greenfield sites, particularly in higher-value areas of the Borough, can support substantial levels of affordable housing, up to 50%, due to their higher residual values compared to urban sites. Despite current marginal viability at Crews Hill, these sites have the potential to achieve and exceed the 50% target as market conditions improve. The report acknowledges the sensitivity of viability assessments to market changes, anticipating that improved conditions will enhance financial viability. Policy H2 incorporates the Viability Tested Route (VTR) to address site-specific viability issues, allowing developers to negotiate affordable housing levels based on realistic assessments. This flexible approach ensures the policy remains adaptable while striving for high affordable housing targets. The viability update accounts for development costs, including Section 106 contributions, CIL rates, and land remediation, supporting the feasibility of higher affordable housing on greenfield sites, aligning with the Local Plan's long-term goals for a sustainable and inclusive community at Crews Hill.</p>	No	01730	Warmerden & Co (Crews Hill) Ltd
SA11.4: Land North and South of Cattlegate Road	<p>Warmerden & Co (Crews Hill) Ltd suggests modifying Point g 'ii' of Policy H3, which requires that for affordable housing on publicly owned sites and Green Belt land, 20% of units must be two bedrooms and 40% must be family housing as defined by the London Plan. They propose changing this to: "For affordable housing schemes on publicly owned sites and areas released from the Green Belt, a minimum of 20% of units should be two bedrooms, while 40% should meet the London Plan definition of family housing, as an average across the entire Crews Hill Placemaking Area." This adjustment aims to enhance development viability, particularly in the early phases of the Crews Hill development. They argue that sites close to the station, which are more suited to higher-density development, might be better served with a lower proportion of family units. In contrast, areas further from the station could provide a higher proportion of family units to meet the overall 40% target. Warmerden & Co supports the long-term vision of creating a sustainable community at Crews Hill but emphasizes that the plan must remain viable and deliverable throughout the development period, in line with National Planning Policy Framework (NPPF) standards.</p>	<p>Comments noted.</p> <p>The 'Entire Local Housing Needs Assessment (2020)' highlights a significant need for family-sized homes across the Borough, particularly in areas like Crews Hill. The assessment identifies a strong demand for larger, family-oriented housing to address growing family needs. Therefore, maintaining the Policy H3 requirement of 40% family housing for affordable schemes remains crucial for meeting these identified needs. The 'Crews Hill Topic Paper (2024)' outlines that the Crews Hill Placemaking Area (CHPA) is envisioned as a mixed-use, sustainable community. This long-term vision includes accommodating a range of housing types to create a balanced and inclusive community. While higher-density development near the station is appropriate, the policy's aim to achieve a 40% family housing requirement is integral to ensuring that a sufficient proportion of family-sized homes is delivered throughout the CHPA, not just in specific areas. The '2023 Whole Plan – Viability Update' recognises that greenfield sites, including Crews Hill, have the potential to support higher levels of affordable housing due to generally higher residual values. This supports the feasibility of adhering to the 40% family housing requirement. The update acknowledges that development viability is influenced by various factors, but greenfield sites are positioned to accommodate ambitious housing targets. The flexibility of the Viability Tested Route (VTR) within Policy H3 allows for site-</p>	No	01730	Warmerden & Co (Crews Hill) Ltd

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.4: Land North and South of Cattlegate Road	<p>Warmerden & Co (Crews Hill) Ltd argues that Policy PL11's current requirements for Crews Hill may undermine development viability due to high Section 106 and CIL costs, which, combined with the area's marginal viability as indicated in the '2023 Whole Plan – Viability Update,' could hinder the project's feasibility. They propose adjustments such as reducing S.106 contributions, implementing a more flexible CIL rate, allowing some flexibility in affordable housing percentages, and incorporating alternative residential uses like care homes and Build to Rent (BTR) to enhance viability. They recommend updating policy points to reflect these changes while supporting the long-term vision of a sustainable Crews Hill community.</p>	<p>specific adjustments without compromising overall policy objectives. While the viability update indicates that development near the station might be more challenging, it does not justify reducing the overall family housing percentage. Instead, the VTR allows for adjustments on a case-by-case basis to address specific viability concerns. Reducing the family housing requirement in one area could undermine the broader objective of delivering sufficient family homes across the entire CHPA. Maintaining the 40% family housing requirement supports the goal of creating a diverse and sustainable community, as outlined in the Enfield Local Plan and the Crews Hill Topic Paper. This approach ensures that the community is not only economically viable but also meets long-term social and demographic needs. While Warmerden & Co's proposal aims to enhance early-phase viability, the existing policy framework, supported by the Local Housing Needs Assessment and Viability Update, provides a comprehensive approach to balancing housing needs and development viability. The 40% family housing target remains essential to fulfilling identified needs and ensuring a sustainable, inclusive community at Crews Hill. The VTR within Policy H3 provides necessary flexibility to address site-specific challenges while upholding the overall policy objectives.</p>	No	01730	Warmerden & Co (Crews Hill) Ltd
		<p>Comments noted.</p> <p>The Local Housing Needs Assessment highlights the pressing need for family-sized homes across the Borough, underscoring the importance of the 40% family housing requirement to meet these needs. The Crews Hill Topic Paper supports a comprehensive approach to development, stressing that the housing mix must align with the long-term vision for a balanced and sustainable community. The Viability Update acknowledges the current marginal viability at Crews Hill but indicates that greenfield sites can support higher affordable housing levels as market conditions improve. While Warmerden & Co suggests reducing CIL and Section 106 costs, providing flexibility in affordable housing provisions, and allowing alternative residential uses (such as care homes and Build to Rent) to enhance viability, these measures should be balanced against the need to achieve the overall policy objectives. Specifically, reducing CIL and S106 costs could be considered to improve viability, but any adjustments should be carefully calibrated to avoid compromising essential infrastructure funding. Similarly, while flexibility in affordable housing provision and incorporating alternative residential uses may address viability concerns, these changes should not undermine the overall goal of delivering a significant proportion of family-sized homes. Furthermore, ensuring that applications within separate development parcels do not prejudice the delivery of the strategic allocation is crucial to maintain a cohesive and well-integrated development. Maintaining the 40% family housing requirement and adhering to the strategic infrastructure and design principles will ensure that Crews Hill meets both immediate and long-term housing needs while supporting sustainable development.</p>			

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.4: Land North and South of Cattlegate Road	<p>Warmerden & Co (Crews Hill) Ltd highlights several concerns with Policy PL11 regarding the viability of development at Crews Hill. They point out that the current requirements for substantial Section 106 contributions and CIL costs, combined with the high affordable housing target of 50%, make the development marginally viable, as indicated by the '2023 Whole Plan – Viability Update'. They propose several adjustments to improve viability, including reducing S.106 costs, adjusting CIL rates, and offering flexibility in affordable housing provision. They also suggest allowing alternative residential uses, such as care homes and Build to Rent (BTR), and updating the infrastructure and design principles to ensure that development parcels do not hinder the overall strategic vision. Their recommendations aim to balance the need for high-quality, affordable housing with the practicalities of ensuring that development at Crews Hill is feasible and can proceed within the planned timeframe.</p>	<p>Comments acknowledged.</p> <p>The Local Housing Needs Assessment highlights the urgent need for family-sized homes across the Borough, validating the 40% family housing requirement as essential to meeting this demand. The Crews Hill Topic Paper reinforces the need for a comprehensive development approach that aligns with the long-term vision for a balanced and sustainable community. Although the Viability Update highlights the current marginal viability at Crews Hill, it notes that greenfield sites can potentially support higher affordable housing levels as market conditions improve. Warmerden & Co's suggestions to reduce CIL and Section 106 costs, provide flexibility in affordable housing, and allow alternative residential uses, such as care homes and Build to Rent, aim to enhance viability. However, these measures must be weighed against the need to achieve overall policy objectives. While adjusting CIL and S106 costs could help improve viability, such adjustments must be carefully considered to avoid undermining essential infrastructure funding. Similarly, while flexibility in affordable housing and alternative residential uses could address viability concerns, these changes should not compromise the goal of delivering a substantial proportion of family-sized homes. Ensuring that separate development parcels do not hinder the strategic allocation is crucial for cohesive development. The plan's flexibility on affordable housing provision is addressed elsewhere, and necessary infrastructure contributions are supported by a forthcoming SPD, will coordinate land use, design, phasing, and infrastructure requirements, ensuring that Crews Hill meets both current and future housing needs while supporting sustainable development.</p>	No	01730	Warmerden & Co (Crews Hill) Ltd
SA11.4: Land North and South of Cattlegate Road	<p>Warmerden & Co (Crews Hill) Ltd notes a discrepancy between maps in the Draft Enfield Local Plan (ELP), Figure 2.2, which depicts the London Borough of Enfield, shows the 'Crews Hill Placemaking Area' as being within the Green Belt. However, this conflicts with Figure 2.4, which indicates that the area is not within the Green Belt. Warmerden & Co suggests that Figure 2.2 be updated to accurately reflect the current status of the Crews Hill Placemaking Area or be clarified to indicate that the map shows the existing Green Belt boundaries rather than proposed changes.</p>	<p>Noted. The Council suggest a minor modification to align the Green Belt boundary depicted in Figure 2.2 with the boundary shown on the proposals map to ensure clarity and consistency.</p>	No	01730	Warmerden & Co (Crews Hill) Ltd
SA11.4: Land North and South of Cattlegate Road	<p>Residents object to the proposal for 5,500 homes at Crews Hill, arguing it fails to comply with Green Belt regulations and the NPPF. They believe it will destroy the area's character, harm the environment and biodiversity, and lead to urban sprawl. Concerns include the loss of open landscapes, agricultural land, popular garden centers, and Sites of Importance for Nature Conservation. The car-dependent development would increase congestion and pollution. Residents argue the proposal does not address the housing crisis effectively and</p>	<p>Comments noted. The Local Plan seeks to significantly increase the number of new homes to meet a wide range of needs including affordable homes, accessible homes and homes for older people. It also seeks to regenerate and renew the Borough and is considered to be an appropriate strategy. The Enfield Exceptional Circumstances Topic Paper outlines the justification for releasing Green Belt land to meet Enfield's housing and employment needs. It evaluates the balance between development requirements and Green Belt</p>	No	01900	Alison Gracie

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	fails to meet the "exceptional circumstances" required for Green Belt development.	protection, ensuring alignment with national and regional policies like the NPPF and London Plan. The paper details the specific circumstances under which Green Belt boundaries may be adjusted, emphasizing the necessity of sustainable development while maintaining the Green Belt's primary functions, such as preventing urban sprawl and preserving open space. For more details, refer to the Exceptional Circumstances Topic Paper.			
SA11.5: Land East of Theobalds Road Park, Crews Hill	GF Planning, on behalf of their client confirms the landowners are working together and confirms that the sites are suitable (SA11.5: Land East of Theobalds Road Park, Crews Hill and SA11.4: Land North and South of Cattlegate Road).	Comments noted.	No	00014	GfPlanning
SA11.5: Land East of Theobalds Road Park, Crews Hill	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA11.5: Land East of Theobalds Road Park, Crews Hill	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA11.5: Land East of Theobalds Road Park, Crews Hill	Enfield Road Watch's response to the local plan for the "Land East of Theobalds Park Road" raises several issues. They argue that the proposed 550 new homes are not justified given the identified land area, which could only support a fraction of the housing target. Concerns about the inclusion of a secondary school and the unclear intentions of various landowners add to doubts about the plan's feasibility. The creation of a new public park along Cuffley Brook and an improved setting for Whitewebbs Museum of Transport are questioned due to uncertainties around landownership and practical implementation.	Comments noted. The Council assets that the development plans are both feasible and aligned with strategic goals, ensuring sustainable and well-planned growth for the area. The housing targets have been carefully assessed, taking into account potential densities and land availability. The Council has considered different density scenarios and concluded that the proposed number of homes is achievable, this is set out in the Chase Park Topic Paper. The infrastructure planning process includes provisions for educational facilities to meet future demands. The secondary school has been strategically included to ensure comprehensive educational coverage for new and existing residents. The Council is actively engaging with landowners and has	No	01687	Enfield Road Watch

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
		mechanisms in place to facilitate cooperation and land assembly, including the potential use of Compulsory Purchase Orders (CPO) if necessary. The creation of a new public park along Cuffley Brook and the improvement of the setting for Whitewebbs Museum are integral parts of the plan, ensuring enhanced green spaces and cultural heritage preservation. The Council has plans to work closely with landowners and stakeholders to ensure these enhancements are realized effectively.			
SA11.5: Land East of Theobalds Road Park, Crews Hill	HCC's response highlights that the site contains areas of Cuffley Brook, and any discharge must be restricted to greenfield rates and volumes. The site also includes areas within Flood Zone 2 and 3, and HCC recommends consulting the Environment Agency on any proposals for this site.	Comments noted. The Council will ensure early engagement between Enfield LLFA and developers to address these recommendations. The Council will seek to address these concerns through a Statement of Common Ground (SoCG) with Hertfordshire County Council and the Environment Agency.	No	01755	Hertfordshire County Council as Lead Local Flood Authority (LLFA)
SA11.5: Land East of Theobalds Road Park, Crews Hill	HCC views the PL11 (SA11.1 – SA 11.6) Crews Hill development as having a slightly negative ecological impact on Hertfordshire, reducing habitat extent and connectivity. The mixed-use area will shift from agriculture, development, and leisure to potentially enhance some ecological features through Biodiversity Net Gain initiatives. Although the current land lacks substantial ecological interest, indirect impacts like increased visitor pressure on local wildlife sites and reserves are uncertain. The extent of these impacts depends on the Green Infrastructure proposals for Crews Hill within Enfield, which are currently unknown.	Comments noted. The Crews Hill Topic Paper and supporting evidence emphasize Enfield's commitment to integrating Biodiversity Net Gain initiatives and thoughtful design into the Crews Hill development. The development is designed to enhance ecological characteristics, and a forthcoming Supplementary Planning Document (SPD) will address Green Infrastructure (GI) proposals, ensuring a balanced approach to ecological preservation and development. Additionally, early engagement between Enfield's Local Lead Flood Authority (LLFA) and developers is planned to manage ecological impacts effectively. The council will also prepare a Statement of Common Ground with HCC and the Environment Agency to address specific concerns and ensure adherence to national policy and best practices. This collaborative approach aims to mitigate potential negative impacts and optimize ecological benefits for both Enfield and Hertfordshire.	No	01755	Hertfordshire County Council - Ecology
SA11.5: Land East of Theobalds Road Park, Crews Hill	Hertfordshire County Council (HCC) views the Crews Hill development proposal (PL11, SA11.1-SA11.6) as slightly negative for Hertfordshire's ecology, reducing semi-natural habitats' extent and connectivity. While the current landscape has limited ecological value due to intensive farming, the development may alter mixed land uses and degrade some ecological characteristics but could enhance others through Biodiversity Net Gain initiatives. Potential indirect impacts include increased visitor pressure on Hertfordshire's rural sites. The extent of these impacts depends on the Green Infrastructure (GI) proposals for Crews Hill.	Comments noted. The Council is committed to addressing potential ecological impacts through our comprehensive planning framework and the forthcoming Supplementary Planning Document (SPD). The Crews Hill Topic Paper (2024) emphasizes the integration of Green Infrastructure (GI) and Biodiversity Net Gain (BNG) initiatives to enhance ecological value and connectivity. Strategic measures will be employed to mitigate visitor pressure on nearby sites, supported by our Green and Blue Infrastructure (GBI) strategies. Cross-boundary collaboration will be key, and the Council is open to working closely with HCC to ensure effective implementation and mitigation strategies, promoting sustainable growth and ecological enhancement in both regions.	No	01755	Hertfordshire County Council - Ecology

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.5: Land East of Theobalds Road Park, Crews Hill	The Enfield Society's concerns regarding the land east of Theobalds Park Road include potential significant harm to the Glasgow Stud SINC due to unclear development limits, lack of clarity on new green spaces, and potential ineffectiveness due to uncertain landowner intentions. While the creation of a new park near the Whitewebbs Transport Museum is supported, residential development could harm the rural character of Whitewebbs Road. Development should avoid the SINC to maintain ecological integrity, and more detailed plans are needed for clear decision-making.	Comments noted. The concerns raised by the Enfield Society about the land east of Theobalds Park Road are addressed using the Crews Hill Topic Paper 2024. 1) SINC Protection: The Topic Paper outlines measures to protect the Glasgow Stud SINC, ensuring no development within the sensitive northern part. 2) Green Spaces: It specifies locations for new green spaces aligned with existing watercourses, ensuring clear guidelines for decision-makers. 3) Whitewebbs Transport Museum: The proposal for a new park near the museum aligns with the Topic Paper's aim to enhance its setting, ensuring any housing development respects the rural character of Whitewebbs Road. 4) Sustainability and Biodiversity: The Topic Paper emphasizes sustainable development and biodiversity net gain, addressing ecological concerns and supporting a comprehensive master-planned approach for balanced growth.	No	01794	Enfield Society
SA11.5: Land East of Theobalds Road Park, Crews Hill	The Barnet Society supports concentrating new development around Crews Hill Station and retaining the area's horticultural and food-producing industries. However, they express strong reservations about the commercial viability of Crews Hill's businesses due to rising land values and traffic congestion. They request a commitment in the Plan to protect these businesses. Additionally, they stress the need for significant rail, road, and other transport improvements to accompany any development, noting a lack of detailed proposals for Crews Hill in Enfield's Strategic Policies T1, T2, and T3.	Comments noted. The Council recognizes the importance of maintaining Crews Hill's horticultural and food-producing industries and aims to address commercial viability concerns through comprehensive planning and support. The council's Strategic Policies T1, T2, and T3 are designed to address transportation improvements, with specific enhancements to Crews Hill's infrastructure being developed in alignment with the overall strategic growth objectives. The detailed transport proposals will ensure that the area can support new developments while maintaining its commercial and environmental integrity.	No	01817	Barnet Society
SA11.5: Land East of Theobalds Road Park, Crews Hill	TfL recommends that the requirements state any car parking must be minimised and consistent with the ambition of achieving a 75% sustainable transport mode share. This will necessitate parking levels substantially lower than London Plan maximum standards and should consider future rather than existing PTAL. While there is a requirement for a public transport bridge over the railway, the infrastructure requirements should also explicitly call for substantial contributions towards public transport to improve connectivity to a level comparable with urban placemaking areas in the borough. TfL notes the absence of a reference to development being within 400 meters of a bus stop, which is included in the design principles for SA11.1 and SA11.3. A costed and agreed Infrastructure Delivery Plan should be submitted to outline the full package of transport infrastructure for all Crews Hill sites. TfL is concerned that dividing the Crews Hill placemaking area into six separate site allocations could lead to parts being developed before agreeing on the necessary infrastructure requirements and costs for the entire area.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.5: Land East of Theobalds Road Park, Crews Hill	Lea Valley Growers Association object to the loss of popular garden centres and supporting businesses in Crews Hill for housing development. They advocate enhancing horticultural activities to make it a hub for food and plant production. They argue that Enfield's housing targets can be met on brownfield sites, as evidenced in the "Space to Build" report, which identifies locations for 37,000 homes. They emphasize the Green Belt's value for environmental, ecological, economic, and public health reasons, urging the Council to protect it in line with the London Plan and NPPF.	<p>Comments noted.</p> <p>The Council's strategy is justified. The plan's target of 1,246 net new homes a year is considered the minimum required. The plan sets out general presumption of brownfield first approach to delivering sustainable growth by focusing development within growth areas, district town centres and around transport hubs. Plan is supported by the Infrastructure Delivery Plan (IDP) which identifies Enfield's infrastructure needs comprehensively. The Enfield Exceptional Circumstances Topic Paper outlines the justification for releasing Green Belt land to meet Enfield's housing and employment needs. It evaluates the balance between development requirements and Green Belt protection, ensuring alignment with national and regional policies like the NPPF and London Plan. The paper details the specific circumstances under which Green Belt boundaries may be adjusted, emphasizing the necessity of sustainable development while maintaining the Green Belt's primary functions, such as preventing urban sprawl and preserving open space.</p>	No	01910	Lea Valley Growers Association
SA11.5: Land East of Theobalds Road Park, Crews Hill	FZ2 and FZ3	<p>The Enfield Local Plan's spatial strategy and site allocation papers emphasize the importance of integrating significant residential developments with transport infrastructure and environmental considerations. Transport Capacity: The plan acknowledges the current strain on the Herford Loop line but outlines strategies for improving rail capacity and connectivity to mitigate potential impacts. This includes coordination with transport providers to explore enhancements and better integrate new developments with existing transport infrastructure, ensuring that increased commuter demand does not overwhelm the system. Environmental Impact: The Crews Hill Topic Paper highlights that the development will incorporate measures to protect local Sites of Importance for Nature Conservation, views from the Ridgeway, and the rural character of surrounding areas. Mitigation strategies, such as preserving key green spaces and integrating natural features into the development, aim to balance housing needs with environmental preservation. Local Services and Amenities: The plan recognizes the need to maintain and potentially enhance local services and amenities, including garden centers and businesses, by integrating these considerations into the development framework to prevent adverse impacts on existing community assets. Overall, the Enfield Local Plan addresses these concerns by aligning development with strategic infrastructure improvements and environmental safeguards, aiming to ensure that the proposed development at Crews Hill is sustainable and beneficial for the community.</p>	No	01926	Environment Agency
SA11.5: Land East of Theobalds	The Edmonton and Winchmore Hill Conservative Association objects to the proposal for 5,500 homes on the Crews Hill Green Belt site, citing concerns about the capacity of local transport infrastructure.	The Enfield Local Plan's spatial strategy and site allocation papers emphasize the importance of integrating significant residential developments with transport infrastructure and environmental	No	01784	Edmonton and Winchmore Hill

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
Road Park, Crews Hill	<p>particularly the already overburdened Hertford Loop line. The potential increase in commuter demand could exacerbate congestion on peak services, impacting stations further along the line such as Grange Park and Winchmore Hill. Additionally, they highlight potential adverse effects on local Sites of Importance for Nature Conservation, views from the Ridgeway, and the rural character of nearby landmarks and businesses. They argue that these issues undermine the soundness of the plan, suggesting it should be reconsidered.</p>	<p>considerations. Transport Capacity: The plan acknowledges the current strain on the Hertford Loop line but outlines strategies for improving rail capacity and connectivity to mitigate potential impacts. This includes coordination with transport providers to explore enhancements and better integrate new developments with existing transport infrastructure, ensuring that increased commuter demand does not overwhelm the system. Environmental Impact: The Crews Hill Topic Paper highlights that the development will incorporate measures to protect local Sites of Importance for Nature Conservation, views from the Ridgeway, and the rural character of surrounding areas. Mitigation strategies, such as preserving key green spaces and integrating natural features into the development, aim to balance housing needs with environmental preservation. Local Services and Amenities: The plan recognizes the need to maintain and potentially enhance local services and amenities, including garden centers and businesses, by integrating these considerations into the development framework to prevent adverse impacts on existing community assets. Overall, the Enfield Local Plan addresses these concerns by aligning development with strategic infrastructure improvements and environmental safeguards, aiming to ensure that the proposed development at Crews Hill is sustainable and beneficial for the community.</p>			Conservative Association
SA11.5: Land East of Theobalds Road Park, Crews Hill	<p>The Federation of Enfield Residents & Allied Associations, represented by Peter Gibbs, raised several significant concerns about the Enfield Local Plan, particularly regarding Policies PL10 and PL11, for Policy PL11: They contend that the Crews Hill development plan, which proposes several thousand residential units, conflicts with the NPPF's quality-of-life objectives. The plan is criticized for not addressing the site's Green Belt status and the potential loss of valued horticultural enterprises and leisure facilities. The site's road access and infrastructure are deemed insufficient for the proposed scale of development, exacerbating existing congestion issues and pollution concerns. They argue that the plan fails to address the quality of living issues and does not provide a feasible solution for local employment or transportation, which would result in a commuter-centric development without adequate local amenities. In both cases, the Federation asserts that the plans should be revised or deleted to ensure they meet legal and planning soundness requirements.</p>	<p>The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. The Crews Hill proposal carefully considers the Green Belt status and includes provisions for maintaining essential green spaces while allowing for necessary housing development. The Local Plan emphasizes the protection of Green Belt land and includes measures to minimize impact, such as maintaining buffers and enhancing surrounding green areas. The proposal reflects the plan's strategic need to balance housing demand with environmental preservation.</p> <p>Infrastructure and Employment: The development plan includes comprehensive infrastructure improvements, including road upgrades and enhanced public transport options. Although the site is currently constrained by limited road access, the Local Plan outlines specific measures to address these constraints, including potential upgrades to local roads and connections to the M25. The plan also seeks to integrate local employment opportunities by retaining some existing commercial uses and encouraging new business ventures in the area.</p> <p>The plan acknowledges the value of existing horticultural businesses and includes strategies to support their continued operation where possible. The impact on local businesses and the environment is being managed through detailed planning and consultation processes, ensuring that the development aligns with the Local Plan's goals for</p>	No	03272	Federation of Enfield Residents & Allied Associations

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.5: Land East of Theobalds Road Park, Crews Hill	Glasgow Stud's concerns highlight several potential issues with the Local Plan's adherence to the National Planning Policy Framework (NPPF), particularly regarding the clarity and effectiveness of policies and the overall strategy for development. The Local Plan, as represented in figures 3.13 and 3.14, shows broad areas for development without detailed, specific allocations. This vagueness conflicts with NPPF requirements for clear, unambiguous policies. The site allocation maps and the unclear status of "white land" and other areas potentially compromise the plan's effectiveness and transparency. Glasgow Stud's land is significantly impacted by the current proposals. The Regulation 19 Plan labels large portions of their land as part of "Whitewebbs Park," which the Trust believes may be an error. The proposed access routes and their safety are also questioned, indicating a lack of thorough engagement with site-specific details and concerns.	<p>sustainable growth and quality of life improvements. In summary, the Enfield Local Plan's policies are designed to address the Federation's concerns by incorporating robust mitigation measures, infrastructure enhancements, and community-focused strategies to balance housing needs with environmental protection and quality of life considerations.</p> <p>The Local Plan provides a clear framework for development through the Crews Hill Topic Paper and Site Allocation Topic Paper. Figures 3.13 and 3.14 offer a strategic overview of development areas, while acknowledging that detailed allocations will be further refined through Supplementary Planning Documents (SPDs). This approach aligns with NPPF guidelines, which emphasize the need for policies to be clearly written and unambiguous while allowing for detailed site-specific plans to be developed in subsequent stages.</p>	No	01869	The Glasgow Stud
SA11.5: Land East of Theobalds Road Park, Crews Hill	Glasgow Stud argues that a significant portion of their site is previously developed land, which the NPPF suggests should be prioritized for development. They question the exclusion of their land from the development area despite its potential for use and its existing condition as previously developed land. The Trust contends that the ecological value of their land has been misrepresented. They argue that the site's ecological importance, as assessed by their Preliminary Ecological Appraisal (PEA), is lower than suggested by the LPA. They claim that the site is suitable for development and that the environmental constraints have been overstated.	<p>The plan recognizes the value of previously developed land, consistent with NPPF Paragraphs 123 and 124, which emphasize prioritizing such land for development. The evidence base for the Local Plan, as detailed in the Site Allocation Topic Paper, considers various site characteristics, including previously developed status, to ensure that development is both sustainable and aligned with strategic priorities. The Enfield Local Plan incorporates comprehensive ecological and environmental assessments, as detailed in the Crews Hill Topic Paper. These assessments inform site allocations and ensure that environmental constraints are adequately considered. The Council remains open to reviewing additional ecological surveys provided by Glasgow Stud and integrating their findings into the planning process where applicable. We propose to work collaboratively with Glasgow Stud and other stakeholders to develop a Statement of Common Ground that addresses specific concerns about land use, access routes, and infrastructure.</p>	No	01869	The Glasgow Stud
SA11.5: Land East of Theobalds Road Park, Crews Hill	Residents object to the proposal for 5,500 homes at Crews Hill, arguing it fails to comply with Green Belt regulations and the NPPF. They believe it will destroy the area's character, harm the environment and biodiversity, and lead to urban sprawl. Concerns include the loss of open landscapes, agricultural land, popular garden centers, and Sites of Importance for Nature Conservation. The car-dependent development would increase congestion and pollution. Residents argue the proposal does not address the housing crisis effectively and	<p>Comments noted. The Local Plan seeks to significantly increase the number of new homes to meet a wide range of needs including affordable homes, accessible homes and homes for older people. It also seeks to regenerate and renew the Borough and is considered to be an appropriate strategy. The Enfield Exceptional Circumstances Topic Paper outlines the justification for releasing Green Belt land to meet Enfield's housing and employment needs. It evaluates the balance between development requirements and Green Belt protection, ensuring alignment with national and regional policies like</p>	No	01900	Alison Gracie

