

---

I have lived in Southgate for over 30 years and one of the reasons was the green and pleasant land. What is outrageous now is Enfield council think they can get all this redevelopment through without even telling people who live in Enfield. I have heard nothing from the council about it.....why? They think they can sneak it through as normal with the council!!

If the redevelopment goes through, as usual the council have no plans to improve the infrastructure, the roads, the doctors, hospitals, the schools, the drainage, everything which is part and parcel to developing new homes! Everything is already at breaking point.

We are still fighting the new road changes which cause hideous traffic all around Southgate and the increase of carbon emissions....this new development will just make it much worse. How can the council be so silly when on one hand they think they are improving things and on the other hand they are trying to suggest this major removal of a huge chunk of green belt, plus build loads more houses , more traffic more people, more everything. It is an outrageous proposal.

The Sainsbury redevelopment is even more ridiculous, it is the only big supermarket in the area. This will make it difficult for many people to go elsewhere for there food. Plus building more homes in an already area that is over populated. Green Lanes itself is a nightmare now...this will make it an even more hideous, a total disaster.

The removal of the golf courses is even more sad, and dangerous, they tell us we should be exercising more to stop diabetes and the like and they are taking away things that would give people opportunities to do this exercise. They are removing areas for birds and animals to live breed in a lovely habitat. All these areas are good for our well being.....and you are suggesting you build more homes in areas that are overpopulated already!!

Why are they suggesting so many areas , all the areas on the full list are places that make Enfield a pleasant place to live....all the houses will overpopulate and cause the area to go down hill in so many ways. Golf courses to go, farms to go , parks to go....etc etc. Disaster from every point of view. Except the fat cats making money of course, with no worry for the people living in the areas now.

As I said I have lived in Southgate over 30 years and everything is going down hill faster than I could ever believe. I think it is all based on money so why do we need to make the folk already rich, even richer!! Whilst ruining the total area.

Please do not allow all these changes through, surely there can be a compromise. I hope the council will sit back and think what a disaster this whole plan is.
