

Save our green belt

I've lived In Hadley Wood for a few years now and the reason I chose to live here was because of the big open spaces and being mostly surrounded by green belt. Building house's on this land surely breaches national policies and Enfield own climate change action plan.

Hadley wood doesn't have the best transport links either so the increase in cars and pollution will be huge. The traffic in Cockfosters road is very heavy all day everyday and this will only make things worse.

I didn't spend all this money to live in a beautiful area with lots of green spaces only for it to be taken away from me and my young family because the council need to build more houses. Quite honestly build them somewhere else and not on our green belt.
