

Objection to SA32 Sainsbury's. Green Lanes

---

Object to the above because. Loss of major supermarket forcing people to travel further afield for shopping. Not enough doctors, (can't get an appointment at the moment. Let alone more potential patients coming to the area). Not enough hospitals, schools and all other amenities now in the area, so what will this be like with a potential 1000 more people being housed on this site. Enfield Council are intent on ruining a once pleasant area. When is this all going to end and what notice is taken from the long standing residence whose voices are not heard. It appears that no real thought is applied when these ridiculous plans are implemented. I would suggest that this does not affect any of the planning committee as they probably live no where near these irresponsible plans. There will be more cars contesting the already busy roads, more people wanting the very shopping facility you are taking away. Why oh why are you not controlling the amount of persons you are allowing to come into the area to reside. Whilst the laws of immigration remain as they are, we will never catch up with the demand on housing. The population density in this Winchmore Hill area is becoming excessive. There is already another development impending in Bush Hill which for all the reasons I have written above will spoil the appeal of the area. PLEASE, PLEASE sometimes listen to the long standing residence who understand the history in this area and strive to keep it a pleasant place to live. Whilst all these so called improvements are going on, give a thought to us who are trying to avoid the disruptions that are caused. Is there any reduction in rates etc. For the down grading of the area. All our infer structure is overloaded.
