

W recently received information in the post regarding the above Titled FUTURE ENFIELD...NEW HOMES FOR ENFIELD PEOPLE. With an introduction from Council Leader Cllr Nesil Caliskan

Are you able to provide further information to support how

1. "in some cases current housing needs are forcing people to move away when they would prefer to stay"
2. " the reality is that we do not have enough brownfield sites to meet housing needs". Do LBE have an upto date register of brownfield sites, who owns them, if planning for housing has been explored and if not why not.
3. Can you explain why the housing supply options are just to build up or build "further out into Enfield"....why not further "in" or further East, West North or South.
4. Why the proposed number of new builds to meet statutory annual target is being exceeded.... technically sound LP only requires 1246 per annum.
5. Land values are generally cheaper towards the east of the Borough so how can Council expenditure be justified for housing developments in the west, north or southern limits
6. What evidence is there to support the statement Enfield " children and grandchildren will be priced out of Enfield" in fact what evidence is there that our children and grandchildren have expressed a desire to stay in Enfield?...have children and grandchildren been consulted?

On a separate but related development matter....outdoor recreation and in particular outdoor swimming is on the increase with many people I know having to travel out of the Borough for a Lido experience. Enfield old Lido on the site of Southbury Leisure Centre was decommissioned. I personally think there is demand for a new Lido for Enfield

Residents to improve wellbeing and reduce environmental pollution from out of Borough travelling

Regards
T. Chowdry