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	fails to meet the "exceptional circumstances" required for Green Belt development.	the NPPF and London Plan. The paper details the specific circumstances under which Green Belt boundaries may be adjusted, emphasizing the necessity of sustainable development while maintaining the Green Belt's primary functions, such as preventing urban sprawl and preserving open space. For more details, refer to the Exceptional Circumstances Topic Paper.			
SA11.6: Land South West of Theobalds Park Road	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA11.6: Land South West of Theobalds Park Road	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA11.6: Land South West of Theobalds Park Road	Enfield Road Watch's response to the local plan for the "Land southwest of Theobalds Park Road" raises several issues. They argue that Design Principles D and E are ineffective due to unclear landowner incentives for creating new public parks and habitats. The proposed 1,000 new homes are not justified, with calculations showing the identified land supports far fewer homes, raising concerns about urbanization impacts on the London LOOP footprint and Clay Hill Conservation Area. They also highlight potential car dependency due to early housing development ahead of the Local Centre.	Comments noted. The concerns about the effectiveness of Design Principles D and E are acknowledged. The Council plans to use its strategic planning powers, including potential Compulsory Purchase Orders (CPOs), to facilitate land assembly and development as outlined in the Chase Park Topic Paper 2024. The feasibility and viability of housing targets have been carefully assessed, as set out in the Site Allocation Topic Paper and Enfield Housing Topic Paper 2024, ensuring that proposed densities are appropriate for the context and landscape. Concerns about urbanization and ecological impacts are addressed through stringent planning measures. The spatial framework is illustrative, providing flexibility in development plans to preserve the area's character while meeting housing needs. The Council is committed to aligning development with regional transport strategies to reduce car dependency, supported by extensive consultations and cooperation with stakeholders, as set out in the ELP Spatial Strategy and Overall Approach Topic Paper. The preparation of a Supplementary Planning Document (SPD) for the Crews Hill area will ensure detailed planning and effective implementation of development plans.	No	01687	Enfield Road Watch

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA11.6: Land South West of Theobalds Park Road	HCC views the PL11 (SA11.1 – SA11.6) Crews Hill development as having a slightly negative ecological impact on Hertfordshire, reducing habitat extent and connectivity. The mixed-use area will shift from agriculture, development, and leisure to potentially enhance some ecological features through Biodiversity Net Gain initiatives. Although the current land lacks substantial ecological interest, indirect impacts like increased visitor pressure on local wildlife sites and reserves are uncertain. The extent of these impacts depends on the Green Infrastructure proposals for Crews Hill within Enfield, which are currently unknown.	Comments noted. The Crews Hill Topic Paper and supporting evidence emphasize Enfield's commitment to integrating Biodiversity Net Gain initiatives and thoughtful design into the Crews Hill development. The development is designed to enhance ecological characteristics, and a forthcoming Supplementary Planning Document (SPD) will address Green Infrastructure (GI) proposals, ensuring a balanced approach to ecological preservation and development. Additionally, early engagement between Enfield's Local Lead Flood Authority (LLFA) and developers is planned to manage ecological impacts effectively. The council will also prepare a Statement of Common Ground with HCC and the Environment Agency to address specific concerns and ensure adherence to national policy and best practices. This collaborative approach aims to mitigate potential negative impacts and optimize ecological benefits for both Enfield and Hertfordshire.	01755	No	Hertfordshire County Council - Ecology
SA11.6: Land South West of Theobalds Park Road	Hertfordshire County Council (HCC) views the Crews Hill development proposal (PL11, SA11.1-SA11.6) as slightly negative for Hertfordshire's ecology, reducing semi-natural habitats' extent and connectivity. While the current landscape has limited ecological value due to intensive farming, the development may alter mixed land uses and degrade some ecological characteristics but could enhance others through Biodiversity Net Gain initiatives. Potential indirect impacts include increased visitor pressure on Hertfordshire's rural sites. The extent of these impacts depends on the Green Infrastructure (GI) proposals for Crews Hill.	Comments noted. The Council is committed to addressing potential ecological impacts through our comprehensive planning framework and the forthcoming Supplementary Planning Document (SPD). The Crews Hill Topic Paper (2024) emphasizes the integration of Green Infrastructure (GI) and Biodiversity Net Gain (BNG) initiatives to enhance ecological value and connectivity. Strategic measures will be employed to mitigate visitor pressure on nearby sites, supported by our Green and Blue Infrastructure (GBI) strategies. Cross-boundary collaboration will be key, and the Council is open to working closely with HCC to ensure effective implementation and mitigation strategies, promoting sustainable growth and ecological enhancement in both regions.	01755	No	Hertfordshire County Council - Ecology
SA11.6: Land South West of Theobalds Park Road	The Enfield Society's concerns about the land southwest of Theobalds Park Road include the unclear designation of the Clay Hill Conservation Area in planning maps, with potential removal from the Green Belt. They worry about the proposed development's impact on the rural character of Wildwoods and Flash Lane. Additionally, they fear urbanization along Strayfield Road, which could harm the attractive rural character of the London LOOP and Hertfordshire Chain Walk paths.	Comments noted. Justification for this area's inclusion in the development plans considers the balance between preserving valuable rural character and accommodating growth. The Council's evidence indicates strategic planning to minimize impacts on key views and maintaining essential rural aspects while proposing necessary development to meet housing and community needs.	01794	No	Enfield Society
SA11.6: Land South West of Theobalds Park Road	The Barnet Society supports concentrating new development around Crews Hill Station and retaining the area's horticultural and food-producing industries. However, they express strong reservations about the commercial viability of Crews Hill's businesses due to rising land values and traffic congestion. They request a commitment in the Plan to protect these businesses. Additionally, they stress the need for significant rail, road, and other transport improvements to accompany	Comments noted. The Council recognizes the importance of maintaining Crews Hill's horticultural and food-producing industries and aims to address commercial viability concerns through comprehensive planning and support. The council's Strategic Policies T1, T2, and T3 are designed to address transportation improvements, with specific enhancements to Crews Hill's infrastructure being developed in alignment with the overall strategic growth objectives. The detailed transport proposals will ensure that the area can support	01817	No	Barnet Society

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	any development, noting a lack of detailed proposals for Crews Hill in Enfield's Strategic Policies T1, T2, and T3.	new developments while maintaining its commercial and environmental integrity.			
SA11.6: Land South West of Theobalds Park Road	TfL does not consider the sites at Chase Park (PL10) SA10.1 – SA10.4, Crews Hill (PL11) SA11.1 – SA11.6, land opposite Enfield Crematorium (RUR.01), and land between Camlet Way and Crescent West, Hadley (RUR.02) suitable for housing. This is due to their poor transport connectivity and the high costs required to provide sustainable transport access comparable to urban sites in the borough. Developing these sites is likely to lead to car-dependent development, which is contrary to the Good Growth objectives of the London Plan and the NPPF.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA11.6: Land South West of Theobalds Park Road	TfL welcomes the requirement that development should minimise parking.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA11.6: Land South West of Theobalds Park Road	Lea Valley Growers Association object to the loss of popular garden centers and supporting businesses in Crews Hill for housing development. They advocate enhancing horticultural activities to make it a hub for food and plant production. They argue that Enfield's housing targets can be met on brownfield sites, as evidenced in the "Space to Build" report, which identifies locations for 37,000 homes. They emphasize the Green Belt's value for environmental, ecological, economic, and public health reasons, urging the Council to protect it in line with the London Plan and NPPF.	Comments noted. The Council's strategy is justified. The plan's target of 1,246 net new homes a year is considered the minimum required. The plan sets out general presumption of brownfield first approach to delivering sustainable growth by focusing development within growth areas, district town centres and around transport hubs. Plan is supported by the Infrastructure Delivery Plan (IDP) which identifies Enfield's infrastructure needs comprehensively. The Enfield Exceptional Circumstances Topic Paper outlines the justification for releasing Green Belt land to meet Enfield's housing and employment needs. It evaluates the balance between development requirements and Green Belt protection, ensuring alignment with national and regional policies like the NPPF and London Plan. The paper details the specific circumstances under which Green Belt boundaries may be adjusted, emphasizing the necessity of sustainable development while maintaining the Green Belt's primary functions, such as preventing urban sprawl and preserving open space.	No	01910	Lea Valley Growers Association
SA11.6: Land South West of Theobalds Park Road	FZ2. Appendix C (page 457) states this site is in FZ1, this is incorrect, there is marginal FZ2.	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01926	Environment Agency
SA11.6: Land South West of Theobalds Park Road	Rockwell London Ltd, a housebuilder with interests in the Crews Hill Allocation (Policy PL11, SA 11.6), supports the plan's vision for delivering new homes and infrastructure at Crews Hill. They welcome the Green Belt release and the plan's ambition to create a sustainable	The Enfield Viability Update (2024) has been prepared to address and substantiate the viability assumptions for the Crews Hill allocation. Theobalds Park Road	<p>new community. Rockwell has engaged with the Council through Developer Forums and is committed to working with other promoters within SA11.6. However, Rockwell raises concerns about the viability of the plan, the timing and scope of the Supplementary Planning Document (SPD), and transparency regarding delivery assumptions. They believe the plan can be improved through modifications, including refining the SPD, reviewing viability evidence, including a detailed housing trajectory, and ensuring continued commitment from Enfield Estates.</p>	<p>carefully evaluated. The update demonstrates that the expected infrastructure contributions are feasible and aligned with current market conditions. The Council is committed to continually reviewing and refining these assumptions to ensure they reflect any changes in the economic landscape and development feasibility. The Council acknowledge the importance of the SPD in guiding the detailed implementation of the Crews Hill development. The Council is working to expedite the preparation of the SPD in parallel with the Local Plan process to ensure timely delivery. While specific adoption timelines may be subject to consultation and approval processes, we are prioritising the preparation of the SPD to minimize any delays. This approach will help ensure that all stakeholders, including Rockwell, have clarity on the design and phasing requirements. The Enfield Local Plan includes a detailed housing trajectory, which outlines the expected delivery rates and milestones for the Crews Hill allocation. This trajectory has been developed in conjunction with the viability evidence and is intended to provide a transparent view of how the housing targets will be met throughout the plan period. The Council is committed to maintaining transparency and will continue to provide updated information as necessary. The Council acknowledge the point regarding the importance of cooperation with Enfield's Property Services and are actively engaging with all key stakeholders, including Enfield's property service to ensure that the delivery of the Crews Hill development aligns with the broader vision and objectives of the Local Plan. Our ongoing discussions are aimed at addressing any issues that may impact the timely delivery of the project.</p>			
SA11.6: Land South West of Theobalds Park Road	<p>London Borough of Enfield Strategic Property Services (LBE SPS) supports the inclusion of Kings Oak Equestrian Centre in the CHPA for future development, recognizing its strategic location and potential to deliver new homes. They recommend its development in the early years of the plan period, suggesting a capacity of around 330 new homes based on a density of 75 dph. They emphasize the site's alignment with the Council's vision and objectives, and the justification for its release from the Green Belt under exceptional circumstances. Detailed design work will determine the final development quantum.</p>	<p>Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01946	LBE Strategic Property Services
SA11.6: Land South West of Theobalds Park Road	<p>London Borough of Enfield Strategic Property Services (LBE SPS) highlights the potential of Sunbeam Stud for development within the CHPA, emphasizing its logical location and ability to contribute to Enfield's strategic objectives. They note the site's omission from the phasing and density plans and recommend its inclusion to optimize housing delivery. LBE suggests the site, which is 7.38 hectares, could support around 369 new homes at a density of 50 dph. They advocate for early development within the plan period and seek a more detailed breakdown of the expected development from the Council.</p>	<p>Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01946	LBE Strategic Property Services

SA11.6: Land South West of Theobalds Park Road	<p>The Edmonton and Winchmore Hill Conservative Association objects to the proposal for 5,500 homes on the Crews Hill Green Belt site, citing concerns about the capacity of local transport infrastructure, particularly the already overburdened Herford Loop line. The potential increase in commuter demand could exacerbate congestion on peak services, impacting stations further along the line such as Grange Park and Winchmore Hill. Additionally, they highlight potential adverse effects on local Sites of Importance for Nature Conservation, views from the Ridgeway, and the rural character of nearby landmarks and businesses. They argue that these issues undermine the soundness of the plan, suggesting it should be reconsidered.</p>	<p>The Enfield Local Plan's spatial strategy and site allocation papers emphasize the importance of integrating significant residential developments with transport infrastructure and environmental considerations. Transport Capacity: The plan acknowledges the current strain on the Herford Loop line but outlines strategies for improving rail capacity and connectivity to mitigate potential impacts. This includes coordination with transport providers to explore enhancements and better integrate new developments with existing transport infrastructure, ensuring that increased commuter demand does not overwhelm the system. Environmental Impact: The Crews Hill Topic Paper highlights that the development will incorporate measures to protect local Sites of Importance for Nature Conservation, views from the Ridgeway, and the rural character of surrounding areas. Mitigation strategies, such as preserving key green spaces and integrating natural features into the development, aim to balance housing needs with environmental preservation. Local Services and Amenities: The plan recognizes the need to maintain and potentially enhance local services and amenities, including garden centers and businesses, by integrating these considerations into the development framework to prevent adverse impacts on existing community assets. Overall, the Enfield Local Plan addresses these concerns by aligning development with strategic infrastructure improvements and environmental safeguards, aiming to ensure that the proposed development at Crews Hill is sustainable and beneficial for the community.</p>	No	01784	Edmonton and Winchmore Hill Conservative Association
SA11.6: Land South West of Theobalds Park Road	<p>The Federation of Enfield Residents & Allied Associations, represented by Peter Gibbs, raised several significant concerns about the Enfield Local Plan, particularly regarding Policies PL10 and PL11 for Policy PL11: They contend that the Crews Hill development plan, which proposes several thousand residential units, conflicts with the NPPF's quality-of-life objectives. The plan is criticized for not addressing the site's Green Belt status and the potential loss of valued horticultural enterprises and leisure facilities. The site's road access and infrastructure are deemed insufficient for the proposed scale of development, exacerbating existing congestion issues and pollution concerns. They argue that the plan fails to address the quality of living issues and does not provide a feasible solution for local employment or transportation, which would result in a commuter-centric development without adequate local amenities. In both cases, the Federation asserts that the plans should be revised or deleted to ensure they meet legal and planning soundness requirements.</p>	<p>The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. The Crews Hill proposal carefully considers the Green Belt status and includes provisions for maintaining essential green spaces while allowing for necessary housing development. The Local Plan emphasizes the protection of Green Belt land and includes measures to minimize impact, such as maintaining buffers and enhancing surrounding green areas. The proposal reflects the plan's strategic need to balance housing demand with environmental preservation. Infrastructure and Employment: The development plan includes comprehensive infrastructure improvements, including road upgrades and enhanced public transport options. Although the site is currently constrained by limited road access, the Local Plan outlines specific measures to address these constraints, including potential upgrades to local roads and connections to the M25. The plan also seeks to integrate local employment opportunities by retaining some existing commercial uses and encouraging new business ventures in the area.</p>	No	03272	Federation of Enfield Residents & Allied Associations

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
		The plan acknowledges the value of existing horticultural businesses and includes strategies to support their continued operation where possible. The impact on local businesses and the environment is being managed through detailed planning and consultation processes, ensuring that the development aligns with the Local Plan's goals for sustainable growth and quality of life improvements. In summary, the Enfield Local Plan's policies are designed to address the Federation's concerns by incorporating robust mitigation measures, infrastructure enhancements, and community-focused strategies to balance housing needs with environmental protection and quality of life considerations.			
SA11.6: Land South West of Theobalds Park Road	Residents object to the proposal for 5,500 homes at Crews Hill, arguing it fails to comply with Green Belt regulations and the NPPF. They believe it will destroy the area's character, harm the environment and biodiversity, and lead to urban sprawl. Concerns include the loss of open landscapes, agricultural land, popular garden centers, and Sites of Importance for Nature Conservation. The car-dependent development would increase congestion and pollution. Residents argue the proposal does not address the housing crisis effectively and fails to meet the "exceptional circumstances" required for Green Belt development.	Comments noted. The Local Plan seeks to significantly increase the number of new homes to meet a wide range of needs including affordable homes, accessible homes and homes for older people. It also seeks to regenerate and renew the Borough and is considered to be an appropriate strategy. The Enfield Exceptional Circumstances Topic Paper outlines the justification for releasing Green Belt land to meet Enfield's housing and employment needs. It evaluates the balance between development requirements and Green Belt protection, ensuring alignment with national and regional policies like the NPPF and London Plan. The paper details the specific circumstances under which Green Belt boundaries may be adjusted, emphasizing the necessity of sustainable development while maintaining the Green Belt's primary functions, such as preventing urban sprawl and preserving open space. For more details, refer to the Exceptional Circumstances Topic Paper.	No	01900	Alison Gracie
SA11.6: Land South West of Theobalds Park Road	Residents' concerns about the proposed development at Crews Hill (PL11) center on several key issues: non-compliance with the National Planning Policy Framework (NPPF) regarding protecting Green Belt land, lack of adequate use of brownfield sites, and potential ecological damage. They argue that the development would harm Sites of Importance for Nature Conservation, urbanize rural public rights of way, and disrupt historical landscapes. Additionally, they fear increased traffic congestion, loss of popular garden centers, insufficient affordable housing, and inadequate infrastructure planning, all of which would degrade the area's character and sustainability.	Comments noted. The ELP Spatial Strategy and Overall Approach Topic Paper emphasizes protecting Sites of Importance for Nature Conservation and maintaining the integrity of public rights of way. The Exceptional Circumstances Topic Paper justifies limited Green Belt development while ensuring environmental safeguards and community benefits. The Site Allocation and Crews Hill Topic Papers include measures to preserve local economies, such as garden centers, and minimize traffic impacts on narrow rural roads. These strategies aim to balance development with the protection of Enfield's unique ecological and historical landscapes.	No	02288	Andrew Scott
C1: Housing and Mixed use Allocations – outside of placemaking areas					
URB.01: Land known as Brimsdown Sports Ground	FZ2 and FZ3. Appendix C states this is FZ1 (page 479). This is incorrect.	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01926	Environment Agency

URB.01: Land known as Brimsdown Sports Ground	Sport England support the upgrade to facilities, however this allocated also suggests the loss of the existing golf course, Sport England would like to see this allocation referenced in an up-to-date PPS to better understand the strategic need for an upgrade to this facility as this is not mentioned in the existing PPS. This allocation does not currently meet with NPPF 103 or Sport England Policy. any new sports and leisure facilities should meet a strategically identified need.	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01967	Sport England
URB.01: Land known as Brimsdown Sports Ground	Thames Water indicates that the scale of development in this catchment will likely necessitate upgrades to the water supply network infrastructure. They recommend that developers and the Local Planning Authority engage with Thames Water early to create a housing phasing plan. Failure to do so may result in planning conditions to manage development phasing and ensure necessary infrastructure upgrades are completed before occupancy. Developers can find information on network infrastructure at the Thames Water website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
URB.01: Land known as Brimsdown Sports Ground	Thames Water does not currently anticipate infrastructure concerns regarding wastewater networks for the proposed developments. However, they recommend that developers and the Local Planning Authority liaise with Thames Water early to discuss development phasing. Contact can be made via email at Devcon.team@thameswater.co.uk, by phone at 02035779998, or in writing to Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
URB.01: Land known as Brimsdown Sports Ground	TfL welcomes the requirement for contributions towards identified upgrades to the London Underground network but notes it should refer to Cockfosters rather than Amos Grove. Since step-free access is already provided at Cockfosters, contributions should focus on general station access or capacity improvements, including streetscape improvements and better crossing facilities to enhance accessibility and safety. TfL also welcomes the requirement for car-free development but recommends amending the wording to state it "must deliver car-free development" to ensure consistency with the London Plan, considering the PTAL of 6a.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
URB.02: Cockfosters Station Car Park	This allocation needs a full reference to the various designated heritage assets within the boundary together with further detail as to how the heritage significance of each must be taken account of during the development of any proposals.	Comments noted. The Council appreciate Historic England's guidance on the importance of conserving and enhancing Enfield's historic environment. The Council will address their concerns by collaborating on a statement of common ground to ensure the Local Plan aligns with the National Planning Policy Framework (NPPF) and the Planning Practice Guide (PPG).	No	01788	Historic England

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
URB.02: Cockfosters Station Car Park	Places for London welcome Enfield's inclusion of a 351 Approximate Estimated Housing Capacity for the Cockfosters Station Car Park allocation. However, we strongly suggest that this is approximate capacity is amended to '350-400', which will present a greater degree of flexibility in light of recent changes to building regulations and requirement to provide a second staircase in buildings of 18 metres or more.	Comments noted. The council acknowledges the importance of collaboration and agrees to work together with Places for London. We will formalize our mutual understanding and agreements through a Statement of Common Ground, ensuring that all recommendations and concerns are addressed cohesively within the planning framework. This collaborative approach will help us effectively accommodate growth, enhance sustainable travel, and support higher density development in areas with high transport accessibility.	No	01937	TfL Places for London
URB.02: Cockfosters Station Car Park	Thames Water does not currently anticipate infrastructure concerns regarding wastewater networks for the proposed developments. However, they recommend that developers and the Local Planning Authority liaise with Thames Water early to discuss development phasing. Contact can be made via email at Devcon.team@thameswater.co.uk , by phone at 02035779998, or in writing to Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ.	Comments noted. Clarification will be included in the Statement of Common Ground. URB.03: Former Chase Farm Hospital	TfL welcomes the requirement for contributions towards identified upgrades to the London Underground network but notes it should refer to Cockfosters rather than Arnos Grove. Since step-free access is already provided at Cockfosters, contributions should focus on general station access or capacity improvements, including streetscape improvements and better crossing facilities to enhance accessibility and safety for station users. TfL also welcomes the requirement for car-free development.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
URB.03: Former Chase Farm Hospital	The Enfield Society's concerns include the omission of four Local Heritage Assets within the site boundary from the design principles, making the policy inconsistent with national historic environment policy. Despite potential residential developments that could fund repairs, these heritage assets remain neglected and are now 'at risk.' The Clock Tower, a notable landmark, symbolizes the area's historical significance in poor relief and medical care. The lack of focus on these assets undermines the character and identity of this part of Enfield.	Comments noted. The Enfield Local Plan is designed to ensure balanced development while protecting the borough's heritage assets. The Site Allocation Topic Paper (Regulation 19) details the integration of Local Heritage Assets into design principles. This approach aligns with national policy, ensuring development respects and enhances historic environments. The plan includes specific guidelines to safeguard and restore heritage buildings, promoting their adaptive reuse within new developments. The focus on heritage assets helps maintain Enfield's cultural identity, providing clear frameworks for developers to incorporate historical considerations into their projects.	No	01794	Enfield Society
URB.03: Former Chase Farm Hospital	Comments received from residents/businesses are contained in Table B.3i_8: URB.03: Former Chase Farm Hospital				
URB.04: Blackhorse Tower, Cockfosters Road	Thames Water does not currently anticipate infrastructure concerns regarding wastewater networks for the proposed developments. However, they recommend that developers and the Local Planning Authority liaise with Thames Water early to discuss development phasing. Contact can be made via email at Devcon.team@thameswater.co.uk, by phone at 02035779998, or in writing to Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ. University, Trent Park	phasing. Contact can be made via email at Devcon.team@thameswater.co.uk, by phone at 02035779998, or in writing to Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ.				
URB.07: Sainsburys, Green Lanes	The Councillor objects to redeveloping Sainsbury's on Green Lanes for 368 homes and highlights several concerns: the impact on Bush Hill Park residents' supermarket access, leading to increased congestion at other locations; inadequate consideration of local infrastructure like schools and doctor surgeries; reduced parking affecting nearby streets; unclear commercial servicing plans; environmental risks due to proximity to potable groundwater abstraction; and the potential loss of green space and impact on nearby heritage assets.	Comments noted. The proposed site allocation of Sainsbury's on Green Lanes for 368 new homes, while re-providing the supermarket with reduced parking, aligns with the National Planning Policy Framework (NPPF) as it supports sustainable urban growth. The plan includes measures to mitigate impacts on local infrastructure, such as schools and healthcare facilities, and ensures efficient servicing of commercial units. Environmental safeguards address groundwater concerns, and heritage considerations are incorporated to protect nearby assets. The strategy promotes sustainable transport options, reducing car dependency and minimizing traffic congestion.	No	01779	Councillor Fallart
URB.07: Sainsburys, Green Lanes	The Councillor objects to redeveloping Sainsbury's on Green Lanes for 368 homes and highlights several concerns: the impact on Bush Hill Park residents' supermarket access, leading to increased congestion at other locations; inadequate consideration of local infrastructure like schools and doctor surgeries; reduced parking affecting nearby streets; unclear commercial servicing plans; environmental risks due to proximity to potable groundwater abstraction; and the potential loss of green space and impact on nearby heritage assets.	Comments noted. The proposed site allocation of Sainsbury's on Green Lanes for 368 new homes, while re-providing the supermarket with reduced parking, aligns with the National Planning Policy Framework (NPPF) as it supports sustainable urban growth. The plan includes measures to mitigate impacts on local infrastructure, such as schools and healthcare facilities, and ensures efficient servicing of commercial units. Environmental safeguards address groundwater concerns, and heritage considerations are incorporated to protect nearby assets. The strategy promotes sustainable transport options, reducing car dependency and minimizing traffic congestion.	No	01784	Councillor Fallart
URB.07: Sainsburys, Green Lanes	The Enfield Conservative Group objects to the proposed site redevelopment due to its inconsistency with the surrounding two-story dwellings, leading to inappropriate scale and massing. The loss of parking would harm the viability of a supermarket re-provision, causing the displacement of traffic along limited routes, exacerbating issues in the Green Lanes area. The redevelopment would substantially damage the character and visual amenity of a valuable local urban green space and surrounding housing, leading to overdevelopment that is out of character with the predominantly two-story semi-detached and short terrace houses in the area.	Comments noted. The Council acknowledges the concerns about scale, massing, and parking impacts. However, the proposed redevelopment aligns with the strategic objectives set out in the Local Plan, which aims to optimize land use and improve housing supply while ensuring high-quality design and sustainable development. The Spatial Strategy and Overall Approach Topic Paper highlights the importance of delivering diverse housing types, and the redevelopment proposal includes measures to enhance the local urban environment and mitigate traffic impacts. The plan is designed to be flexible yet deliverable, ensuring compatibility with the existing neighbourhood while addressing broader housing and development needs.	No	01670	Enfield's Conservative Group
URB.07: Sainsburys, Green Lanes	The Edmonton and Winchmore Hill Conservative Association objects to the redevelopment of the Sainsbury's site on Green Lanes, citing several concerns that challenge the proposal's soundness. They argue that the dense housing development of 368 new homes, coupled with minimal parking for the supermarket, will exacerbate parking issues and cause congestion in surrounding streets. The existing car park is	The Edmonton and Winchmore Hill Conservative Association's objections to the redevelopment of the Sainsbury's site on Green Lanes are addressed as follows: Impact on Surrounding Residential Areas: The Housing Topic Paper 2024 outlines the necessity of increasing housing supply to meet the Borough's growing needs. The proposed 368 new homes are in line with strategic objectives for high-	No	01784	Edmonton and Winchmore Hill Conservative Association

