

I am writing to object to the 3000 new houses at Chase Park Vicarage Farm Policy SP PL 10 Fig 3.11.

By destroying our green belt you are taking away natural habitats for thousands of creatures not to mention the detrimental effects to the health and mental health of the residents of Enfield. What would we have done without our green spaces during lock down, it doesn't bear thinking about? Furthermore, with global warming a huge topic at the moment, destroying thousands of trees is simply not a good idea.

Please consider regenerating the grey areas instead.

Yours sincerely
