

---

Dear Sir/Madam

Regarding the Draft Local Plan 2039, I wish to object to the proposals. Simply put, my objection relates to two specific issues. They are, namely;

Erosion of green belt

Enfield has large areas of green belt. The intention to build 3000 houses on Vicarage Farm and a similar number at Crews Hill, is a massive erosion of Enfield's green belt.

25000 (circa) dwellings

The proposal to construct so many new dwellings will simply overwhelm the current infrastructure (doctors surgeries, school places and the like). They will not be expanded at the same rate.

Aside from the green belt sites, a further 43 possible sites have been identified. I have grave doubts that Enfield will be able to control the rush to develop. There has been remarkably little evidence of any strategic planning control regarding the scale, density, and design of recent planning applications. I refer to Southgate Office Village, Coliseum site, and Edmonton town centre. Enfield town centre also appears to be under threat of inappropriate development.

I wish to object
