To whom ever it may concern

On opening my local paper I have just found out about your plans to develop on our much loved green belt. Crews hill is a gem in our area and I cant understand the logic in getting rid of such an amazing place for yet more housing . As for the extra traffic and pollution it will cause to the area I am stunned I often pop to the garden centres. It is well known the benefits plants and gardening in general can bring to people with mental health issues which let's be honest . A large percentage of the country are going through now . Instead it seems yet more concrete and brick is on the table for our lovely enfield. I hope someone reads this and ads it to the huge list of people who are disgusted . I don't know of anybody I know who agrees with this disgusting plan
