Population

Based on the [2021 Census](#), the ward population is estimated to be 12,529.¹ The population increased by 8.6% from 2011 to 2021.

Age Profile

The ward has higher than average proportions people aged 55 and over, and relatively fewer school-aged children and young adults. The split between male and female residents by age band is in the chart (bottom).

¹ Census 2021 population totals vary in accordance with geographies and characteristics being measured: eg the sum of all-age ward populations do not necessarily match the published borough total, and the sum of age band totals do not necessarily match ward and borough totals. This has occurred owing to changes in statistical suppression practices used by the ONS in order to release Census data more quickly. Differences are small and have very little effect upon calculations of proportions.
