

I object to the proposed changes to the Green Lanes Sainbury in Winchmore Hill .

I can see complete chaos and traffic jams from day one let alone sending people further away to do their daily or weekly shop.

Going further away will cause more cars on the road and more pollution, so much for a greener Enfield.

299 new homes will mean stretching services and infrastructure to breaking point.

Where are the new hospitals and schools ?

Please reconsider your decision the impact will be forever, new homes have to be built but consider brown fill sites and look at empty properties all over London.

Alternatives are always available force developers to not sit on land and wait for prices to rise and then build.

Enfield Council has a duty to its residents and tax payers to listen to them because these 299 homes on the current site will not work, it could be a complete disaster.

How does the council propose to deal with anti-social behaviour in these densely populated apartment blocks?

High rise living is not wanted, people should be able to live in traditional homes with gardens.
