
I wish to register my objection to your plans to build housing on areas of Enfield Green Belt.

1. My objections are based on the fact that there is no infrastructure in place to accommodate any more building of houses near Enfield Road and Hadley Road.

2. There are only these two roads that would be used and they already inadequate to cope with the traffic. Enfield Road is at present used as an alternative from east to west for the congested North Circular Road A406 and Hadley Road is used to avoid this congestion but clogs up Cockfosters at one end.

3. Lack of adequate public transport using these routes.

4. Schools. There is already a shortage of school places in Enfield just where are families expected to send their children.

5. Doctors surgeries. Again the surgeries available just about cope at present and have no room for expansion.

6. Chase Farm and Barnet Hospitals are the only ones in the area. Chase Farm has no A+E department and Barnet A+E the waiting times are hours to get seen and on two occasions that I had cause to use it recently you have to queue outside for up to an hour to register before the wait to be seen.

Please add my objection to your consultation
