

I am writing to object to the proposed plan as stated above.

As a resident in Orpington Road, the proposed plan is to a and affects the rear garden boundary line.

Reasons for objection:

Loss of large supermarket serving the immediate community, whom many are elderly and rely on walking.

The preservation of the green land as stated by the Secretary of State in 1989 upon purchase by Sainsbury's.

Infrastructure of such dwellings not in line with period residents properties. N21 is a green, leafy suburb which does not require excessive infrastructure.

Current bottle neck of traffic due to Green Lanes, bus and cycles lanes, parking bays, Compton road and corner of Orpington road. Increased levels of traffic along quiet side roads.

Noise levels of such vast amount of dwellings proposed.

Inadequate levels of public services to meet current demands; schools, dentist, doctors, hospitals, transport.

Enfield's housing crisis will not be solved by selling luxury properties to which most will be purchased by investors out side of the community. N21 real estate per sq ft is exuberant. Families in need will not be able to even consider a purchase.

Increase risk of dense population issues: crime, lack of policing.

Pollution and electrical radiation due to excessive flats in one area.

Years of inconvenience during development and construction. Noise, traffic, blocked roads.

Disturbing and destroying the established wildlife and fauna.

I appreciate these views be taken into consideration alongside many other objections submitted within the community.
