

---

I wish to object to the plan to develop the cemetery on Firs Farm wetland. The loss of a local green space within walking distance will force people to have to drive to the next nearest area. This would especially affect elderly and disabled residents and increase car usage on local roads. The increase in vehicles on the road from potential residents of this development, will increase carbon monoxide levels which will impact locals and especially school children at Highfields school.

This development will lead to the destruction of habitat and woodlands. The site is home to many different species of birds as well as trees. The Wetlands is especially useful for residents who live in the surrounding flats and do not have gardens. The area is used by families and elderly alike, which contributes to the health and wellbeing of all residents of Enfield.
