Cc: Draft local plan - Site SA45- Land between Camlet Way and Crescent West , Hadley Wood
Subject: 09 October 2021 17:40:11
Date:

Dear Enfield Council

I live in the High Barnet and my son goes to school in the area and one the primary reasons of our choice of the area and our well being is the green spaces the area offers. I value all green spaces in areas which protects its special character and I love that I can go for walks and enjoy fresh air in the area where I live. I therefore OBJECT to proposed site allocation which would allow development of 160 homes in the captioned green belt land. I think there are some very strong reasons to protect this Green belt, some of these are listed below:

- 1) to protect the air quality in the area, biodiversity and is directly in contradiction to climate change policies.
- 2) to protect flooding risk and balance in he area apart from protecting the heritage of the area.
- 3) to protect high quality green belt's destruction for construction which can be done on other brown sites
- 4) to avoid traffic congestion and prevent open space for walking, cycling and community activity in the area
- 5) to avoid further damage to ecological balance of the area . This is a sensitive area and construction here could severely increase flooding risk in the area and impact surface water levels

Please can you remove this proposed site from next edition of local plan and retain the green belt status of the land.

Regards
