

---

Dear Sirs

I object to the proposed changes for the following reasons :-

(1) More risk of flooding during heavy rain storms due to concreting of grassland. Particularly applicable to houses downhill such as in Greenbrook Avenue

(2) Years of heavy building trucks in the area will make it even more difficult to exit the area to Cockfosters and Barnet. Already Beech Hill and Camlet Way are too narrow to allow traffic to easily pass through without one vehicle having to give way.

(3) And then when the project is finished traffic will be heavier and it will be even more difficult to exit the area to Cockfosters and Barnet. Already Beech Hill and Camlet Way are too narrow to allow traffic to easily pass through without one vehicle having to give way A real worry for emergency services and buses

(4) We are very fond of being able to walk from our house into Hadley Woods alongside the Golf Course and to Jakes Lake. The proposal would change this pleasure and change the nature of a very special residential area.

Thanks
