

Save our green space

---

Hi,

I wish to register my complaint against Enfield Council's decision to encroach on the green areas and build a cremation in the heart of Palmers Green Wetlands Area.

This area is the habitat of so much wildlife that brings such a joy to the local residents. The peace and tranquillity that you get walking around the park watching the beautiful old trees and the lake with all the ducks and geese is beyond any words. The effect this has on the regular park users like me can only be understood by my fellow nature lovers.

If the officers who make the decisions spend at least a few days taking a stroll around the park will understand our dismay and disappointment at this decision.

I wish to express my strong sadness this brings to all of us who live around the Wetlands area and would say plead for you to reverse this decision.