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	<p>crucial for local residents' weekly shopping trips, and reduced parking could lead to increased traffic at other supermarkets. Additionally, there are concerns about the site's proximity to potable groundwater, which could affect building foundations, and the potential impact on nearby Grade II listed and other heritage assets. The loss of surrounding green space is also seen as contrary to Strategic Policy BG8. Furthermore, the adequacy of servicing for commercial units, including the supermarket, remains unclear. These issues lead to the belief that the site should be removed from the plan.</p>	<p>density developments in urban areas. Mitigation measures, including robust transport planning and parking management strategies, are designed to address potential impacts on surrounding streets. Parking Concerns: The Site Allocation Topic Paper acknowledges the need for effective parking solutions. The redevelopment includes plans to re-provide the supermarket with similar floor space but aims to incorporate sustainable transport options. Parking provision will be reviewed to balance residential and commercial needs, ensuring that local congestion is managed and displacement of shoppers is minimized. Environmental Considerations: The Environment Agency's concerns about the proximity to potable groundwater are noted. The development proposal includes comprehensive site assessments and mitigation strategies to address potential impacts on groundwater and building foundations, in line with environmental protection standards. Heritage Impact: The development proposal carefully considers the proximity to Grade II listed and non-designated heritage assets. The design will adhere to conservation guidelines to minimize visual and physical impacts on these heritage sites. Green Space: While the proposal does involve some loss of green space, the Site Allocation Topic Paper details plans for compensatory green space within the development and improvements to existing nearby parks to enhance local amenities. Servicing for Commercial Units: The development will include detailed plans for servicing arrangements to ensure that the supermarket and other commercial units are adequately supported without disrupting local traffic flow. The Site Allocation aligns with Enfield's strategic housing and development goals, balancing residential growth with infrastructure improvements and environmental considerations.</p>			
<p>URB.07: Sainsburys, Green Lanes</p>	<p>Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.				
URB.08: Hoe, Eastfield, Cherry and Bouvier Estates	TfL welcomes the requirement that development should minimise parking. This should apply to all proposed uses, including residential and commercial.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
URB.09: Exeter Road Estate	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
URB.09: Exeter Road Estate	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
URB.10: Alma Estate	Better Homes Enfield argues that SA URB.10: Alma Estate is not legally compliant with the London Plan 2021, as required by Section 24(1) of the 2004 Planning and Compulsory Purchase Act. The site is counted as 127 homes in the ELP, but recent consultations suggest an increase by 400+ homes, indicating under-optimisation. This brownfield site near a central London railway station does not meet London Plan Policies D3 and H1, which require maximising site capacity and increasing housing supply on suitable brownfield sites. Consequently, the allocation does not conform to the NPPF Chapter 11 requirements for effective land use and fails the soundness test of NPPF 35(d). Better Homes Enfield recommends adjusting the housing capacity to reflect the site's full potential and net delivery rates from 2022/23 onwards to ensure compliance with the London Plan and national policy.	Comments noted. The Site Allocation Topic Paper emphasizes the flexibility and ongoing review of density levels to ensure alignment with LP21 policies D3 and H1. The paper details considerations for site-specific requirements and contextual appropriateness of density increases.	No	01708	Better Homes Enfield
URB.10: Alma Estate	Vistry Group supports the draft site allocation for the Alma Estate (SA URB.10) but requests updates to reflect their ongoing development and potential for 1,404 homes with buildings up to 17-stories. They suggest adjusting the housing capacity, delivery timeframe, and design principles to match current planning permissions and pre-application discussions. They also propose changes to the Tall Building Maps to ensure flexibility for future development phases and accurate height allowances, supporting optimal delivery of market and affordable housing.	The council appreciates Vistry Group's support and acknowledges the concerns regarding the wording of policy SA URB.10. The Council will continue to engage with Vistry Group and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01897	Vistry Group
URB.11: The Former Royal Chace Hotel	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
URB.11: The Former Royal Chace Hotel	Thames Water does not currently anticipate infrastructure concerns regarding wastewater networks for the proposed developments. However, they recommend that developers and the Local Planning Authority liaise with Thames Water early to discuss development phasing. Contact can be made via email at Devcon.team@thameswater.co.uk, by phone at 02035779998, or in writing to Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
URB.11: The Former Royal Chace Hotel	The Enfield Society is concerned that the removal of the Royal Chase Hotel site from the Enfield Chase Area of Special Character (ASC) has allowed the development of a visually intrusive housing estate. This development is prominent in views from the London LOOP footpath and Hadley Road, undermining the character and openness of the Green Belt. The Society emphasizes the importance of the ASC for maintaining the area's character and identity, suggesting that the landscape-led approach in Design Principle A has been ineffective in preserving these qualities.	Comments noted. The Enfield Local Plan is designed to ensure balanced development while protecting the borough's heritage assets. The Site Allocation Topic Paper (Regulation 19) details the integration of Local Heritage Assets into design principles. This approach aligns with national policy, ensuring development respects and enhances historic environments. The plan includes specific guidelines to safeguard and restore heritage buildings, promoting their adaptive reuse within new developments. The focus on heritage assets helps maintain Enfield's cultural identity, providing clear frameworks for developers to incorporate historical considerations into their projects.	No	01794	Enfield Society
URB.12: 241 Green Street	FZ2 and FZ3. Appendix C states Flood Zone 'No' (page 485). This is incorrect.	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01926	Environment Agency
URB.12: 241 Green Street	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. URB.12: 241 Green Street	TfL welcomes the requirement that the development should minimise residential parking.	<p>Comments noted.</p> <p>The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01891	Transport for London
URB.12: 241 Green Street	Better Homes Enfield argues that the site allocation SA URB.12: 241 Green Street is not legally compliant with the London Plan 2021, as required by Section 24(1) of the 2004 Planning and Compulsory Purchase Act. London Plan Policy D3 requires optimising site capacity through a design-led approach, and Policy H1 emphasises maximising housing delivery on suitable brownfield sites, particularly those near transport hubs. The current allocation counts 92 homes, despite having planning approval for 148 homes, failing to optimise this brownfield site's potential. This discrepancy means the site allocation does not meet the requirements of London Plan Policies D3 and H1, nor the NPPF's Chapter 11 on effective land use and site density optimisation. To address this, Better Homes Enfield recommends modifying the site allocation to reflect the approved housing capacity, ensuring legal compliance and soundness in line with national policy.	<p>Comments noted.</p> <p>The Site Allocation Topic Paper emphasizes the flexibility and ongoing review of density levels to ensure alignment with LP21 policies D3 and H1. The paper details considerations for site-specific requirements and contextual appropriateness of density increases.</p>	No	01708	Better Homes Enfield

URB.22: Oakwood Station Car Park	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
URB.22: Oakwood Station Car Park	Thames Water does not currently anticipate infrastructure concerns regarding wastewater networks for the proposed developments. However, they recommend that developers and the Local Planning Authority liaise with Thames Water early to discuss development phasing. Contact can be made via email at Devcon.team@thameswater.co.uk , by phone at 02035779998, or in writing to Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
URB.22: Oakwood Station Car Park	TfL supports streetscape improvements but emphasizes that any proposals affecting the A10 or its frontage should be agreed with TfL. They also state there should be no direct vehicle access (for parking or servicing) from the A10.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
URB.22: Oakwood Station Car Park	The Councillor object to the proposal to close the car park at Oakwood Station and build 52 dwellings on the site as it does not meet the NPPF soundness test. The closure is inconsistent with promoting sustainable transport, particularly impacting those with mobility issues. Displaced cars will exacerbate parking problems and emissions in nearby streets. The proposed housing blocks will detract from the listed station building and increase housing density without additional services like GP surgeries and schools, inconveniencing the traveling public and local residents.	Comments noted. The plan emphasizes sustainable development and transport, reducing car dependency, and encouraging alternative travel modes. The introduction of housing near public transport hubs aligns with the aim of maximizing land use efficiency and supporting local housing needs. Infrastructure improvements and design considerations will ensure accessibility and integration with existing community services, mitigating concerns about parking displacement and service provision.	No	01779	Councillor Fallart
URB.22: Oakwood Station Car Park	The Enfield Conservative Group suggests the following modifications to make the Draft Plan sound and legally compliant: Delete Specific Proposals: Remove proposals for Chase Park, Crews Hill, and Hadley Wood from Policy SS1: Spatial Strategy, and delete policies PL10, PL11, and SAURB 22.	Comments noted. The Council asserts that the proposals for Chase Park, Crews Hill, and Hadley Wood are integral to the overall spatial strategy of the Local Plan, aiming to address housing needs, economic development, and sustainable growth across the borough. Removing these sites would undermine the Plan's ability to meet the required housing and employment targets. These proposals are supported by a comprehensive evidence base, including the Exceptional Circumstances Topic Paper and the Site Allocation Topic Paper, which	No	01670	Enfield's Conservative Group

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
URB.22: Oakwood Station Car Park	The Enfield Conservative Group opposes to the proposal to develop Oakwood Station Car Park for housing, as it represents overdevelopment based on unrealistic housing targets. This development would remove a critical amenity, forcing car-dependent residents to find alternative parking and increasing emissions in neighbouring streets. The station's unique accessibility for those with mobility issues would be compromised. Additionally, the proposed medium-height building for 52 homes could harm views of the listed Oakwood Station.	justify the inclusion of these sites based on strategic planning considerations and sustainable development principles. Comments noted. The Council maintains that the proposal to develop Oakwood Station Car Park aligns with the strategic goals of the Local Plan, which prioritizes optimizing land use near transport hubs to meet housing needs. This approach is supported by the Site Allocation Topic Paper. The plan aims to balance housing provision with accessibility and sustainability, ensuring that the development includes measures to mitigate potential impacts on parking, mobility, and views of the listed Oakwood Station.	No	01670	Enfield's Conservative Group
URB.22: Oakwood Station Car Park	Places for London strongly welcome Enfield's inclusion of the Oakwood Station Car Park as a Draft Site Allocation, following previous submissions in Enfield Call for Sites (February 2021) and Enfield Local Plan Main Issues and Preferred Approaches (June 2021) consultations. The site has excellent public transport accessibility, with good access to local services, amenities, and shops. Places for London highlighted that should a site allocation be included for just the car park site (as evident in the Reg 19 Draft Local Plan draft site allocation) then we would suggest this should be for residential-led development and include a site capacity of approximately 65 units. Therefore, Places for London recommend that the Approximate Estimated Housing Capacity is increased from 52 units to 65 units. The HELAA 2021 assessed the site (site reference COC11), with the Housing topic paper clarifying the site selection methodology and setting out that a size threshold of 50 homes+ or 0.25ha was used to select sites to allocate. Oakwood Station car park has a larger site area of 0.32 ha and Places for London has undertaken various capacity studies which show that the site could provide between 52 and 80 homes (with heights of 3 to 6 storeys). Development could potentially explore the integration of adjacent land, including the retail parade fronting Bramley Road.	Comments noted. The council acknowledges the importance of collaboration and agrees to work together with Places for London. We will formalize our mutual understanding and agreements through a Statement of Common Ground, ensuring that all recommendations and concerns are addressed cohesively within the planning framework. This collaborative approach will help us effectively accommodate growth, enhance sustainable travel, and support higher density development in areas with high transport accessibility.	No	01937	TfL Places for London
URB.22: Oakwood Station Car Park	The Enfield Society's concerns regarding Design Principles H and I are centred on the lack of clarity and thorough assessment of the impact on heritage assets. Design Principle H suggests that tall buildings up to 39m high should be located centrally north of the railway line and carefully considered south of the railway line to mitigate heritage impacts. Design Principle I states that development must consider long views from Trent Park Conservation Area. However, the term "consider" is vague, and it is unclear how decision-makers should interpret it. The Enfield Society argues that the impact on Trent Park Conservation Area and the Registered Historic Park and Garden should be thoroughly assessed and established before setting development principles in the Local Plan.	Comments noted. In response, the Council's Local Plan, including the policy on the location of tall buildings and the assessment of important views, has been developed based on a comprehensive evidence base that aligns with national and regional planning frameworks. The Site Allocation Topic Paper and the Character of Growth Study provide detailed analysis and justifications for the proposed development locations and the heights of buildings. These documents emphasize a landscaped approach to ensure that any new development, including tall buildings, integrates well with the existing character and heritage of the area while addressing strategic growth needs.	No	01794	Enfield Society

	groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.				
URB.26: Fords Grove Car Park	TfL notes the requirement to provide limited residential parking but suggests it should be amended to state that parking must be minimised to ensure consistency with the London Plan.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
URB.26: Fords Grove Car Park	The Enfield Conservative Group objects to the loss of Ford's Grove Car Park, as it would harm the viability of the Green Lanes area by reducing parking for shoppers. With 14% of car parking on Winchmore Hill Broadway already removed due to Enfield Council's cycle lanes, further parking loss would negatively impact local shop revenue. This car park is the only public one in Winchmore Hill, which already suffers from a severe parking shortage. Additionally, the proposed redevelopment would likely result in overdevelopment that is out of character with the surrounding two-story character terraces.	Comments noted. The Council acknowledges the concerns about the loss of Ford's Grove Car Park and its potential impact on the viability of the Green Lanes area. However, the redevelopment aligns with strategic objectives in the Local Plan to optimize land use and increase housing supply. The Site Allocation Topic Paper outlines that the proposal includes measures to mitigate parking impacts and enhance the local urban environment. The plan aims to balance local needs with broader housing and development goals while ensuring high-quality, sustainable development.	No	01670	Enfield's Conservative Group
URB.26: Fords Grove Car Park	LBESPS supports the allocation of Ford's Grove Car Park (SA URB.26) for new homes, noting the site's suitability for residential development, subject to detailed design and servicing considerations. They agree with the estimated capacity of 29 homes, acknowledging it will depend on detailed planning. They support a development timeframe of up to 10 years, highlighting the site's sustainability and accessibility to Winchmore Hill Station. The site is seen as deliverable and prioritized for development.	Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01946	LBE Strategic Property Services

URB.27: South Street	Thames Water notes that the development boundary is within a Source Protection Zone for groundwater abstraction, which could be at risk from polluting activities. To prevent pollution, a tiered, risk-based approach will be used by the Environment Agency and Thames Water to regulate activities impacting groundwater resources. The applicant is encouraged to review the Environment Agency's approach to groundwater protection and may consult with a qualified environmental consultant to understand the implications for their development. More information is available at Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
URB.27: South Street	TfL notes that the site has a PTAL of 1b and it is unlikely that further public transport or active travel improvements could adequately support the proposed 291 homes. They observe that the design principles do not require parking to be minimised, likely resulting in a car-dominated development that is not well connected and does not align with the London Plan principles of Good Growth. TfL is also likely to object to any proposed vehicle access directly from the A10, as specified in the design principles.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
RUR.01: Land opposite Enfield Crematorium (known as The Dell), Great Cambridge Road	Thames Water indicates that the scale of the proposed developments will likely necessitate upgrades to the water supply network infrastructure. They recommend early liaison between the Developer, Local Planning Authority, and Thames Water to agree on a housing phasing plan. This plan should outline the required phasing to ensure that infrastructure upgrades are completed before development occupation. Failure to coordinate may result in planning conditions at the application stage. Developers can request information on network infrastructure from Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
RUR.01: Land opposite Enfield Crematorium (known as The Dell), Great Cambridge Road	Thames Water does not anticipate any infrastructure concerns regarding wastewater networks for the proposed development(s). However, they recommend that the Developer and the Local Planning Authority engage with Thames Water early to discuss the development's phasing. For further details, developers should contact Thames Water Development Planning via email (Devcon.team@thameswater.co.uk), phone (02035779998), or in writing (Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ).	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
RUR.01: Land opposite Enfield Crematorium (known as The Dell), Great Cambridge Road	Thames Water notes that the development boundary is within a Source Protection Zone for groundwater abstraction, which is vulnerable to pollution from surface or subsurface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate potentially impacting activities. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. Further information can be found here.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
RUR.01: Land opposite Enfield Crematorium (known as The Dell), Great Cambridge Road	The Enfield Society's concerns regarding the proposed development on this Green Belt and open space site highlight the inconsistency with London Plan Policy G1, which protects such areas. They question the adequacy of the heritage impact assessment, especially regarding views from Forty Hill Conservation Area, and the lack of detailed evidence, such as Vucities modelling. Additionally, concerns are raised about the delayed implementation due to potential environmental permits, suggesting that an earlier survey could clarify the timeframe for delivering the proposed 291 dwellings.	Comments noted. The Enfield Local Plan is designed to ensure balanced development while protecting the borough's heritage assets. The Site Allocation Topic Paper (Regulation 19) details the integration of Local Heritage Assets into design principles. This approach aligns with national policy, ensuring development respects and enhances historic environments. The plan includes specific guidelines to safeguard and restore heritage buildings, promoting their adaptive reuse within new developments. The focus on heritage assets helps maintain Enfield's cultural identity, providing clear frameworks for developers to incorporate historical considerations into their projects.	No	01794	Enfield Society
RUR.01: Land opposite Enfield Crematorium (known as The Dell), Great Cambridge Road	Forty Leisure Limited and Jubilee Church are supportive of the Local Plan's allocation of Site SA RUR.01 (Land Opposite Enfield Crematorium). They believe the site is ideal for their needs due to its strategic location within Enfield, good road access, and proximity to public transport, including Turkey Street Rail Station and bus routes. Jubilee Church, in particular, supports the plan's provision for community uses and the site's release from the Green Belt under Spatial Policy SS1. They argue that the site's designation for a purpose-built church and community hub aligns well with their objectives and the plan's goals for sustainable development.	Support noted. The Local Plan's commitment to integrating community facilities and enhancing accessibility aligns with the feedback received from various stakeholders, including their support for the release of the land from the Green Belt.	No	01876	Forty Leisure Limited and Jubilee Church
RUR.01: Land opposite Enfield Crematorium (known as The Dell), Great Cambridge Road	Forty Leisure Limited and Jubilee Church have expressed strong support for the allocation of Site SA RUR.01 (Land Opposite Enfield Crematorium) in the draft Local Plan. They highlight that the site is ideal for a mixed-use development, including a purpose-built church and community hub, due to its strategic location, good road access, and accessibility via Turkey Street Rail station and local bus services. They commend the allocation's focus on community uses and its designation for non-residential development along the A10. Additionally, they support the site's release from the Green Belt, as outlined in the Spatial Policy SS1, to facilitate the development.	Support noted. The Local Plan's commitment to integrating community facilities and enhancing accessibility aligns with the feedback received from various stakeholders, including their support for the release of the land from the Green Belt.	No	01876	Forty Leisure Limited and Jubilee Church
RUR.01: Land opposite Enfield Crematorium	TfL does not consider the sites at Chase Park (PL10) SA10.1 – SA10.4, Crews Hill (PL11) SA11.1 – SA11.6, land opposite Enfield Crematorium (RUR.01), and land between Camlet Way and Crescent West, Hadley (RUR.02) suitable for housing. This is due to their poor	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
(known as The Dell), Great Cambridge Road	transport connectivity and the high costs required to provide sustainable transport access comparable to urban sites in the borough. Developing these sites is likely to lead to car-dependent development, which is contrary to the Good Growth objectives of the London Plan and the NPPF.	to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.			
RUR.01: Land opposite Enfield Crematorium (known as The Dell), Great Cambridge Road	TfL notes that the site has a PTAL of 1, making it unlikely that public transport or active travel improvements could support the proposed 160 homes. While they support the requirement to minimise parking, this could be undermined by the Hadley Neighbourhood Plan, which permits higher parking levels than the London Plan. The Neighbourhood Plan cites evidence of high car reliance among existing residents, suggesting the development will likely be car-dominated, not well connected, and inconsistent with the London Plan principles of Good Growth.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
RUR.01: Land opposite Enfield Crematorium (known as The Dell), Great Cambridge Road	Residents have expressed several concerns regarding RUR.01: Land opposite Enfield Crematorium (The Dell), Great Cambridge Road. They highlight that the proposed crematorium is unnecessary given the proximity of existing facilities, such as Enfield and Edmonton Cemeteries. The planned area is significantly smaller than other crematoriums, potentially leading to future expansions and reduced green space. There are worries about noise pollution from nearby roads and schools, which would disturb the calm environment required for a crematorium. Additionally, the project might negatively impact pedestrian and cyclist safety, increase traffic congestion, and contribute to pollution in a densely populated area, raising health concerns for nearby residents.	Comments noted. The Exceptional Circumstances Topic Paper outlines the necessity of utilizing this site due to the limited availability of alternative locations that meet the spatial and operational needs for a crematorium. The ELP Spatial Strategy and Overall Approach Topic Paper emphasizes a balanced development approach, ensuring that the environmental and community impacts are mitigated through careful planning and design. The plan also includes measures to enhance pedestrian and cycle connectivity and to minimize traffic and pollution impacts, ensuring that the development is sustainable and beneficial to the broader community. RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Hadley Wood Neighbourhood Planning Forum (HWNPF) argues that Enfield's Local Plan (ELP) is flawed and has predetermined outcomes. They highlight that the housing target has increased by 34% without consultation and believe the evidence base was written to fit chosen policies. Key concerns include the timing and release of crucial topic papers after the plan's initial approval, inadequate consultation with stakeholders, and the unsoundness of the plan's housing targets and site assessments. HWNPF asserts that the exceptional circumstances for Green Belt release, particularly for Site RUR.02, are inadequately evidenced, making the plan unsound and non-compliant with NPPF requirements.	Comments noted The Council asserts that the Local Plan is sound and based on a comprehensive, up-to-date evidence base. The increase in the housing target is justified by current assessments to address significant housing needs, as detailed in the Enfield Housing Topic Paper 2024. The release of key topic papers followed standard procedures, ensuring transparency and thorough consultation, as outlined in the Council meeting documents here. The evidence base includes the Spatial Strategy and Overall Approach Topic Paper, the Exceptional Circumstances Topic Paper, and the Site Allocation Topic Paper. These documents collectively ensure the plan supports sustainable development and strategic long-term planning for the borough.	No	01311	Hadley Wood Neighbourhood Planning Forum (HWNPF)
RUR.02: Land between Camlet Way and Crescent	The Hadley Wood Neighbourhood Planning Forum (HWNPF) argues that Enfield's Local Plan (ELP) is flawed and has predetermined outcomes. West, Hadley Wood	consultation with stakeholders, and the unsoundness of the plan's housing targets and site assessments. HWNPF asserts that the exceptional circumstances for Green Belt release, particularly for Site RUR.02, are inadequately evidenced, making the plan unsound and non-compliant with NPPF requirements.	outlined in the Council meeting documents here. The evidence base includes the Spatial Strategy and Overall Approach Topic Paper, the Exceptional Circumstances Topic Paper, and the Site Allocation Topic Paper. These documents collectively ensure the plan supports sustainable development and strategic long-term planning for the borough.	No	01311	Hadley Wood Neighbourhood Planning Forum (HWNPF)
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Hadley Wood Neighbourhood Planning Forum (HWNPF) asserts that Enfield's Local Plan (ELP) is not positively prepared, as it does not adequately demonstrate how the housing target meets objectively assessed needs. They argue the increased housing target of 34% post-2029 is based on site availability rather than actual need and that the plan extends to 2041 without a London Plan requirement. HWNPF contends that the evidence base appears tailored to fit predetermined policies, lacking proper consultation with the GLA as required by paragraph 4.1.11 of the London Plan. This approach, including the unjustified Green Belt release, renders the ELP unsound.	Comments noted. The Council asserts that the Local Plan (ELP) is sound and based on an up-to-date evidence base. The housing target increase and site allocations are justified by thorough assessments and align with national and regional planning guidelines. Detailed justifications and methodologies are outlined in the Spatial Strategy and Overall Approach Topic Paper and the Enfield Housing Topic Paper 2024. These documents demonstrate compliance with the London Plan's requirements and ensure a strategic approach to sustainable development. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the HWNPF to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01311	Hadley Wood Neighbourhood Planning Forum (HWNPF)
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Hadley Wood Neighbourhood Planning Forum (HWNPF) argues that Enfield's Local Plan (ELP) is not positively prepared and is unjustified, contrary to NPPF paragraph 35. They contend that the plan's housing target is based on potential site availability rather than actual need and that extending the ELP to 2041 exceeds London Plan requirements. HWNPF asserts that the decision to release Green Belt land was made before evidence was prepared, failing to demonstrate exceptional circumstances or fully explore alternatives, making the plan unsound. They emphasize that Green Belt releases were decided years before evidence was presented and that the housing target increase lacks consultation and proper justification.	Comments noted. The Council maintains that the Local Plan (ELP) is sound and based on a comprehensive, up-to-date evidence base. The Exceptional Circumstances Topic Paper details the exceptional circumstances for Green Belt release, demonstrating that all other reasonable options have been fully explored and exhausted. The housing target is based on a detailed assessment of needs and capacity, as outlined in the Enfield Housing Topic Paper 2024. This includes analysis of the Strategic Housing Land Availability Assessment (SHLAA) and the London Plan's small sites policy. The Site Allocation Topic Paper explains the methodology for selecting sites, ensuring they meet strategic objectives and sustainability criteria. The Consultation and Duty to Cooperate document highlights extensive engagement with stakeholders, including the GLA, ensuring transparency and compliance with NPPF requirements. The Spatial Strategy and Overall Approach Topic Paper supports the plan's long-term vision, emphasizing a balanced approach to development and infrastructure provision. This extensive evidence base and consultation demonstrate that the ELP is well-founded, addresses housing needs comprehensively, and aligns with both national and regional planning guidelines, ensuring a strategic and sustainable approach to development. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the HWNPF to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01311	Hadley Wood Neighbourhood Planning Forum (HWNPF)
RUR.02: Land between Camlet Way	The Hadley Wood Neighbourhood Planning Forum (HWNPF) has identified 11 brownfield sites with a PTAL rating of 3 or 4 that could collectively deliver up to 3,500 housing units, which the Council either	Comments noted. The Council has conducted a thorough assessment of potential housing sites in the Spatial Strategy and Overall Approach Topic Paper and the Site Allocation Topic Paper. The following points	No	01311	Hadley Wood Neighbourhood Planning Forum (HWNPF)

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
<p>and Crescent West, Hadley Wood</p>	<p>did not include in their assessment or incorrectly ruled out. They argue that developing these sites could eliminate the need to allocate Site RUR.02 for the development of 160 units. The identified sites include:</p> <ol style="list-style-type: none"> 1) Royal Mail Sorting Office, EN1 1AA 2) ASDA, N14 5PW 3) M&S, N14 6AQ 4) Southgate Leisure Centre, N14 6AD 5) De Mandeville Gate Retail Park, EN1 1TW 6) DFS, EN1 1UJ 7) Furniture Village and Sofology, EN1 1UJ 8) Stephen James BMW, EN1 1SW 9) Enfield Retail Park, EN1 1TH 10) British Car Auctions, EN1 3RL 11) Builders Depot, N11 1QJ <p>These sites, they claim, have significant potential for residential development, which would address housing needs without releasing Green Belt land.</p>	<p>address the exclusion or ruling out of the sites identified by HWNPF:</p> <p>Royal Mail Sorting Office: While this site has potential, its future availability and redevelopment timeline remain uncertain, and it is currently operational. ASDA, 130 Chase Side: The long lease held by ASDA poses significant redevelopment challenges, making it an unreliable short-term housing solution. M&S, 21 Winchmore Hill Rd: This site was excluded based on long-term lease agreements and operational requirements, rendering its redevelopment within the plan period improbable. Southgate Leisure Centre: Redevelopment of this community facility was deemed inappropriate due to its essential role and the difficulty in relocating or integrating residential units. De Mandeville Gate Retail Park and adjacent sites (DFS, Furniture Village, Stephen James BMW): These sites face significant commercial lease and operational constraints, with current retail functions serving the community. The economic impact and logistical challenges of displacing these operations outweigh potential housing benefits. Enfield Retail Park: The site's current extensive use as a retail hub with a large car park presents significant redevelopment challenges. Future redevelopment prospects are noted, but they are beyond the immediate plan period. British Car Auctions: Despite its potential, the site's classification within a Strategic Industrial Location (SIL) limits its suitability for residential development, focusing on preserving industrial and employment uses. Builders Depot, Station Rd: This site was evaluated, but current use constraints and long-term viability for redevelopment did not align with the plan's immediate housing needs. In conclusion, Enfield's site selection prioritizes immediate availability, feasibility, and strategic alignment with broader planning objectives. Detailed evaluations are documented in the Site Allocation Topic Paper, ensuring a balanced and justified approach to housing development. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the HWNPF to clarify these points further and ensure mutual understanding and agreement on these matters.</p>	<p>No</p>	<p>01311</p>	<p>Forum (HWNPF)</p>
<p>RUR.02: Land between Camlet Way and Crescent West, Hadley Wood</p>	<p>The Hadley Wood Neighbourhood Planning Forum (HWNPF) raises several concerns about the Enfield Local Plan (ELP), claiming it is inconsistent with national policies and legislation. They argue that the proposal to develop 160+ homes on Site RUR.02 does not meet the area's development needs, fails to align growth with infrastructure, and negatively impacts the environment and climate change mitigation. They also highlight the site's poor public transport accessibility and lack of amenities. Additionally, HWNPF asserts that the site assessment process was flawed and that the plan lacked early and effective engagement with local communities. They believe existing developments and brownfield sites could meet housing targets without Green Belt release.</p>	<p>Comments noted. The Enfield Local Plan (ELP) is sound and based on an up-to-date evidence base, aligning with national policies and legislation, particularly NPPF paragraph 35. The ELP's strategy is consistent with the Spatial Strategy and Overall Approach Topic Paper and the Housing Topic Paper, ensuring a viable pattern of development. The Green Belt Exceptional Circumstances Topic Paper (March 2024) outlines the criteria for reviewing Green Belt boundaries and the specific justifications for such releases. The Site Allocation Topic Paper (March 2024) provides detailed assessments of all proposed sites, including justifications for the inclusion or exclusion based on accessibility, sustainability, and potential development impacts. The Housing Topic Paper (2024) details the housing target methodology and justifications for increasing the housing target post-2029, emphasizing the need to meet future housing demands. The ELP identifies sites that are viable, sustainable, and necessary to meet</p>	<p>No</p>	<p>01311</p>	<p>Hadley Wood Neighbourhood Planning Forum (HWNPF)</p>

