

---

Enfield Council wants to build a crematorium in the heart of Firs Farm's greenspace. We can't let this happen because wetlands green space has proved to be valuable to us all for many reasons:

- health and wellbeing
- education and environment
- recreation
- biodiversity
- sport.

The Friends of Firs Farm have worked tirelessly to develop the site for the benefit of the community and are always working to further improve the site.

We are in need of an indoor accessible community space, which would allow us to take advantage of the site year-round and have an ever-greater positive impact upon local community and individual wellbeing, physical and mental. These plans are yet to come to fruition, despite our continued and best efforts to work with Council, they are instead prioritizing a project that would degrade the site and be of detriment to the community's wellbeing, over one that would benefit it.
