

---

I have been made aware of Firs Farm Wetland being earmarked as a site for potential crematorium development. We are against this for the following reasons

- Destruction of valuable green space where our kids cycle and play which helps our health and wellbeing
- Proximity of site to Houses and School
- Loss of local people from the area if you trash what makes Winchmore Hill unique and different
- The sneaky way you seek to get planning through without proper consultation

Look forward to your feedback on this
