

---

I have looked at your plans for the construction of housing on this site, SA32  
I object for the following reasons.

Many people shop in the supermarket, there are not any large shops like it in the area, many people will have to travel further away to shop.

All the medical surgeries in the area will not have space on their books for more patients.

Our local hospitals are already very busy with long waiting times for appointments.

Lack of emergency services.

There will be a lack of local school places for both primary and secondary schools.

Lack for parking for intended residents.