		<p>the identified housing needs, ensuring a balanced approach to urban and Green Belt development. The council has engaged in extensive consultation with stakeholders and the public, as detailed in the Consultation and Duty to Cooperate documents, ensuring transparency and responsiveness to community concerns. The Spatial Strategy and Overall Approach Topic Paper highlights the strategic planning for infrastructure development, ensuring alignment with growth and sustainability objectives. The ELP includes provisions for enhancing infrastructure and promoting sustainable development patterns, aligning with NPPF guidelines and addressing concerns about site RUR.02's development. The ELP's development proposals are consistent with the NPPF's requirements for sustainable development, as detailed in the Integrated Impact Assessment (IIA) and the Housing Topic Paper. The assessment of site RUR.02, including its PTAL rating and proximity to amenities, is based on comprehensive evidence, ensuring it meets the criteria for sustainable development. The identification and exclusion of certain brownfield sites are justified based on detailed site assessments, prioritizing those that meet the development needs and sustainability criteria. The exceptional circumstances for Green Belt release are thoroughly evidenced, ensuring compliance with national policies and addressing the identified housing needs. Overall, the Enfield Local Plan is robust, evidence-based, and meets the necessary requirements for sustainable development. The concerns raised by the Hadley Wood Neighbourhood Planning Forum have been addressed through comprehensive assessments and justifications within the ELP and supporting documents, ensuring the plan's soundness and alignment with national planning policies. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the HWNPF to clarify these points further and ensure mutual understanding and agreement on these matters.</p>			
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	<p>The Hadley Wood Neighbourhood Planning Forum states that site RUR.02 is potentially the site of the 1471 Battle of Barnet or at least contiguous with it, affecting its archaeological significance. They argue that the site's historical importance has not been adequately considered in the Integrated Impact Assessment, referencing further details in a representation by Barnet Museum, approved by its Chair, John Hall.</p>	<p>Comments noted. The Council acknowledges the importance of this site and its archaeological implications. The Site Allocation Topic Paper comprehensively assesses all proposed sites, including their historical and archaeological significance. The Council ensures that any development on RUR.02 will be carefully managed to preserve its historical context.</p>	No	01311	Hadley Wood Neighbourhood Planning Forum (HWNPF)
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	<p>The Hadley Wood Neighbourhood Planning Forum opposes the proposed release of Green Belt site RUR.02, arguing that it lacks evidence and justification for exceptional circumstances. They highlight that the site does not meet criteria for release, performs highly as Green Belt, and would cause significant harm if developed. Concerns include poor public transport accessibility, lack of local services, and high flood risk. The site is part of a valued landscape with historical, ecological, and scenic importance. The Forum criticizes the exclusion of this site from the Hadley Wood Neighbourhood Plan, which was</p>	<p>Comments noted. The justification for releasing RUR.02 is based on a thorough and evidence-based approach detailed in several documents: 1) ELP Spatial Strategy and Overall Approach Topic Paper. This document outlines the comprehensive strategy behind the Local Plan and the exceptional circumstances necessitating Green Belt release. It demonstrates the strategic importance of site RUR.02 in meeting Enfield's housing and development needs. 2) Exceptional Circumstances Topic Paper: This paper provides a robust justification for the exceptional circumstances required for Green Belt release. It</p>	No	01311	Hadley Wood Neighbourhood Planning Forum (HWNPF)

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	supported by the community, and faults the Local Planning Authority for not properly considering objections or providing a robust analysis of the evidence. They conclude that RUR.02 should retain its Green Belt designation.	includes an analysis of the need for housing and the lack of viable alternatives within existing urban areas. 3) Site Allocation Topic Paper: This paper includes site-specific assessments, detailing the suitability and planning considerations for each proposed site, including RUR.02. It considers factors such as public transport accessibility, local services, flood risk, and the ecological and historical significance of the site. The Council has followed a detailed and transparent process, incorporating feedback and ensuring all criteria and evidence support the inclusion of RUR.02 in the Local Plan.			
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Hadley Wood Neighbourhood Planning Forum opposes the proposed release of Green Belt site RUR.02, arguing that it lacks evidence and justification for exceptional circumstances. They highlight that the site does not meet criteria for release, performs highly as Green Belt, and would cause significant harm if developed. Concerns include poor public transport accessibility, lack of local services, and high flood risk. The site is part of a valued landscape with historical, ecological, and scenic importance. The Forum criticizes the exclusion of this site from the Hadley Wood Neighbourhood Plan, which was supported by the community, and faults the Local Planning Authority for not properly considering objections or providing a robust analysis of the evidence. They conclude that RUR.02 should retain its Green Belt designation.	Comments noted. The justification for releasing RUR.02 is based on a thorough and evidence-based approach detailed in several documents: 1) ELP Spatial Strategy and Overall Approach Topic Paper. This document outlines the comprehensive strategy behind the Local Plan and the exceptional circumstances necessitating Green Belt release. It demonstrates the strategic importance of site RUR.02 in meeting Enfield's housing and development needs. 2) Exceptional Circumstances Topic Paper: This paper provides a robust justification for the exceptional circumstances required for Green Belt release. It includes an analysis of the need for housing and the lack of viable alternatives within existing urban areas. 3) Site Allocation Topic Paper: This paper includes site-specific assessments, detailing the suitability and planning considerations for each proposed site, including RUR.02. It considers factors such as public transport accessibility, local services, flood risk, and the ecological and historical significance of the site. The Council has followed a detailed and transparent process, incorporating feedback and ensuring all criteria and evidence support the inclusion of RUR.02 in the Local Plan.	No	01311	Hadley Wood Neighbourhood Planning Forum (HWNPF)
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Enfield Conservative Group objects to the allocation of SA RUR.02: Land between Camlet Way and Crescent Way. This site is in the Green Belt, performing well against its purposes, and development here would cause very high harm, affecting the village feel and conservation areas in Hadley Wood and Monkton Hadley. It also has low public transport accessibility and lacks nearby amenities. We argue that Enfield's housing targets should align with the London Plan, reducing the need for Green Belt development, as housing need alone does not justify exceptional circumstances for Green Belt release.	Comments noted. The allocation of SA RUR.02: Land between Camlet Way and Crescent Way is supported by thorough assessments detailed in the Site Allocation Topic Paper and the Exceptional Circumstances Topic Paper. The Local Plan aligns with the London Plan's housing targets, and the identified sites, including RUR.02, are essential to meeting Enfield's diverse housing needs. The plan also includes measures to mitigate impacts on conservation areas and enhance public transport accessibility as detailed in the Spatial Strategy and Overall Approach Topic Paper. The Council remains committed to sustainable and balanced development across the borough.	No	01670	Enfield Conservative Group
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Duchy of Lancaster supports the Draft Local Plan's housing targets, recognizing the need for a significant amount of new housing to meet Enfield's requirements. They highlight the Camlet Way site as available and deliverable within the first five years of the plan, contributing approximately 160 units to help address the housing supply deficit. They emphasize the site's lack of dependency on significant infrastructure improvements, which facilitates timely	Support noted. The Council appreciates the support and comments from the Duchy of Lancaster regarding the Draft Local Plan and the site at Camlet Way. The strategic allocation of housing sites, including RUR.02, is guided by robust evidence and a comprehensive understanding of local housing needs, as detailed in the Site Allocation Topic Paper, Exceptional Circumstances Topic Paper, and ELP Spatial Strategy and Overall Approach. The early delivery of Camlet Way	No	01672	Duchy of Lancaster

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	delivery. This site is considered crucial for meeting Enfield's development needs and addressing the previous shortfall in housing supply.	within the first five years will indeed bolster our housing supply and help meet the accrued deficit. The Council welcome further engagement and a statement of common ground to ensure the successful delivery of this important site.	No	01672	Duchy of Lancaster
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Enfield's Housing Needs Assessment (2020) highlights a significant increase in median house prices in Enfield, from £114,000 in 2000 to £319,000 in 2019, making homes over 13 times the average annual earnings. The Hadley Wood Neighbourhood Plan indicates a distinct local market with nearly 70% of homes having four or more bedrooms and average sales prices exceeding £1.24m in 2018. The Duchy of Lancaster recognises that the site offers an opportunity to address local demographic needs by providing a mix of housing types, including smaller family homes and downsizing options, along with affordable housing, ensuring quality and sustainability.	Comments noted. The Council appreciate the support and comments from the Duchy of Lancaster regarding the Draft Local Plan and the site at Camlet Way. The strategic allocation of housing sites, including RUR.02, is guided by robust evidence and a comprehensive understanding of local housing needs, as detailed in the Site Allocation Topic Paper, Exceptional Circumstances Topic Paper, and ELP Spatial Strategy and Overall Approach. The early delivery of Camlet Way within the first five years will indeed bolster our housing supply and help meet the accrued deficit. The Council welcome further engagement and a statement of common ground to ensure the successful delivery of this important site.	No	01672	Duchy of Lancaster
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Duchy of Lancaster's response acknowledges that most planned development in Enfield, according to Policy SS1, will be concentrated in the east and in Opportunity Areas like Meridian Water and New Southgate, which are likely to be high-density, tall developments. They emphasize the importance of addressing housing needs qualitatively and quantitatively, highlighting the site's potential for lower-density, family-friendly housing that complements the Hadley Wood conservation area. They also note the draft Policy H2 requirement for 50% affordable housing on former Green Belt sites and request clarification on whether this is calculated by unit or habitable room.	The Council acknowledges the Duchy of Lancaster's response regarding the development potential at Camlet Way, particularly its ability to address housing needs both qualitatively and quantitatively. The Enfield Local Housing Needs Assessment (2020) identifies significant housing affordability issues, with the median house price now over 13 times the average annual earnings. Furthermore, the Enfield Housing Topic Paper (2024) confirms a pressing need for diverse housing types, including affordable family homes. The Council's viability assessments support the 50% affordable housing requirement on former Green Belt sites as justified. The evidence base provided in the Enfield Local Housing Needs Assessment, Housing Topic Paper, and Viability Update confirm the approach and underline the need for robust affordable housing provisions. The council is committed to further engagement and look forward to collaborating to ensure that the site can contribute effectively to meeting the borough's housing needs. Additionally, we will clarify whether affordable housing requirements apply on a unit or habitable room basis.	No	01672	Duchy of Lancaster
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Duchy of Lancaster supports the infrastructure requirements and design principles in Site Allocation RUR.02. They highlight that the site is available and could be developed within the first five years of the plan period. The Enfield Site Allocation Topic Paper (2024) indicates that the benefits of developing this site, when balanced with strategic exceptional circumstances, justify its release from the Green Belt. The Duchy of Lancaster concurs with the Council's assessment that the exceptional circumstances for releasing this site from the Green Belt are met.	Comments noted. The Council acknowledges and appreciates the Duchy of Lancaster's support for the infrastructure requirements and design principles set out in Site Allocation RUR.02. The Council agrees that the site's availability and potential for development within the first five years align well with strategic planning objectives. The exceptional circumstances justifying the release of this site from the Green Belt are robustly supported by the plan's evidence base, including the Site Allocation Topic Paper (2024), Exceptional Circumstances Topic Paper, and ELP Spatial Strategy and Overall Approach Topic Paper. The Council welcome further engagement and collaboration to ensure the site's successful development.	No	01672	Duchy of Lancaster

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Duchy of Lancaster argues that the need for new housing in Enfield justifies the exceptional circumstances for Green Belt release, as the draft Local Plan will not meet Enfield's housing needs over the 20-year period. With Enfield demonstrating only a 3.75-year housing land supply, a 20% buffer is needed in the first five years. Therefore, Site Allocation RUR.02 is crucial for addressing the significant housing shortfall in the next five years and throughout the Plan period.	Comments noted. The Council acknowledges the Duchy of Lancaster's points regarding the necessity for Green Belt release to meet housing needs. The Council's approach is justified by the Enfield Local Housing Needs Assessment and the Enfield Housing Topic Paper 2024. The Council agrees that Site Allocation RUR.02 is essential for meeting Enfield's housing requirements and welcome further engagement to ensure successful implementation.	No	01672	Duchy of Lancaster
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Duchy of Lancaster highlights the significant rise in median house prices in Enfield from £114,000 in 2000 to £319,000 in 2019, leading to limited housing choices and overcrowding. They emphasize that the delivery of affordable housing on the site is crucial to addressing this housing need.	Comments noted. The Council acknowledges the Duchy of Lancaster's concerns regarding housing affordability and overcrowding. The Council's approach, as detailed in the Enfield Housing Needs Assessment and the Enfield Housing Topic Paper 2024, supports the delivery of affordable housing to meet local needs. The Council appreciates the Duchy's commitment to this objective and welcome further collaboration to ensure effective implementation.	No	01672	Duchy of Lancaster
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Duchy of Lancaster emphasizes that the Hadley Wood Neighbourhood Plan identifies a skew towards larger homes, with almost 70% having four or more bedrooms. A key objective of the plan is to provide smaller family homes and downsizing options. The site will be instrumental in meeting this objective by offering the type and size of family housing needed by the local community.	Comments noted. The Council appreciate the feedback from the Duchy of Lancaster on Site Allocation RUR.02. The Enfield Local Housing Needs Assessment (2020) and Housing Topic Paper (2024) justify our approach, emphasizing the critical need for new housing and addressing affordability issues. The Hadley Wood Neighbourhood Plan's objective to provide smaller family homes aligns with our strategy for the site, ensuring it meets local housing needs effectively. The Council acknowledge the importance of this site in contributing to Enfield's housing targets and addressing the shortfall in housing land supply. Further engagement and refinement of plans will ensure the site's successful development.	No	01672	Duchy of Lancaster
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Duchy of Lancaster argues that the site at Hadley Wood offers limited contribution to Green Belt purposes. The site is separated from other urban areas by natural features, does not affect the gap between Greater London and Potters Bar, and is enclosed by mature planting, reducing its countryside distinction. It minimally impacts the Hadley Wood Conservation Area, with any effects mitigable through design and landscaping. The allocation of this site is necessary to meet Enfield's housing targets and does not hinder urban regeneration.	Comments noted. The Council acknowledges the Duchy of Lancaster's position regarding the limited contribution of the Hadley Wood site to Green Belt purposes. The council's assessment, as detailed in the Site Allocation Topic Paper and the Exceptional Circumstances Topic Paper, justifies the site's allocation for development. Enfield remains committed to sustainable growth while respecting the character of surrounding areas. The council welcome further dialogue to ensure the development aligns with both strategic goals and community needs.	No	01672	Duchy of Lancaster
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Enfield's Green Belt Assessment (2023) identifies a well-defined field boundary to the west of the site, suggesting that releasing the site would minimally impact the adjacent Green Belt. The boundary features established vegetation, and development would extend the current urban edge northwards, creating a clear and defensible boundary. Consequently, the site is deemed suitable for release, with any localized impacts mitigated as proposed in the policy. This aligns	Comments noted. The Council appreciates the detailed assessment provided by the Duchy of Lancaster regarding the Green Belt site at Hadley Wood. Enfield's Green Belt Assessment (2023) supports this view, confirming that the site's release would have minimal impact due to the well-established field boundary and vegetation. The site's development is crucial for meeting housing targets, and any localized impacts will be effectively mitigated. This approach is justified by the findings in the Site Allocation Topic Paper and the Exceptional Circumstances Topic Paper. The council welcome continued	No	01672	Duchy of Lancaster

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	with the findings in the Exceptional Circumstances Topic Paper and the Site Allocation Topic Paper. Paragraph 147 of the NPPF highlights the importance of considering land well-served by public transport when releasing Green Belt land for development. The site at Hadley Wood is ideally located next to Hadley Wood Station, offering direct rail connections to Welwyn Garden City and London (Moorgate). It is also near local bus stops, amenities, and facilities, including a primary school and a local shopping parade. The site's strategic location aligns with the NPPF's criteria, making it a sustainable choice for development.	engagement to ensure that the development aligns with strategic goals and community needs. Comments noted. The Council acknowledges the strategic advantages of the site at Hadley Wood, particularly its proximity to Hadley Wood Station, local bus services, and essential amenities. This aligns with Paragraph 147 of the NPPF, which emphasizes prioritizing land well-served by public transport for Green Belt release. The site's sustainable location and accessibility support its allocation for development, contributing to Enfield's housing targets while adhering to national planning policy. This approach is justified by the Site Allocation Topic Paper and the Exceptional Circumstances Topic Paper. Further engagement to ensure alignment with planning objectives is welcome.	No	01672	Duchy of Lancaster
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Duchy of Lancaster supports the allocation and Green Belt release of the Camlet Way site for residential development, recognizing its critical role in meeting Enfield's significant housing needs over the next five years and throughout the Plan period. The site offers a unique opportunity for lower-density family and affordable housing, distinct from the high-density developments in the borough's east. They look forward to continued collaboration with the Council to ensure a high-quality, sustainable scheme that benefits the Hadley Wood community.	Comments noted. The Council appreciates the support from the Duchy of Lancaster for the allocation and release of the Camlet Way site from the Green Belt to meet Enfield's significant housing needs. This decision is supported by the Site Allocation Topic Paper and the Exceptional Circumstances Topic Paper, which outline the strategic and local level justifications for Green Belt release. The site's sustainable location, adjacent to Hadley Wood Station and local amenities, further aligns with NPPF guidelines. The council look forward to continued collaboration to deliver a high-quality, sustainable development that benefits the Hadley Wood community and contributes to the borough's housing targets. Further engagement and a Statement of Common Ground will be essential in refining and ensuring the successful implementation of the proposed policies.	No	01672	Duchy of Lancaster
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Thames Water does not anticipate infrastructure concerns for wastewater networks regarding this development. However, they recommend that the developer and the Local Planning Authority liaise with Thames Water early to discuss development phasing. For further coordination, Thames Water Development Planning can be contacted via email at Devcon.team@thameswater.co.uk , by phone at 02035779998, or by mail at Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Enfield Road Watch objects to SA RUR.02: Hadley Wood (Land Between Camlet Way and Crescent Way) because the area is currently Green Belt countryside and designated as an Enfield Chase Area of Special Character in the existing Development Plan. Additionally, the proposed development would negatively impact the setting of the Conservation Areas at Hadley Wood and Monken Hadley (Barnet).	Comments noted. The Enfield Housing Topic Paper (2024) and the Site Allocation Topic Paper for emphasizes that the Council has thoroughly explored brownfield sites first, but some Green Belt release is necessary to meet housing needs. The ELP Spatial Strategy recognises the balanced approach taken to address housing demands while preserving essential green spaces where possible.	No	01687	Enfield Road Watch

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	CPRE London opposes the development of Green Belt land at Hadley Wood (SA RUR.02), emphasising its significance to the Metropolitan Green Belt and arguing that Enfield has enough brownfield land and existing major sites like Meridian Water for housing development. They note that this protected Green Belt countryside is designated as an Enfield Chase Area of Special Character within the current statutory Development Plan and should not be included as a site allocation.	Comments noted. The Council acknowledges CPRE London's concerns regarding the development of Green Belt land at Hadley Wood (SA RUR.02). The ELP Spatial Strategy and Overall Approach Topic Paper outlines the necessity of meeting housing demands in Enfield, emphasizing that brownfield sites alone are insufficient. The Exceptional Circumstances Topic Paper provides detailed justification for Green Belt release, highlighting the importance of addressing housing shortages comprehensively. The Enfield Housing Topic Paper and Site Allocation Topic Paper further explain the rigorous assessment process ensuring developments balance housing needs with environmental protection, maintaining the character and significance of areas like Hadley Wood.	No	01726	Hertfordshire County Council as Lead Local Flood Authority (LLFA)
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Enfield Society's response highlights significant concerns about the proposed development of 160 homes between Hadley Wood and Monken Hadley Conservation Areas. They argue the development would harm the views from Crescent Road, breach woodland fringes, and intrude on rural views. The site is historically significant as part of Enfield Chase and could be part of the Battle of Barnet battlefield. They emphasize the area's protection under London Plan policies and the Hadley Wood Neighbourhood Plan, arguing the development is inconsistent with these protections and would disrespect local democratic wishes.	Comments noted. The Enfield Local Plan aims to balance development needs while preserving historic and natural environments. The proposed site allocation for 160 homes near Hadley Wood and Monken Hadley Conservation Areas acknowledges the area's historic significance and scenic value. The Plan emphasizes compliance with London Plan Policy G1, which protects open spaces, including privately owned land. Additionally, policies HC1 and HC3 focus on conserving heritage and strategic views, ensuring any development respects these guidelines. The Plan supports development that aligns with strategic policies, mitigating impacts on valued landscapes and historic sites.	No	01794	Enfield Society
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Barnet Society is concerned about the designation of the Green Belt site for 160 new homes, noting that this area is a crucial part of the scenic valley of Monken Mead Brook. They emphasize that the combined landscapes of Enfield, Barnet, and Hertsmere create a significant and cohesive natural environment. The loss of Enfield's meadows would negatively impact the surrounding areas, and they express concern over the apparent lack of consultation with Barnet and Hertsmere on this matter.	Comments noted. The council emphasizes the rigorous assessment and strategic planning considerations that underpin the proposal, including the balancing of housing needs with environmental protection. The Topic Paper outlines the exceptional circumstances and mitigation measures that are planned to preserve the landscape's integrity while meeting housing targets. The full justification can be reviewed in the Site Allocation Topic Paper.	No	01817	Barnet Society
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The Barnet Society raises concerns about a contradiction in the Local Plan. Table 2.2, Side note 1, mentions a minimum requirement of 160 homes for the Hadley Wood Neighbourhood Plan area per NPPF Paragraph 67 but does not quantify potential windfall. This contradicts the specific proposal for SA RUR.02: Land between Camlet Way and Crescent Way outlined on pages 511-512. This inconsistency needs clarification to ensure transparency and alignment with planning requirements.	Comments noted. The Site Allocation Topic Paper clarifies that the proposed allocation for SA RUR.02: Land between Camlet Way and Crescent Way is intended to meet housing needs in Hadley Wood. The Housing Topic Paper further supports this by providing evidence of housing requirements and windfall site contributions. This alignment ensures transparency and compliance with NPPF Paragraph 67, balancing specific allocations and windfall estimates.	No	01817	Barnet Society
RUR.02: Land between Camlet Way and Crescent	TfL recommends amending the criteria in Part 2a to avoid subjective terms like "good" or "bad." Instead, they suggest specifying "sites with a PTA of 3 – 6" to provide clearer and more objective criteria.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity	No	01891	Transport for London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
West, Hadley Wood		to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.			
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	TfL welcomes the requirement for the development to reduce on-site car parking. They recommend that the reduction should align car parking with the London Plan maximum standards for a site with a PTAL of 3-4.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Importance of careful layout and design to prevent encroachment and maintain the strategic purposes of the Green Belt.	Comments noted. Exceptional Circumstances for the release of Green Belt are set out in the relevant Topic Paper. Further engagement and statement of common ground to consider how to resolve issue.	No	01924	Hertsmere Borough Council
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Strong opposition due to the site being in strongly performing Green Belt. Concerns about the lack of consideration of Green Belt harm and the site's deliverability, given Hertsmere's decision not to allocate the adjacent site. Potential negative impacts on the environment and infrastructure, particularly on Potters Bar.	Comments noted, Exceptional Circumstances for the release of Green Belt are set out in the relevant Topic Paper. Further engagement and statement of common ground to consider how to resolve issue.	No	01924	Hertsmere Borough Council
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	FZ2 and FZ3 and FZ3b. Appendix C states this is FZ1 (page 524). This is incorrect.	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01926	Environment Agency
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	LBESPS supports the allocation of land between Camlet Way and Crescent Way (SA RUR.02) for new homes, emphasizing sustainable design that respects the surrounding Green Belt and SINC. They endorse early engagement with Historic England and Thames Water due to the site's location in an Archaeological Priority Area and potential wastewater network upgrades. They agree with the estimated capacity of 160 new homes and the 10-year development timeframe. The site is seen as a deliverable location that can significantly contribute to the Borough's housing needs and should be prioritized for residential development.	Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01946	LBE Strategic Property Services
RUR.02: Land between Camlet Way and Crescent	LB Enfield's draft Local Plan allocates site SA.RUR.02 (Land Between Camlet Way and Crescent West, Hadley) for housing (160 homes), adjacent to Green Belt in LB Barnet. LB Barnet is concerned that this development could detrimentally affect the Green Belt's openness.	The council appreciate LB Barnet's feedback on the site allocation SA.RUR.02 and understand their concerns about the impact on the Green Belt and the Monken Hadley Conservation Area. The design principles within the site allocation have been developed to mitigate	No	02091	London Borough of Barnet

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
West, Hadley Wood	<p>While the site allocation includes design principles to retain high-value trees, create green corridors, and limit building heights to 18m with height reductions towards the boundaries, Barnet fears the height could impact the Green Belt's openness. LB Barnet's policy ECC05 aims to protect land from inappropriate development, considering spatial and visual impacts. Barnet also highlights the site's proximity to the Monken Hadley Conservation Area, seeking to prevent harm to its character. They request specific references to the Green Belt and Conservation Area in site allocation SA45. Barnet supports design principles improving pedestrian and cycle connections and ensuring careful consideration of the Conservation Area's impact. LB Barnet urges Enfield to consult with them on any proposals for this site to ensure the Green Belt and Conservation Area are adequately protected.</p>	<p>these impacts, as outlined in the Site Allocation Topic Paper. The Council is committed to ongoing consultation with LB Barnet to ensure that development respects the openness of the Green Belt and the character of the Conservation Area. Further engagement and a Statement of Common Ground will be pursued to resolve these issues collaboratively.</p>			
RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	<p>Comments urge the retention of site RUR.02 within the Green Belt to protect it from inappropriate development and emphasize that Hadley Wood Neighbourhood Plan policies should apply within its area. Critics argue that the Plan is inconsistent with national policies and legislation, citing the Council's failure to consider representations from around 1,000 local residents and the detailed submission from the Hadley Wood Neighbourhood Planning Forum. They also highlight the Council's refusal to update the Consultation Statement, which does not reflect the significant opposition to the development of Hadley Wood Green Belt land and omits mention of the Forum's extensive submission regarding Site RUR.02.</p>	<p>Comments noted. The Enfield Local Plan (ELP) is sound and based on an up-to-date evidence base, aligning with national policies and legislation, particularly NPPF paragraph 35. The ELP's strategy is consistent with the Spatial Strategy and Overall Approach Topic Paper and the Housing Topic Paper, ensuring a viable pattern of development. The Green Belt Exceptional Circumstances Topic Paper (March 2024) outlines the criteria for reviewing Green Belt boundaries and the specific justifications for such releases. The Site Allocation Topic Paper (March 2024) provides detailed assessments of all proposed sites, including justifications for the inclusion or exclusion based on accessibility, sustainability, and potential development impacts. The Housing Topic Paper (2024) details the housing target methodology and justifications for increasing the housing target post-2029, emphasizing the need to meet future housing demands. The ELP identifies sites that are viable, sustainable, and necessary to meet the identified housing needs, ensuring a balanced approach to urban and Green Belt development. The council has engaged in extensive consultation with stakeholders and the public, as detailed in the Consultation and Duty to Cooperate documents, ensuring transparency and responsiveness to community concerns. The Spatial Strategy and Overall Approach Topic Paper highlights the strategic planning for infrastructure development, ensuring alignment with growth and sustainability objectives. The ELP includes provisions for enhancing infrastructure and promoting sustainable development patterns, aligning with NPPF guidelines and addressing concerns about site RUR.02's development. The ELP's development proposals are consistent with the NPPF's requirements for sustainable development, as detailed in the Integrated Impact Assessment (IIA) and the Housing Topic Paper. The assessment of site RUR.02, including its PTAL rating and proximity to amenities, is based on comprehensive evidence, ensuring it meets the criteria for sustainable development. The identification and exclusion of certain brownfield sites are justified based on detailed site assessments, prioritizing those that meet the development needs and sustainability criteria. The</p>	No	02094	Rowley Farm

SA2.2: Heritage House	BL Logistics Investment Limited (British Land) supports the land use principles set out in draft site allocation Policy SA2.2 - Heritage House, and the identification of the site for industrial redevelopment under Use Classes E(g)iii, B2, and B8, subject to the necessary amendments detailed in these representations. British Land appreciates that Draft Policy SA2.2 includes the correct estimated floorspace capacities as per planning permission ref. 23/00824/FUL. Additionally, it is noted that Heritage House is identified in the Council's Employment Topic Paper (March 2024), a key evidence base document, as "the only contemporary instance of an intensified format with granted planning consent in Enfield." A tracked changes version of Policy SA2.2, incorporating detailed comments, has been included at Appendix 3.	Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives. The Council appreciates the support from BL Logistics Investment Limited (British Land) regarding the land use principles in draft site allocation Policy SA2.2 - Heritage House. The council acknowledge the identification of the site for industrial redevelopment and the inclusion of correct estimated floorspace capacities. The recognition of Heritage House as a key instance of an intensified format with granted planning consent in Enfield is noted. The council welcome further engagement and the development of a statement of common ground to address any necessary amendments and resolve issues collaboratively.	No	02011	BL Logistics Investment Limited (British Land)
SA2.7: Crown Road Lorry Park	Thames Water comments that the development boundary falls within a Source Protection Zone for groundwater abstraction, posing a risk of pollution from surface activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater resources. Applicants are encouraged to review the Environment Agency's approach to groundwater protection and consult with a qualified environmental consultant to understand the implications for their development. For more details, refer to the Environment Agency's groundwater protection position statements.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA2.7: Crown Road Lorry Park	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA2.7: Crown Road Lorry Park	TfL welcomes the requirement for the development to contribute towards bus service prioritisation and associated traffic management measures along the A1010.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
SA2.7: Crown Road Lorry Park	LBESPS supports the allocation of Crown Road Lorry Park (SA2.7) for additional employment floorspace, proposing 4,530 sqm of industrial and related uses. They recommend a flexible approach in design, suggesting the floorspace figure be approximate and removing the reference to "stacked industrial units" due to viability and market attractiveness concerns. They advise reconsidering the 65% plot ratio and emphasize the need for detailed design and feasibility studies. The site is seen as a sustainable, accessible brownfield location, with a development timeframe of up to 10 years, and should be prioritized for development.	Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01946	LBE Strategic Property Services
SA2.8: Land and buildings north of Lincoln Road	Thames Water does not foresee infrastructure concerns regarding the water supply network for the proposed development. However, they recommend that the Developer and the Local Planning Authority liaise with Thames Water early to discuss the development's phasing. Developers should contact Thames Water Development Planning via email at Devcon.team@thameswater.co.uk , by phone at 02035779998, or by mail at Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA2.8: Land and buildings north of Lincoln Road	Thames Water indicates that the proposed development scale will likely require wastewater network upgrades. They recommend early liaison between the Developer, Local Planning Authority, and Thames Water to agree on a housing and infrastructure phasing plan. This plan should determine existing network capacity and necessary phasing to ensure infrastructure upgrades are completed before development occupation. Failing to do so may result in planning conditions at the application stage. Developers can request network infrastructure information from Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
SA2.8: Land and buildings north of Lincoln Road	TfL welcomes the requirement to contribute towards increasing direct and frequent bus services to improve connectivity to and from industrial areas, emphasising that any enhanced bus services must be economically viable based on expected trip generation. They are currently updating options for bus services to Meridian Water phases 1 and 2 based on the latest costs. TfL notes the requirement for limited parking but suggests it should be amended to state that parking must be minimised to ensure consistency with the London Plan. They support streetscape improvements but emphasize that any proposals affecting the North Circular Road or its frontage should be agreed with TfL, with no direct vehicle access (for parking or servicing) from the North Circular Road.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
SA2.8: Land and buildings	To align the Draft Local Plan more closely with national and regional policies, Goodman UK Limited suggest that Chapters 7 (Design and Character) and 9 (Economy) be modified to better support the provision of a diverse range of modern, high-quality, and accessible	Comments noted.	No	01874	Goodman UK Limited

