

---

Dear Sir or Madam,

I have just heard of the proposed plan to use part of Firs Farm Recreation Ground as a place to build a new crematorium.

I am writing to you to raise my concerns about this proposal.

I use the area for walking at least once a week and it is a fantastic community facility. The Friends of Firs Farm have really improved it and I understand have further plans to build a cafe and meeting area.

Firs Farm Wetlands is a valuable community space not just for walking but for sports and for children with unusual play facilities. This year it has been invaluable for people's mental well-being and for a space to go. It is also an important habitat for a wide range of native species - plants, birds, insects and encourages biodiversity.

Building a crematorium will take away important green space that we very much need in our local area for people's well being, children's learning and for the community to come together.

I strongly believe that we have to protect the green spaces we have left and would hope Enfield council also supported that. .

I hope the council will reconsider the location of the proposed development save this valuable green space

Yours faithfully,
