

Save our and protect our green belt

---

I am absolutely horrified that there are plans to build across the beautiful green belt land we have around the Crews Hill/Enfield area. Given the global events in 2021 indicating major climate change, I am stunned that Enfield council is pushing for these monstrous developments which will destroy natural habitats and eco-systems.

Think about our children and future generations to come and please consider the impact all these developments will have on our beautiful planet.

I urge you to reconsider these development proposals and save our green belt land.
