

I am writing to object to the proposed redevelopment of the Sainsbury's supermarket site on Green Lanes - SA32 page 351 - to residential homes and non-residential floor space.

How much more green space is going to be taken away and the facilities the Sainsbury's already provides to the whole Winchmore Hill community especially the elderly and disabled who have easy access, plenty of parking and a bus stop outside with easy access to a pharmacy and opticians.

Equally, is the infra-structure there to support additional demands on the schools, doctors, dentists etc which are already under great pressure. What about the excessive traffic/parking which will exacerbate the already too busy roads some of which created by the council by shutting off of local residential roads to be safer and cleaner - this will obviously go against this policy as people will have to drive farther to do their shopping, creating more fumes and damaging the environment.

If the council continues its over development and over population of local green space there will be no "green and pleasant lands" for future generations.
