

---

I am writing as resident of Hadley Wood and also a Trustee of the Hadley Wood Association to register my opposition to the plans to build on valuable green belt land . I appreciate the pressure that every council is under to build housing for local residents but cannot understand the logic or the rationale for building on precious green belt land . My primary concern is the potential damage to the environment particularly given the Council's commitment to a clear and unequivocal green agenda as set out by the Climate Change Task Force .

One example is the illogical decision to spend substantial sums on low traffic neighbourhoods and then create higher traffic neighbourhoods in other parts of the borough .

The other issue I wish to raise is the total unsuitability of the proposed site with genuine concerns about serious flooding with its sloping terrain and the loss of valuable meadows as part of the eco-system.

Given the widespread opposition within our community I hope the Council is able to reconsider its current proposals

Yours sincerely
