

---

I am not in favour of the above Draft local Plan. i am a long standing resident of Hadley Wood.

Hadley Wood and its green spaces are a major asset for the environment. Given the dramatic challenges to our environment due to global warming, I am amazed that this plan is even being considered. Diviersity and biodiversity will be negatively impacted. The site is close to conservation areas as well.

I think it would be very damaging to the environment to allow this development.
