

Enfield's Planning & Development Plan

Having spent several days negotiating the Enfield Website for information on your development plans for the borough, as suggested by the Leader of the council in the flyer sent to all households. I wish to congratulate those responsible for a superb job of hiding the facts about your intentions.

I had to turn to other sources, to separate the wood from the trees. Consequently I am totally opposed to what can only be described as an ill conceived, poorly thought out set of proposals, which would rip the heart out of our borough turning into a community dessert, with nothing more than dense housing blocks and towers.

With no thought about the impact on the wider community infrastructure of critical services, i.e. shops and peoples jobs, medical services, schools. To top it all, built into a base plan 10 years old.
