

---

I am logging my objections to building a CREMATORIUM in Firs Farm Green Space.

1. I am a local resident and use the field every day to walk my dog, get exercise and get some fresh air
2. I use it to relax and to meet friends
3. I use the fields to play with my grandchildren
4. I use the fields as a cut through.
5. My children have used the fields and now my grandchildren use them to play football and meet their friend.

How can you propose to build a crematorium in the middle of the fields..

1. it would block the open space
2. it would bring lots of traffic into the area. I thought that the council wanted to reduce traffic or is that only for the expensive areas in Enfield.
3. It's not appropriate to have a crematorium in the middle of an area used where children play. For the children's sake and for the dignity of the deceased and their relatives.
4. It is in close proximity to a secondary school, a primary school and a nursery. It is totally inappropriate.
5. It is too close to residence houses.

It would be more appropriate to house the crematorium in the cemetery its self. I have only ever seen a crematorium in a cemetery not in the middle of playing fields.

I hope you will reconsider this ludicrous proposal.
