
Dear Sir/Madam.

Stop building on the green belt,
this country is full and you are ruining people's quality of life.

It's not a shameful thing to say that you want to put your own people first.

This is not a party political issue and when is someone going to have the guts to put a number on it. Is 80 million too much, is 100 million too much?.

Everywhere I turn in Enfield I see somewhere that had green grass that has now got rows of flats, when will it end ?.
