

Support to SA32, Sainsburys Green Lanes N21 3RS.

---

I am emailing to put forward my support for the development of this site. I feel that it would provide a huge number of houses which are needed to be created in Enfield, without harming the green belt. Whilst still providing 13,000sq foot of retail space which could have a local supermarket. The current car park encourages people to use cars and create pollution and is a big plot which is never full.

It would also encourage people to support and shop at local businesses rather than larger chain supermarkets. It also has good links to roads and amenities already in place, which other sites do not offer.
