

---

To whom it may concern:

I am opposed to the proposal to build a crematorium at Firs Farm Wetlands. I feel it is so important to preserve our local green spaces from an ecological, climatic and social perspective. The local community have spent many years fundraising and developing this wonderful nature reserve for our community to use. As an individual and a family we would be really upset if we lose this wonderful space and resource that we use on a regular basis as a place to relax, exercise, play and enjoy being close to nature. It has been such a lifeline during the pandemic.
