

As a resident of Hadley Wood, I have always valued the green space which we have and therefore feel strongly that we should be protecting our Green Belt not building on it.

I cannot see how we can justify building 160 new houses on the Green Belt. The area identified represents a massive over development of the local area where we have very limited local amenities. The school is a small primary school and most years over subscribed, the shops are limited and the extra cars would cause a very real problem with traffic and congestion. The area is also prone to flooding and drainage issues which again the development of such a large area would only worsen.

The planned site is in the middle of two Conservation Areas and will adversely impact the setting and appearance of the whole area. This is not, in my opinion, a sustainable development.

I therefore object strongly to the development of this proposed site.
