

---

I am writing to express my disappointment in finding out that Enfield Council is thinking of a development of a crematorium in Firs Farm Wetlands and playing fields.

I demand you remove all reference to Firs Farm Wetland from Policy SP CL4.

This area is a community asset. I play with my daughter in this area including flying a kite, picnics, go for walks to relax my mind during these challenging times (which we will need spaces like this to fully mentally recover from the pandemic), and I exercise here. In addition, I have also played football here for my community team Armenian Youth which brings together people recreational and socially.

It will be sad to see one of Enfields award winning blue/green spaces ruined.
