

Draft local plan - site SA45 - between Camlet Wat and Crescent west

---

I have lived in Hadley Wood since 1985 . reason we chose to move here was character of the place, open space , good schools and excellent rail connection to the city.

Over 36 years I have seen crime with congestion because of increased housing with presser on all sorts on community services.

We can talk about major issues every one will write to you about effect of such constructions on climate , local wild life , health and well being of people who live here.

I would object to such plans for further construction in remaining local areas of green belt . I also appreciate that council has the responsibilities for creating new housing accommodations .
