
Greetings

I wish to lodge my objections against all housing or warehouse developments on Enfield Green Belt lands including the Vicarage Farm proposal for 3,000-5,000 houses.

(Policy SP PL 10, pages 80-87, and Figure 3.11)

Before I even get to the environmental vandalism of such projects , the existing roads and other infrastructure cannot support such massive schemes as they are at full capacity already.

It is a staggering disregard for the environment of Enfield and a terrible legacy for all future generations. Brown field sites must be utilised for all future housing developments and this unfettered population growth must be curtailed as it is not compatible to a sustainable future for the human race.

I cannot believe that the human race has sunk so low that they find it acceptable to consider building over such pristine and natural environments as Enfield green belt land. Shame on Enfield Council.
