

---

Hello, I received an invitation to respond to suggested changes to Enfield. I have to say I am sceptical that anyone in the council cares about our views. No one in the neighbourhood voted to have fortnightly bin collections and it still went ahead. However since there is a consultation, here are my views:

Please do not waste money on traffic calming measures, extending pavements and bicycle lanes. This borough is half rural, people need cars to get to shops, schools, station. Please use the money to clean up the canal in front of the Enfield Town station as it has changed from an asset into a neglected, stagnant water which does not smell great on a hot day.

Kind regards