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
north of Lincoln Road	employment premises. Written representations with detailed recommendations are included in the enclosed Regulation 19 Consultation Stage Representation Form.				
SA2.8: Land and buildings north of Lincoln Road	Goodman UK Limited supports the redevelopment of a site in a Strategic Industrial Location (SIL) due to its current underutilization and the need for modern industrial space. They have a Planning Performance Agreement with the Local Planning Authority to outline flexible development parameters for the site, aiming for delivery by 2027-28. Goodman confirms the site is available and suitable, with initial feasibility studies exploring various development options. They advocate for the site's allocation but request modifications to address inconsistencies in the Draft Site Allocation, particularly concerning unrealistic intensification requirements. Goodman suggests removing rigid minimum intensification levels in favour of flexible approaches that reflect market realities and site-specific factors. This would align with broader policy objectives and support viable, attractive industrial development.	Comments noted. The Council is committed to working collaboratively with Goodman UK Limited and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01874	Goodman UK Limited
SA2.8: Land and buildings north of Lincoln Road	Goodman UK Limited supports the Council's approach to allowing tall buildings in Strategic Industrial Locations (SIL), particularly in the Great Cambridge Road SIL, which is suitable for heights of up to 36m or 39m. They value the flexibility this offers developers for improving site usability and density. However, Goodman questions whether these height limits were established through comprehensive testing as per London Plan Policy GG2 or based on specific typologies. They believe the current evidence base is insufficiently ambitious and does not account for site-specific factors, suggesting that taller buildings, up to 54m, might be necessary for optimal industrial intensification. Goodman's feasibility studies show no significant visual impact difference between 39m and 54m buildings. They recommend increasing the height limit to 54m, allowing for flexibility and detailed assessments during development, and aligning with Draft Policy DE6's flexibility provision.	Comments noted. The Council is committed to working collaboratively with Goodman UK Limited and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01874	Goodman UK Limited
SA2.8: Land and buildings north of Lincoln Road	Goodman UK Limited expresses concerns over the removal of the proposed extension to the Great Cambridge Road SIL in the Draft Policies Map. They supported the extension, which would have addressed the need for additional employment land and created a buffer between their site and the Morrisons site. The current Draft Local Plan's omission of this extension is regretted, as it could impact the efficiency and future redevelopment of their site. Goodman emphasizes the need for robust boundaries and adherence to the Agent of Change principle to prevent new mixed-use developments from disrupting 24-hour industrial operations at Martinbridge and affecting future intensification. They also advocate for similar	Comments noted. The Council is committed to working collaboratively with Goodman UK Limited and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01874	Goodman UK Limited

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	protections for other nearby sites to avoid conflicts between residential and industrial uses.				
SA2.8: Land and buildings north of Lincoln Road	Goodman UK Limited supports the overall direction of Draft Strategic Policy E3 (Strategic Industrial Locations) but is concerned that Part 3 of the policy does not fully align with London Plan Policy E4(A). The current policy supports a limited range of industrial uses, whereas the London Plan includes a broader spectrum of emerging industrial-related sectors and related activities essential for London's economy. Goodman UK Limited recommends rewording the policy to ensure it meets the Borough's and the capital's current and future industrial needs and aligns with the London Plan.	Comments noted. The Council is committed to working collaboratively with Goodman UK Limited and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01874	Goodman UK Limited
SA2.8: Land and buildings north of Lincoln Road	Goodman UK Limited supports the Council's encouragement of industrial intensification and efficient use of space in Draft Policy E5 but has concerns about Part 2(D) regarding the retention and relocation of existing businesses. They believe that engaging with existing businesses and negotiating leases is primarily a commercial matter outside the planning regime, with details often being commercially sensitive. The London Plan does not mandate addressing the retention or relocation of businesses for redevelopment proposals. Additionally, retaining businesses may conflict with the goal of intensification, as new multi-storey developments may not suit existing tenants' needs. Goodman UK Limited recommends rewording the policy to consider these factors and allow case-by-case exploration of business retention, aligned with each site's specific circumstances.	Comments noted. The Council is committed to working collaboratively with Goodman UK Limited and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01874	Goodman UK Limited

SA5.7: Ravenside Retail Park	Prologis suggests changes to Policy SA 5.7 for Ravenside Retail Park to support multi-level logistics development. They propose removing the new pedestrian route through the site, as it conflicts with vehicle movements, and focusing pedestrian paths on the eastern end. Prologis also objects to the proposed 10-meter buffer zone along the Lee Navigation, advocating for an 8-meter zone. They recommend amending the site allocation map and design principles to reflect these changes, ensuring the site's development effectiveness.	The council appreciates Prologis' support and acknowledges the concerns regarding the wording of PL5. The Council will continue to engage with Prologis and prepare a bespoke area-wide Meridian Water statement of common ground to address these issues and ensure the policy is justified and sound.	No	01905	Prologis
SA5.7: Ravenside Retail Park	Prologis supports the development of a multistorey logistics hub at Ravenside Retail Park (RRP) but highlights inconsistencies in the draft policy SA 5.7 regarding industrial floorspace figures, which are listed as both 21,700 sqm and 32,500 sqm. They recommend clarifying this to avoid limiting the site's potential. Prologis also notes that ramps and enclosed yards necessary for the hub should be excluded from the floorspace calculation. They suggest amending the policy to state a minimum of 32,500 sqm to facilitate optimal development.	The council appreciates Prologis' support and acknowledges the concerns regarding the wording of PL5. The Council will continue to engage with Prologis and prepare a bespoke area-wide Meridian Water statement of common ground to address these issues and ensure the policy is justified and sound.	No	01905	Prologis
SA5.7: Ravenside Retail Park	Prologis objects to certain design principles in the draft policy SA 5.7 for Ravenside Retail Park, arguing they hinder the site's potential for a multi-level logistics hub. They highlight conflicts with requirements for naturalizing Pymmes Brook, setback distances, yard and loading space locations, and limited parking. Prologis contends these elements are not justified or effective, potentially impeding the operational needs of logistics developments. They suggest amending	The council appreciates Prologis' support and acknowledges the concerns regarding the wording of PL5. The Council will continue to engage with Prologis and prepare a bespoke area-wide Meridian Water statement of common ground to address these issues and ensure the policy is justified and sound. 	more details, refer to the Environment Agency's groundwater protection position statements.				
URB.28: Land and buildings south east of Stockingswater Lane	TfL welcomes the requirement to contribute towards more direct and frequent bus services along the A1055 to improve connectivity to and from industrial areas. They emphasise that any enhanced bus services must be economically viable based on expected trip generation and note the potential difficulty of providing viable bus services due to limited frontages in the area. Additionally, TfL notes the requirement for limited parking but suggests it should be amended to state that parking must be minimised to ensure consistency with the London Plan.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
URB.28: Land and buildings south east of Stockingswater Lane	ADL welcomes the inclusion of site allocation URB.28 (Land and Buildings South East of Stockingswater Lane) in Policy E1: Employment and Growth, with an estimated additional capacity of 80,753 sqm. They support the focus on intensifying industrial land to boost employment. However, ADL proposes clarifying that this capacity is an estimate and not a limit, allowing for higher capacity if an appropriate design solution is found. They also recommend updating Policy E1 to reflect that 80,753 sqm is a minimum capacity.	The council appreciate ADL's support for the inclusion of site allocation URB.28 (Land and Buildings South East of Stockingswater Lane) within Policy E1: Employment and Growth, recognizing its potential to add significant industrial capacity. As justified by the Site Allocation Topic Paper and the Employment Topic Paper, the focus on industrial intensification is crucial for boosting employment. We acknowledge ADL's suggestion to clarify that the 80,753 sqm capacity is an estimate and not a limit. Therefore, the council will consider updating Policy E1 to reflect this capacity as a minimum, allowing for higher capacity if an appropriate design solution is found. Further engagement and a statement of common ground will be essential to ensure these adjustments align with Enfield's growth objectives.	No	01682	Arel Developments Ltd. ('ADL') on behalf of the Landowner of Stockingswater Lane ('Landowner').
URB.28: Land and buildings south east of Stockingswater Lane	ADL welcomes the inclusion of site allocation URB.28 but suggests several clarifications and amendments. They note that the identified green area on the map does not exist within the site boundary and propose integrating green areas across the site to ensure efficient building layouts and meet industrial and employment capacity goals. ADL argues that requiring active frontages around the site's circumference may limit building forms and industrial space intensification, suggesting instead the use of well-located amenity spaces, appropriate glazing, curated landscaping, and biodiversity. They recommend the land use section support interim uses like parking and loading areas to facilitate the site's industrial function, advocating for innovative multistorey development. ADL also proposes the policy prioritize industrial floorspace delivery while contributing to placemaking, with amendments including contributions to the Green Loop, Brimsdown Station improvements, and open space enhancements along the River Lee Navigation. For design principles, they suggest activation along Stockingswater Lane and the River Lee Navigation, streetscape improvements, pedestrian/cycle connections, access to the pedestrian river bridge, and supporting the Enfield Green Loop. These adjustments aim to balance industrial space intensification with broader community and environmental benefits.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with ADL to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01682	Arel Developments Ltd. ('ADL') on behalf of the Landowner of Stockingswater Lane ('Landowner').

URB.31: Snowbird Foods Extension	<p>definition. They advocate for flexibility in site capacity assessment and alignment with London Plan Policy E7. HBD also points out inaccuracies in the Draft Plan regarding current planning applications and existing employment floorspace. They request updates to the policy to reflect the approved Design Code and planning history accurately.</p> <p>Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding</p>	<p>The Employment Land Review (2024) supports the need for intensified employment use within existing sites to meet future demand. This includes the Montagu Industrial Estate. The draft Local Plan's employment floorspace targets are based on extensive analysis, considering current and future market demands. On Intensification of Employment Sites: The GLA's Industrial Intensification and Co-Location Study (2018), provides a framework that the council adopts to ensure that sites like Montagu can be developed to their full potential. The draft Local Plan does not merely focus on spatial intensification (increasing floorspace) but also emphasizes economic, process, and urban intensification, ensuring a holistic approach to site development. On Intensification of Employment Sites: The GLA's Industrial Intensification and Co-Location Study (2018) provides a framework that the council adopts to ensure that sites like Montagu can be developed to their full potential. The draft Local Plan does not merely focus on spatial intensification (increasing floorspace) but also emphasizes economic, process, and urban intensification, ensuring a holistic approach to site development. On Implementation Timeframe and Infrastructure Requirements: The council acknowledges the progress on site developments and the terms of existing planning permissions. The Local Plan aims to align future site allocations with these permissions, ensuring continuity and feasibility. Infrastructure requirements are based on comprehensive assessments to ensure sustainable development. On Design Principles and Flexibility: The design principles for the Montagu Industrial Estate are grounded in creating high-quality, functional industrial spaces that align with the approved Design Code. The principles provide a necessary framework to guide future developments while maintaining flexibility to adapt to evolving market demands. The council's approach to the Montagu Industrial Estate is justified and aligns with broader strategic goals for employment and industrial intensification in Enfield. The policies are evidence-based, considering the dynamic nature of employment needs and market conditions. The existing planning permissions and ongoing development activities are integrated into this strategic vision, ensuring that the Local Plan is both practical and forward-looking. The detailed assessments and evidence presented in the Employment Topic Paper, Employment Land Review, and Site Allocation Topic Paper for Regulation 19 justify the council's approach to employment allocations, including specific targets and design principles for Montagu Industrial Estate. The Council will continue to engage with Henry Boot Developments and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.</p> <p>Comments noted. Stantec requests confirmation of receipt for all three emails and offers further assistance if needed.	Received with thanks.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.34: 5 Picketts Lock Lane	CCLA Investment Management, representing site 5 Pickett's Lock Lane, raises concerns about the Enfield Local Plan's 2.2 Spatial Vision and Strategic Objectives. They suggest emphasizing investment in industrial buildings to grow and diversify business spaces, aligning with NPPF paragraphs 86(c) and 35(d). They recommend adding a section to support investment within the Borough, amending references to 'expansion of employment floorspace' to include modern needs, and rephrasing section 13 to focus on new employment spaces rather than intensification. For section 14, they suggest highlighting feasible industrial intensification and enhancing blue-green connectivity to attract businesses.	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.34: 5 Picketts Lock Lane	CCLA Investment Management supports the inclusion of "designated urban intensification" in Policy SS2, emphasizing sympathetic redevelopment to local character and heritage while considering site constraints and pollution effects, as per NPPF paragraph 191. They find the requirement for schemes over 500sqm to demonstrate	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of	No	01895	CCLA Investment Management (CCLA) who are the

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	contributions to "placemaking areas" inconsistent with NPPF paragraph 35(c), as not all sites fall within these areas. They propose that the policy reflect this to ensure it is effective and appropriate for various site contexts.	Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.			appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.34: 5 Picketts Lock Lane	CCLA Investment Management supports the general principles of Policy SE2 but argues against additional requirements beyond those in the London Plan, as they may render projects unviable. They emphasize balancing sustainable outcomes with scheme viability, in line with NPPF paragraph 35(b). While supporting the target for non-residential schemes over 1,000sqm to achieve BREEAM 'Outstanding,' they suggest this should be an aspiration due to the impracticality for energy-intensive developments. They propose flexibility in the policy to account for financial and operational viability, ensuring effectiveness as per NPPF paragraph 35(c).	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.34: 5 Picketts Lock Lane	CCLA Investment Management acknowledges the design requirements to achieve pre-2030 targets but raises concerns about the higher targets' viability and functionality, which remain largely untested and are not reflected in the local plan's viability assessment. They highlight the unique carbon considerations for multi-storey industrial buildings due to their specific structural needs. CCLA suggests mandating carbon optioneering for major developments requiring demolition to assess optimal approaches, noting that this could impact project viability. They consider the policy unjustified under NPPF paragraph 35(b).	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.34: 5 Picketts Lock Lane	CCLA Investment Management emphasizes the need to balance environmental considerations with the practical realities of development in Policy SE6 to avoid undue burdens on stakeholders. They argue that the policy is currently not compliant with NPPF paragraph 35(b) and should avoid introducing overly onerous requirements unless fully justified by appropriate evidence. This	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives. Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	balance is essential to ensure the viability of development projects while supporting sustainable outcomes.				the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.34: 5 Picketts Lock Lane	CCLA Investment Management highlights that the requirement for achieving greenfield runoff rates in Policy SE9 is not compliant with Policy SI 13 of the London Plan and NPPF paragraph 35(d). They propose that the policy should be amended to state that major developments should aim to achieve greenfield runoff rates or as close as possible, ensuring compliance with the London Plan. This amendment would align the policy with NPPF guidelines and make it more practical for developers.	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.34: 5 Picketts Lock Lane	CCLA Investment Management recommends maintaining the exclusion of warehousing (Class B2 and B8) from Policy BG10, citing the Inspector's report on the London Plan. The report highlights the challenges and costs associated with urban greening for industrial developments, noting the feasibility issues of green roofs due to construction and maintenance costs. To ensure the policy is justified per NPPF 35(b), CCLA suggests amending the policy to exclude Class B2 and B8 and focus on commercial developments exceeding urban greening targets as per the London Plan.	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.34: 5 Picketts Lock Lane	CCLA Investment Management highlights that the requirement for achieving greenfield runoff rates in Policy SE9 is not compliant with Policy SI 13 of the London Plan and NPPF paragraph 35(d). They propose that the policy should be amended to state that major developments should aim to achieve greenfield runoff rates or as close as possible, ensuring compliance with the London Plan. This amendment would align the policy with NPPF guidelines and make it more practical for developers.	Comments noted. URB.34: 5 Picketts Lock Lane	CCLA Investment Management highlights that Paragraph 016 of the PPG states planning performance agreements (PPAs) are voluntary between applicants and local authorities. Therefore, Policy DE2 should not require PPAs, making the policy non-compliant with NPPF paragraph 35(d). CCLA suggests deleting section 2a of DE2 to ensure compliance with national guidelines.	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
URB.34: 5 Picketts Lock Lane	CCLA Investment Management supports maintaining and intensifying business premises but stresses the need for pragmatic application. They suggest focusing on modernized floorspace, operational efficiency, building height, infrastructure investment, resilience, sustainability, and operational flexibility. Regarding the co-location of residential and commercial uses, they emphasize this should only be acceptable if the operational functionality of surrounding industrial units is not compromised, in line with London Plan Policy E7. They propose adding a clause to ensure compliance with NPPF paragraph 35(d): "Co-location will only be considered acceptable where operational function."	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.34: 5 Picketts Lock Lane	CCLA Investment Management recommends that the supporting text of Policy DE6 recognize multi-storey industrial developments in London that are 35-40 meters tall. This acknowledgment would facilitate the construction of high-capacity, modern industrial buildings, including multi-storey warehouses, where commercially feasible. They also highlight that tall industrial buildings often have large footprints to accommodate vehicular ramps and goods lifts, and suggest the policy should consider these practical requirements.	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.34: 5 Picketts Lock Lane	CCLA Investment Management (CCLA) proposes revisions to policy E1: Employment Growth for site 5 Pickett's Lock Lane, arguing that the policy should prioritize enhancing productivity and operational efficiency over merely expanding floor space or development footprint. They advocate for incorporating modern industrial needs, such as faster loading, higher ceilings, and improved infrastructure, to align with policy E4 of the London Plan and the NPPF. Their proposed revision, "1a Intensified development, where feasible, of industrial, logistics and related functions in existing employment areas, to meet modern business needs," aims to ensure the policy supports high-quality, flexible industrial spaces that can attract investment and meet future sector demands.	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
URB.34: 5 Picketts Lock Lane	CCLA Investment Management (CCLA) suggests that policy E2: Promoting Jobs and Inclusive Business Growth should be revised to emphasize both the intensification of existing employment sites and the modernization of floorspace to meet contemporary industrial needs. They argue that while supporting intensification is important, it must be applied pragmatically and not as a one-size-fits-all solution. Instead, redevelopment should focus on modernizing floorspace, improving operational efficiency, and investing in infrastructure, resilience, and sustainability. CCLA's proposed amendment rewords the policy to support proposals that enhance and modernize employment locations while also providing modern industrial units. This change aims to ensure the policy is 'justified' and 'effective' in line with NPPF paragraphs 35(b) and 35(c).	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.34: 5 Picketts Lock Lane	CCLA Investment Management (CCLA) proposes modifications to policy E5: Transforming Industrial Sites to better reflect the need for both intensification and innovation in industrial development. They emphasize that while the draft policy focuses on intensification, it should also support new employment formats that align with the Borough's business needs. Their suggested revision aims to ensure that policy E5 is 'effective' as per NPPF paragraph 35(c) by incorporating elements such as modernized floorspace, operational efficiency, increased building height, and infrastructure investment. The proposed amendment is: "The intensification of industrial uses within SILs and LSIS through the more efficient use of space, higher plot ratios, the development of multi-storey schemes, and the assembling of sites within designated employment areas to assist with the delivery of more intensive formats will be supported, where feasible. Proposals will be supported which deliver modernized floorspace, operational efficiency; increased building height, infrastructure investment, resilience, sustainability, quality and operational flexibility (24/7 use)."	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.34: 5 Picketts Lock Lane	CCLA Investment Management (CCLA) recommends revisions to policy E7: Non-Designated Industrial Sites to better accommodate modern industrial requirements and economic potential. They argue that the policy should not penalize reductions in floor space if they lead to site modernization and increased productivity. Instead, the policy should consider factors such as site suitability, modern business needs, quality of floorspace, and essential infrastructure like service yards and parking. CCLA suggests deleting section 2 of the draft policy to allow for more flexible and innovative development, aligning the policy with Policy E4 of the London Plan and ensuring compliance with NPPF paragraph 35(d).	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
URB.34: 5 Picketts Lock Lane	CCLA Investment Management (CCLA) suggests revisions to policy E8: Providing for Workspaces to better align with market demands and support the needs of expanding and larger businesses. They argue that the policy should not impose specific requirements for small or medium-sized units, as this could hinder the availability of suitable industrial space for growing businesses, potentially leading them to relocate outside London. Instead, each site should be assessed individually based on its ability to meet modern business needs. CCLA proposes amending the policy to focus on supporting the provision of affordable workspaces on appropriate sites, ensuring the policy is 'effective' in accordance with NPPF paragraph 35(c).	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.34: 5 Picketts Lock Lane	CCLA Investment Management (CCLA) argues that policy E9: Local Jobs, Skills and Local Procurement unjustifiably penalizes proposals that reduce existing floorspace, potentially affecting the feasibility of such schemes and diminishing Enfield's competitive edge compared to neighbouring areas. They believe that the requirements for relocation of businesses, job creation elsewhere in the Borough, or financial contributions for industrial regeneration and job support, as outlined in section 2 and paragraph 9.65, are excessive and unjustified. CCLA recommends removing these penalizations to ensure the policy aligns with NPPF paragraph 35(b) and does not hinder development potential.	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.34: 5 Picketts Lock Lane	CCLA Investment Management (CCLA) emphasizes that policy D1: Securing Contributions to Mitigate the Impact of Development should not impose excessive or cumulative financial requests that could compromise the deliverability of development plans. They stress that local authorities must ensure that the total impact of such contributions does not hinder plan implementation, aligning with paragraph 34 of the NPPF. Any deviation from this principle would conflict with paragraph 35(d) of the NPPF.	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
URB.34: 5 Picketts Lock Lane	CCLA Investment Management (CCLA) stresses the need for a balance between environmental protection and practical development realities in policy ENV1: Local Environmental Protection. They argue that the draft policy should avoid imposing excessively stringent requirements unless they are thoroughly justified by evidence, as overly onerous conditions could undermine project viability. CCLA advocates for ensuring that environmental policies support sustainable outcomes without placing undue burdens on stakeholders.	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.34: 5 Picketts Lock Lane	CCLA Investment Management (CCLA) supports the allocation of 5 Picketts Lock Lane for industrial redevelopment but recommends several modifications to ensure the policy is feasible and aligns with contemporary needs. They argue that the current requirement for a minimum of 2,297 sqm of additional floor space and the emphasis on multi-level development are impractical given the site's characteristics and modern employment requirements. CCLA suggests updating the Land Use Requirements to include more flexible use classes (E(g)(ii), E(g)(iii), B2, B8) and revising the Design Principles to focus on modernized floorspace, operational efficiency, and sensitivity to the site's context, including residential amenity and environmental considerations. They propose adjustments to the Site Boundary, Site Area, and Design Principles to reflect these changes and ensure that infrastructure requirements do not impede site deliverability. These modifications aim to make the allocation 'justified', 'effective', and 'consistent with national policy' as per NPPF guidelines.	Comments noted. The Council is committed to working collaboratively with CCLA and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01895	CCLA Investment Management (CCLA) who are the appointed Investment Manager for the Local Authorities (LAMIT) on behalf of site 5 Pickett's Lock Lane
URB.35: Riverwalk Business Park	Thames Water does not currently anticipate infrastructure concerns regarding wastewater networks for the proposed developments. However, they recommend that developers and the Local Planning Authority liaise with Thames Water early to discuss development phasing. Contact can be made via email at Devcon.team@thameswater.co.uk, by phone at 02035779998, or in writing to Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
URB.35: Riverwalk Business Park	Thames Water comments that the scale of development in the catchment area will likely necessitate upgrades to the water supply network infrastructure. Early liaison between the developer, the Local Planning Authority, and Thames Water is recommended to agree on a housing phasing plan. This will ensure necessary infrastructure upgrades are delivered ahead of development occupation, avoiding	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	the need for planning conditions at the application stage. Developers can obtain information on network infrastructure via Thames Water's website.				
URB.35: Riverwalk Business Park	Thames Water does not currently anticipate infrastructure concerns regarding wastewater networks for the proposed developments. However, they recommend that developers and the Local Planning Authority liaise with Thames Water early to discuss development phasing.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
RUR.03: Land west of Ramme Marsh	Broxbourne Borough Council has raised concerns about the accuracy of Enfield's traffic modelling, especially regarding the impact of 5,500 new dwellings at Crews Hill and the proposed employment allocation west of Ramme Marsh. Broxbourne's previous transport modelling indicated that several junctions would be operating at or near capacity by 2033, which contrasts sharply with Enfield's lower congestion projections. Broxbourne fears this discrepancy may undermine planned transport interventions on the A10 and result in severe highway impacts, making this part of the Local Plan unsound.	Comments noted. The Council maintains that the Local Plan is sound and based on an up-to-date evidence base, particularly the comprehensive transport modelling detailed in our Movement and Connectivity evidence base. This modelling, conducted by WSP, aligns with national guidelines and incorporates future growth projections, including developments at Crews Hill and Ramme Marsh. The discrepancies noted by Broxbourne arise from different modelling approaches and assumptions. Enfield remains committed to collaborating with neighbouring councils to address cross-boundary transport impacts and ensure sustainable development. The Council is happy to work with the Broxbourne Council to clarify these points further and ensure mutual understanding and agreement on these matters.	No	00580	Broxbourne Borough Council
RUR.03: Land west of Ramme Marsh	Thames Water comments that the scale of developments in the catchment will likely require upgrades to the water supply network. They recommend that the developer and Local Planning Authority engage with Thames Water early to agree on a housing phasing plan. This plan is necessary to ensure infrastructure upgrades are completed before the development's occupation. Without this coordination, planning conditions may be imposed to control development phasing. Developers can request network infrastructure information on the Thames Water website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
RUR.03: Land west of Ramme Marsh	Thames Water notes that the scale of the proposed developments will likely necessitate upgrades to the wastewater network. They recommend early liaison between the developer, the Local Planning Authority, and Thames Water to agree on a housing and infrastructure phasing plan. This plan should assess current network capacity and determine the required phasing to ensure development does not outpace necessary infrastructure upgrades. Failure to coordinate may result in planning conditions to control development phasing. Developers can obtain infrastructure information from Thames Water's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
RUR.03: Land west of Ramme Marsh	Thames Water highlights that the development boundary is within a Source Protection Zone for groundwater abstraction, posing a risk of pollution. They emphasize the need for a tiered, risk-based approach to regulate activities impacting groundwater resources. Developers are encouraged to review the Environment Agency's approach to groundwater protection and consult with an environmental expert. This guidance aims to prevent groundwater contamination from development activities. Further details can be found on the Environment Agency's website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
RUR.03: Land west of Ramme Marsh	Enfield Road Watch objects to SA RUR.03: Land West of Ramme Marsh because the land is currently designated as Green Belt and is part of the Lee Valley Area of Special Character. They emphasize that the area is rich in wildlife and argue that further ecological surveys are needed to understand its significance better.	Comments noted. Enfield's strategic planning documents highlight a balanced approach to development, ensuring sustainable use of Green Belt land while protecting ecological assets. Detailed assessments set out in the evidence base and strategic site allocations support this approach, aligning with Enfield's broader goals for sustainable growth and employment opportunities.	No	01687	Enfield Road Watch
RUR.03: Land west of Ramme Marsh	CPRE London opposes the development of Green Belt land west of Ramme Marsh (SA RUR.03), highlighting its significance to the Metropolitan Green Belt and asserting that Enfield has sufficient brownfield land and existing major sites like Meridian Water for housing development. They emphasize that this protected Green Belt land is designated as part of the Lee Valley Area of Special Character and should not be included as a site allocation.	Comments noted. The Council acknowledges CPRE London's concerns regarding the development of Green Belt land west of Ramme Marsh (SA RUR.03). The Enfield Local Plan (ELP) considers the significance of the Metropolitan Green Belt and prioritizes brownfield sites. However, the ELP Spatial Strategy and Exceptional Circumstances Topic Paper justify the inclusion of certain Green Belt sites to meet housing needs. The Site Allocation Topic Paper and Employment Topic Paper detail the strategic approach, ensuring sustainable development while protecting important green spaces. Ramme Marsh's allocation is based on thorough assessments and the necessity to address employment needs effectively.	No	01726	CPRE London
RUR.03: Land west of Ramme Marsh	HCC's response highlights that the site includes a section of the main river Monken Mead Brook, which drains areas of Hertfordshire. Discharge rates and volumes must be restricted to greenfield rates to ensure upstream areas in Hertfordshire can drain effectively. The site also contains areas within Flood Zone 2 and 3, and HCC recommends consulting the Environment Agency on any proposals for this site.	Comments noted. The Council acknowledge the importance of restricting discharge rates and volumes to greenfield rates to facilitate effective drainage of upstream areas in Hertfordshire. Additionally, the Council will consult with the Environment Agency on any proposals for the site, especially concerning areas within Flood Zones 2 and 3. The Council will seek to address these concerns through a Statement of Common Ground (SoCG) with Hertfordshire County Council and the Environment Agency.	No	01755	Hertfordshire County Council as Lead Local Flood Authority (LLFA)
RUR.03: Land west of	HCC questions whether a mitigation measure at J24 of the M25 is needed to handle growth and increased HGV traffic from the industrial allocation RUR.04 Land East of Junction 24 and welcomes discussion	Comments noted. The need for strategic mitigation measures at J24 of the M25 are recognised and are committed to exploring solutions with HCC. The	No	01755	Hertfordshire County

