

---

I object to the build of the crematorium in the heart of Firs Farm green space!

I can't believe the council is proposing yet another thing without informing local residents again. We have just had a bus stop put in front of our house and we knew nothing about it. Our neighbours had to inform us of this! The council have ruined Enfield! With the cycle lanes and the no entry roads etc..it would be ok if London transport was a reasonable price. Fares are so expensive that it is cheaper to own a car!

Why do we need a crematorium on a residential road?! The one good thing that the council did was to create the wetlands and now you are going to ruin it!

During lockdown the wetlands was a saviour for alot of people, including me and my family. Isn't it better to do a coffee shop or a playground for our children as there are 3 nearby schools in the area? Not sure who thinks of these ideas but they should be sacked!

I strongly object to the building of the cremetorium.

Thank you
