

---

I am writing to object to the plans to build a crematorium in the firs park Wetlands area. This space has been a sanctuary for myself and numerous others, especially during lockdown. It is a very important hub of the community for wellbeing and wildlife and must not be impacted on by any building works planned by the local authority. Myself, numerous friends, my partner and children all use this area and benefit hugely from its natural resources and we are really looking forward to enjoying the proposed cafe and well being Community space planned. It would be an absolute travesty if this area was changed or built upon in any way. Please take this as a strong opposition to Enfield's proposed plans.
