

Objection. To SA32 Sainsbury Green Lanes

---

I am writing as a very concerned resident of N13 about the proposed redevelopment. Clearly the council has forgotten the people it serves. This redevelopment will detrimentally impact the N13 and N21 area. The council has already imposed draconian traffic changes that have negatively impacted Green Lanes. This development will create additional traffic on already crowded streets and create additional pollution, which the council claims it wants to decrease. The environmental impacts alone should negate this proposal. Further you are proposing to take the largest supermarket in the area. Many families, disabled persons and elderly cannot travel miles upon miles to get food. Common sense would suggest this is an absurd plan.

There are dozens more reasons why this proposal should fail. The desire for this council to develop green space and create unnecessary burdens on its residents is mindblowing. Please note the objection by my family.
