

---

Hello

I have been a resident here in Hadley Wood for over 50 years. My children were born here, went to the local nursery, ballet school, primary school, used the tennis courts. The Hadley Wood train station allowed myself and husband when alive in the past to travel to work.

Particularly during Covid times having been able to walk the site and enjoy this Green Belt area has sustained my mental health. I feel this is a wrong location for this proposed development. It would destroy the amenities of this area i.e. overcrowding, car traffic, parking, noise and pollution.

I am sure there are many more reasons to support my objection which I am sure the HW Association will have submitted to you.
