

Objection to building a crematorium on Firs Farm Wetlands and green space.

---

I am objecting to Enfield Council proposal to building a Crematorium on Firs farm Wetlands and green space.

The Wetlands have transformed the local area and are a haven for our local wildlife . I enjoy cycling on the paths in a safe environment , to exercise and enjoy the scenery, wildlife and fresh air . It is a beautiful place and very therapeutic for me , since suffering a stroke 2 years ago. It is also educational for local children who can get close up to the ducks , birds and butterflies , as well as a variety of plants that are thriving in this beautiful habitat.

The fields next to the Wetlands are also an essential green space for local residents to exercise their dogs and themselves, for children and adults to play football , cycle on the paths and play tennis .

The Wetlands and green space must be preserved for the wellbeing of local residents and visitors alike, as well as the wildlife and plants that inhabit this beautiful and essential space.
