

---

I object to the development on green belt sites. Once these natural areas are concreted over it will be impossible to go back. These areas will be lost to future generations for ever. Enfield Chase is an important historic part of Enfield.

In addition, my concern is the inadequate infrastructure that exists within the borough. The building of thousands of new family homes will have an impact on our already overcrowded schools. (Having a member of school appeals panels. I am aware of this problem) Additional traffic on our already congested roads and increased pressure on our already struggling public health services.

Please think carefully before making decisions that cannot be reversed affecting future generations.
