

---

To whom it may concern,

In response to the proposal of a parking permit in the highfield area I would like to make the following points:

Parking during the day is not a problem. The local businesses use several spaces and this would not be changed with a parking permit situation. Therefore it is useless to have a parking permit situation for the day.

Residents from the flats on green lanes park during the evening.

I propose a permit area either not at all, or in the evenings, for only a few hours to keep the costs down for residents.
