

---

To whom it may concern,

I am really saddened to hear of the plans to sell off some land to the crematorium. The firs farm wetland is frequented weekly/ daily by my family and was through the whole of lock down. It has been somewhere to gather thoughts and make sure our mental health has all been in good place. My toddler loves to run around, visit the little play area whilst my husband and son do their exercise there every week and it promotes time for families to be outside in the fresh air.

I dread to think of the animals, insects and plants losing their homes. Its been a great promotion for biodiversity and so much more. a lovely green space for the community and a sanctuary. The green and open space is desirable and not as an asset to be disposed of by the council.

There are many cemeteries in Enfield and I strongly view this planning application to be rejected. Residents have not been consulted or asked what and how this open space can be used more.

Has the land been fully inspected?

There must be alternative green or concrete spaces which can be used!!!
