

---

I am emailing you to address my objections to building a crematorium in the first form green space.

Why do you find it so hard to listen to the people that live in the area? You can clearly see that people are very unhappy with this proposal but yet it seems like once again you will do whatever you want and give zero shits about what the local people actually care about which is in this case saving one of the few green spaces we have left.

I have lived in Enfield all my Life and one of the things I love about living in Enfield is that we are so fortunate enough to have beautiful green spaces that I can take my family to and to truly enjoy.

I really hope on this occasion you actually do what is right and leave the green space alone!!!!

As mentioned above I have no doubt that you will do whatever you want and not care at what we have to say which just sums up Enfield Council, absolute rubbish! I'm ashamed of our council and the fact that you never seem to listen to us and there is always a financial agenda for you. Sadly this is the world we live in, people councils and governments the only care about greed and money.
