

Objection to Enfield Local Plan

I attempted to fill in your online form but it was anything but quick and easy to fill in and seemed cynically designed so that lazy people might tick yes to things they would not necessarily agree with to get through the form faster.

I have not read the whole plan in detail but there are a number of aspects that worry me greatly and which I strongly object to:

- Overdevelopment will increase congestion and pollution, and put greater strain on already stretched public amenities.
- Replacing existing amenities (eg Winchmore Hill Sainsburys) with high density housing will have a large negative impact on existing residents.
- The character and environment of areas such as Winchmore Hill amongst others will be irreparably damaged by new high density housing developments.
- The green belt within Enfield should be preserved.