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
Ramsey Marsh	on this. They express concerns about increased traffic volumes and delays on the A10 and A1010 due to industrial allocations off Mollison Avenue (RUR.03 and RUR.05), noting these routes are designated Air Quality Management Areas (AQMAs) and face severe congestion, especially when the M25 is delayed or closed. HCC expects these issues to be investigated through applicable planning applications and supports integrating wording into the plan to ensure this investigation is a policy requirement.	Council is keen to engage further on this matter and will prepare a Statement of Common Ground (SoCG) with HCC to collaboratively address these transportation concerns and ensure the proposed developments align with both Enfield's and Hertfordshire's strategic transport and infrastructure goals.			Council - Highways
RUR.03: Land west of Ramsey Marsh	The Enfield Society argues that SS1 Paragraph 5 erroneously omits the reference to RUR.03 (West of Ramme Marsh), which should provide 70,200 sqm of new employment floorspace. They assert that neither RUR.03 nor RUR.04 (Junction 24 of the M25) conform with the London Plan's spatial strategy or have the exceptional circumstances needed to justify their removal from the Green Belt. Consequently, both sites should be deleted from paragraph 5 to maintain conformity and policy coherence.	Comments noted. The Enfield Local Plan's policy on employment floorspace is sound and aligns with the London Plan's spatial strategy and definition of 'good growth.' The policy integrates the London Plan's focus on regeneration, Opportunity Areas, and brownfield sites, including Meridian Water and New Southgate. The employment targets are supported by a robust evidence base, including transport modelling by WSP and the Enfield Employment Topic Paper. The strategic balance between housing and employment is designed to minimize environmental impact, particularly in sensitive areas like Chase Park and Crews Hill, which are addressed in their respective topic papers. Site allocations such as East of Junction 24 (SA RUR.04) and Land West of Ramme Marsh (SA RUR.03) are justified by exceptional circumstances, ensuring a sustainable development approach that preserves Enfield's character and heritage.	No	01794	Enfield Society
RUR.03: Land west of Ramsey Marsh	The Enfield Society expresses concerns over the proposal to release a large area of Green Belt land for employment, particularly the 70,200sqm site at Ramme Marsh. They argue that the need for this release has not been demonstrated and that exceptional circumstances do not exist. They also question the proposed ecological enhancements, suggesting off-site improvements should focus on the Lee Valley rather than Enfield Chase. Additionally, they find the proposed building heights of up to 39m for industrial use unjustified, as such developments are typically low-rise. The Society supports creating an active travel and biodiversity corridor along the River Lea.	Comments noted. The proposed site at Ramme Marsh for new employment land, as outlined in the Site Allocation Topic Paper, is justified due to its strategic location, which supports Enfield's economic growth objectives. The proposal includes necessary infrastructure enhancements, such as ecological improvements linking the Lee Valley and Enfield Chase, contributing to sustainable development. The planned 39m building heights align with industrial intensification needs, facilitating efficient land use and supporting the borough's employment targets. This balanced approach addresses ecological, economic, and spatial planning considerations.	No	01794	Enfield Society
RUR.03: Land west of Ramsey Marsh	TfL notes the requirements to contribute towards increasing direct and frequent bus services to improve connectivity and towards enhancing walking and cycling connectivity from Hadley Wood station. However, TfL's recent work has confirmed that providing more direct and frequent bus services would be costly and unlikely to be sustainable in the long term.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
RUR.03: Land west of Ramme Marsh	The Lee Valley Regional Park Authority (LVRPA) supports the site allocations RUR.03 Ramme Marsh West and RUR.05 Land North West of Innova Park for industrial and logistics development, which have been removed from the Green Belt. They appreciate the revisions in the site proformas that address their previous comments, including the emphasis on ecological and greening enhancements, public open space creation, and improved pedestrian and cycle connectivity. LVRPA seeks to collaborate with the Council on master planning to ensure sensitive redevelopment that enhances environmental quality and integrates with the blue and green network.	Comments noted. The detailed feedback is welcomed. The Council propose working closely with the Lee Valley Regional Park Authority (LVRPA) to develop a Statement of Common Ground (SoCG). This collaborative approach will ensure that the Local Plan accurately reflects the strategic importance of the Park, aligns with the Park Development Framework, and supports enhancements to green and blue infrastructure and leisure provisions within the borough.	No	01981	Lee Valley Regional Park Authority
RUR.03: Land west of Ramme Marsh	FZ2. Appendix C states this is FZ1 (page 544). This is incorrect.	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01926	Environment Agency
RUR.03: Land west of Ramme Marsh	The London Borough of Enfield Strategic Property Services (LBESPS) expresses support for the proposed Site Allocation SA.RUR.03 – Land West of Ramme Marsh, for industrial and logistics employment uses, consistent with the need for additional employment floorspace identified in the Council's evidence base. LBESPS, collaborating with the Lee Valley Regional Park Authority (LVRPA), endorses the site's allocation due to its strategic location and potential for development, emphasizing its suitability for industrial use given its excellent transport links and proximity to established industrial locations.	The council acknowledges the importance of collaboration and agrees to work together with Enfield Strategic Property Services (LBESPS) as the promoter. We will formalize our mutual understanding and agreements through a Statement of Common Ground, ensuring that all recommendations and concerns are addressed cohesively within the planning framework. This collaborative approach will help us effectively accommodate growth, enhance sustainable travel, and support higher density development in areas with high transport accessibility.	No	01946	LBE Strategic Property Services
RUR.03: Land west of Ramme Marsh	Comments received from residents/businesses are contained in Table 12: RUR.03: Land west of Ramme Marsh				
RUR.04: Land east of Junction 24, M25	The Hadley Wood Neighbourhood Planning Forum (HWNPF) raises concerns about the proposed 30,000m ² logistics hub on Green Belt land near junction 24 of the M25 (site RUR.04). They argue that its isolated PTAL 1a location means workers will predominantly commute by car, contributing to car dependency. Additionally, given its location in a corner of the borough, the development is likely to benefit residents of Hertsmere, particularly Potters Bar, more than those in Enfield. HWNPF believes the proposal is driven by financial motives rather than genuine employment needs.	Comments noted. The proposed logistics hub at RUR.04 near junction 24 of the M25 is part of Enfield's broader strategy to meet significant employment needs, as justified by the exceptional circumstances outlined in the relevant planning documents. While the site's PTAL 1a rating and potential for car dependency are acknowledged, the strategic importance of these sites for the borough's economic growth and employment targets takes precedence. The development is aimed at balancing economic growth with environmental considerations and is not purely financially motivated. The ELP Spatial Strategy and Overall Approach Topic Paper emphasizes the need for strategic employment locations to support Enfield's economic growth. It highlights the importance of accessibility and sustainable locations but recognizes the challenges of PTAL 1a sites. The justification for Green Belt release is detailed in the Exceptional Circumstances Topic Paper: focusing on the balance between development needs and environmental protection. The criteria for exceptional circumstances	No	01311	Hadley Wood Neighbourhood Planning Forum (HWNPF)

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
		include economic benefits and the need for strategic employment sites. The Site Allocation Topic Paper addresses the specific considerations for site RUR.04, acknowledging its PTAL 1a rating. It emphasizes the site's role in meeting borough-wide employment needs, despite potential commuting challenges. The Enfield Employment Topic Paper outlines the strategic importance of employment sites like RUR.04 and RUR.05 in fulfilling Enfield's employment targets. It underscores the necessity of these sites for long-term economic stability and job creation within the borough. Clarification will be included in the Statement of Common Ground. The Council is happy to work with the HWNPF to clarify these points further and ensure mutual understanding and agreement on these matters.			
RUR.04: Land east of Junction 24, M25	The Enfield Conservative Group opposes to the proposal for industrial use at Site SA RUR.04, as it would cause significant harm to the green gateway to the Borough from the M25 at Potters Bar. The site, designated as an Enfield Chase Area of Special Character, would be negatively impacted by the industrialization of its countryside setting, undermining its special character within the current Development Plan.	Comments noted. The Council recognizes the importance of preserving the special character of the Enfield Chase Area. However, the proposal for industrial use at Site SA RUR.04 is supported by comprehensive assessments, including the Spatial Strategy and Overall Approach Topic Paper, the Exceptional Circumstances Topic Paper, and the Employment Topic Paper. These documents collectively ensure that the plan supports strategic economic growth while minimizing harm to valued landscapes.	No	01607	Enfield Conservative Group
RUR.04: Land east of Junction 24, M25	Thames Water does not anticipate any infrastructure concerns regarding the water supply network for the proposed development based on the current information. They recommend early engagement between the developer and Thames Water to discuss the phasing of the development. Contact Thames Water Development Planning for further assistance via email at Devcon.team@thameswater.co.uk , by phone at 02035779998, or by writing to Thames Water Utilities Ltd, Maple Lodge STW, Denham Way, Rickmansworth, Hertfordshire, WD3 9SQ.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
RUR.04: Land east of Junction 24, M25	Thames Water does not foresee infrastructure concerns regarding the wastewater network or treatment capabilities for the proposed development. Early liaison between the developer and Thames Water is recommended to discuss development phasing. Thames Water acknowledges high infiltration flows in the catchment during certain groundwater conditions and advises careful design of new networks to prevent flooding. They are working on a long-term strategy to reduce groundwater entering the sewer network. Developers should collaborate with the Lead Local Flood Authority (LLFA) to establish a sustainable surface water strategy before connecting to the public sewer network.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
RUR.04: Land east of Junction 24, M25	Enfield Road Watch objects to SA RUR.04: M25 Junction 24 (The Ridgeway, near St John's School) due to its current designation as Green Belt countryside and an Enfield Chase Area of Special Character within the statutory Development Plan. They argue that the	Comments noted. Enfield's planning documents provide a robust justification for this allocation. The Enfield Employment Topic Paper recognises the critical	No	01687	Enfield Road Watch

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	proposed industrial, storage, and distribution center would destroy the farm fields and countryside views that create a green gateway to the borough.	need for industrial and storage facilities to boost local employment opportunities and economic growth. The ELP Spatial Strategy emphasizes balanced development, ensuring that while green spaces are protected, strategic sites like Junction 24 are used to meet economic goals. The Site Allocation Topic Paper details the rationale for selecting this site, balancing development with environmental considerations and aligning with broader regional planning policies. These, alongside Enfield's extensive evidence base justifies the approach and highlight the Council's commitment to sustainable development, ensuring that essential employment needs are met while preserving the character of the area.			
RUR.04: Land east of Junction 24, M25	CPRE London opposes the development of Green Belt land at M25, Junction 24 (SA RUR.04), emphasizing its importance to the Metropolitan Green Belt and arguing that Enfield has sufficient brownfield land and existing major sites like Meridian Water for housing development. They assert that development would harm the green gateway to the Borough and that this land, designated as Green Belt, should not be included as a site allocation.	Comments noted. The Council acknowledges CPRE London's concerns regarding the development of Green Belt RUR.04: Land east of Junction 24, M25. The Enfield Local Plan (ELP) considers the significance of the Metropolitan Green Belt and prioritizes brownfield sites. However, the ELP Spatial Strategy and Exceptional Circumstances Topic Paper justify the inclusion of certain Green Belt sites to meet housing needs. The Site Allocation Topic Paper and Employment Topic Paper detail the strategic approach, ensuring sustainable development while protecting important green spaces. Rammey Marsh's allocation is based on thorough assessments and the necessity to address employment needs effectively.	No	01726	CPRE London
RUR.04: Land east of Junction 24, M25	National Highways' response notes that the Local Plan's strategic vision and spatial strategy align with sustainable development principles. However, they raise concerns about a proposed new logistics hub near Junction 24 of the M25, which could increase commuting and commercial traffic along the M25. They require transport evidence at the planning application stage to ensure no unacceptable impacts on the safety or operation of the M25, and prefer pre-application engagement for this proposal.	The Council acknowledges and appreciates National Highways' response, noting the alignment of our Local Plan's strategic vision and spatial strategy with sustainable development principles. We understand and share concerns about the potential impacts of the proposed new logistics hub near Junction 24 of the M25 on commuting and commercial traffic. We commit to providing thorough transport evidence at the planning application stage to ensure there are no unacceptable impacts on the safety or operation of the M25. Additionally, we welcome and encourage pre-application engagement with National Highways to collaboratively address these concerns and develop effective mitigation strategies. Enfield Council looks forward to working together closely to achieve sustainable and safe development outcomes.	No	01753	National Highways Limited
RUR.04: Land east of Junction 24, M25	HCC's response highlights that an ordinary watercourse flows along the eastern boundary of the site, culverted under the M25 before entering Hertfordshire and the main river Turkey Brook. The site must use Sustainable Drainage Systems (SuDS) to ensure outfalls to this watercourse are restricted to greenfield runoff rates and volumes, preventing increased flood risk downstream in Hertfordshire. Additionally, SuDS should ensure robust water quality treatment for all runoff before discharging into the watercourse.	Comments noted. The Council acknowledge the importance of restricting discharge rates and volumes to greenfield rates to facilitate effective drainage of upstream areas in Hertfordshire. Additionally, the Council will consult with the Environment Agency on any proposals for the site, especially concerning areas within Flood Zones 2 and 3. The Council will seek to address these concerns through a Statement of Common Ground	No	01755	Hertfordshire County Council as Lead Local Flood Authority (LLFA)

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
RUR.04: Land east of Junction 24, M25	HCC's response notes that the proposal for industrial use at SA RUR.04, an arable field within a farmed landscape, is incongruous with its agricultural and landscape context and damaging to the local environment's character. Despite this, there appear to be no ecological constraints locally or within Hertfordshire.	(SoCG) with Hertfordshire County Council and the Environment Agency. Comments noted.	No	01755	Hertfordshire County Council - Ecology
RUR.04: Land east of Junction 24, M25	HCC questions whether a mitigation measure at J24 of the M25 is needed to handle growth and increased HGV traffic from the industrial allocation RUR.04 Land East of Junction 24 and welcomes discussion on this. They express concerns about increased traffic volumes and delays on the A10 and A1010 due to industrial allocations off Mollison Avenue (RUR.03 and RUR.05), noting these routes are designated Air Quality Management Areas (AQMAs) and face severe congestion, especially when the M25 is delayed or closed. HCC expects these issues to be investigated through applicable planning applications and supports integrating wording into the plan to ensure this investigation is a policy requirement.	Comments noted. The need for strategic mitigation measures at J24 of the M25 are recognised and are committed to exploring solutions with HCC. The Council is keen to engage further on this matter and will prepare a Statement of Common Ground (SoCG) with HCC to collaboratively address these transportation concerns and ensure the proposed developments align with both Enfield's and Hertfordshire's strategic transport and infrastructure goals.	No	01755	Hertfordshire County Council - Highways
RUR.04: Land east of Junction 24, M25	The Enfield Society argues that SS1 Paragraph 5 erroneously omits the reference to RUR.03 (West of Rammey Marsh), which should provide 70,200 sqm of new employment floorspace. They assert that neither RUR.03 nor RUR.04 (Junction 24 of the M25) conform with the London Plan's spatial strategy or have the exceptional circumstances needed to justify their removal from the Green Belt. Consequently, both sites should be deleted from paragraph 5 to maintain conformity and policy coherence.	Comments noted. The Enfield Local Plan's policy on employment floorspace is sound and aligns with the London Plan's spatial strategy and definition of 'good growth.' The policy integrates the London Plan's focus on regeneration, Opportunity Areas, and brownfield sites, including Meridian Water and New Southgate. The employment targets are supported by a robust evidence base, including transport modelling by WSP and the Enfield Employment Topic Paper. The strategic balance between housing and employment is designed to minimize environmental impact, particularly in sensitive areas like Chase Park and Crews Hill, which are addressed in their respective topic papers. Site allocations such as East of Junction 24 (SA RUR.04) and Land West of Rammey Marsh (SA RUR.03) are justified by exceptional circumstances, ensuring a sustainable development approach that preserves Enfield's character and heritage.	No	01794	Enfield Society
RUR.04: Land east of Junction 24, M25	The Enfield Society raises several concerns about the proposed development site, including questioning the necessity of the development in this Green Belt area, which the Green Belt Study deems would cause 'very high harm'. The site is a valued landscape, part of Enfield Chase, and strategically important open space. The need for coordination with Hertsmere District Council for road safety and other infrastructure requirements complicates the feasibility of the development. The proposed heights for buildings and the impact on pedestrian and cycle connectivity are also problematic, making the	Comments noted. The Enfield Society's concerns about the proposed development site in the Green Belt are addressed by the comprehensive review provided in the Site Allocation Topic Paper. The review emphasizes the need for strategic planning, justifying development only under exceptional circumstances and considering the overall employment requirements and spatial strategy. The review also discusses the integration of infrastructure improvements, potential ecological enhancements, and the balancing of development impacts on the	No	01794	Enfield Society

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
RUR.04: Land east of Junction 24, M25	<p>policy appear unsound and inconsistent with both the London Plan and national policies.</p> <p>The Barnet Society expresses concerns regarding the designation of the Green Belt site for development. They seek clarification on what land in Hertsmeire is involved, how much, and for what purpose. They recommend adding safeguards for adjoining land designated for wildlife in Hertsmeire's draft Local Plan. While they see the logic of a logistics hub near M25 Junction 24, they believe the scale of development is excessive for Enfield's green gateway and highlight a lack of consultation with Hertsmeire District Council.</p>	<p>Green Belt, ensuring that all proposals align with both the London Plan and national policies.</p> <p>Comments noted.</p> <p>The Local Plan has been prepared in accordance with the National Planning Policy Framework (NPPF) and the London Plan, with a focus on sustainable development and strategic growth. The designation of specific sites for development, including the logistics hub near M25 Junction 24, has undergone extensive consultation and assessment. The mention of cooperation with Hertsmeire District Council is crucial. Enfield Council has adhered to the Duty to Cooperate as per the Planning and Compulsory Purchase Act 2004, ensuring cross-boundary strategic priorities are addressed. This involves continuous collaboration with neighbouring authorities and stakeholders, including Hertsmeire, to align development plans and mitigate adverse impacts on shared landscapes and biodiversity. The Council is committed to preserving and enhancing the Green Belt while balancing the need for economic growth and housing. The proposed logistics hub is strategically positioned to leverage its proximity to major transport links, contributing to Enfield's economic development. However, the scale and design of development will adhere to stringent planning regulations to protect the character of green gateways and minimize environmental harm.</p>	No	01817	Barnet Society
RUR.04: Land east of Junction 24, M25	<p>TfL reiterates that land for sustainable transport functions may be needed in locations beyond Strategic Industrial Locations (SIL), as referenced in Policy SP T1.</p>	<p>Comments noted.</p> <p>The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01891	Transport for London
RUR.04: Land east of Junction 24, M25	<p>TfL welcomes the requirement to contribute towards increasing direct and frequent bus services along the A1055 to improve connectivity to and from industrial areas. They emphasise that any enhanced bus services must be economically viable based on expected trip generation and note the difficulty of providing a viable service due to limited frontages in the area. TfL also notes the requirement to provide limited parking but suggests amending it to state that parking must be minimised to ensure consistency with the London Plan.</p>	<p>Comments noted.</p> <p>The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01891	Transport for London
RUR.04: Land east of Junction 24, M25	<p>LBE SPS supports the new Enfield Local Plan, particularly the site allocation at Land East of Junction 24 for a logistics hub. They recommend revising the plot ratio from the London Plan and suggest a single-storey design for feasibility. They propose a flexible approach to the employment floorspace, suggesting an approximate figure of 48,000 sqm instead of a minimum. LBE emphasizes the need for</p>	<p>Comments noted.</p> <p>The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. 	discussions between Enfield and Hertsme councils to bring forward the wider site and notes that the Enfield portion could proceed independently if necessary.	Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.			
RUR.04: Land east of Junction 24, M25	Land East of Junction 24 is deemed deliverable according to the NPPF criteria. The site is: 1) Available: It is in single ownership by LBE, supporting employment scheme delivery. 2) Suitable: Though currently Green Belt, it is allocated for employment development in the LBE draft Local Plan. It represents a sustainable location for industrial and logistics growth. 3) Achievable: The site is attractive to the market with no insurmountable constraints. Initial feasibility studies support its deliverability. The site can be developed solely on LBE land or as part of a broader scheme including land in Hertsme.	Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01946	LBE Strategic Property Services
RUR.04: Land east of Junction 24, M25	LBESPS' comments focus on the site at Land East of Junction 24 (site allocation RUR.04) and highlight the importance of cooperation with other Local Planning Authorities (LPAs) as required by the Localism Act 2011 and NPPF paragraphs 24 to 27. They emphasize the need for ongoing joint working to ensure a positively prepared and justified strategy for a sound Local Plan. LBESPS supports the Council's Duty to Cooperate Compliance Statement (2024) and stresses the importance of discussions with Broxbourne and Hertsme, particularly for the deliverability of CHPA and Junction 24 sites.	Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01946	LBE Strategic Property Services
RUR.04: Land east of Junction 24, M25	Stage 1 Design Report received.	Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01946	LBE Strategic Property Services
RUR.04: Land east of Junction 24, M25	LBESPS' comments focus on the site at Land East of Junction 24 (site allocation RUR.04) and highlight the importance of cooperation with other Local Planning Authorities (LPAs) as required by the Localism Act 2011 and NPPF paragraphs 24 to 27. They emphasize the need for ongoing joint working to ensure a positively prepared and justified strategy for a sound Local Plan. LBESPS supports the Council's Duty to Cooperate Compliance Statement (2024) and stresses the importance of discussions with Broxbourne and Hertsme, particularly for the deliverability of CHPA and Junction 24 sites.	Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01946	LBE Strategic Property Services
URB.36RUR.05: Land to the north west of Innova Park	Thames Water supports the allocation of the former Thames Water Ramney Marsh Sewage Sludge beds (SA RUR.05) for employment development and agrees with its removal from the Green Belt. They suggest amending Design Principle G to allow greater flexibility in design and responsiveness to market demands. Additionally, they	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points	No	01681	Thames Water

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
	propose enhancing Design Principle D to improve public security and surveillance. Thames Water agrees that the impact of releasing the site from the Green Belt is low and supports the Council's assessment of low Green Belt harm. They highlight the site's strategic importance and suitability for logistics and distribution uses.	further and ensure mutual understanding and agreement on these matters.			
RUR.05: Land to the north west of Innova Park	Thames Water indicates that the proposed scale of development in this catchment will likely necessitate upgrades to the water supply network infrastructure. They recommend early liaison between the developer and the Local Planning Authority to create a housing phasing plan. This collaboration will help avoid planning conditions at the application stage, ensuring that necessary infrastructure upgrades are completed before the occupation of developments. Developers can find more information and request network infrastructure details via the Thames Water website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
RUR.05: Land to the north west of Innova Park	Thames Water suggests that the scale of proposed developments will likely necessitate upgrades to the wastewater network. They recommend that developers and the Local Planning Authority engage with Thames Water early to agree on a housing and infrastructure phasing plan. This plan should determine current spare capacity and required phasing to ensure development does not outpace necessary network upgrades. Early liaison will help avoid planning conditions at the application stage. Developers can request more information on network infrastructure through the Thames Water website.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
RUR.05: Land to the north west of Innova Park	Thames Water notes that the development boundary falls within a Source Protection Zone for groundwater abstraction, which is at risk from polluting activities. To prevent pollution, the Environment Agency and Thames Water will use a tiered, risk-based approach to regulate activities impacting groundwater. The applicant is encouraged to read the Environment Agency's approach to groundwater protection and may need to consult a qualified environmental expert to discuss the implications for their development.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with Thames Water to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01681	Thames Water
RUR.05: Land to the north west of Innova Park	HCC's response highlights that an ordinary watercourse flows along the eastern boundary of the site, culverted under the M25 before entering Hertfordshire and the main river Turkey Brook. The site must use Sustainable Drainage Systems (SuDS) to ensure outfalls to this watercourse are restricted to greenfield runoff rates and volumes, preventing increased flood risk downstream in Hertfordshire. Additionally, SuDS should ensure robust water quality treatment for all runoff before discharging into the watercourse.	Comments noted. The Council acknowledge the importance of restricting discharge rates and volumes to greenfield rates to facilitate effective drainage of upstream areas in Hertfordshire. Additionally, the Council will consult with the Environment Agency on any proposals for the site, especially concerning areas within Flood Zones 2 and 3. The Council will seek to address these concerns through a Statement of Common Ground (SoCG) with Hertfordshire County Council and the Environment Agency. Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
RUR.05: Land to the north west of Innova Park	HCC questions whether a mitigation measure at J24 of the M25 is needed to handle growth and increased HGV traffic from the industrial allocation RUR.04 Land East of Junction 24 and welcomes discussion on this. They express concerns about increased traffic volumes and delays on the A10 and A1010 due to industrial allocations off Mollison Avenue (RUR.03 and RUR.05), noting these routes are designated Air Quality Management Areas (AQMAs) and face severe congestion, especially when the M25 is delayed or closed. HCC expects these issues to be investigated through applicable planning applications and supports integrating wording into the plan to ensure this investigation is a policy requirement.	Comments noted. The need for strategic mitigation measures at J24 of the M25 are recognised and are committed to exploring solutions with HCC. The Council is keen to engage further on this matter and will prepare a Statement of Common Ground (SoCG) with HCC to collaboratively address these transportation concerns and ensure the proposed developments align with both Enfield's and Hertfordshire's strategic transport and infrastructure goals.	No	01755	Hertfordshire County Council - Highways
RUR.05: Land to the north west of Innova Park	The Enfield Society's concerns about the site in the Green Belt highlight that the need for proposed employment uses has not demonstrated the required 'exceptional circumstances' for Green Belt release. The proposed 39m tall buildings are not justified for the intended employment uses. Additionally, Design Principle C should mandate, rather than suggest, the maintenance of a pedestrian connection parallel to the watercourse towards the Small River Lea.	Comments noted. Regarding the proposed site in the Green Belt, the necessity for employment uses has been evaluated and substantiated through comprehensive studies and strategic assessments outlined in the Site Allocation Topic Paper. The 39m building height aligns with the site's strategic development goals, ensuring optimal land use and future economic viability. Design Principle C's wording allows for flexibility in design innovation while ensuring the critical pedestrian connection is maintained as an integral aspect of the site's development plan.	No	01794	Enfield Society
RUR.05: Land to the north west of Innova Park	TfL welcomes the requirement to contribute towards identified upgrades to the London Underground network serving Southgate. They note that, although there is currently no viable way to install lifts for step-free access at Southgate station, any improvements should focus on general access or capacity enhancements. TfL also welcomes the requirement for the development to be designed as cat-free, consistent with the London Plan.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
RUR.05: Land to the north west of Innova Park	The Lee Valley Regional Park Authority (LVRPA) supports the site allocations RUR.03 Rammey Marsh West and RUR.05 Land North West of Innova Park for industrial and logistics development, which have been removed from the Green Belt. They appreciate the revisions in the site proformas that address their previous comments, including the emphasis on ecological and greening enhancements, public open space creation, and improved pedestrian and cycle connectivity. LVRPA seeks to collaborate with the Council on master planning to ensure sensitive redevelopment that enhances environmental quality and integrates with the blue and green network.	Comments noted. The detailed feedback is welcomed. The Council propose working closely with the Lee Valley Regional Park Authority (LVRPA) to develop a Statement of Common Ground (SoCG). This collaborative approach will ensure that the Local Plan accurately reflects the strategic importance of the Park, aligns with the Park Development Framework, and supports enhancements to green and blue infrastructure and leisure provisions within the borough.	No	01918	Lee Valley Regional Park Authority
RUR.05: Land to the north west of Innova Park	FZ2. Appendix C states this is FZ1 (page 548). This is incorrect.	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01926	Environment Agency

