I'm sending this email in hope that it will stop the planning for building a crematorium in the heart of firs farms green space

I'm totally shocked and saddened that this has even been proposed as I regularly take my young children there to enjoy an open peaceful space within walking distance from home of which that absolutely love even on some cold winter days

Not only will this ruin one of the only beautiful open spaces we have so close by it will also increase traffic around the school roads and crossing those roads with three children is not easy at best of times

I'm pretty sure that there are already many concrete areas that a crematorium could be placed in Enfield and can only ask please leave our beautiful green space and wildlife alone
