

---

I have lived in Enfield over 30 years tried to support our local area only for our local council to sellout as they will not examine all other reasonable options by using brownfield land, first thought is to destroy our green spaces. There is no statutory duty to provide a fixed number of homes per year. Again the council's plans to "resist skyscrapers" is not the case as according to their proposal it contains multiple high storey developments. (Policy DM DE6) Do want all town centres to be a clone?

The answer is to develop well designed homes near existing transport hubs, such as Crews Hill station. This station supposedly will support 6,500 homes, with no other alternative transport, but all acceptable for Enfield council to take the money and destroy our green belt and the livelihood of numerous business. (Policy SP PL9) . This site is part of the historic Enfield Chase that is a rare and valuable landscape and it's destruction would cause harm to the character of our borough and green belt. What planet are they living on?

Other councils are maximising other opportunities for industrial land. You don't need to be a rocket scientist to work out we have so many empty office blocks, as a result of the pandemic & working from home, could be re designed to use for housing?

In the last 18 months we have to told to look after our mental health in open spaces. How is this possible if the green spaces disappear?

A disgusted Enfield resident