C.3: Other site allocations					
SA6.2: Barnet and Southgate college	TfL welcomes the requirement to contribute towards bus service prioritisation and associated traffic management measures along the A1010.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
RUR.06: Land at Picketts Lock	National Grid has reviewed the Enfield Local Plan and identified that several proposed development sites, including RUR.06 (Land at Picketts Lock), SA5.2 (Meridian Water Phase 2), and SA5.6 (Meridian East - Harbet Road), are crossed or in close proximity to NGET assets. They propose modifications to include site-specific criteria, such as a strategy for responding to NGET overhead transmission lines, ensuring the NGET Design Guide and Principles are applied during masterplanning to reduce the impact through good design.	Comments noted. Clarification will be included in the Statement of Common Ground. The Council is happy to work with National Grid to clarify these points further and ensure mutual understanding and agreement on these matters.	No	01658	National Grid
RUR.06: Land at Picketts Lock	The Wave generally supports the Local Plan as it pertains to their activities but has concerns about the wording of policy SA RUR.06, deeming it unjustified. They suggest specific modifications to address these issues, aiming to make the policy more sound.	The council appreciates The Wave's support and acknowledges the concerns regarding the wording of policy SA RUR.06. The Council will continue to engage with The Wave and prepare a statement of common ground to address these issues and ensure the policy is justified and sound.	No	01880	The Wave
RUR.06: Land at Picketts Lock	TfL reiterates their recommendation to exclude major trip-generating uses from the site allocation due to the relatively poor connectivity.	Comments noted. The Council is committed to working collaboratively with Transport for London and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01891	Transport for London
RUR.06: Land at Picketts Lock	The Lee Valley Regional Park Authority (LVRPA) supports the inclusion of references to Pickett's Lock in the draft Local Plan but seeks a minor amendment to Site Allocation RUR.06. Pickett's Lock, a strategic site within Enfield's Regional Park, hosts the Lee Valley Athletics Centre, Odeon Luxe Cinema, golf course, and campsite. The LVRPA supports the revised site allocation for new sports, recreation, and leisure facilities. They request amending the description of existing uses to include all current facilities and adjacent land.	Comments noted. The detailed feedback is welcomed. The Council propose working closely with the Lee Valley Regional Park Authority (LVRPA) to develop a Statement of Common Ground (SoCG). This collaborative approach will ensure that the Local Plan accurately reflects the strategic importance of the Park, aligns with the Park Development Framework, and supports enhancements to green and blue infrastructure and leisure provisions within the borough.	No	01918	Lee Valley Regional Park
RUR.06: Land at Picketts Lock	FZ2 and FZ3. Appendix C states this is FZ1 and FZ2 (page 550). This is incorrect.	Comments noted.	No	01926	Environment Agency

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
RUR.06: Land at Picketts Lock	The loss of the Whitewebbs Golf Course is not supported by an up-to-date needs assessment. This site allocation does not meet with any of the three exceptions of paragraph 103 of the NPPF and London Plan Policy S5C. Sport England would like to see this site allocation supported by an up-to-date PPS and conversations taking place with National Governing Bodies to understand the strategic need for certain playing fields to meet the communities needs.	Further engagement and statement of common ground to consider how to resolve issue. Comments noted. The Council is committed to working collaboratively with Sport England other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.	No	01967	Sport England
RUR.07: Whitewebbs Golf Course	FZ2 and FZ3. Appendix C states this is FZ1 (page 552). This is incorrect.	Comments noted. Further engagement and statement of common ground to consider how to resolve issue.	No	01926	Environment Agency
RUR.07: Whitewebbs Golf Course	CPRE London strongly objects to the allocation of Whitewebbs Park for commercial use by Tottenham Hotspur Football Club, as it contradicts policies in both the Draft Plan and the London Plan. The development is deemed inappropriate for Green Belt land due to the high fencing that will alter the landscape, impacting protected views and transforming valuable public green space into an enclosed area, akin to built development. Additionally, this allocation conflicts with Enfield's and the London mayor's targets to enhance wild spaces and habitats for nature, as it will destroy vital natural areas, replacing them with engineered surfaces and causing significant impacts from light and noise. They request confirmation of the receipt of these comments.	The council's strategy to allocate Whitewebbs Golf Course and the land at Tottenham Hotspurs Training Ground for nature recovery uses, professional sport, recreation and community sports/leisure uses by Tottenham Hotspur Football Club is justified based on the need for effective land use and the exceptional circumstances outlined. The "Spatial Strategy and Overall Approach Topic Paper," explains that the council aims to balance development with the preservation of green spaces, ensuring that land use contributes to both the economic and social needs of the borough. The "Exceptional Circumstances Topic Paper" further supports this allocation by detailing the unique conditions that necessitate such developments, emphasizing that the proposed use will contribute significantly to local employment and community facilities, while the overall strategy includes measures to mitigate environmental impacts and maintain public access to green spaces. The comprehensive planning approach ensures that the benefits of the development outweigh the potential negative impacts, aligning with broader regional and national planning policies.	No	01944	CPRE London
RUR.07: Whitewebbs Golf Course	London Gardens Trust appreciates the aim of Policy BG5 to protect Enfield's Green Belt and Metropolitan Open Land from inappropriate development. However, they suggest explicitly including protections for historic landscapes, such as those on Historic England's Register of Parks and Gardens, Enfield's local list of heritage green spaces, and the Enfield Chase Heritage Area AOSC. This would ensure that development does not compromise the integrity of these culturally and historically significant sites.	Comments noted. The Council understands LGT's recommendation to ensure that landscape restoration and offsetting works within or affecting historic landscapes listed on the Historic England Register of Parks and Gardens preserve their unique design heritage. The Council will work with our stakeholders to consider rewording the policy to include comprehensive consultation with statutory consultees and local amenity groups. This will help ensure that restoration efforts enhance both biodiversity and the historical integrity of these important heritage sites.	No	02089	London Gardens Trust

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
RUR.07: Whitewebbs Golf Course	Residents object to the proposal for Whitewebbs Golf Course and Land at Tottenham Hotspur's Football Club Training Ground due to ongoing judicial review against Enfield Council's plan to fence off large areas for exclusive use by the football club. They emphasize that such fencing would negatively impact the historic open parkland character of Whitewebbs Park, which is protected by current policies as part of the Whitewebbs Park and Forty Hall Area of Special Character. Additionally, they argue that development within the Green Belt is inconsistent with national policy. Residents also oppose the shift in focus from nature recovery to sport and leisure in the current version of the plan.	Comments noted. The "Spatial Strategy and Overall Approach" document underscores the importance of protecting the Green Belt and maintaining areas of special character, such as Whitewebbs Park and Forty Hall, ensuring any development aligns with these priorities. Furthermore, the "Site Allocation Topic Paper" details the rigorous criteria and comprehensive assessments required for any proposed changes to Green Belt land, including the impact on historical parkland and nature recovery initiatives. The plan also emphasizes balancing recreational use with environmental conservation, ensuring that sport and leisure developments do not compromise the ecological and historical integrity of the area. These measures collectively ensure that any development at Whitewebbs Golf Course will be carefully managed to protect its unique character and comply with national policy.	No	00218 (Carol Fisk) 01900 (Alison Grace) 01961 (Gaynor Evans) 01955 (Lisa Seagroatt) 02026 (Adam Wilson) 03422 (Danielle Shap) 03651 (Mak Saunders) 04039 (Eiina Virkkunen) 04337 (Jacqueline Willoughby) 04339 (Jaime Stubberfield) 04343 (James Halstead)	
RUR.08: Sloemans Farm	HCC's response highlights that the site is adjacent to the main river Cuffley Brook. Surface water runoff must be managed on-site to ensure that any discharges to Cuffley Brook are restricted, preventing any hindrance to upstream flows.	Comments noted.	No	01755	Hertfordshire County Council as Lead Local Flood Authority (LLFA)
RUR.08: Sloemans Farm	HCC has a neutral stance on SA RUR.08 for Burial Ground, noting it will not contribute ecologically to the area south of the M25 unless significant ecological management is implemented prior to and/or during its use. The ecological impact will depend on the burial density and intended cemetery character, likely to be formal. The existing arable land and intensive farmland in Hertfordshire are of little intrinsic ecological interest, though the farmland in Hertfordshire appears better managed and possibly less degraded.	Comments noted. The Council will ensure early engagement between Enfield LLFA and developers to address these recommendations. The Council will seek to address these concerns through a Statement of Common Ground (SoCG) with Hertfordshire County Council and the Environment Agency.	No	01755	Hertfordshire County Council - Ecology
RUR.08: Sloemans Farm	The Enfield Society supports additional burial space, provided it minimally impacts the character of Whitewebbs Lane and the open landscape within the sensitive Enfield Chase Area of Special Character. They seek greater clarity around Design Principle F for the design of the vehicular entrance, to align with retaining existing hedgerows and long views. They argue that ancillary buildings, as mentioned in Design Principle G, are inconsistent with Green Belt policy and should not affect the rural character of Whitewebbs Lane.	Comments noted. The Enfield Local Plan ensures minimal impact on the character of Whitewebbs Lane and the open landscape, with specific design principles emphasizing landscape and heritage protection. Design Principle A requires retaining existing hedgerows and preserving long views, aligning with the site's heritage sensitivity. Design Principle F mandates a careful vehicular entrance design. Although Design Principle G allows ancillary buildings, these must respect the rural character and adhere to national Green Belt policy. The plan balances burial space needs with environmental and heritage preservation.	No	01794	Enfield Society

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
RUR.08: Sloemans Farm	<p>Site Allocations - Source Protection Zone (SPZ) 1</p> <p>Areas in SPZ1 are the catchment areas for sources of potable, high quality water supplies usable for human consumption. As such, sites within SPZ1 are particularly sensitive with respect to groundwater. Additional constraints will be placed on development proposals in these areas. With respect to the Environment Agency's Approach to Groundwater Protection, the following position statements would apply:</p> <ul style="list-style-type: none"> • D1- General principles-all storage facilities • D2- Underground Storage (and associated pipework) D3- Subwater table storage • G2- Sewage Effluent Discharges within SPZ1 • G4- Trade effluent and other discharges within SPZ1 G8- Sewage pipework • G13- Sustainable Drainage systems N7- Hydrogeological risk assessment • N8- Physical disturbance of aquifers in SPZ1 <p>Please note that we would recommend planning conditions for any piled foundation proposals for allocated sites within SPZ1. The use of piled foundations would require a robust supporting Foundation Works Risk Assessment (FWRA) demonstrating that they are appropriate at the particular location and would not result in a deterioration of groundwater quality. Without such a risk assessment we would object to the use of piled foundations.</p> <p>Our records show the following sites are either partly or wholly within SPZ 1.</p> <ul style="list-style-type: none"> • SA1.2 Enfield Town station and former enfield arms • SA1.5 St Anne's Catholic School • SA5.1 Meridian Water Phase 1 • SA5.2 Meridian Water Phase 2 • SA5.3 Former Ikea , Meridian Water • SA5.4 Tesco Extra, Meridian Water • SA5.5 Meridian 13 • SA5.6 Meridian East (Harbet Road) • SA8.1 Morrisons, 19 Alderman's Hill • SA8.2 Lodge Drive Car Park 	<p>Comments noted.</p> <p>Further engagement and statement of common ground to consider how to resolve issue.</p>	No	01926	Environment Agency

RUR.08: Sloemans Farm	<p>Residents express concerns that the Enfield Burial Needs Assessment (2020) fails to meet the soundness criteria of the Local Plan, arguing it does not meet the area's objectively assessed needs, lacks consideration of reasonable alternatives, and is not based on proportionate evidence. They highlight the report's emphasis on the need for more burial plots due to the rising Muslim population, while existing sites potentially have significant capacity for ashes plots. They also note the absence of technical diligence on expanding cremation capacity at current sites. Additionally, residents believe proposing a new crematorium without fully examining existing site expansion is unsound, and the proposed location on Metropolitan Open Land is inappropriate due to its scarcity, potential traffic issues, pollution, and proximity to residential areas and schools. They suggest considering alternative sites, even outside the borough, to preserve MOL and address other community needs like sports pitches.</p>	<p>The Enfield Burial Needs Assessment (2020) and the Site Allocation Topic Paper for Regulation 19 support the development of new burial and cremation facilities to meet future needs. The Burial Needs Assessment identifies a significant demand for burial plots, particularly for the Muslim community, which current facilities cannot meet. It also notes that existing cremation facilities are nearing capacity. While residents express concerns about the proposed site's impact on Metropolitan Open Land (MOL), traffic, and pollution, the Assessment and Topic Paper justify the need for new facilities based on thorough analyses. The Council has considered various alternatives and determined that the proposed site is the most viable option to address the identified needs. Additionally, the development will be designed to minimize environmental impacts and integrate well with existing infrastructure, ensuring sustainable and balanced growth in line with national planning policies.</p>	No	03826	Alan Parry

URB.36: Church Street Recreation Ground	The objection to the proposed crematorium at Church Street Recreation Ground emphasizes that the development would contravene the NPPF by reducing essential open space in a densely populated area, causing traffic congestion and safety issues on the A10, and posing environmental risks to mature trees and local air quality. Additionally, it questions the need for a new facility, given existing cremation and burial capacities, and underscores the recreational ground's importance for community health and well-being, arguing that the proposal does not meet the NPPF's soundness test.	Comments noted. The Enfield Burial Needs Assessment 2020 and the site allocation topic paper for Regulation 19 highlights the need for additional cremation facilities due to increasing demand and insufficient existing capacity, noting a rising population and limited burial space, which necessitates diversifying the provision of final rites facilities, including crematoria. The Council acknowledges the importance of open spaces and intends to balance development needs with preserving community amenities through strategic planning and mitigation measures.	No	01779	Enfield's Conservative Group

Recreation Ground		<p>policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>			
URB.36: Church Street Recreation Ground	<p>LBESPS supports the allocation of Church Street Recreation Ground (SA URB.36) for a crematorium, emphasizing the importance of detailed design. They endorse the promotion of nature recovery and biodiversity enhancements as part of the site's development. The site is viewed as deliverable, with a recommended development timeframe of up to 10 years. The allocation is prioritized for development due to its suitability.</p>	<p>Comments noted. The Council is committed to working collaboratively with LBESPS and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01946	LBE Strategic Property Services
URB.36: Church Street Recreation Ground	<p>Sport England would object to any land allocation that results in the loss or reduction of sports facilities, including playing fields, if it does not align with Sport England's Planning Policies or NPPF paragraph 103. They request the Council to highlight any such site allocations not previously identified.</p>	<p>Comments noted. The Council is committed to working collaboratively with Sport England and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	01967	Sport England
URB.36: Church Street Recreation Ground	<p>The Edmonton and Winchmore Hill Conservative Association objects to the proposal for a crematorium on Church Street Recreation Ground, arguing it fails to meet soundness criteria due to its adverse impact on the community, policy conflicts, and insufficient infrastructure planning. They highlight that the site, a valued Metropolitan Open Land used extensively for recreation, would be significantly compromised in terms of openness and accessibility, contradicting NPPF and local policies. Concerns include noise, pollution, inadequate parking, and potential traffic issues, as well as a lack of justification for the need for a new crematorium when expansion of existing facilities or alternative sites could be considered.</p>	<p>The Council's proposal for a crematorium on Church Street Recreation Ground, despite concerns raised, is justified by comprehensive assessments of burial and cremation needs and careful consideration of site allocation. The Enfield Burial Space Need and Provision Study (2020) highlights a significant projected shortfall in cremation capacity by the end of the decade, with existing facilities nearing full capacity. This study supports the need for additional crematorium services to meet growing demand, especially given the historical trend of higher burial rates compared to cremations. Furthermore, the Site Allocation Topic Paper for Regulation 19 acknowledges that Church Street Recreation Ground is a valuable community asset but emphasizes that the proposed use aligns with the need for increased cremation capacity and the lack of suitable alternative sites. The paper also outlines that the selected site was chosen after evaluating multiple options and considering potential impacts. Although the site is Metropolitan Open Land, the proposal includes measures to mitigate impacts, such as preserving existing trees where possible and ensuring that the development integrates well with the surrounding area. The Council's approach strives to balance the essential need for expanded cremation facilities with maintaining the viability and functionality of local green spaces. The council is committed to mitigating environmental impacts and ensuring the site is developed in accordance with planning policies, including addressing air quality concerns and providing necessary infrastructure improvements. This thorough assessment and strategic planning ensure that the proposed development aligns with broader community needs while complying with relevant policies.</p>	No	01784	Edmonton and Winchmore Hill Conservative Association

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
URB.36: Church Street Recreation Ground	Bush Hill Park Residents Association object to the inclusion of The Church Street Recreation Ground, as it is designated as Metropolitan Open Land, should receive the same level of protection as Green Belt land. Concerns are raised about its suitability as a development site due to its proximity to a school and residential properties. Additionally, the proposal would result in the loss of valuable open amenity space in a well-established residential area, making it an inappropriate choice for development.	The Council's proposal for a crematorium on Church Street Recreation Ground, despite concerns raised, is justified by comprehensive assessments of burial and cremation needs and careful consideration of site allocation. The Enfield Burial Space Need and Provision Study (2020) highlights a significant projected shortfall in cremation capacity by the end of the decade, with existing facilities nearing full capacity. This study supports the need for additional crematorium services to meet growing demand, especially given the historical trend of higher burial rates compared to cremations. Furthermore, the Site Allocation Topic Paper for Regulation 19 acknowledges that Church Street Recreation Ground is a valuable community asset but emphasizes that the proposed use aligns with the need for increased cremation capacity and the lack of suitable alternative sites. The paper also outlines that the selected site was chosen after evaluating multiple options and considering potential impacts. Although the site is Metropolitan Open Land, the proposal includes measures to mitigate impacts, such as preserving existing trees where possible and ensuring that the development integrates well with the surrounding area. The Council's approach strives to balance the essential need for expanded cremation facilities with maintaining the viability and functionality of local green spaces. The council is committed to mitigating environmental impacts and ensuring the site is developed in accordance with planning policies, including addressing air quality concerns and providing necessary infrastructure improvements. This thorough assessment and strategic planning ensure that the proposed development aligns with broader community needs while complying with relevant policies.	No	04218	Bush Hill Park Residents Association
URB.36: Church Street Recreation Ground	Comments received from residents/businesses are contained in Table B.31_13: URB.36: Church Street Recreation Ground				
Appendix E: Developer Contributions					
Appendix E	Wolden Garden Centre Ltd has raised concerns regarding the financial contributions required for new developments at Crews Hill. Specifically, they seek clarification on whether the £3,324 per dwelling contribution towards school and childcare places is included within the £50,000 per unit viability assessment for Crews Hill or if it is an additional cost. They express concern that if these contributions are additional, it could further impact the viability of development at Crews Hill. The company hopes that as the viability of the Crews Hill Placemaking Area improves over the plan period, these financial contributions will not unduly hinder development.	Wolden Garden Centre Ltd's concerns about additional financial contributions, such as the £3,324 per dwelling towards school and childcare places, are included in the overall £50,000 per unit viability assessment for Crews Hill outlined in the "Enfield Viability Update" (August 2023). This comprehensive assessment aims to balance essential contributions with development feasibility. While current viability is assessed as "marginal," the Update confirms a commitment to ongoing reviews and adjustments of planning policies and contributions to ensure that development remains feasible and sustainable as market conditions evolve. Thus, any significant impact on viability from additional contributions will be addressed through this flexible and adaptive approach.	No	01887	Wolden Garden Centre Ltd

Policy, paragraph, table number	Main issues raised	Council response	Potential to change plan	Respondent unique ID	Respondent names
Appendix E	<p>The Trust generally aims to maintain its assets in a "steady state," with towpath maintenance based on current usage. When new developments are likely to increase usage, the Trust's maintenance liabilities will also rise. Therefore, it is reasonable to request financial contributions from developers either to cover the increased maintenance costs or to upgrade the towpath surface to a more durable standard that can handle increased usage without adding to the Trust's future maintenance burden. Additionally, there should be further clarity on the delivery of towpath improvements. While paragraphs 2.65-2.69 refer to walking and cycling, they do not mention the towpath or 'green loop'. This should be addressed for greater clarity.</p>	<p>Comments noted. The Council is committed to working collaboratively with Canal & River Trust and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	02007	Canal & River Trust
Appendix E	<p>The Canal and Rivers Trust noted that the Site Allocation Topic Paper references their land at Enfield Lock. They pointed out inaccuracies in the accompanying assessment, which incorrectly classified the entire site as Green Belt, while some of it is previously developed land. They emphasised the need for an updated proposals map for consultation that clearly shows the Trust's land to verify the Local Plan's details. The Trust welcomes further engagement with the Council to address this issue and to provide additional comments once a clearer map is available.</p>	<p>Comments noted. The Council is committed to working collaboratively with Canal & River Trust and other stakeholders to refine and update the Local Plan policies where necessary. We welcome the opportunity to enter into a Statement of Common Ground to ensure a shared vision and effective implementation of the Plan's objectives.</p>	No	02007	Canal & River Trust

Schedule B.3i: Full summary of the main issues raised by the Regulation 20 representations and Council response, in plan/policy order, received from residents/businesses

Table B.3i_1: SP SS1: Spatial strategy

Rep ID	First Name	Last Name	Policy Number	site allocation reference	Summary of Response	Potential to change the plan	Council Response	LINKS
00001	Rosa	Ibrahim	SP SS1: Spatial strategy		A resident has expressed concerns about the local plans for increasing new homes in Enfield. While she acknowledges the need for more housing, she is worried about the impact on local infrastructure, particularly healthcare. She notes that GP surgeries and hospitals are already overwhelmed, with patients waiting over six months for consultant appointments. She questions the future of the NHS and seeks clarity on plans for healthcare, education, traffic, and pollution in the area. Additionally, she highlights concerns about the reduction of green spaces.	No	Comments noted. The Enfield Local Plan is supported by an Infrastructure Delivery Plan. Concerns about the potential impact of increased housing on local infrastructure, including healthcare, education, traffic, and green spaces are noted. The Enfield Local Plan acknowledges the need for improved healthcare infrastructure to support population growth. The Infrastructure Delivery Plan (IDP) includes provisions for enhancing healthcare facilities to ensure they can meet the increased demand. This includes expanding existing GP surgeries and hospitals to reduce waiting times and improve service delivery. The plan also addresses the need for additional educational facilities. New schools and expansions of existing ones are planned to accommodate the growing number of students. This will help ensure that educational standards are maintained and that all children in Enfield have access to quality education. To manage traffic and reduce pollution, the plan includes significant investments in public transport and sustainable travel options. Improvements to road networks, cycling infrastructure, and public transportation services are designed to alleviate congestion and minimize environmental impact. The plan emphasizes the preservation and enhancement of green spaces. While there will be development, the strategy includes creating new parks and protecting existing green areas to ensure residents continue to have access to natural spaces. Efforts to improve biodiversity and tackle climate change are integral to the plan.	00001-1-1
00003	Derek	Gill	SP SS1: Spatial strategy		A resident has inquired about the current plans for building social housing specifically for key workers such as social workers and housing officers. This reflects a concern about the availability of affordable housing options for essential community service providers.	No	Comments noted. The Local Plan includes a strong emphasis on providing affordable housing for key workers, such as social workers and housing officers. The plan targets a significant portion of new housing developments to be affordable, with specific allocations for key workers. These developments will be strategically located in areas with good public transport and access to essential services to support sustainable communities. Additionally, the plan involves partnerships with housing associations and developers to ensure sufficient funding and effective delivery of these housing projects. For more details, full documents are on the Enfield Council website: Enfield	00003-1-1

Rep ID	First Name	Last Name	Policy Number	site allocation reference	Summary of Response	Potential to change the plan	Council Response	LINKS
00004	Sam Gracie	Tillbrook	SP SS1: Spatial strategy		<p>The resident expresses extreme disappointment with the Enfield Local Plan Regulation 19 consultation process, criticizing it for being overwhelming due to the large volume of information provided, and inaccessible to those with limited English proficiency, disabilities, young people, and those without computer access. They emphasize the need for the younger generation's voices to be heard. The resident opposes the plan to build homes on greenbelt land, arguing that council housing, not just "affordable housing," is needed. They reference a report by CPRE, Enfield Roadwatch, and the Enfield Society that identifies sufficient brownfield sites to accommodate 37,000 homes, questioning why this has not been considered. The resident accuses the consultation process of greenwashing and calls for a fairer approach.</p>	No	<p>Local Plan: Spatial Strategy and Overall Approach and Enfield Housing Topic Paper 2024.</p> <p>Comments noted. Firstly, accessibility and inclusiveness of the consultation process have been considered. The Council recognizes the challenge of engaging with diverse community members and has made efforts to make documents accessible. Hard copies of the plan are available in local libraries, and there are contact points for assistance. The council is committed to improving engagement and is open to feedback on making the process more accessible for everyone, including those with limited English proficiency, disabilities, and younger residents. Regarding the use of greenbelt land versus brownfield sites, the Housing and Economic Land Availability Assessment (HELAA) and the Enfield Housing Topic Paper outline the comprehensive review of potential development sites. The council aims to balance development needs while protecting valuable greenbelt areas. Although some greenbelt development is proposed, significant emphasis is placed on utilizing brownfield sites to meet housing targets. The plan includes detailed assessments and justifications for site selections to ensure sustainable growth. In terms of affordable housing, the Local Plan emphasizes the need for genuinely affordable housing, including social housing, to address the housing crisis. The council acknowledges the term "affordable housing" can be misleading and is committed to providing housing options that are accessible to those most in need, including key workers and low-income families.</p>	00004-1-1
00004	Sam Gracie	Tillbrook	SP SS1: Spatial strategy		<p>The resident raises several concerns and questions in response to the Enfield Local Plan. They seek clarification on whether all brownfield site landowners have been consulted and agree with the proposals. They question the rationale behind the assessment of brownfield sites as unrealistic and ask why negotiations with brownfield landowners were not prioritized. The resident criticizes the perceived preference for building on greenbelt land and challenges the claim that this approach aligns with greater green space protections and climate resilience. They express skepticism about the plan to rewild 500 hectares and request specific locations in the Local Plan. The resident also inquires about the inclusion of Whitewebbs in biodiversity enhancement plans and expresses concerns over the implications of population growth on transport infrastructure, including</p>	No	<p>Comments noted. Justification is set out in Enfield Local Plan: Spatial Strategy and Overall Approach Enfield Housing Topic Paper 2024. These documents provide comprehensive insights into the planning and consultation processes, site assessments, housing strategies, and infrastructure plans. Consultation with Brownfield Site Landowners: The Enfield Local Plan emphasizes the importance of ensuring that proposed sites have a realistic prospect of development within the plan period. Sites included in the plan must align with Central Government Planning Practice Guidance, which requires evidence of active promotion by landowners. This ensures that the sites are deliverable and can meet housing targets effectively. Rationale for Greenbelt Development: The decision to include greenbelt land for development is based on a thorough assessment of housing needs and available land. The Housing Topic Paper explains that</p>	

Rep ID	First Name	Last Name	Policy Number	site allocation reference	Summary of Response	Potential to change the plan	Council Response	LINKS
					commitments from Transport for London and plans for car parks and cycling infrastructure.		solely relying on brownfield sites would not meet the borough's housing needs due to limited availability and suitability. The plan aims to balance development by protecting essential green spaces while utilizing some greenbelt areas to address the acute housing crisis effectively. Green Space Protections and Climate Resilience: The Local Plan commits to enhancing green spaces and promoting climate resilience. The plan includes the creation of approximately 500 hectares of rewilded landscapes and upgrading sites of importance for nature conservation (SINCs). This approach aims to ensure that even as some greenbelt areas are developed, the overall green space and biodiversity in the borough are enhanced. Specific areas designated for rewilding and biodiversity improvements are detailed in the plan to provide transparency and accountability. Transport Infrastructure and Population Growth: Regarding the impact of population growth on transport infrastructure, the Local Plan outlines collaborations with Transport for London (TfL) to improve public transport services, road networks, and cycling infrastructure. The plan includes strategic investments to accommodate the increased population, such as extending transport services and enhancing cycling and pedestrian routes to promote sustainable travel options. Whitewebbs and Biodiversity Enhancements: While Whitewebbs is not specifically mentioned in the immediate documents, the plan's commitment to biodiversity includes reviewing and potentially upgrading areas of ecological importance. This ensures a comprehensive approach to environmental conservation across the borough.	
00007	MAUREEN	DARCY	SP SS1: Spatial strategy		Residents have expressed strong objections to Enfield Council's proposal to build on Greenbelt land, citing several major concerns. Firstly, there is already excessive traffic on Slades Hill, leading to noise pollution and sleep disturbances despite double glazing. The road has not been resurfaced for over 17 years, and additional development would exacerbate traffic and noise issues. Secondly, residents are deeply concerned about increased pollution, which has been linked to serious health risks and even fatalities, as evidenced by a recent case involving a young girl. This concern is heightened for those caring for vulnerable individuals, such as an autistic grandson, who may be particularly affected by pollution. Additionally, recent gas works have already caused significant traffic and pollution, highlighting the	No	Comments noted. The Council acknowledges the concerns raised by residents regarding the proposed development on Greenbelt land and addresses these issues through strategic and sustainable planning measures. The ELP Spatial Strategy and Overall Approach Topic Paper prioritizes sustainable development, aiming to balance housing needs with environmental preservation and quality of life improvements for current residents. 00063	Hulya	Murat	SP SS1: Spatial strategy		Residents object to the plan for 34,000 new homes in Enfield, citing concerns about excessive population growth, increased pollution, traffic, noise, and loss of green spaces. They argue that the plan lacks clarity on sustainability and community well-being, potentially compromising current living conditions and future generations. Questions arise about the impact on residents' mental health, infrastructure, and crime rates, with calls for evidence of due diligence and integration plans. Residents demand reassurance that the plan will meet its social and environmental objectives without harming the community's quality of life.	No	Comments noted. The Enfield Local Plan (ELP) outlines a strategic approach to meet housing needs while ensuring sustainable development. The plan emphasizes balancing economic growth with social and environmental objectives, aiming to create strong, healthy, and safe communities. It incorporates detailed assessments of infrastructure, green spaces, and public services to mitigate negative impacts. The ELP promotes the use of brownfield sites and prioritizes integrating new developments with existing communities to minimize strain on resources and maintain Enfield's character and quality of life.

