

Draft Local Plan - Objections

---

Being a resident on The Larches street (N13), I strongly want to oppose Enfield Council's proposed plan that includes turning some of the Firm Farm Wetlands' ground for the burial purpose.

Enfield Council needs to find a site elsewhere as there is already a burial site next to Firs Farm Wetlands. By proposing a new plan, Enfield council would take away fun and playgrounds from kids, our walking / jogging / sports and outdoor natural space. We go to Firm Farm wetlands almost everyday with kids and also with friends and family members. Such greenery and fresh air definitely rejuvenates all of us. By developing on this site, the council is going to add more frustration among the residents. Your development plan will destroy little left wild-life habitat and destroy woodlands.

Enfield council needs to find a site for their project elsewhere or even out of London where there are plenty of such green lands. Why council needs to only develop a new burial site so close to the residential area? Why can't council also provide alternatives like cremation instead of burial? In my opinion, cremation is cheaper, needs no space and is good for the environment too.

What's in it for the council to develop such a plan where land - especially green land / parks - is a rarity? Why can't Enfield Council find site elsewhere?

The council should rather think about adding more recreational things for kids like swings, slides, tree-climbing and also few things for adults to enjoy.

Again, as a resident and a Firs Farm Wetlands fan, lover, I and my entire family strongly oppose this proposal of Enfield Council to take away any part of Firs Farm Wetlands for burial purpose.
