Dear Enfield Council

I absolutely object to all of the council's plans to build on the green belt around Enfield and green spaces within our community. The plans to build a crematorium at Firs Farm are disgraceful. This is a very popular area with families and schools and it needs to be preserved. This plan would ruin all of the good work which has been fine to develop this outdoor space over the past 10 years.

There are many brownfield sites which could be used for housing and other developments across the borough, particularly around the north circular and Tottenham area. These plans need to be urgently reassessed.