00123	Susan	Aylott	SP SS1: Spatial strategy		Residents express strong opposition to the proposed developments, citing significant detrimental impacts on nature conservation at Crews Hill Golf Club and Glasgow Stud. They emphasize that the loss of land providing scenic views over the Ridgeway to Enfield Chase would be irreversible. The proposals threaten vital commercial enterprises and popular garden centres that generate jobs, revenue, and attract visitors to the area. Increased traffic on rural lanes such as Whitewebbs, Cattlegate Road, and East Lodge Lane would degrade their natural beauty and character. Additionally, the rise in traffic volume is expected to negatively impact the conservation areas of Clay Hill and Forty Hall.	No	Comments noted. The Council acknowledges the concerns regarding the potential impacts on nature conservation, scenic views, and local commercial enterprises at Crews Hill. The Crews Hill Topic Paper outlines a strategic approach to balance development with environmental preservation, ensuring that vital green spaces and biodiversity are protected. The plan includes measures to enhance public access to green areas, promote sustainable transport, and support local businesses. By integrating new development with careful environmental management, the Council aims to maintain the area's rural character while addressing housing and infrastructure needs in a sustainable manner.	
00156	Shirley	Sandford	SP SS1: Spatial strategy		Residents object to the Local Enfield Plan, particularly the use of Green Belt land, citing a lack of infrastructure at those sites. They argue that	No	Comments noted. Local Plan takes into account all of the infrastructure needs that will be required throughout the Plan period and the Infrastructure Delivery Plan will be continuously updated. Environmental impacts will be

					brownfield sites, which have better access to job opportunities and transportation, should be utilized instead.		considered at the planning application stage against the relevant Local Plan policies.	
00164	Paula	Sandamas	SP SS1: Spatial strategy		The resident objects to building on Green Belt land due to its negative impact on the environment, wildlife, and ecosystems. They highlight known flood issues that could worsen with additional housing, increased traffic and pollution in an already busy area, and the inability of overcrowded Piccadilly Line services at Oakwood to cope with more users. They argue that the development won't bring additional jobs, lacks leisure or recreational activities, and removes access to countryside and riding stables. There are no plans for additional healthcare provision, and existing cycle lanes are underutilized. The resident urges the planning committee to consider the cumulative impact of extensive housing in surrounding areas on the local environment.	No	Comments noted. The ELP Spatial Strategy and Overall Approach Topic Paper addresses many of the issues you have raised. The council is committed to ensuring that any development on Green Belt land is carefully planned to mitigate environmental impacts, protect wildlife, and manage flood risks through sustainable drainage systems. Traffic and transportation concerns are taken seriously, with plans to work with providers to improve infrastructure and public transport capacity, including addressing issues on the Piccadilly Line. The strategy also aims to balance housing needs with the provision of job opportunities and recreational facilities, ensuring that new developments contribute positively to the community. Healthcare provision is a key consideration, with efforts to ensure that new housing developments include necessary services and amenities.	
00194	Trefor	Charles	SP SS1: Spatial strategy		Residents consider the growth will overcrowd Enfield. The Plan is not legally compliant and policy is unsound.	No	The Enfield Local Plan is both sound and legally compliant, having been developed based on up-to-date evidence contained in the council's planning evidence base.	
00227	Greta	Carrington	SP SS1: Spatial strategy		Residents strongly object to the high-rise building proposals in Enfield Council's Policies raising concerns that these structures will destroy the historic market town's rural character and impact the Enfield Town Conservation Area. They oppose the Chase Park development due to its detrimental effects on the Enfield Chase Area of Special Character, historic landscapes, and wildlife habitats. The proposed developments are seen as threats to footpaths like Merryhill's Way and the London Loop, farmland, and the Trent Park Conservation Area. Additionally, increased traffic and pollution with minimal new employment are significant concerns.	No	Comments noted. The ELP Spatial Strategy and Overall Approach Topic Paper emphasizes strategic growth while protecting conservation areas and green spaces. The Chase Park Topic Paper outlines measures to mitigate impacts on Enfield Chase, preserving views, wildlife habitats, and historical landscapes. The policy includes plans to manage traffic and pollution, ensuring sustainable and community-friendly development.	
00253	Sarah	Hargreaves	SP SS1: Spatial strategy		Residents acknowledge the need for an updated Local Plan but are skeptical about its future-proofing, particularly regarding infrastructure needs and maintaining green spaces. They question the necessity of the proposed number of dwellings, citing declining birth rates and population movement out of London. Concerns include the creation of low-grade	No	Comments noted. The "Spatial Strategy and Overall Approach" document emphasizes the importance of sustainable development, ensuring that new housing meets current and future needs while preserving green spaces and maintaining the character of local areas. The plan includes rigorous assessments of infrastructure requirements to support growth, such as improvements to

00429	Aron	Rolle	SP SS1: Spatial strategy	URB.22: Oakwood Station Car Park	<p>jobs at M25 J24 and West of Ramme Marsh, the unsuitability of tall buildings for Enfield's market town environment, and the loss of amenities such as garden centers, which are vital for the local economy and recreation. They argue that high-rise flats do not foster community and that affordable housing may not benefit the local economy. Additionally, there are worries about the capacity of local transport infrastructure and roads to handle increased demand, as well as the importance of green spaces like Trent Park for pollution reduction and recreation.</p> <p>Residents object to Policy SS1 Spatial Strategy and URB.22: Oakwood Station Car Park, based on several points: Overstated Population Projections: The housing need figures in the Enfield Local Plan (ELP) are based on 2014 population projections, which are significantly higher than the latest 2021 census data and projections. The actual population in Enfield has decreased, with the Greater London Authority (GLA) projecting an increase of around 10,000 people from 2021 to 2041, compared to the ELP's projection of 51,000. This leads to an overstated housing need of approximately 34,000 homes. Need for Revised Data: The consultation paper for the Levelling Up and Development Bill emphasizes the need to review the approach to assessing housing needs, ensuring it is based on the most relevant data. Using updated data would result in a more accurate housing need figure, reducing the necessity for tall buildings and high-density developments. Inappropriate Housing Density: The proposed housing density at Oakwood Station Car Park does not align with the area's character. The development is not sympathetic to the existing housing types and is considered inappropriate and not aesthetically pleasing. Impact on Views and Landscape: Tall buildings will negatively impact views from the Trent Park Conservation Area and the landscape character of the area. The development would also adversely affect views from the historic Enfield Chase Area of Special Character and the countryside. Negative Impact on Cockfosters: The development would negatively impact the character of Cockfosters and remove essential car parking facilities used by commuters and for leisure purposes.</p>	No	<p>transport networks and amenities. Additionally, the "Site Allocation Topic Paper" details how the plan balances housing development with economic opportunities, aiming to create high-quality employment and community spaces. It addresses the integration of tall buildings into the urban fabric while minimizing their impact on local character and ensuring they contribute positively to the community. These strategies collectively demonstrate the plan's commitment to sustainable growth, infrastructure enhancement, and the preservation of Enfield's unique environment and heritage.</p> <p>Comments noted. The Enfield Local Plan (ELP) has been developed using population projections and housing needs assessments to ensure that future growth is sustainably managed. While residents have highlighted discrepancies between 2014 projections and the latest 2021 census data, the council is committed to using the most accurate and relevant data available. The ELP Spatial Strategy emphasizes that the housing need figures are periodically reviewed and updated to reflect the most recent data and trends. This ensures that housing targets are realistic and in line with actual population growth. The council recognizes the importance of aligning housing development with the character of existing neighborhoods. The Housing Topic Paper outlines the council's commitment to creating developments that are sympathetic to the local context and provide necessary amenities without compromising the area's character. The site allocation topic paper further emphasizes the need for developments that are compatible with the surrounding urban fabric and are designed to enhance the community's aesthetic appeal and functionality. The council's design and character guidelines ensure that any new developments, including those proposed for Oakwood Station Car Park, respect and preserve key sightlines and the visual integrity of significant areas such as Trent Park Conservation Area and the Enfield Chase Area of Special Character. The ELP Spatial Strategy also emphasizes sustainable development practices that maintain the natural landscape and heritage of the area, ensuring that new buildings harmonize with the existing environment. The council understands the concern regarding the impact on infrastructure, including car parking facilities, GP services, and schools. The ELP includes provisions for improving and expanding local infrastructure to meet the needs of a growing population, ensuring that new developments do not strain existing services. Specific attention is given to preserving essential facilities, such as</p>

01675	Valerie	Lenson	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	The resident objects to the Enfield Local Plan, citing inadequate infrastructure in Hadley Wood, including poor transport services, frequent traffic congestion, and limited amenities. They argue that adding new homes without significant investment in infrastructure is unjustified. The plan's housing strategy is based on capacity rather than need, failing to prioritize brownfield sites and inadequately evidencing the exceptional circumstances for Green Belt release. They emphasize that developing Green Belt land, which serves as a carbon sink and biodiversity area, contradicts national policies and lacks community support, particularly from the Hadley Wood Neighbourhood Planning Forum.	No	The Enfield Local Plan's spatial strategy and overall approach emphasize the importance of integrating new housing developments with necessary infrastructure improvements. This includes enhancing transport services, healthcare facilities, and local amenities to ensure sustainable and well-supported growth. The plan prioritizes the use of brownfield sites and carefully considers the release of Green Belt land, ensuring that exceptional circumstances are clearly justified and align with national policies. Additionally, the plan addresses community feedback and aims to create balanced development that meets both current and future needs of Enfield residents while preserving environmental and historical assets. This comprehensive approach ensures that infrastructure developments are planned alongside new housing projects to support the community effectively.	
01679	Wendy and David	Poulton	SP SS1: Spatial strategy		Regulation 19 should not proceed because Enfield's Green Belt is essential for health, well-being, and future generations. Planning Policy Framework and the London Plan, focusing on sustainable, well-integrated growth while preserving the natural and historic environment. This approach ensures comprehensive development that meets Enfield's housing needs without compromising environmental and community values.	
01904	Matt	Burn	SP SS1: Spatial strategy		Residents object to Policy SS1 in the draft Enfield Local Plan, arguing it fails to conform with the London Plan (LP21) and the NPPF. They emphasize the need to prioritize brownfield sites over Green Belt land for housing and industrial use. The plan proposes excessive housing targets and family-sized homes without updated evidence, potentially reducing overall affordable housing. Concerns include the environmental impact, loss of open spaces, and insufficient infrastructure for sustainable development. The viability of proposed affordable housing at key sites is also questioned, deeming the plan legally non-compliant and unsound.	No	Comments noted. The plan's target of 1,246 net new homes a year is considered the minimum required against the London Plan. The Plan sets out general presumption of brownfield first approach to delivering sustainable growth by focusing development within growth areas, town centers and around transport hubs. The Plan is supported by the Infrastructure Delivery Plan (IDP) which identifies Enfield's infrastructure needs comprehensively while highlighting some uncertainties around funding from Government departments that may affect how planning for future provision is considered.	
01909	Andy	Perkins	SP SS1: Spatial strategy		Resident object to the Local Plan 2019-2041.	No	Noted.	
01909	Andrew	Perkins	SP SS1: Spatial strategy		Regulation 19 should not proceed because Enfield's Green Belt is essential for health, well-being, and future generations. 02010	James	Lawn	SP SS1: Spatial strategy		Residents have expressed significant concerns regarding the consultation process for Enfield Council's draft Local Plan, citing failures in compliance with the duty to cooperate. At a public session, it was revealed that many residents did not receive the communication, either by mail or email, about the draft plan, despite claims that such documents were distributed. A poll of attendees at the session showed that approximately 70% had not received the key information. Further checks with residents in various locations confirmed these communication gaps. As most attendees learned about the consultation through non-council sources, there are concerns about the transparency and accountability of the process. Residents are calling for a thorough investigation and a more effective re-run of the consultation to ensure comprehensive and fair communication with the community.	No	Comments noted. The Council acknowledges the residents' concerns regarding the consultation process and aims to address these through improved communication and adherence to statutory requirements. The council's Duty to Cooperate Statement highlights the legal framework guiding consultations, ensuring that all relevant bodies are engaged in the planning process. Efforts are being made to enhance transparency and accountability, ensuring that all residents are adequately informed and involved. The council remains committed to refining its consultation methods to better serve the community's needs and uphold the principles of effective and inclusive planning.	
02058	Sean	Doull-Connolly	SP SS1: Spatial strategy		Residents have significant concerns regarding Policy PL11, highlighting several key issues. They fear the development will severely impact Sites of Importance for Nature Conservation at Crews Hill Golf Course and Glasgow Stud. Urbanization would eradicate the Chain Walk Public Right of Way and Burnt Farm Ride Public Bridleway, while damaging views from the Ridgeway over Enfield Chase. The potential deletion of Green Belt at Kings Oak Plain threatens areas recently reforested by volunteers. Additionally, the loss of local garden centers could harm the economy and employment. Increased traffic on narrow rural roads may lead to more accidents, negatively affecting the character of conservation areas at Clay Hill and Forty Hall.		The Enfield Local Plan is both sound and legally compliant, having been developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development.	
02060	Hisham	LAHOULAS NIA	SP SS1: Spatial strategy		Residents argue that Enfield Council's consultation for the draft local plan was flawed, with technical materials, vague maps, and limited document access discouraging public engagement. They claim the plan was developed with preconceived outcomes, disregarding Regulation 18 representations and the Hadley Wood Neighbourhood Plan. They contend that exceptional circumstances for Green Belt releases, particularly in site RUR.02, are not justified, and brownfield sites were not fully explored. Additionally, they assert that the plan is inconsistent with Enfield's Climate Action Plan and priorities, risking significant	No	The Enfield Local Plan is both sound and legally compliant, having been developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs.

03473	Aron	De Vos	SP SS1: Spatial strategy		Residents object to Policy SS1 in the draft Enfield Local Plan, arguing it fails to conform with the London Plan (LP21) and the NPPF. They emphasize the need to prioritize brownfield sites over Green Belt land for housing and industrial use. The plan proposes excessive housing targets and family-sized homes without updated evidence, potentially reducing overall affordable housing. Concerns include the environmental impact, loss of open spaces, and insufficient infrastructure for sustainable development. The viability of proposed affordable housing at key sites is also questioned, deeming the plan legally non-compliant and unsound.	No	Comments noted. The plan's target of 1,246 net new homes a year is considered the minimum required against the London Plan. The Plan sets out general presumption of brownfield first approach to delivering sustainable growth by focusing development within growth areas, town centres and around transport hubs. The Plan is supported by the Infrastructure Delivery Plan (IDP) which identifies Enfield's infrastructure needs comprehensively while highlighting some uncertainties around funding from Government departments that may affect how planning for future provision is considered.

04051	Emmeline	Galilee	SP SS1: Spatial strategy		The plan is unsound and not positively prepared because it lacks evidence that tall residential buildings provide desirable, community-enhancing housing. Studies show tall buildings often create isolated dormitory units and fail to foster sustainable neighborhoods. Tower blocks, reminiscent of the unsuccessful 1960s models, do not enhance the public realm or street vibrancy. Research indicates that high-rise living leads to fewer friendships and more stress, particularly for children. Additionally, the sustainability of tall buildings is questionable due to higher construction and maintenance costs.	No	The Exceptional Circumstances Topic Paper and the Spatial Strategy and Overall Approach Topic Paper provide a thorough evidence base for the plan. They ensure that housing developments, including tall buildings, are part of a sustainable growth strategy. This strategy integrates housing with necessary infrastructure improvements, supports community building, and addresses housing needs while adhering to environmental and social sustainability goals. The plan aims to balance development with maintaining the character and liveability of the area	
04220	Beverley	Kennard	SP SS1: Spatial strategy		The proposal is viewed as causing inconvenience to the traveling public across a large area of Enfield and beyond.	No	Comments noted.	
05090	Susan	Miller	SP SS1: Spatial strategy		Residents are concerned that the local plan's focus on redeveloping major supermarket sites, leisure centers, and Cineworld will displace essential community amenities. They fear this shift prioritizes housing development at the expense of existing facilities for food shopping and leisure, diminishing services that current residents rely on and enjoy.	No	The local plan aims to balance housing needs with the preservation of community amenities, recognizing the importance of existing facilities such as supermarkets and leisure centers. The plan includes measures to ensure that redevelopment projects, including those at key sites like Tesco and Sainsbury's, incorporate provisions for maintaining or enhancing community services. This approach seeks to mitigate the potential loss of essential amenities by integrating them into new developments or providing alternative solutions. Additionally, the plan's emphasis on sustainable development includes evaluating the impact on local services and ensuring that new housing does not overshadow the needs of existing residents. This strategy aligns with the broader goals outlined in the Site Allocation Topic Paper, which seeks to address housing demands while safeguarding community infrastructure.	
05100	Tanvi	Haria	SP SS1: Spatial strategy		Residents are concerned about the proliferation of high-rise buildings, fearing it will lead to a loss of green spaces essential for walking and mental well-being. They emphasize the need to preserve and enhance green areas to ensure that there are sufficient spaces for relaxation and recreation, which are crucial for mental health and quality of life.	No	The Local Plan's spatial strategy acknowledges the critical need to balance urban development with the preservation of green spaces to support residents' well-being. The Plan integrates green infrastructure and open spaces into its framework to ensure that new developments include adequate recreational areas, enhancing mental health and quality of life. High-rise developments are strategically placed to limit their impact on existing green spaces, and there are dedicated policies to protect and enhance these areas. The Plan's approach aims to create vibrant, sustainable communities where residents can enjoy both modern amenities and access to green environments. This

They argue that the Council	No	The concerns about the Local Plan's Green Belt allocations are addressed by the robust justification for the Plan's approach, as outlined in the Site Allocation Topic	

Rep ID	First Name	Last Name	Policy Number	site allocation reference	Summary of Response	Potential to change the plan	Council Response	LINKS
			strategy	Camlet Way and Crescent West, Hadley Wood	has not adequately addressed feedback from the Regulation 18 consultation or engaged with the HW Neighbourhood Planning Forum. Concerns are also raised about the lack of evidence supporting exceptional circumstances for Green Belt releases and the inadequate justification for removing land from the Green Belt, as even the Integrated Impact Assessment (IIA) supports retaining these areas. The reliance on passive methods for identifying land and brownfield sites, combined with an unsubstantiated housing target and inadequate infrastructure planning, undermines the Plan's sustainability. Additionally, the Plan does not reflect the recently adopted HW Neighbourhood Plan's emphasis on the Green Belt's importance for setting, character, and history, and fails to address necessary modifications proposed by the HW Neighbourhood Planning Forum.		<p>The Plan has meticulously considered feedback from the Regulation 18 consultation and engaged with relevant stakeholders, including the HW Neighbourhood Planning Forum. Exceptional circumstances for Green Belt releases, particularly for site RUR.02, are substantiated by evidence demonstrating the need for strategic growth to meet housing demands, supported by the Integrated Impact Assessment (IIA). The Plan incorporates a proactive approach to identifying land and brownfield sites and integrates planned infrastructure improvements to ensure sustainable development. It also aligns with the HW Neighbourhood Plan by incorporating necessary modifications and reflecting the Green Belt's value in maintaining the area's character and history, thus ensuring that the development is both justified and balanced.</p>	
01134	Michele	Christopher	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised concerns that the housing target for 2030-2041 is flawed because it is based on the capacity of sites, rather than actual housing need, making it an inadequate justification for releasing Green Belt land. They argue that the Local Plan does not sufficiently incorporate the Hadley Wood Neighbourhood Plan's policies or acknowledge the Green Belt's significance to local character, history, and setting. Specifically, the exceptional circumstances for releasing site RUR.02 from the Green Belt are not adequately evidenced, despite its high value and isolation. Residents also criticize Enfield Council for failing to proactively explore alternative or brownfield sites as required by national policy, instead relying on passive Calls for Sites. The Integrated Impact Assessment (IIA) suggests that site RUR.02 should remain in the Green Belt, and the Hadley Wood Neighbourhood Planning Forum has proposed necessary modifications, including restricting policy H4 to brownfield sites only. Specifically, the exceptional circumstances for releasing site RUR.02 from the Green Belt are not adequately evidenced, despite its high value and isolation. Residents also criticize Enfield Council for failing to proactively explore alternative or brownfield sites as required by national policy, instead relying on passive Calls for Sites. The Integrated Impact Assessment (IIA) suggests that site RUR.02 should remain in the Green Belt, and the Hadley Wood Neighbourhood Planning Forum has proposed necessary modifications, including restricting policy H4 to brownfield sites only.		contained in the council's planning evidence base. The strategy post-2029 is based on realistic capacity assessments to meet future needs. The Plan prioritizes brownfield sites, aligning with NPPF para 125, and exceptional circumstances for Green Belt allocations, including Crews Hill, Chase Park, and Hadley Wood, are justified in the Exceptional Circumstances Topic Paper. The Plan reflects Regulation 18 feedback and the Hadley Wood Neighbourhood Plan, ensuring a balanced approach to sustainable development and community needs. Transport and place-making consultations are integrated into the Plan to support cohesive growth.	
01331	Vivienne	Claridge	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised concerns that the housing target for 2030-2041 is flawed because it is based on the capacity of sites, rather than actual housing need, making it an inadequate justification for releasing Green Belt land. They argue that the Local Plan does not sufficiently incorporate the Hadley Wood Neighbourhood Plan's policies or acknowledge the Green Belt's significance to local character, history, and setting. Specifically, the exceptional circumstances for releasing site RUR.02 from the Green Belt are not adequately evidenced, despite its high value and isolation. Exceptional circumstances for Green Belt releases, particularly for site RUR.02, are substantiated by evidence demonstrating the need for strategic growth to meet housing demands, supported by the Integrated Impact Assessment (IIA). The Plan incorporates a proactive approach to identifying land and brownfield sites and integrates planned infrastructure improvements to ensure sustainable development. It also aligns with the HW Neighbourhood Plan by incorporating necessary modifications and reflecting the Green Belt's value in maintaining the area's character and history, thus ensuring that the development is both justified and balanced.	
01399	Meenal	Pandya	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised several concerns regarding the Local Plan's handling of Green Belt allocations, particularly site RUR.02. They argue that the Council has not adequately addressed feedback from the Regulation 18 consultation or engaged with the HW Neighbourhood Planning Forum. Concerns are also raised about the lack of evidence supporting exceptional circumstances for Green Belt releases and the inadequate justification for removing land from the Green Belt, as even the Integrated Impact Assessment (IIA) supports retaining these areas. The reliance on passive methods for identifying land and brownfield sites, combined with an unsubstantiated housing target and inadequate infrastructure planning, undermines the Plan's sustainability. Additionally, the Plan does not reflect the recently adopted HW Neighbourhood Plan's emphasis on the Green Belt's importance for setting, character, and history, and fails to address necessary modifications proposed by the HW Neighbourhood Planning Forum.	No	The concerns about the Local Plan's Green Belt allocations are addressed by the robust justification for the Plan's approach, as outlined in the Site Allocation Topic Paper. The Plan has meticulously considered feedback from the Regulation 18 consultation and engaged with relevant stakeholders, including the HW Neighbourhood Planning Forum. Exceptional circumstances for Green Belt releases, particularly for site RUR.02, are substantiated by evidence demonstrating the need for strategic growth to meet housing demands, supported by the Integrated Impact Assessment (IIA). 01436	Betty	Helman	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised several concerns regarding the Local Plan's handling of Green Belt allocations, particularly site RUR.02. They argue that the Council has not adequately addressed feedback from the Regulation 18 consultation or engaged with the HW Neighbourhood Planning Forum. Concerns are also raised about the lack of evidence supporting exceptional circumstances for Green Belt releases and the inadequate justification for removing land from the Green Belt, as even the Integrated Impact Assessment (IIA) supports retaining these areas. The reliance on passive methods for identifying land and brownfield sites, combined with an unsubstantiated housing target and inadequate infrastructure planning, undermines the Plan's sustainability. Additionally, the Plan does not reflect the recently adopted HW Neighbourhood Plan's emphasis on the Green Belt's importance for setting, character, and history, and fails to address necessary modifications proposed by the HW Neighbourhood Planning Forum.	No	The concerns about the Local Plan's Green Belt allocations are addressed by the robust justification for the Plan's approach, as outlined in the Site Allocation Topic Paper. The Plan has meticulously considered feedback from the Regulation 18 consultation and engaged with relevant stakeholders, including the HW Neighbourhood Planning Forum. Exceptional circumstances for Green Belt releases, particularly for site RUR.02, are substantiated by evidence demonstrating the need for strategic growth to meet housing demands, supported by the Integrated Impact Assessment (IIA). The Plan incorporates a proactive approach to identifying land and brownfield sites and integrates planned infrastructure improvements to ensure sustainable development. It also aligns with the HW Neighbourhood Plan by incorporating necessary modifications and reflecting the Green Belt's value in maintaining the area's character and history, thus ensuring that the development is both justified and balanced.

The reliance on passive methods for identifying land and brownfield sites, combined with an unsubstantiated housing target and inadequate infrastructure planning, undermines the Plan's sustainability. Additionally, the Plan does not reflect the recently adopted HW Neighbourhood Plan's emphasis on the Green Belt's importance for setting, character, and history, and fails to address necessary modifications proposed by the HW Neighbourhood Planning Forum.	No	The concerns about the Local Plan's Green Belt allocations are addressed by the robust justification for the Plan's approach, as outlined in the Site Allocation Topic Paper. The Plan has meticulously considered feedback from the Regulation 18 consultation and engaged with relevant stakeholders, including the HW Neighbourhood Planning Forum. Exceptional circumstances for Green Belt releases, particularly for site RUR.02, are substantiated by evidence demonstrating the need for strategic growth to meet housing demands, supported by the Integrated Impact Assessment (IIA). The Plan incorporates a proactive approach to identifying land and brownfield sites and integrates planned infrastructure improvements to ensure sustainable development. It also aligns with the HW Neighbourhood Plan by incorporating necessary modifications and reflecting the Green Belt's value in maintaining the area's character and history, thus ensuring that the development is both justified and balanced.	
01540	Chris	Michael	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley Wood	Residents have raised several concerns regarding the Local Plan's handling of Green Belt allocations, particularly site RUR.02. They argue that the Council has not adequately addressed feedback from the Regulation 18 consultation or engaged with the HW Neighbourhood Planning Forum. Concerns are also raised about the lack of evidence supporting exceptional circumstances for Green Belt releases and the inadequate justification for removing land from the Green Belt, as even the Integrated Impact Assessment (IIA) supports retaining these areas. The reliance on passive methods for identifying land and brownfield sites, combined with an unsubstantiated housing target and inadequate infrastructure planning, undermines the Plan's sustainability. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by comprehensive evaluations, and brownfield alternatives have been proactively explored. The housing targets reflect realistic capacity assessments to meet future needs, addressing both the need for sustainable growth and the protection of local character. Exceptional circumstances for Green Belt release are clearly justified in the Exceptional Circumstances Topic Paper. This approach ensures alignment with national policies and community needs.	
02104	Harriet	Davidian	SP SS1: Spatial strategy	RUR.02: Land between Camlet Way and Crescent West, Hadley	Residents are concerned that the Local Plan was developed with predetermined outcomes, selecting Green Belt sites before thorough evidence was gathered, resulting in inconsistencies across nearly 300 documents. They argue that the Plan fails to adequately address the Regulation 18 feedback and does not properly reflect the Hadley Wood Neighbourhood Plan and its policies. The justification	No	The Enfield Local Plan is both sound and legally compliant, developed based on up-to-date evidence contained in the council's planning evidence base. The plan includes extensive documentation and research to support policy decisions, ensuring a robust framework for sustainable development. Regulation 18 representations and the Hadley Wood Neighbourhood Plan have been considered. The selection of Green Belt sites is backed by
